U.S. Coin Auction #1187

Submit Your Bids By Fax | FAX HOTLINE: 214-409-1425

ALL INFORMATION MUST BE COMPLETED AND FORM SIGNED

NAME _____ CLIENT # (if known) _____ BIDDER # _____
ADDRESS _____ E-MAIL ADDRESS _____
CITY/STATE/ZIP _____ CELL PHONE _____
DAYTIME PHONE (_____) _____ EVENING PHONE (_____) _____

Would you like a FAX or e-mail confirming receipt of your bids? If so, please
print your FAX # _____

or e-mail address here: _____

I would like to limit my bidding to a total of \$ _____

at the hammer amount for all lots listed on this bid sheet. I am aware
that by utilizing the Budget Bidding feature all bids on this sheet will be
affected. If I intend to have regular bidding on other lots I will need to
use a separate bid sheet.

Payment by check may result in your property not being released until
purchase funds clear our bank. Checks must be drawn on a U.S. bank.
(Bid in whole dollar amounts only.)

All bids are subject to the applicable Buyer's Premium. See HA.com for details.

Non-Internet bids (including but not limited to, podium, fax, phone and mail
bids) may be submitted at any time and are treated similar to floor bids. These
types of bids must be on-increment or at a half increment (called a cut bid). Any
podium, fax, phone or mail bids that do not conform to a full or half increment
will be rounded up or down to the nearest full or half increment and will be
considered your high bid.

Current Bid	Bid Increment	\$5,000 - \$9,999	\$500
< - \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$29	\$2	\$20,000 - \$29,999	\$2,000
\$30 - \$49	\$3	\$30,000 - \$49,999	\$2,500
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$299	\$20	\$200,000 - \$299,999	\$20,000
\$300 - \$499	\$25	\$300,000 - \$499,999	\$25,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000

7 easy ways to bid

1 Bid By Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 Bid By e-Mail

You can also e-mail your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Bid By Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 Bid In Person

Come to the auction and view the lots in person and bid live on the floor.

5 Bid By FAX

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 3:00 p.m. CT the day prior to the auction date.

6 Bid Live By Phone

Call 1-800-872-6467 Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Bid Live using Heritage Live!™

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default

HERITAGE AUCTIONS

Dear Bidder:

Welcome to Summer FUN! With more than 2100 Floor Session lots consigned by over 150 clients, this is a compact but heavy-hitting auction with a sizable Premier Session that concentrates the highest-value lots into one exciting evening. The sheer variety of Premier Session lots is remarkable. A few highlights:

- Important early Federal coins, including a 1793 Sheldon-9 Wreath cent, Vine and Bars Edge, AU55 PCGS; a 1796 JR-6 dime, MS63 PCGS; and an 1824/1 BD-1 quarter eagle, MS61 PCGS.
- Rare pre-1858 proof coins such as an 1849 quarter, PR65 PCGS, CAC; an 1856 quarter, PR65 PCGS; an 1848 half dollar, PR65 PCGS, CAC; and an 1854 three dollar, PR63 Cameo PCGS.
- Survivors of mass-melted 20th century gold issues, chief among them a 1921 double eagle, MS61 NGC.
- Historic private and territorial gold coins, most notably a seldom-seen 1849 Mormon quarter eagle, AU55 PCGS.

Our Non-Floor Sessions also deserve mention. In addition to selected lots from The Teich Family Collection, the Non-Floor Sessions begin with The Parcfeld Collection, an extensive group including many certified VAM Morgan dollar varieties, among others. Collectors seeking rare varieties that are labeled as such on their certified holders will find plenty of worthwhile lots up for bid.

As always, the seven ways to participate in Heritage's auction are available to you. Pre-auction bids are available through our Web site, HA.com, as well as by mail, fax-and e-mail. On the day of the auction, you can join us by telephone or through our proprietary system, Heritage LIVE!™, if you cannot be in Florida. If you are in attendance at Summer FUN, we hope you make our live floor auction a part of your convention experience. Remember to visit us on the Bourse and say hello.

Happy bidding!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice President

COLONIALS

1652 Small Planchet Pine Tree Shilling, AU50
Noe-16, Early Die State

- 3001 1652 Pine Tree Shilling, Small Planchet AU50 PCGS. CAC. Noe-16, W-835, Salmon 2-B, R.2. 67.29 gn. A relatively early die state without the often-seen break that joins the two lowest left branches. All legends are fully intact on this partly lustrous Small Planchet shilling. The centering is good though the outer beaded circle is incomplete on the right-side obverse and lower reverse borders. The sea-green surfaces are unmarked and exhibit impressive eye appeal. Listed on page 39 of the 2014 *Guide Book*. Population: 9 in 50, 20 finer (6/13). PCGS# 24

1787 Fugio Cent, AU50
Newman 1-B, Cross After Date

- 3002 1787 Fugio Cent, UNITED STATES, No Cinquefoils AU50 PCGS. CAC. Newman 1-B, R.5. The Cross After Date obverse, and one of four varieties of this obverse style. This heavily clashed specimen has medium tan surfaces with a few minuscule toning spots on each side. A pleasing example for the colonial type collector. Listed on page 87 of the 2014 *Guide Book*.
Ex: *Bowers and Merena* (7/1997), lot 1092. PCGS# 880

1787 Auctori Plebis Token, AU58
The Finest PCGS Has Certified

- 3003 1787 Auctori Plebis Token AU58 PCGS. CAC. Breen-1147, W-8770, R.3. This is the usual late die state with a die crack in the upper reverse field. The Auctori Plebis tokens resemble Connecticut coppers, especially on the obverse, although they were struck in England. High grade survivors are extremely rare, and this near-Mint specimen is the single finest example that PCGS has certified and one of just two dozen they have certified in all AU grades (5/13). The olive and chocolate-brown surfaces show considerable luster with minimal marks. Listed on page 74 of the 2014 *Guide Book*. PCGS# 601

1787 Immunis Columbia Copper, AU58
W-5680, Eagle Reverse

- 3004 1787 Immunis Columbia Piece, Eagle Reverse AU58 PCGS. CAC. W-5680, High R.4. This late-Federation era copper has sometimes been called a pattern, and is labeled as such on the PCGS holder. The *Guide Book* states that this variety is "believed to be a prototype for federal coinage." It is also the only collectible issue of the Immune or Immunis Columbia coinage, and is highly sought as such. It is thought that these pieces were struck at the Rahway Mills private mint in New Jersey in the late 1780s, perhaps 1788 or 1789. This near-Mint specimen is a splendid example with bluish-brown patina and nearly full cartwheel luster. Although exhibiting scattered marks, the surfaces are surprisingly well preserved for the age and grade. Listed on page 55 of the 2014 *Guide Book*. PCGS# 841

**1795 Fuld-1 Talbot, Allum & Lee Cent
PR65 Red and Brown**

- 3005** 1795 Talbot, Allum & Lee Cent PR65 Red and Brown PCGS. CAC. Fuld-1, W-8620. The 1795 Talbot, Allum & Lee Cents are common in Mint State and circulated grades. However, proof examples are a different matter. Mint State pieces outnumber proofs by about 10 to one, per the PCGS Population Report (5/13), about five to one based on our Auction Archives record of appearances. This Gem has fully mirrored fields with light orange mint color around the peripheries and wisps of blue overtones on the light brown central areas. Population: 3 in 65 Red and Brown, 1 finer (5/13). Listed on page 76 of the 2014 *Guide Book*. PCGS# 90641

**1791 Small Eagle Cent, MS65+ Brown
Popular Washington Colonial, Baker-16**

- 3006** 1791 Washington Small Eagle Cent MS65+ Brown PCGS. CAC. Baker-16, W-10630, R.3. This stunning Gem has satin luster with reflective olive-brown and pale blue surfaces that show hints of deep orange mint color. Although a few trivial marks prevent a higher grade, this is an incredible early copper piece with wonderful eye appeal. Population: 8 in 65 (2 in 65+) Brown, 4 finer (5/13). Listed on page 81 of the 2014 *Guide Book*. PCGS# 705

HALF CENTS

**1793 C-4, B-4 Half Cent, AU50
Last of Four Varieties Minted in 1793**

- 3007** 1793 AU50 NGC. C-4, B-4, R.3. Manley Die State 2.0 with a sharp vertical projection from the top center of the 7. The reverse die is perfect as always on this variety. Four 1793 half cent varieties are known, and the Cohen and Breen variety sequences properly identify the order of production. The Cohen-4, Breen-4 die marriage offered here was the last of the four varieties produced in 1793. Glossy olive-brown surfaces exhibit minimal circulation marks that are consistent with the grade. Minor scratches and delicate surface smoothing lines are also evident. Our EAC grade VF30. NGC ID# 2222, PCGS# 1000
-

**1794 C-9, B-9 Half Cent, AU55
Rare Early Die State**

- 3008** 1794 AU55 PCGS. C-9, B-9, R.2. Manley Die State 1.0. Although clash marks are evident with a faint die crack through the tops of LIBERTY, this is the rare early die state for C-9 with no evidence of a die crack from the border at 9:30 through the cap. This example is finer than the Cohen Collection coin and finer than the Manley plate coin for the early die state. Glossy light tan surfaces show a darker toning spot at the junction of the cap and upper hair strands with scattered light handling marks and faint hairlines. A pleasing specimen for the specialist. Our EAC grade XF40. NGC ID# 2223, PCGS# 1003

1795 C-6a, B-6a Half Cent, XF45

- 3009** 1795 Plain Edge XF45 PCGS. C-6a, B-6a, R.2. No evidence of undertype appears on either side of this pleasing half cent type coin. The PCGS holder prevents determination of the die state, although this piece appears to be an early state. The surfaces have a few faint, old scratches and minor handling marks, but the overall eye appeal is strong. Both sides are steel-brown with faint blue and olive-tan patina. Our EAC grade VF30. NGC ID# 2225, PCGS# 1018

**1802/0 C-2, B-2 Half Cent, Fine 12
Reverse of 1802**

- 3010** 1802/0 Reverse of 1802 Fine 12 PCGS. C-2, B-2, R.3. The New Reverse or Reverse of 1802 is the only obtainable variety of 1802 half cents due to the rarity of the Old Reverse variety, also known as the Reverse of 1800. The devices of this example are well worn with reddish-tan color, while the fields are dark steel and olive with traces of roughness. Overall, much nicer than usual for the date and variety. Our EAC grade VG10. NGC ID# 222D, PCGS# 1057

**1803 C-3, B-3 Half Cent, MS63 Brown
'Cross-Eyed Zeros' Reverse**

- 3011** 1803 MS63 Brown NGC. C-3, B-3, R.2. Manley Die State 3.0. The prominent die bulge of this die state is diagnostic for the variety, although it is not present on the rare earlier die states. This example shows heavy clash marks at the throat with die file lines in the field, especially from the B to the hair, and from the Y to the nose. The reverse has a curved crack from the second T in STATES to the top left leaf and the F in HALF. The right branch of the wreath is weakly defined as usual in the later die states. This splendid specimen has smooth olive-brown surfaces with a reddish-olive appearance on the reverse. A delightful example. Our EAC grade AU55. NGC ID# 222E, PCGS# 1060

Choice 1804 Plain 4, No Stems Half Cent

- 3012** 1804 Plain 4, No Stems MS64 Brown NGC. C-13, B-10, R.1. A lustrous deep brown near-Gem with occasional steel-gray tints on the reverse field. Sharply struck throughout the majority of the devices, while the dentils are generally indistinct, as usual for the variety. Refreshingly void of marks or spots. Our EAC grade MS60. Census: 36 in 64 (1 in 64+) Brown, 7 finer (5/13). Ex: FUN Signature (Heritage, 1/2007), lot 304. NGC ID# 222F, PCGS# 1063

1804 C-11, B-12 Half Cent, AU55
Plain 4, With Stems

- 3013** 1804 Plain 4, Stems AU55 NGC. C-11, B-12, R.3. This variety is difficult to locate above VF, although it is relatively available in well-worn condition. This medium steel-brown example has a few ticks near the forehead, and minor build-up on the left central wreath. The wreath ribbon is soft, as usual. Our EAC grade VF30. NGC ID# 222F, PCGS# 1066

1804 C-12, B-11 Half Cent, MS64 Brown
Crosslet 4, No Stems

- 3014** 1804 Crosslet 4, No Stems MS64 Brown PCGS. C-12, B-11, R.2. Manley records a single die state for the variety, and this piece appears to be a late stage with heavy clash marks below the hair ribbon and die roughness in the left obverse field. Both sides exhibit full cartwheel luster with frosty mint surfaces. The obverse is dark chocolate while the reverse is mostly light tan with a splash of greenish-steel toning at the upper left. Hints of faded mint red remain on the obverse. Our EAC grade MS60. Population: 8 in 64 Brown, 0 finer (5/13). NGC ID# 222F, PCGS# 1072

1806 C-1, B-3 Half Cent, MS64
Small 6, No Stems
Ex: Jules Reiver

- 3015** 1806 Small 6, No Stems MS64 Brown NGC. C-1, B-3, R.1. Ex: Jules Reiver Collection. While Walter Breen recorded four different die states, Ron Manley included all of these in one die state description. Breen's perfect obverse die apparently does not exist, for the Ruby coin mentioned by him is clearly from a clashed obverse. According to Manley, all examples have the die cracks and rim breaks of Breen's later die states. This example has peripheral weakness in the area of these cracks.

Many examples of this variety, as well as Cohen-4, are known in Mint State. It is these two varieties that comprise the majority of all known Mint State Draped Bust half cents. Aside from the weakness mentioned, this is an exceptional example with fully lustrous light brown surfaces. The left side of the reverse is toned to a darker steel color. Traces of original red mint color remain, especially on the reverse. Our EAC grade AU55.

Ex: Unidentified Ira Reed Sale, lot 238; Harold Bareford; William Bareford (5/25/1984); Jules Reiver Collection (Heritage, 1/2006), lot 19076. NGC ID# 222J, PCGS# 1093

1806 Small 6, With Stems Half Cent
Choice AU, C-2, B-1

- 3016** 1806 Small 6, Stems AU55 NGC. C-2, B-1, R.4. Die State 2.0, which has clash marks (as made) below RT in LIBERTY. The C in CENT is low, E and Y in LIBERTY are widely spaced. Dark mahogany-brown and charcoal-brown patina. A richly detailed and evenly struck specimen, with scattered hints of verdigris adhering to some of the devices, and very few surface blemishes. An attractive example of this scarce variety. Our EAC grade XF40. Ex: Long Beach Signature (Heritage, 1/2004), lot 5024. NGC ID# 222J, PCGS# 1096

**1806 C-4, B-4 Half Cent
MS63 Red and Brown**

- 3017** 1806 Large 6, Stems MS63 Red and Brown PCGS. C-4, B-4, R.1. The repunching is nearly absent on this later die state example. The reverse is rotated about 30 degrees. The large, repunched 6 is merged with the drapery, a diagnostic feature of this variety. The drapery and the upper wreath are weak on this example, as on most survivors. Both sides have pleasing olive-brown surfaces with considerable original orange mint luster. Our EAC grade MS62. Population: 20 in 63 Red and Brown, 3 finer (6/13). NGC ID# 222J, PCGS# 1100

**1806 Half Cent, MS64 Red and Brown
Stems, Large 6, C-4, B-4**

- 3018** 1806 Large 6, Stems MS64 Red and Brown NGC. C-4, B-4, R.1. Manley Die State 1.0, usual for high grade examples. Mint red outlines design elements while the high points and open fields are steel-gray. The coruscating surfaces are generally smooth though the right obverse displays faint marks. Certified in an old pre-hologram holder. Our EAC grade MS60. NGC ID# 222J, PCGS# 1100

**1808 C-3, B-3 Half Cent, MS63 Brown
Only Normal Date Variety**

- 3019** 1808 MS63 Brown PCGS. C-3, B-3, R.1. Manley Die State 3.0. The plentiful Normal Date variety is limited to a single die marriage. The other two varieties of 1808 are both overdates. The obverse of this Select Mint State specimen has full border dentilation and the reverse retains more than half of its border detail. Full cartwheel luster is present with glossy tan and steel-brown surfaces. A splendid specimen and unusual so fine. Our EAC grade AU55. NGC ID# 26Y2, PCGS# 1107

**1811 C-2, B-2 Half Cent, XF45
Close Date**

- 3020** 1811 XF45 PCGS. C-2, B-2, Low R.3. The Close Date variety. Other than the proof-only 1831 and 1836 issues, the 1811 is the key to the Classic Head half cent series. Generally found with problems, in low grades or both, this piece is a happy exception, and the high bidder will likely be just as happy with the coin. The obverse is medium-brown with deeper color evident near the date and the lower stars, while the reverse is a more uniform deep brown. A high degree of detail is evident under light wear; indeed, the reverse is especially attractive for the grade. A coin for the Half Cent specialist or the date collector intent on completing a high grade set. Our EAC grade VF25. NGC ID# 222S, PCGS# 1135

1835 C-1, B-1 Half Cent, MS65 Red and Brown

- 3021** 1835 MS65 Red and Brown PCGS. C-1, B-1, R.1. Manley Die State 2.0, the later of two die states listed, with prominent clash marks at the face and throat. Both die states are plentiful. This Gem has predominately bluish-brown surfaces with full cartwheel luster and traces of orange mint luster. Our EAC grade MS63. NGC ID# 2233, PCGS# 1169

PROOF BRAIDED HAIR HALF CENT

**1852 Coronet Half Cent
First Restrike, B-2, PR64 Brown**

- 3022** 1852 Restrike, Small Berries PR64 Brown PCGS. B-2, R.5. Both sides are richly and originally toned in medium brown shades with hints of reddish-brown color in a few areas on the obverse. The obverse and reverse are sharply detailed, and the smooth surfaces are expectantly distraction-free for the Choice grade level. Perhaps 40-50 1852 B-2 half cents are believed extant, virtually all of which are Series I strikings. Our EAC grade PR60. Ex: Long Beach Signature (Heritage, 9/2002), lot 5104. NGC ID# 26ZT, PCGS# 1317

LARGE CENTS

1793 AMERI. Cent, S-1
AG3, First Mint Issue

- 3023** 1793 Chain AMERI. AG3 PCGS. S-1, B-1, R.4. The Sheldon-1 AMERI. cent was the first issue produced by the fledgling Philadelphia Mint, though 1792 patterns were previously struck in John Harper's workshop under Federal authority. Though four other Chain cent varieties were eventually coined, only S-1 abbreviates AMERICA, presumably for aesthetic reasons. The present medium brown example is surprisingly free from verdigris and has bold detail on the central reverse. The date is difficult to discern but LIBERTY and UNITED STATES OF AMERI are readable. The lower left obverse rim has a couple of minor dings. Our EAC grade Fair 2. NGC ID# 223G, PCGS# 1340

1793 Chain AMERI. Cent, Fine 12
S-1, B-1

- 3024** 1793 Chain AMERI. Fine 12 PCGS. S-1, B-1, R.4. A true hand-crafted cent produced at a time when every Mint process was performed by hand or horse. There was no mechanization in the early days of the first Mint. This dark steel-brown specimen has slightly lighter brown devices with microscopic surface roughness and trivial marks. All of the details are worn but complete. This is an important piece for specialists. Our EAC grade VG8. NGC ID# 223G, PCGS# 1340

1793 Chain Cent, VF Details
AMERICA, S-3

- 3025** 1793 Chain AMERICA — Corroded — NCS. VF Details. S-3, B-4, Low R.3. Much sharper than the typical Chain cent, the present deep brown representative is devoid of scratches or rim dings. The surfaces are granular, especially on the lower left obverse, though all legends are bold, as is the chain and Liberty's profile. Our EAC grade VG8. NGC ID# 223F, PCGS# 1341

1793 Wreath Cent, VF25
The S-6 'Sprung Die' Variety

- 3026** 1793 Wreath Cent, Vine and Bars VF25 PCGS. S-6, B-7, R.3. Most of the Wreath cents were delivered from the chief coiner to the Mint treasurer in April 1793. Walter Breen suggested that this variety was part of the 12,000 pieces coined from April 4 through 9, and delivered on the latter day. April 9 was a cloudy day in Philadelphia, with a temperature of 55 degrees at 7 AM and 71 degrees at 2 PM, according to the daily weather log kept by David Rittenhouse. This early die state piece shows a bulge in the left obverse field that has not progressed across the entire die. Both sides show deep greenish-steel patina with slightly rough surfaces that still retain considerable eye appeal. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 1347

1793 S-9, B-12 Wreath Cent, AU55
Vine and Bars Edge

3027 1793 Wreath Cent, Vine and Bars AU55 PCGS. S-9, B-12, R.2. The Horizontal Stem on the obverse and the kidney-shaped ribbon bow on the reverse are diagnostic of this plentiful variety, the most common die marriage of the Wreath cent design. The total mintage of all Wreath cent varieties was 63,353 coins, mostly produced in April, with a few pieces struck three months later in July 1793. Mint researcher R.W. Julian notes that the supply of copper planchets was exhausted at the same time that the Mint's rolling mills broke. A new supply of copper blanks was delayed until the rolling mills were repaired.

Studying rarity ratings of all 1793 Wreath cent varieties shows a total population of 2,200 to 2,900 survivors for all varieties, including 750 to 1,000 examples of S-9, or about one-third the total population. That data suggests that about one-third of the Wreath cent mintage was from this die pair, or about 21,000 cents. In his *Large Cent Encyclopedia*, Walter Breen conveniently determined that all coins struck in July were examples of S-11 (a, b, and c), and that the cents struck in April were S-5 through S-10, along with the NC varieties. Although his accounting is likely inaccurate, it seems reasonable that the S-9 cents were struck in mid-April 1793.

This early die state specimen appears to have faint die cracks on Liberty's face and temple, although no evidence of any reverse die cracks may be found. The surfaces are olive-brown and tan with a few handling marks and planchet fissures. Overall, this is an attractive specimen with excellent eye appeal. Our EAC grade XF40. NGC ID# 223H, PCGS# 1347

1794 S-28, B-10 Cent, XF40
Early Die State

- 3028** 1794 Head of 1794 XF40 PCGS. S-28, B-10, R.2. Breen Die State II. Housed in a green-label PCGS holder, this early die state specimen has no evidence of obverse die cracks, although minor clash marks are visible. The dark olive-brown surfaces have splashes of steel toning on both sides, with traces of corrosion. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374

1794 'Mounds Reverse' Cent, Choice AU

- 3029** 1794 Head of 1794 AU55 PCGS. S-22, B-6, R.1. Late dies from the well known "Mounds Reverse" variety, identified by the die sinking on the upper right portion of the wreath. Flowlined fields and clashed dies (all as made) further confirm the late die state. This is a pleasing medium brown representative with excellent sharpness and ample remaining luster. The unmarked surfaces further assure the eye appeal. Our EAC grade XF40. Ex: FUN Signature (Heritage, 1/2007), lot 354. NGC ID# 223P, PCGS# 901374

1795 Cent, AU50
S-76b, Plain Edge

- 3030** 1795 Plain Edge AU50 PCGS. S-76b, B-4b, R.1. ONE CENT is entered too high within the wreath, characteristic of this Liberty Cap type variety. Broad, tall leaves on each side of the ribbon loops narrow the wreath interior and force the ungainly placement of the denomination. This walnut-brown cent has pleasing color and sharpness. Small ticks on the bust tip and the reverse rim at 6:30 merit only passing mention. Our EAC grade XF40. NGC ID# 223T, PCGS# 1380

1795 Plain Edge Cent, MS62 Brown
S-78, Ex: Husak Collection

- 3031** 1795 Plain Edge MS62 Brown PCGS. S-78, B-8, R.1. Ex: Husak Collection. Several sets of weak clash marks are visible. Breen suggests that all clash marks are gone and the dies are polished, giving the surfaces a prooflike appearance that is seen here. Either the dies re clashed, or the die polishing procedure did not remove them entirely. Minor die buckling is visible in the right obverse field. The date and LIBERTY are closely spaced. ONE CENT is centered in the wreath and widely separated. The obverse appears on S-78. The reverse appears on S-78. The surfaces are glossy and retain nearly full cartwheel luster with slight reflectivity in the fields. Both sides have numerous tiny prestrike planchet nicks, and only a few other blemishes. Pleasing tan color with splashes of darker brown and minor reddish stains. Sheldon-78 is a common variety that is usually available in all grades, although Mint State coins can be elusive. According to Breen, reverse F (S-78) is "a Gardner die copying reverse C." Reverse C is found on S-76b. If Breen is correct, Gardner's talents were poorly utilized copying the work of others. Our EAC grade AU55. Ex: M.A. Brown (Chapman Brothers, 4/1897), lot 764; Ed. Frossard; Allison Jackman (Henry Chapman, 6/1918), lot 704; S.H. Chapman; later, Frank H. Masters, Jr. (RARCOA, 5/1971), lot 88; Milton Bentley; Stack's (3/1986), lot 1017, \$3,520; Anthony Terranova; Herman Halpern; Denis W. Loring (5/1986); Robinson S. Brown, Jr. (Superior, 1/1996), lot 111, \$7,975; The obverse and reverse are illustrated in Noyes (2007); Husak Collection (Heritage, 2/2008), lot 2081, where it brought \$16,100. NGC ID# 223T, PCGS# 1380

**1796 Liberty Cap Cent, VF35
S-84, Better Date**

- 3032** 1796 Liberty Cap VF35 PCGS. CAC. S-84, B-5, R.3. This medium brown Choice VF cent is smooth aside from a small obverse mark near 2:30. No carbon is present except for a small spot above the left ribbon end. 46 die varieties are known for 1796 cents but all are R.3 or rarer. Thus 1796 is a better Liberty Cap date since the S-76b and S-78 1795 cents are R.1. Our EAC grade VF30. NGC ID# 223V, PCGS# 1392

**1796 Liberty Cap Cent, XF45
Elusive S-88 Variety**

- 3033** 1796 Liberty Cap XF45 NGC. S-88, B-9, R.4. A scarce Sheldon variety of this better Liberty Cap date. The hair near the ear shows moderate wear but the remainder of the design is sharp. The blended tan-brown and gunmetal surfaces are impressively free from abrasions, though minor granularity is noted beneath the I in LIBERTY. Our EAC grade VF30. NGC ID# 223V, PCGS# 1392

**1798 Cent, AU58
S-184, Second Hair Style**

- 3034** 1798 Second Hair Style AU58 NGC. S-184, B-45, R.1. An exquisite Borderline Uncirculated example with plentiful luster throughout the curls, legends, and wreath. Mahogany and steel-blue shades endow smooth surfaces. The reverse is clashed but the dies are otherwise perfect. Certified in a former generation holder. Our EAC grade AU50. Census: 3 in 58, 1 finer (5/13). NGC ID# 2244, PCGS# 1434

**1799 S-189 Cent, VF25
Key Large Cent Issue**

- 3035** 1799 VF25 PCGS. CAC. S-189, B-3, R.2. Ex: Hesselgesser. The rarity of the 1799 large cent has been understood ever since Joseph Mickley attempted to find one in circulation, representing the year of his birth. It is said that the Mickley episode early in his life was the deciding factor leading to his numismatic pursuits.

While both sides of this splendid example have the usual minor handling marks that are expected on any middle circulated grade large cent, this is a delightful piece that will please even the most advanced collector. A few splashes of dark patina reside on the medium brown surfaces of this example, but it is far more attractive than the usual heavily worn example that so often represents the date in 21st century collections. Our EAC grade VF20. NGC ID# 2246, PCGS# 1443

**1801 Cent, AU55
S-216, Partial Mint Luster**

- 3036** 1801 AU55 NGC. S-216, B-6, R.1. Substantial satin luster graces this lightly circulated Draped Bust cent. Marks are limited to a few minor abrasions on the right obverse. The reverse is clashed but the dies are otherwise perfect. The 1801 is plentiful in Good and VG but Choice AU examples are rare. Our EAC grade XF40. NGC ID# 224B, PCGS# 1458

- 3037** 1803 Small Date, Small Fraction AU50 NGC. S-255, B-14, R.1. Ex: Jules Reiver Collection. A delightful ebony-brown representative that shows slight wear on the curls but is far sharper than the usual example. No marks are remotely consequential, though the lower reverse field is mildly granular. Our EAC grade VF35. Ex: Bruno Crossfield, 12/1956; Willard C. Blaisdell, 2/1971; Jules Reiver Collection (Heritage, 1/2006), lot 19572, which realized \$1,035. Reiver's envelope accompanies the lot. NGC ID# 224G, PCGS# 1482

**1803 Cent, AU53, S-265
Rare Large Date, Large Fraction
Ex: Newcomb Collection**

- 3038** 1803 Large Date, Large Fraction AU53 NGC. S-265, B-23, R.4. The very scarce S-265 is the sole die variety for the Large Date, Large Fraction combination. A lightly circulated and pleasing deep mahogany-brown example. The key portion of the incomplete but lengthy pedigree listing for the present lot was compiled by Dr. Wallace Lee for its 2003 Superior auction appearance, where it was noted that "careful examination reveals a smoothed nick in the field over the bust tip and a repaired rim bruise under the 3." Our EAC grade VF20. Ex: Howard R. Newcomb Collection, Part I (J.C. Morgenthau and Co., 2/1945), lot 453; Leon Hendrickson; Jonathan Kern; Tom Caldwell; Lillian Willins; Michael Kramer; Massachusetts Historical Society (Bowers & Merena, 11/1994), lot 2059; Michael Kramer; Orlando FUN Signature (Heritage, 1/1996), lot 5020; Dr. Wallace Lee Collection (Superior, 5/2003), lot 532; Illinois Numismatic Association Show, (9/2004); Drew St. John (A.N.R., 6/2005); Palm Beach Signature (Heritage, 3/2006), lot 88, which realized \$4,887.50. NGC ID# 224G, PCGS# 1501

**1804 S-266c, B-1 Cent, Fine 15
Late Die State**

- 3039** 1804 Fine 15 PCGS. S-266c, B-1, R.2. Heavy rim breaks appear on both sides of this late die state large cent key. The 1804 is the second rarest large cent date following 1799, although the 1793 Liberty Cap cents are also rarer as a group. The obverse is olive and dark chocolate-brown while the reverse is lighter olive and chestnut-brown. Scattered circulation marks are consistent with the grade of this piece that shows no serious flaws. Our EAC grade VG10. NGC ID# 224H, PCGS# 1504

**Key 1804 Cent, VF30
S-266c, Late Die State**

- 3040** 1804 VF30 NGC. S-266c, B-1, R.2. The final major die state for the sole die variety of the key Draped Bust date. Cuds loom over portions of LIBERTY and AMERICA. This dark brown cent displays pleasing sharpness. Although small abrasions are scattered, none merit individual mention save for a brief thin diagonal line on the cheek. Our EAC grade Fine 15. NGC ID# 224H, PCGS# 1504

**1805 Cent, MS61 Brown, S-267
Rare in Uncirculated Grades**

- 3041** 1805 MS61 Brown NGC. S-267, B-1, R.1. A coruscating golden-brown representative. Crisply struck at the centers but the upper reverse legends are incompletely impressed. The reverse is well preserved although a couple of thin marks are noted on Liberty's neck. Our EAC grade AU55. Census: 7 in 61 Brown, 10 finer (5/13). NGC ID# 224K, PCGS# 1510

**1805 S-269, B-3 Cent, MS62 Brown
Late Die State**

- 3042** 1805 MS62 Brown NGC. S-269, B-3, R.1. Apparently a later die state, with faded die lines from the drapery to the border, weak clash marks left and right of Liberty, and a faint die crack through the bases of 180. However, there is no apparent evidence of the die bulge that reportedly develops prior to the die crack. This lustrous olive-brown example has splashes of steel patina, with weakness at the forehead and on the leaves. Our EAC grade XF45. NGC ID# 224K, PCGS# 1510

**1806 Cent, AU58
S-270, Only Dies**

- 3043** 1806 AU58 NGC. S-270, B-1, R.1. Ex: Jules Reiver Collection. The sole dies for the date. Considerable mint gloss and a refreshingly smooth appearance combine to provide exceptional eye appeal. This chocolate-brown near-Mint cent will please even the most jaded collector. Our EAC grade XF40.
Ex: Wattenburger, 10/1968; Jules Reiver Collection (Heritage, 1/2006), lot 19612; Orlando FUN Signature (Heritage, 1/2007), lot 390. NGC ID# 224L, PCGS# 1513

**1810/09 Cent, S-281
MS61 Brown
Rare in Mint State**

- 3044** 1810/09 MS61 Brown NGC. S-281, B-1, R.1. An incontestable overdate with the complete outline of a 0 around the second 1 in the date and the knob of a 9 beneath the final digit. This deeply toned example has cartwheel luster and a mark-free reverse. The left obverse displays scattered tiny ticks. Our EAC grade AU50. Census: 1 in 61 Brown, 3 finer (6/13). NGC ID# 224T, PCGS# 1552

**1810 S-282, B-3 Cent, AU58
Early Die State**

- 3045** 1810 AU58 PCGS. CAC. S-282, B-3, R.2. Breen Die State II, with a faint crack joining the inner points of stars 10 and 11. A minute double profile is visible, along with bold doubling on LIB and RTY. Only the E fails to show the doubling. Frosty medium brown surfaces are splashes with darker toning on both sides. The surfaces are remarkably pleasing. Our EAC grade XF45. NGC ID# 224S, PCGS# 1550

**1811 S-287, B-1 Cent, MS63 Brown
Scarce Classic Head Issue**

- 3046** 1811 MS63 Brown PCGS. S-287, B-1, R.2. A short die scratch slants down from star 5 toward the nose on this obverse die. This late die state representative has minor die bulges and clash marks, with narrow rim breaks at the dentils left of stars 2 through 4. A narrow rim break appears outside of star 9 in the latest die state, although imperfect centering fails to show that feature if it was present when this piece was struck. Olive-brown surfaces accompany cartwheel luster on this Select Mint State specimen, with splashes of deep maroon patina on the obverse. Our EAC grade AU50. NGC ID# 224U, PCGS# 1555

**1812 S-289 Cent, AU58
Large Date**

- 3047** 1812 Large Date AU58 PCGS. S-289, B-4, R.1. The T in LIBERTY is strongly repunched on this conditionally rare Sheldon pairing. The present momentarily circulated cent is deep medium brown and has surprisingly few marks. A curved, narrow strike-through near the TE in STATES is of mint origin. Our EAC grade AU50. Population: 5 in 58, 12 finer (6/13). NGC ID# 224W, PCGS# 1564

**1813 S-292, B-2 Cent, AU58
Late Die State**

- 3048** 1813 AU58 NGC. S-292, B-2, R.2. Breen Die State IV. Both dies show strong flow lines and the reverse border dentilation is almost entirely absent although STATES remains separated from the border at the top of the reverse. The strike is imperfectly centered as usual for this variety. Although lightly worn, this near-Mint specimen has mostly sharp details except for the lower right obverse. The dark brown surfaces are pleasing with few imperfections other than scattered handling marks. Trivial marks are evident on Liberty's cheek. Our EAC grade XF45. NGC ID# 224X, PCGS# 1570

**1814 S-294, B-1 Cent, AU58
Crosslet 4**

- 3049** 1814 Crosslet 4 AU58 PCGS. S-294, B-1, R.1. Although the Crosslet 4 and Plain 4 varieties are both rated R.1, the Crosslet 4 is less easily located, and it is especially elusive in higher grades. This example has considerable frosty luster with deep steel toning and sharp details. There is no evidence of clash marks on this early die state specimen. Our EAC grade AU50. NGC ID# 224Y, PCGS# 1573

- 3050** 1819 Small Date MS63 Brown PCGS. CAC. N-9, R.1. The obverse field is mahogany-brown, the reverse field is steel-gray, and the motifs are dark brown. A coruscating cent that boasts unmarked fields and only light, faded contact on Liberty's cheek. Our EAC grade AU50. NGC ID# 2254, PCGS# 1606

**1821 Cent, MS62 Brown
N-2, Lower Mintage Date**

- 3051** 1821 MS62 Brown NGC. N-2, R.1. A lower mintage date omitted from the Randall Hoard. A majority of survivors are in well circulated grades. The present cent is mostly chocolate-brown with hints of gunmetal toning on the obverse. Moderately prooflike and nearly unabraded. The strike is crisp except on the forehead curl. Our EAC grade AU50. NGC ID# 2258, PCGS# 1621

**1823 Cent, XF45
N-2, Key Date**

- 3052** 1823 XF45 PCGS. CAC. N-2, R.2. Just three die varieties for this date, and all have separate Guide Book listings. N-2 is the Normal Date original striking and is scarcer than the N-1 1823/2 overdate. Many collectors omit the N-3 out-of-Mint restrike. This well defined medium brown example has moderate marks above the CE in CENT and a thin line on Liberty's neck. Our EAC grade VF35. Population: 3 in 45, 8 finer (5/13). NGC ID# 225A, PCGS# 1627

**1839/6 N-1 Large Cent, Fine 15
Early Die State**

- 3053** 1839/6 XF40 PCGS. N-1, R.3. This early die state piece has no trace of the obverse die cracks that eventually form after continued coinage production. Both sides are highly attractive with mahogany and steel-brown. Minor evidence of verdigris and surface roughness is evident but has little effect on the eye appeal of this important variety. Our EAC grade VF30. Population: 2 in 40, 3 finer (5/13). NGC ID# 225W, PCGS# 1756

INDIAN CENTS

1877 Indian Cent, MS64 Brown

- 3054 1877 MS64 Brown PCGS. CAC.** Glints of red appear around the device edges on this near-Gem key-date coin, which otherwise shows nice, attractive medium milk-chocolate coloration. One faint gray spot appears below the E in AMERICA and another on the reverse bow ribbon, but there are no mentionable contact marks. A bit of strike softness appears at the upper reverse wreath. A complete Brown set of Indian cents can be both a challenging and rewarding proposition. Population: 26 in 64 Brown, 8 finer (5/13). NGC ID# 2284, PCGS# 2127

- 3055 1878 MS65 Red and Brown PCGS. CAC.** The reflective surfaces of this sharply detailed Gem display an attractive mix of original red and light brown patina, with two minor carbon spots near the C in CENT. Population: 80 in 65 Red and Brown, 3 finer (5/13). NGC ID# 2285, PCGS# 2131

1894 Cent, MS66 Red Conditionally Elusive

- 3056 1894 MS66 Red PCGS.** The 1894 Indian cent saw a large mintage exceeding 16 million pieces, but most either fail the Red test or have too many abrasions (or are outright circulated) to grade nearly as high as this Premium Gem Red example. This recently encapsulated piece shows uniformly brick-red surfaces with effulgent luster and a strike that is close to full, save for a couple of the forward feather tips. A few brown flecks near the rim are neither carbon nor distracting. A Registry Set prize. Population: 26 in 66 (2 in 66+) Red, 0 finer (6/13). NGC ID# 228N, PCGS# 2189

1898 Indian Cent, MS67 Red Among the Finest Certified

- 3057 1898 MS67 Red PCGS. CAC.** The 1898 Indian cent claims a large mintage of 49.8 million pieces, but few survivors can equal the quality of this delightful Superb Gem, and none exceed it. This coin is a close match for the spectacular MS67 Red PCGS coin offered in lot 3129 of our October 2011 Pittsburgh Signature that realized \$26,450. It is certain to inspire spirited competition from date and Registry Set collectors alike. This piece displays well-preserved original red surfaces with vibrant mint luster and terrific eye appeal. The design elements are sharply detailed throughout. Population: 8 in 67 Red, 0 finer (6/13). NGC ID# 228T, PCGS# 2201

PROOF INDIAN CENTS

1862 Indian Cent, PR67 Cameo Underrated Proof Issue

- 3058 1862 PR67 Cameo NGC. CAC.** This glittering Superb Gem Cameo proof has brilliant deep tan surfaces with highly lustrous devices over deeply mirrored fields with exceptional cameo contrast. Cameo and Deep Cameo examples of the copper-nickel small cent series are elusive, regardless of date. Census: 5 in 67 Cameo, 1 finer (6/13). PCGS# 82259

1870 Cent, PR66 Red Shallow N, Iridescent Colors

- 3059 1870 PR66 Red NGC.** Shallow N in ONE. Iridescent fire-red, orange-gold, and sea-green shades provide outstanding eye appeal. The portrait exhibits slight mellowing toward steel-gray. A loupe reveals only a couple of microscopic flecks. Census: 6 in 66 Red, none finer (6/13).
Ex: Robert R. Rollins Collection, Part Two (Heritage, 6/2008), lot 218, which realized \$3,737.50. NGC ID# 229N, PCGS# 2299

LINCOLN CENTS

1909-S VDB Cent, Red Gem A 'Dream Coin' for Many Collectors

- 3060 1909-S VDB MS65 Red PCGS.** A "dream coin" for thousands of collectors, this Red Gem example of the famous 1909-S VDB cent has pale yellow-and-gold interiors with peach at the margins, the band of hue narrow on the obverse but wide on the reverse. Minor carbon is visible on the reverse, but the portrait side displays well. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red Mark-Free and Lustrous

- 3061 1909-S VDB MS65 Red NGC. CAC.** Generally sun-gold with hints of orange-red at the margins. Lustrous and completely mark-free with scattered pinpoint flecks left of the C in CENT. Many 1909-S VDB cents have a full strike, though the present Gem is an exception, as the upper half of the O in ONE is soft. The VDB initials are bold, however, unlike often seen. Encapsulated in an old pre-hologram holder. NGC ID# 22B2, PCGS# 2428

1916-D Cent, MS65 Red Unabraded Pumpkin-Gold Surfaces

- 3062 1916-D MS65 Red PCGS. CAC.** A pumpkin-gold beauty with uncommonly mark-free surfaces. Only the infrequent minute fleck denies technical perfection. The strike is fairly crisp but the dies exhibit wear, especially on UNUM and the outer lines of the wheat ears. Certified in a green label holder. Population: 57 in 65 (3 in 65+) Red, 5 finer (6/13). NGC ID# 22BP, PCGS# 2491

**1920-S Lincoln Cent, MS65 Red
A Registry Collector's Delight**

3063 1920-S MS65 Red PCGS Secure. Surfaces range from copper-gold to orange and reddish-violet, never sliding into the truly cool hues that lead similarly colorful coins to be called Red and Brown or Brown. Luster is luminous with a degree of swirl on the reverse, and while the detail on Lincoln's portrait is characteristically soft, this coin's near-absence of carbon and distracting marks makes for an excellent coin that should appeal to the top tier of Lincoln cent enthusiasts. For the Registry collector, these numbers tell the story: Population: 10 in 65 Red, 0 finer (5/13). NGC ID# 22C5, PCGS# 2530

3064 1922 No D Strong Reverse XF40 NGC. CAC. FS-401. Die Pair 2. TRUST is sharper than the other obverse legends, an important characteristic of this key Lincoln variety. The lines in the wheat ears are bold though the portrait has soft definition. The chocolate-brown surfaces are smooth save for faded marks behind the neck and beneath the M in AMERICA. NGC ID# 22C9, PCGS# 3285

**1922 No D Cent, AU Details
Relatively Well-Defined**

3065 1922 No D Strong Reverse — Environmental Damage — PCGS Genuine. AU Details. FS-401. Die Pair 2. The surfaces are medium brown with just slightly lighter color over the high points. The Environmental Damage listed on the insert covers an area from Lincoln's eyebrow to hairline. It is deeper in color than the surrounding area and slightly noticeable at arm's length. Relatively well-detailed for this scarce issue.

**1922 No D Cent, Choice AU
Strong Reverse, FS-401**

3066 1922 No D Strong Reverse AU55 NGC. CAC. FS-401. Die Pair 2. A lightly circulated but problem-free example of this famous die variety. The wheat ears are bold, as is the date and TRUST. A loupe locates minor marks and a couple of peripheral flecks, but the eye appeal remains impressive. Only a small percentage of certified AU55 examples also possess a CAC seal. NGC ID# 22C9, PCGS# 3285

1923-S Lincoln Cent, MS65 Red
None Finer at PCGS

3067 1923-S MS65 Red PCGS. The 1923-S Lincoln cent boasts a low mintage of 8.7 million pieces and the issue has long been considered a semikey in the series. The 1923-S is definitely a condition rarity at the Gem level, with the Red designation, and few survivors can match the quality of this delightful MS65 example. The original red surfaces of this remarkable specimen show some traces of light brown patina, with minimal signs of contact. The design elements are well-detailed and the pleasing surfaces are brightly lustrous. Housed in a green label holder. Population: 16 in 65 Red, 0 finer (6/13). NGC ID# 22CB, PCGS# 2548

1924-D Lincoln Cent, MS65 Red
Low-Mintage Semikey Issue

3068 1924-D MS65 Red PCGS. The 1924-D Lincoln cent is a low-mintage issue and high-grade examples are seldom encountered. This attractive Gem displays original red surfaces with just a few hints of light brown and lilac. The design elements are well-detailed, much better-than-average for this issue. Mint luster is strong and visual appeal is outstanding. Housed in a green label holder. Population: 38 in 65 (1 in 65+) Red, 1 finer (6/13). NGC ID# 22CD, PCGS# 2554

1944 Steel Cent Error, AU Details
Inverse of the 1943 Bronze Cent

3069 1944 Cent — Struck on a Zinc-Coated Steel Planchet, Improperly Cleaned — NGC. AU Details. The flip side of the famous 1943 bronze cent, the 1944 steel cent was struck in the previous year's alloy. More 1944 steel cents are known than 1943 bronze, in part because the Philadelphia Mint was using leftover steel blanks to strike emergency Belgian coinage, creating more likely conditions for accidental 1944 steel cents. This example has been known to the collecting community for decades. Though cleaned, which gives this piece a hairlined, half-bright look with a touch of blue on pale gray surfaces, it remains an important example of a popular error type. Ex: *The Frontenac Collection* (Bowers and Merena, 11/1991), lot 1663. Flip included.

**1969-S Doubled Die Cent, AU58
Famed and Elusive Rarity**

3070 1969-S Doubled Die Obverse AU58 PCGS. CAC. FS-101. The 1969-S Doubled Die was discovered shortly after its release, yet today specimens remain highly elusive. The bold die doubling in places is nearly as dramatic as that on its cousin, the 1955 Doubled Die, an error coin that is nonetheless far more available. While the digits of the 1955 Doubled Die are more widely separated, the letters near the rim of the 1969-S Doubled Die are separated by nearly a half-letter width at IN GOD WE TRUST. The digits of the date and LIBERTY are also widely doubled, although not in so extreme a fashion as the 1955 Doubled Die.

Interestingly, all of the 1969-S Doubled Die cents were apparently made from a single die pair. This also puts the 1969-S Doubled Die cents in common with the 1955 Doubled Die cents, which are also all struck from a single die pair. But there, the similarities largely end.

While the 1955 Doubled Die is readily obtainable for a price in the lower Mint State grades, Uncirculated examples of the 1969-S Doubled Die are seldom seen. The typical survivor is an AU55, placing this piece in the above-average category. This is an attractive coin with even, reddish-brown coloration on both sides. A tick at the top of Lincoln's hair, one on the beard, and one above the Y in LIBERTY are the only mentionable contact on the obverse. Singular contact is also nearly absent on the reverse, save for a small mark on a column of the Lincoln Memorial. These are minor complaints, however, compared to the overall high quality and excellent eye appeal this coin offers. Population: 12 in 58, 4 finer (5/13). PCGS# 2921

PROOF LINCOLN CENTS

**1937 Lincoln Cent, PR66 Cameo
Only Two Numerically Finer Coins at PCGS**

3071 1937 PR66 Cameo PCGS. CAC. The original red surfaces of this delightful Premium Gem show no mentionable flaws and no signs of toning or carbon. The sharply detailed design elements are richly frosted, creating bold cameo contrast with the deeply mirrored fields. Eye appeal is terrific. Population: 5 in 66 (1 in 66+) Cameo, 2 finer (6/13). NGC ID# 22L4, PCGS# 83338

**1977-S Cent, PR70 Red Deep Cameo
Condition Rarity in the Lincoln Memorial Series**

3072 1977-S PR70 Red Deep Cameo PCGS. Medium orange-red surfaces are completely free of carbon, contact, or any other distraction amid the bold luster and superlative eye appeal. Most examples — the vast majority — of spot-free, contact-free examples appear in the PR69 Deep Cameo rung. Another prize for the ultimate Registry Set. Population: 11 in 70 Deep Cameo (6/13). NGC ID# 22M9, PCGS# 93452

TWO CENT PIECE

**1872 FS-101 Two Cent, MS64 Brown
Doubled Obverse Die
Late Die State**

3073 1872 MS64 Brown PCGS. CAC. FS-101. TRUST is minutely die doubled north. The variety is undesignated on the insert. Although the present example is a *Cherrypickers'* variety, most collectors will be more interested in its status as a high grade representative of a very low mintage (64,000 pieces) commercial issue. This is a nicely struck near-Gem with variegated walnut-brown, straw-gold, and lime-green toning. The reverse is extensively cracked, especially through the tops of UNITED, with a branch to the left stem, and through the ribbons to CA. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

1871 Two Cent Piece, PR66 Red Among the Finest at PCGS

- 3074 1871 PR66 Red PCGS. CAC.** The original greenish-red surfaces of this delightful Premium Gem display deeply reflective fields with no mentionable signs of contact or toning. The design elements exhibit razor-sharp definition throughout and eye appeal is outstanding. Population: 13 in 66 Red, 0 finer (6/13). NGC ID# 22NH, PCGS# 3647

1873 Two Cent Piece, PR66 Red and Brown Original Closed 3 Variant

- 3075 1873 Closed 3 PR66 Red and Brown PCGS.** The well-preserved surfaces of this spectacular Premium Gem show a vivid mixture of original red, violet, and blue toning, with sharply detailed design elements and deeply reflective fields. A proof-only issue, the 1873 two cent piece claims an original mintage of just 600 pieces, but restrikes were produced at a later date, easily identified by the Open 3 in the date. Population: 19 in 66 Red and Brown, 0 finer (6/13). NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1862/1 Three Cent Silver, MS67 Tied for Finest Certified

- 3076 1862/1 MS67 PCGS. CAC. FS-301.** The previous 1 is clearly visible beneath the left side of the 2 on this Superb Gem. Both sides are frosty and highly lustrous with brilliant silver surfaces beneath lovely clue, green, violet, and gold toning. No finer examples have been examined at PCGS or NGC. Population: 14 in 67, 0 finer (6/13). NGC ID# 22ZC, PCGS# 3681

PROOF THREE CENT SILVER

1870 Three Cent Silver, PR66 Cameo Multicolor Toning

- 3077 1870 PR66 Cameo PCGS. CAC.** This well-detailed Premium Gem displays many die striations in the fields. The well-preserved surfaces exhibit shades of pale gold, blue, and amber toning and the reflective fields contrast boldly with the frosty devices. From a proof mintage of 1,000 pieces. Population: 8 in 66 Cameo, 1 finer (6/13). PCGS# 83721

1870 Three Cent Silver Cameo Premium Gem Proof One Finer Coin at PCGS

- 3078 1870 PR66 Cameo PCGS. CAC.** The reflective fields of this delightful Premium Gem contrast dramatically with the sharply detailed frosty design elements to produce a startling cameo effect. Delicate shades of pale gold and cerulean-blue toning enhance the pristine surfaces. Eye appeal is terrific. Population: 8 in 66 Cameo, 1 finer (6/13). PCGS# 83721

THREE CENT NICKEL

1866 Three Cent Nickel, MS66 Extremely Rare in Finer Grades

- 3079 1866 MS66 PCGS. CAC.** Heavy clash marks show on both sides of this well-detailed Premium Gem, with vibrant satiny mint luster and outstanding eye appeal. No post-striking defects are evident to the naked eye, even on close inspection. From a mintage of 4.8 million pieces. Population: 25 in 66 (2 in 66+), 2 finer (6/13). NGC ID# 22NK, PCGS# 3732

PROOF THREE CENT NICKEL

- 3080** 1866 PR65 PCGS. CAC. Attractive shades of champagne-gold toning blanket the reflective surfaces of this well-detailed Gem proof. From a mintage of just 725 pieces. Population: 51 in 65, 24 finer (5/13). NGC ID# 275L, PCGS# 3762

LIBERTY NICKELS

1912-D Liberty Nickel, MS66 Great-Looking Surfaces, Tied for Finest

- 3081** 1912-D MS66 PCGS. The 1912-D Liberty nickel is far more elusive in the higher Mint State grades — MS65 and above — than the large mintage figure of more than 8.4 million pieces suggests. This Premium Gem, tied for finest at PCGS, shows the typical somewhat satiny surface texture with great luster and attractive color, largely gold and gray on the obverse with pale rainbow iridescence on the reverse. The strength of strike on the lower-left ear of corn is somewhat surprising, and overall this is a great-looking coin. Population: 30 in 66, 0 finer (5/13). NGC ID# 277P, PCGS# 3874

1912-S Nickel, MS65 Popular Mintmarked Key

- 3082** 1912-S MS65 NGC. A colorful example with quicksilver luster on the obverse and a slightly firmer texture on the reverse. Waves of sea-green and blue-violet toning drape each side of this Gem from the sole San Francisco Liberty nickel issue, softly struck on the lower right obverse stars and lower left reverse wreath but otherwise pleasing. NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS65 Last Official Liberty Issue

- 3083** 1912-S MS65 PCGS. CAC. From a tiny mintage of 238,000 pieces, this attractive Gem displays well-detailed design elements and vibrant mint luster, under shades of pale gold and lavender-gray toning. The Liberty design was retired after 1912, except for the clandestine and ultra-rare 1913 issue. PCGS has graded 10 numerically finer examples (6/13). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1885 Liberty Nickel, PR66 Deep Cameo Popular and Seldom Seen in This Grade

- 3084** 1885 PR66 Deep Cameo PCGS. The 1885 Liberty nickel proof is exceedingly popular due to its association with the low-mintage circulation strike of the same date. This deeply contrasted Premium Gem proof intermingles gray and gold hues on each side with a sharp strike. A couple of tiny contact marks constitute the grade, including one at the corner of Liberty's mouth. Seldom seen in Deep Cameo. Population: 2 in 66 (1 in 66+) Deep Cameo, 0 finer (5/13). PCGS# 93883

1894 Nickel, Brilliant PR67 Cameo Surprisingly Scarce With Contrast

- 3085** 1894 PR67 Cameo PCGS. CAC. Each side of this remarkable coin is completely brilliant. The fields display unfathomable depth of reflectivity, which gives the piece a "black" appearance in the fields. Set against this depth of mirrored fields is significant mint frost. With a mintage of 2,632 proofs, one would expect more Cameo pieces than have been certified. To date (6/13), only three other PCGS coins have been so graded with none finer. PCGS# 83892

1896 Liberty Nickel, PR67 Cameo
Among the Finest Certified Examples

- 3086** 1896 PR67 Cameo NGC. Golden tinges and a splash of peach are more prominent on the obverse, but both sides of this Cameo Superb Gem benefit from the modest color infusion. The definition is excellent, the reflectivity strong, and the frost delicate but distinct. Neither NGC nor PCGS has graded a PR68 Cameo specimen of this issue (6/13). PCGS# 83894

BUFFALO NICKELS

1918/7-D Nickel, AU53, World War I Overdate

- 3087** 1918/7-D AU53 NGC. FS-101. During both World Wars, the U.S. Mint produced clusters of overdate errors in which a die bearing the previous year's date was hubbed with a more current year over it. Unlike previous overdates, which sometimes were deliberate cost-saving measures, these 20th century overdates are thought to be accidents derived from the volunteering or conscription of Mint personnel and the lesser skill of their replacements. This example of the 1918/7-D nickel is lightly worn but the date and its uniquely flattened top and corner at upper right are clear. Luminous surfaces have a medium-gray base and subtle rose and mauve overtones. NGC ID# 22RJ, PCGS# 3939

1928 Buffalo Nickel, MS67
None Finer at PCGS

- 3088** 1928 MS67 PCGS. A spectacular Superb Gem Buffalo nickel, with especially vibrant mint luster and sharply detailed design elements throughout. The mostly brilliant surfaces display a few hints of pale gold and ice-blue toning, and close inspection fails to reveal any mentionable surfaces flaws. Population: 13 in 67, 0 finer (6/13). NGC ID# 22SB, PCGS# 3963

1937-D Nickel, MS63
Popular Three-Legged Reverse

- 3089** 1937-D Three-Legged MS63 NGC. FS-901. Varieties that are listed in the *Guide Book of United States Coins*, commonly called the "Red Book," are popular with collectors, and those varieties that have been listed in most or all editions since 1947 are extremely popular and in great demand. The Three-Legged Buffalo debuted in the third edition of the Guide Book published in 1948 and has been listed ever since.

This Select Mint State piece has light gray surfaces with full luster and delicate gold toning. The satin surfaces have minimal marks on this attractive example. NGC ID# 22SX, PCGS# 3982

1937-D Three-Legged Nickel, MS64
A Collector Classic

- 3090** 1937-D Three-Legged MS64 NGC. FS-901. A near-Gem representative of the collector classic, which, thanks to early recognition and savings, remains available for a price in grades through MS64, though it becomes conditionally scarce any finer. This piece's subtle blue and green overtones grace a pale gray base that shows minimal carbon. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKEL

1936 Buffalo Nickel, PR68
Type One, Satin Finish

3091 1936 Type One—Satin Finish PR68 PCGS. CAC. Due to dwindling demand, the Philadelphia Mint discontinued proof coin production after 1916. The lack of interest may have been related to the experimental matte finish proof cents and nickels that were first struck in 1909. Two decades later, proof production began again, with the initial 1936 proof production comprised of satin finish cents and nickels. Brilliant proofs were introduced later in the year.

This sensational Superb Gem proof features the initial satin finish that resembles business strikes only much sharper. Fully brilliant luster appears on both sides under lilac, blue, and amber toning. Population: 31 in 68, 1 finer (6/13). NGC ID# 278X, PCGS# 3994

JEFFERSON NICKEL

1942-D/D Jefferson Nickel, FS-501
Series Key, Sole MS66 at PCGS

3092 1942-D D Over Horizontal D MS66 PCGS. FS-501. The *Cherrypickers' Guide* rates the FS-501 1942-D/D as the rarest major Jefferson nickel variety in Mint State, and the Bowers series reference comments that it is "very rare, even a worn example would be a prize." This Premium Gem example is the sole finest graded FS-501 at PCGS, which shows a total of 20 submissions in all Mint State grades combined. The PCGS *Price Guide* gives a retail price of \$8,500 for an MS65 but the variety is unpriced in MS66 — unsurprisingly, as we can find no record of a public trade at this grade level. This piece is essentially unmarked and show light pinkish-gold patina complementing generous luster. Most of the steps are visible, even though there is a small bridge just past the halfway point. PCGS# 4015

EARLY HALF DIME

1795 V-2, LM-3 Half Dime, AU58
Bisecting Obverse Crack

3093 1795 AU58 PCGS. CAC. V-2, LM-3, R.5. A late die state with a partially bisecting obverse crack through the upright of the R in LIBERTY, down through the hair. Other cracks are evident on both sides of this scarce die marriage. A gorgeous near-Mint example, this piece has nearly full luster with blue, violet, and gold toning. NGC ID# 22ZV, PCGS# 4251

BUST HALF DIMES

1831 Half Dime, MS66, V-6, LM-1.1
Exceedingly Rare Early Die State

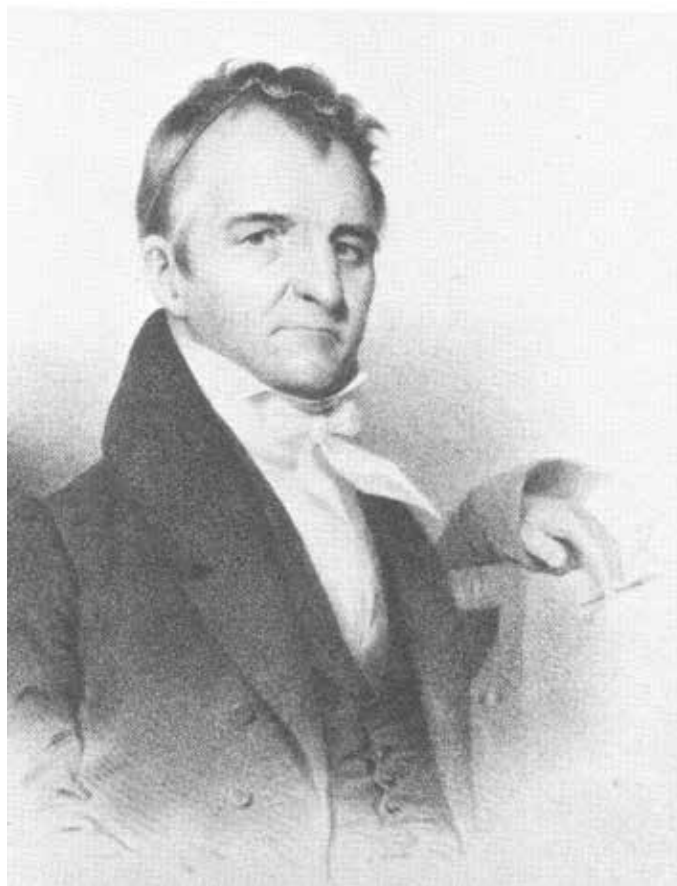

3094 1831 MS66 PCGS. CAC. V-6, LM-1.1, R.1. The upper loop of the first S in STATES is clear on this early die state specimen. The reverse die was used in order for 1831 LM-1.1, 1830 LM-9.1, 1831 LM-1.2, 1830 LM-9.2, and 1831 LM-1.3. The authors of *Federal Half Dimes 1792-1837*, John W. McCloskey and the late Russell J. Logan, write that "this remarriage is exceedingly rare," and note that they had seen several "EF+ examples." The present MS66 example is perhaps the finest survivor from the early die state, and offers specialists with an extremely important opportunity. Both sides have brilliant mint frost and sharp design details beneath intermingled ivory, sea-green, and deep gold toning. NGC ID# 232D, PCGS# 4278

1831 V-1, LM-6 Half Dime, MS67
Late Die State

3095 1831 MS67 NGC. V-1, LM-6, R.1. All of the die cracks and other reverse die defects described by Logan and McCloskey are present on this late die state. The surfaces of this Superb Gem exhibit frosty silver luster that shines through green, gold, and iridescent toning on the obverse. The reverse is mostly brilliant. An exceptional example. Census: 14 in 67, 1 finer (6/13). NGC ID# 232D, PCGS# 4278

William Kneass, Mint Engraver 1824-1835

EARLY DIMES

1796 JR-6 Dime, MS63 High-Grade Early Type Coin

3096 1796 MS63 PCGS. JR-6, R.3. 1796 was the first year of dime (or disme, per nomenclature of the era) production at the First Philadelphia Mint. The Draped Bust and Small Eagle motifs originated on 1795 silver dollars. According to often repeated numismatic legend, the Draped Bust model was Philadelphia socialite Ann Willing Bingham, indirectly through paintings by noted artist Gilbert Stuart. *Guide Book* credit for the design, however, is assigned to Chief Engraver Robert Scot.

On the dime, the Small Eagle only lasted through 1797, and was replaced by the Heraldic (or Large) Eagle in 1798. The Draped Bust obverse continued until 1807, except the star count was reduced to 13 beginning in 1798. Technically, the 1796 15 Stars is a single-year design subtype, since the 1797 issue has either 16 (JR-1) or 13 (JR-2) stars.

This is a satiny and mark-free representative with primarily stone-gray toning. The reverse has a small dab of dark color right of the D in UNITED, and the obverse displays several parallel, slender, and toned alloy streaks. The strike is sharp for the Draped Bust type, though the centers show minor incompleteness.

The usually seen die state with a horizontal break through the 17 in the date, a slender crack through star 8 to the center of Liberty's neck that splits into two cracks descending to the rim at 5:30 and 6 o'clock, a crack from 10:30 through the eagle to the M in AMERICA, a vertical crack from the ribbon to the eagle's breast, a crack through the bases of OF AMER, a crack from the rim to the M, and a delicate crack from the center of the R in AMERICA. Population combined for all 1796 varieties: 13 in 63, 20 finer (6/13). NGC ID# 236B, PCGS# 4461

1800 Dime, JR-1, MS62
Significantly Toned

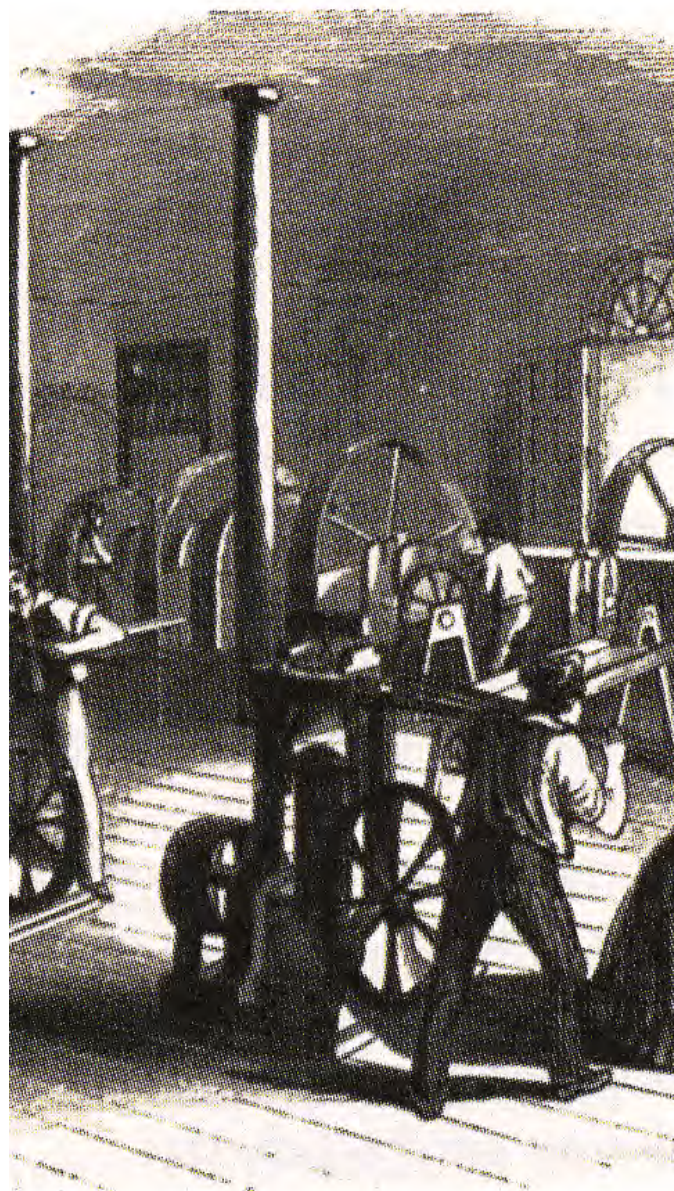

- 3097 1800 MS62 PCGS Secure. JR-1, R.4.** The slightly more accessible of two die pairs for the issue, distinguished by an eagle that does not have a star clamped in its beak. The emphasis is on “slightly,” however, as the JR-1 variety is very scarce regardless of condition. This MS62 example has silver interiors with cerulean, sea-green, and reddish-gold outer toning. The obverse has these colors well-centered, while on the reverse the “center” is shifted toward the top. Underlying luster is prominent with a hint of frostiness. For the two 1800 dime varieties combined, Population: 3 in 62, 5 finer (6/13). NGC ID# 236H, PCGS# 4470

1807 JR-1 Dime, MS62

- 3098 1807 MS62 NGC. JR-1, R.2.** The rarity rating suggests that about 1,000 survivors are known today from the mintage of 165,000 coins. The actual number may be closer to 2,000 pieces. This lustrous silver-gray specimen exhibits strike weakness with minor clash marks and other die imperfections. Splashes of dark toning are evident on the reverse. NGC ID# 236T, PCGS# 4480

1807 JR-1 Dime, MS65
Unabrased and Attractively Toned

3099 1807 MS65 PCGS. CAC. JR-1, R.2. Though the *Guide Book* reports an 1807 mintage of 165,000 pieces, only a single die variety is known. Production of dimes was limited to the 1807 between 1806 and 1808 since silver bullion depositors at the Mint preferred the convenience of larger denominations. The mintage of 1807 half dollars surpassed 1,000,000 pieces. It is likely that 1807 dimes were infrequently seen relative to worn-out or cut-down Spanish colonial silver, which remained legal tender until 1857.

1807 was the final date of the Draped Bust type. John Reich, a German immigrant and former indentured servant known to President Jefferson, was named Assistant Engraver on April 1, 1807. He set to work redesigning all denominations. The half eagle and half dollar came first while the dime waited until 1809 for Reich's Bust Left motif.

Many better grade 1807 examples display bold clash marks on the right reverse field, but clashes on the present coin are less extensive. There is a double "beard" clash beneath Liberty's jaw and a "lump" clash above the upper cleavage. A faint clash from the horizontal shield lines rests beneath Liberty's ear, and minor clashes are evident on the reverse near the shield tips and banner.

Most collectors will pay greater attention to the splendidly mark-free surfaces, which are richly patinated in intermingled tobacco-brown and gunmetal-blue shades. The reverse border exhibits blushes of forest-green. The major devices are well struck, though UNITED and the left-side obverse stars show weakness. Coruscating luster further confirms the remarkable quality. Population: 6 in 65, 2 finer (6/13). NGC ID# 236T, PCGS# 4480

BUST DIMES

1831 JR-5 Dime, MS65
Late Die State
Reverse Retained Cud

3100 1831 MS65 PCGS. CAC. JR-5, R.1. Although a common variety, this extremely important Gem has a retained cud over UNI in this late die state. Eventually the retained cud progresses to a full cud, and that terminal die state is extremely rare. Autumn-gold, rose-red, and aquamarine toning consumes this fully struck and satiny Gem. This specimen is far the finest we have handled with the retained cud on the reverse, and is the same coin that appeared in our April sale where it was certified MS66 NGC. This is an extremely important opportunity for the advanced variety specialist. Population: 15 in 65, 11 finer (6/13), for all 1831 varieties. NGC ID# 237B, PCGS# 4520

1837 JR-4 Capped Bust Dime, MS66
From the Pittman Collection

3101 1837 MS66 NGC. JR-4, R.1. Ex: Pittman. A bisecting obverse die crack between 12 and 5 o'clock identifies the variety. Frosty luster shines through the beautiful rainbow toning with light silver devices. The obverse has light gold at the centers, changing to deeper gold, violet, russet, and cobalt-blue at the border. Reddish-gold at the central reverse changes to blue-green and gold at the border. The visual effect of the toning on this Premium Gem is stunning. Liberty's hair is a trifle soft, but the reverse is razor-sharp. An appealing example of this final-year Capped Bust dime. Census: 6 in 66, 0 finer (6/13), for all 1837 Capped Bust varieties. Ex: Barney Bluestone, 11/1943, sold for \$2.50; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 577; Los Angeles Signature (Heritage, 8/2009), lot 450; Fort Worth Signature (Heritage, 3/2010), lot 595. NGC ID# 237H, PCGS# 4529

SEATED DIMES

1844 Seated Liberty Dime, MS61 Famous 'Little Orphan Annie' Issue

- 3102 1844 MS61 NGC.** The well-known low mintage (72,500 pieces) "Little Orphan Annie" dime. This example displays attractive shades of cobalt-blue, lavender, and gold on the obverse; while the reverse is essentially untuned in the center with lavender and gold peripheries. A few light to moderate handling marks are noted over each side, none of which pose a serious distraction. Census: 2 in 61, 7 finer (6/13).
Ex: *Atlanta Signature (Heritage, 4/2006), lot 402.* NGC ID# 238A, PCGS# 4585

1877-CC Seated Dime, MS66 Rarely Seen Finer

- 3103 1877-CC MS66 PCGS.** Type Two Reverse. A well-detailed Premium Gem, with just a touch of softness on the ribbon bow, this coin displays vibrant mint luster and mostly brilliant surfaces, with traces of gray and amber toning at the peripheries. Close inspection reveals no mentionable flaws. Population: 33 in 66 (1 in 66+), 5 finer (6/13). NGC ID# 23AM, PCGS# 4683

BARBER DIMES

1897-O Dime, MS66 Largely Untoned and Well-Struck

- 3104 1897-O MS66 PCGS. CAC.** An even 666,000 pieces were reportedly struck of this midseries O-mint issue, making it one of several sub-1 million-coin mintages in the Barber dime series. Just a touch of light patina visits each side of this Premium Gem, which still basically presents as silver-white and well-struck. Population: 9 in 66, 5 finer (5/13). NGC ID# 230000, PCGS# 4813

1899-S Dime, MS66 Series Condition Rarity

- 3105 1899-S MS66 PCGS.** The 1899-S is a median rarity among S-mint issues within the Barber dime series, and even more elusive in Gem grades and above. This Premium Gem boasts beautiful color in mottled shades, including gray, blue, pink, and gold. The surfaces show few marks of any significance. Some diagonal lines on the obverse high points are roller marks from the creation of the planchet, not technically grade-affecting. Population: 10 in 66 (1 in 66+), 3 finer (5/13). NGC ID# 23EB, PCGS# 4820

1900-S Dime, MS66+ Sole Finest at NGC

- 3106 1900-S MS66+ NGC.** The 1900-S Barber dime is a high-mintage coin, but this piece is one of the top-grade survivors and technically the sole finest certified at NGC, although only by the "Plus" margin, as that service has seen six others in MS66 (5/13). PCGS shows eight in MS66 with one MS67 finer. This NGC piece exhibits great color and luster, silver interiors with copper-pink and pale ice-blue at the rims, over unmarked, well-struck surfaces. NGC ID# 23EE, PCGS# 4823

PROOF BARBER DIMES

1907 Dime, PR67 One Finer at PCGS

- 3107 1907 PR67 PCGS. CAC.** Only 575 proof Barber dimes were struck in 1907 and few survivors can match the quality and appeal of this gorgeous Superb Gem. Whispers of soft yellow-gold and red patina reside on the obverse, ceding to cobalt-blue, orange, and lavender on the reverse. A solid strike leaves sharp definition on the design elements. Population: 11 in 67, 1 finer (6/13). NGC ID# 23GM, PCGS# 4891

**1909 Ten Cent, PR67 Cameo
Fewer Than 10 Pieces at PCGS and NGC**

- 3108 1909 PR67 Cameo PCGS. CAC.** Proof 1909 Barber dimes almost always display an all-brilliant finish with little evidence of field-motif contrast. Indeed, of the 240 proof 1909s certified by PCGS fewer than 30 are designated as Cameos (this issue is unknown with Deep/Ultra finish). Superb Gem Cameos such as the present coin are scarce; PCGS and NGC combined have seen fewer than 10 such pieces. The field-device contrast is complemented by boldly struck design elements and impeccably preserved surfaces. These attributes yield outstanding eye appeal, affirmed by the CAC label. PCGS# 84893

MERCURY DIMES

**1916-D Mercury Dime, AU55
Great Luster and Eye Appeal**

- 3109 1916-D AU55 PCGS.** This Choice AU example of the perennially popular 1916-D offers many of the attributes of a Mint State piece at a more reasonable price. Essentially all of the mint luster remains in the fields on this snow-white, frosty, untomed piece, although a touch of rub is visible, as expected, on the high points of each side. There is no sign of mentionable contact, save for one curving mark on Liberty's cheek; otherwise, just a few scattered, insignificant ticks appear. A bold strike complements great eye appeal. NGC ID# 23GY, PCGS# 4906

1918-D Dime, MS64+ Full Bands

- 3110 1918-D MS64+ Full Bands PCGS. CAC.** The 1918-D is among the trickier issues in the early Mercury dimes to find with Full Bands designation, although Gem Full Bands pieces are considerably more elusive. This piece is "nearly there" to Gem Full Bands; a couple of thin hairlines in the right obverse field and a pair of small ticks on the rear of Liberty's neck appear to be the delimiters. The CAC approval will add to the premium. Satiny surfaces are silver-white in the centers, deepening to pink-gold near the rims. Population: 78 in 64+ Full Bands, 24 finer (6/13). NGC ID# 23H6, PCGS# 4919

**1921 Dime, MS66 Full Bands
Lustrous Multicolored Surfaces**

- 3111 1921 MS66 Full Bands PCGS. CAC.** Sharply detailed in most areas, with Full Bands definition on the fasces, this impressive Premium Gem shows just a touch of softness on the peripheries. The well-preserved surfaces display attractive shades of gold, blue, and amber toning, with vibrant mint luster underneath. Population: 36 in 66 Full Bands, 2 finer (6/13). NGC ID# 23HE, PCGS# 4935

**1931 Dime, MS67 Full Bands
Highly Lustrous Surfaces**

- 3112 1931 MS67 Full Bands PCGS.** Variegated orange-gold, reddish-gold, green, and purple toning visit the obverse of this Superb Gem dime, leaving the reverse nearly color-free. The highly lustrous surfaces exhibit sharply struck design elements, culminating in Full Bands on the fasces. This piece is exquisitely well-preserved and appealing. Population: 13 in 67 Full Bands, 0 finer (6/13). NGC ID# 23J7, PCGS# 4983

**1935 Dime, MS68 Full Bands
A Registry Collector Essential**

- 3113 1935 MS68 Full Bands PCGS.** Though more than 58.8 million 1935 dimes were produced, the date is a notable condition rarity at the MS68 Full Bands level. This minimally toned beauty has a frosty texture most visible in contrast to the few small areas where the luster breaks out into shining brilliance. Population: 10 in 68 Full Bands, 0 finer (6/13). NGC ID# 23JC, PCGS# 4993

**1936-S Dime, MS68 Full Bands
Registry Set Prize, One of Three Finest**

- 3114 1936-S MS68 Full Bands PCGS.** Among the nearly 500 submissions of Mercury dimes, all issues, that PCGS has seen in the lofty grade of MS68 Full Bands, most are either Philadelphia Mint issues or the particularly well-made 1939-D, which latter date accounts for 73 of the total. For the 1936-S, this impeccable piece is tied for the finest graded with a mere two other submissions. The surfaces are still mostly untuned on each side, although various pale iridescent shades feature more prominently on the obverse, ranging from pale saffron through rose and violet. Each side is free from essentially all contact, as expected at this grade level, and the central bands are fully split, even if a touch of strike softness visits the lower diagonal band. A gorgeous prize for type or Registry Set collectors. Population: 3 in 68 Full Bands, 0 finer (5/13). NGC ID# 23JH, PCGS# 5003
-

1943-S Dime, MS68 Full Bands
Remarkable Color and Underlying Luster

- 3115** 1943-S MS68 Full Bands PCGS. CAC. Large S. Remarkable cherry-red, peach, lemon, and apple-green patina encompasses this fully struck and pristine Superb Gem. Though the 1943-S is common in typical Uncirculated grades, the eye appeal of the present piece is unsurpassable. Population: 16 in 68 Full Bands, 0 finer (6/13). NGC ID# 23KA, PCGS# 5049

1945-S Micro S Dime, MS67 Full Bands
Scarce Variant in This Final Year of Issue

- 3116** 1945-S Micro S MS67 Full Bands PCGS. CAC. FS-512. Per *Cherrypickers*, "this variety has the only mintmark punch of this type and size known to have been used during the 1940s." Collectors have mostly ignored mintmark size differences on the 1941-S through 1947-S dimes, but the 1945-S Micro S is an exception, sufficiently popular to merit its own *Guide Book* listing. The present well struck and lustrous Premium Gem is nearly pristine and exhibits richly blended jade-green and chestnut patina. Population: 19 in 67 (1 in 67+) Full Bands, 2 finer (6/13). NGC ID# 23KH, PCGS# 5063

TWENTY CENT PIECE

1876 Twenty Cent, Colorful MS65
Difficult in All Grades

- 3117** 1876 MS65 PCGS. Only 14,640 business-strike twenty cent pieces were struck in 1876 at the Philadelphia Mint, making it a very difficult acquisition in all grades. Soft violet, powder-blue, orange-gold, and yellow patination reside on the lustrous surfaces of this gorgeous Gem. Well struck design motifs enhance even more the coin's eye appeal. Population: 32 in 65, 15 finer (6/13). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECE

1877 Twenty Cent, PR64
Reflective Silver-Gray Example

- 3118** 1877 PR64 PCGS. The silvery surfaces are highly reflective and offer considerable cameo contrast on this near-Gem proof, even if undesignated by PCGS. The grade is determined by a couple of trivial spots on the extreme rims, but otherwise this low-mintage proof strike (350 pieces) has much to commend itself. A great example for the type. Population: 57 in 64, 36 finer (6/13). NGC ID# 27H4, PCGS# 5305

EARLY QUARTERS

1804 B-1 Quarter, Good 6

- 3119** 1804 Good 6 NGC. B-1, R.3. The tops of AMERICA are merged into the reverse border with otherwise complete rims on both sides. This pewter-gray specimen has a few splashes of darker toning. An excellent example for the grade, representing the scarcest date of the Heraldic Eagle quarter series. NGC ID# 23RB, PCGS# 5312

1807 B-2 Quarter, AU53
Late Die State

- 3120** 1807 AU53 PCGS. B-2, R.3. Die State d in the Rea, Peterson, Karoleff, Kovach reference, and ranking in the top 20 known for the variety. This piece has heavy obverse clash marks with no mention in that reference. Although 1807 B-1 is rated R.2 and B-2 is rated R.3, our experience indicates that B-2 is far the scarcer of those two known varieties, and is probably a Low R.4 die marriage. This attractive AU example has delicate champagne toning over lustrous silver surfaces, and it is essentially problem free. NGC ID# 23RF, PCGS# 5316

BUST QUARTER

1831 B-4 Quarter, MS66 Small Letters Reverse Tied for Finest Known

3121 1831 Small Letters MS66 PCGS. B-4, R.1. An early die state with a perfect obverse and a reverse crack from the border to the C in the denomination, and faintly into the eagle's feathers and wing left of the shield.

Although the Mint was partially mechanized by the early 1830s, this piece falls at the tail-end of the "hand-crafted" period of coinage operations in Philadelphia. Construction had begun on the second Mint at the corner of Chestnut and Juniper Streets, but the facility would not be completed for several months with its first occupancy in January 1833. At the first Mint, coinage was still accomplished with screw presses when this coin was struck. The Mint workmen were clearly capable of producing a beautiful product in the early 1830s, as this coin testifies.

Although a few stars are incomplete, the overall design definition of this Premium Gem is exceptional. The fields are lightly but fully mirrored, providing a suitable background for the lustrous devices. Both sides have pale champagne toning at the cents, with outstanding peripheral iridescence. An exquisite specimen destined for the finest cabinet.

A Condition Census of the early quarters, compiled by specialists Rory Rea, Jim Koenings, and Aram Haroutunian, records three MS66 examples of this variety sharing top honors for the variety. This highly prooflike example is a fourth Premium Gem, and those four coins are tied for the finest known examples of the variety. There are also four proof examples recorded in the same census, each with a grade of PR64. Population: 5 in 66, 0 finer (6/13), for all 1831 varieties. NGC ID# 23RW, PCGS# 5348

SEATED QUARTERS

1840-O Seated Quarter, MS62 Short-Lived No Drapery Type

- 3122 1840-O No Drapery MS62 PCGS.** This impressive MS62 example represents an important subtype in the Seated Liberty quarter series. The short-lived No Drapery design was only struck from 1838 to 1840, and high-grade examples of any of these dates are seldom encountered. This well-detailed specimen displays pleasing golden-brown and light blue toning with traces of original mint luster underneath. Population: 8 in 62, 5 finer (6/13).. NGC ID# 23SG, PCGS# 5393

1854 Seated Liberty Quarter, MS65 In-Demand Type Issue

- 3123 1854 Arrows MS65 PCGS.** CAC. From the second year of the short-lived Arrows design, the 1854 Seated Liberty quarter is a popular issue with type collectors. This impressive Gem exhibits well-detailed design elements and vibrant mint luster, with mingled gold, gray, and amber patina. Population: 11 in 65 (1 in 65+), 12 finer (5/13). NGC ID# 23U6, PCGS# 5432

1854-O Seated Quarter, MS64 O-Mint Arrows Variant

- 3124 1854-O Arrows MS64 PCGS.** CAC. A handful of well-defined areas of gold and iridescent toning appear on each side of this frosty example, with the deepest colors appearing along the lower obverse border. Only a few scattered marks prevent a higher grade. The design elements are well-detailed. Population: 9 in 64, 2 finer (6/13). NGC ID# 23U7, PCGS# 5433

1857-O Seated Quarter, MS64 Prime Condition Rarity

- 3125 1857-O MS64 PCGS.** CAC. Dappled golden-brown and olive-gray toning enriches this crisply struck and thoroughly lustrous near-Gem. Well-preserved and desirable. Despite a bountiful mintage of 1.18 million pieces, the 1857-O is rare in Mint State and unavailable as a Gem. Population: 6 in 64, 0 finer (6/13). NGC ID# 23TF, PCGS# 5443

1872 Quarter Dollar, Lustrous MS65 Rare in Mint State

- 3126 1872 MS65 PCGS.** The 1872 Seated Liberty quarter boasts a low mintage of 182,000 circulation strikes and is difficult to locate in all grades, due in part to many probably having been melted in the 1873 silver melt. Larry Briggs (1991) assigns a rarity rating of R.6+ to Uncirculated pieces. Soft cobalt-blue, lavender, and orange-gold patina adorns the obverse while light russet visits the reverse. Lustrous surfaces are well struck. Population: 1 in 65, 1 finer (6/13). NGC ID# 23UR, PCGS# 5481

1873 Arrows Quarter, MS65 Only One Finer Example at NGC

- 3127 1873 Arrows MS65 NGC.** A delightful Gem representative of this popular short-lived design type, with well-detailed design elements that show just a touch of softness on the star centrils. The unmarked surfaces radiate vibrant mint luster and exhibit a few hints of silver-gray toning. Census: 10 in 65, 1 finer (6/13). NGC ID# 23VU, PCGS# 5491

PROOF SEATED QUARTERS

Gem Proof 1849 Quarter The Garrett-Kaufman Specimen

3128 1849 PR65 PCGS. CAC. Offered by us in two previous sales where it was graded PR66 NGC, this impressive Gem is now conservatively graded PR65 PCGS. This piece ranks as one of the two finest known examples. Past numismatists have estimated that only three to five 1849 proof quarters exist, and we believe that the true population is five coins. PCGS shows five certified examples that include PR63, PR65 (2), and PR66 (2). NGC has certified four proofs including PR63 (2), PR64, and PR66, and the latter coin is this example that no longer resides in the NGC holder, so their effective population is only three coins. It is virtually certain that some duplication exists among those certified pieces. A medley of blue-green and tan-gray patina adorns both sides of this charming Premium Gem, taking on deeper hues on the reverse. Relatively strong field-motif contrast is noted on the obverse, while the depth of toning on the reverse tends to mute this variation. An exacting strike imparts excellent definition to the design features of this impeccably preserved Gem proof.

The following enumeration is derived from appearances known to us, and is revised from our earlier rosters:

1. PR66 PCGS. William Dickinson Collection (Chapman Brothers, 3/1894); J.M. Clapp; J.H. Clapp. Clapp estate, 1942; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1445; Heritage (2/1999), lot 5915.

2. PR65 PCGS. The present coin, previously certified PR66 NGC. J. Colvin Randall Collection; John Work Garrett Collection, Johns Hopkins University (Stack's, 3/1976), lot 160; Kenneth C. Long Estate (Bowers and Merena, 5/1995), lot 1089; Phil Kaufman Collection, Part Three (Heritage, 4/2008), lot 2390; Greensboro Collection, Part III (Heritage, 4/2013), lot 4221.

3. Gem Proof. R. Green (10/11/1949); John Jay Pittman (David Akers, 5/1998), lot 1315.

4. PR65/64. Norweb Collection (Bowers and Merena, 3/1988), lot 1585.

5. PR63 PCGS. 1998 FUN Sale (Heritage, 1/1998), lot 6781.

Additional Appearances

A. Lorin Parmelee Collection (New York Stamp & Coin, 1/1890). Possibly any of the above except the Garrett specimen.

B. H.P. Smith Collection (Chapman Brothers, 1906). Possibly number 3, 4, or 5.

C. Matthew Stickney Collection (Chapman Brothers, 1907). Possibly number 3, 4, or 5.

D. George Earle Collection (Henry Chapman, 6/1912). Possibly number 3, 4, or 5.

E. Jerome Kern (B. Max Mehl, 5/1950), lot 1440. Possibly number 4 or 5. NGC ID# 23WC, PCGS# 5543

1856 Seated Liberty Quarter, PR65
Tied for Finest at PCGS
Ex: John Jay Pittman

3129 1856 PR65 PCGS. The Philadelphia Mint produced a limited number of proof sets in 1856, two years before the official program of public offerings was started. No mintage figures were recorded, but the number was undoubtedly small. Walter Breen estimated fewer than 30 examples were still extant in 1987 and David Akers thought the number might be 25-30 specimens a decade later. The current estimate on the PCGS web site is 20-30 examples in all grades, so the population seems to be holding remarkably steady over the years.

Collectors have always prized the 1856 proof issues, even though they are much more difficult to locate than their commercially offered post-1858 counterparts. Pittsburgh collector David S. Wilson, who assembled a fine collection over the course of more than 50 years, acquired both a single example of the 1856 proof quarter and another specimen as part of a complete silver and minor proof set. When his collection was sold by S.H. Chapman on March 13 and 14, 1907, the single quarter was offered in lot 64, which realized \$5 and the set in lot 1035 brought \$52.

When David Akers described this identical coin in the Pittman Collection catalog, he commented that:

“...it is doubtful if more than 25-30 examples exist, very few of which are more choice, and almost none of which are prettier, than this specimen.”

This coin displays spectacular shades of reddish-gold and blue toning on the obverse, with darker blue, violet, and gold on the reverse. The design elements exhibit razor-sharp definition throughout, except for some softness on the stars on the left. The fields are deeply reflective and eye appeal is terrific. The reverse die shows a bulge from AM in AMERICA down through the eagle's wing that is diagnostic for this issue. This coin should find a home in the finest collection or Registry Set. Population: 2 in 65, 0 finer (6/13).

Ex: Wayte Raymond; purchased by John Jay Pittman on 5/14/1946 for \$25; John Jay Pittman Collection, Part II (David Akers, 5/1998), lot 1333. NGC ID# 23WH, PCGS# 5552

1869 Quarter, Multicolor PR66
Deeply Reflective Fields

- 3130** 1869 PR66 PCGS. CAC. Struck from the doubled obverse die, an unusual occurrence for a proof coin. Only 600 proofs were struck in 1869 and none are finer at PCGS (5/13). Both sides are splashed with rich, multicolored iridescence and the fields shine brightly through the layers of color. An impressive early With Motto proof quarter. NGC ID# 23X2, PCGS# 5568

1871 Quarter, PR67 Cameo
Heavily Lapped Fields, Lovely Toning

- 3131** 1871 PR67 Cameo NGC. The depth of mirroring in the fields is a result of heavy die polishing, the effect can be seen most obviously on the overpolished folds in the scroll of the motto above the eagle's head. The obverse displays an off-center oval of pinkish-brilliance that is surrounded by pale rose and blue. The reverse is mostly blue-green and light rose. Exceptionally attractive surfaces with obvious contrast even through the toning. Census: 2 in 67 Cameo, 0 finer (5/13). PCGS# 85570

1885 Quarter, PR67+ Deep Cameo
Absolute Contrast

- 3132** 1885 PR67+ Deep Cameo PCGS. CAC. Magnificently contrasted between sharply struck white-frost devices and gleaming silver mirrors that show only the faintest evidence of toning. As visually striking as this specimen is, it takes a moment for the fantastic preservation to register, but after close examination with a loupe, even a simple "Superb Gem" proof designation is not enough to describe this Deep Cameo beauty. While the grading services have certified several exceptional specimens from this issue of 930 proofs, this coin tops the PCGS *Population Report*: 3 in 67 (1 in 67+) Deep Cameo, 0 finer (6/13). PCGS# 95586

BARBER QUARTERS

1892 Barber Quarter, MS67+
Attractively Toned, Lustrous Specimen

- 3133 1892 MS67+ PCGS. CAC.** Type One Reverse. This high-end Superb Gem exhibits well-detailed design elements and pleasing shades of lavender-gray and pale gold toning. Strong, but subtle, cartwheel mint luster shines beneath the patina. Eye appeal is outstanding. From the first year of the Barber design. Population: 25 in 67+, 3 finer (6/13). NGC ID# 23XT, PCGS# 5601

1892-O Barber Quarter, MS66
Popular First-Year Type Coin

- 3134 1892-O MS66 PCGS.** Type Two Reverse. This delightful branch mint quarter represents the first year of the Barber design, from a substantial mintage of 2.6 million pieces. Attractive shades of pale gold and lavender-gray toning blanket the well-preserved lustrous surfaces and the sharply detailed design elements add to the considerable visual appeal. Population: 13 in 66 (3 in 66+), 3 finer (6/13). NGC ID# 23XU, PCGS# 5602

PROOF BARBER QUARTERS

1898 Quarter, Colorful Superb Gem

- 3135 1898 PR67 PCGS. CAC.** The mintage of proof 1898 Barber quarter dollars was a respectable 735 pieces, and examples can be found without too much difficulty today, especially through the near-Gem level. Gems and Premium Gems will take a bit more searching to locate; PR67 examples are scarce and finer specimens are rare. Soft cobalt-blue, orange-gold, lavender, and russet drape both sides of the current PR67 offering. Razor-sharp definition is apparent on the design elements, enhancing the coin's magnificent eye appeal. Population: 17 in 67, 7 finer (6/13). NGC ID# 242D, PCGS# 5684

1905 Quarter, PR67 Cameo
Untoned Silver-White Example

- 3136 1905 PR67 Cameo PCGS.** The surfaces on this Superb Gem proof are silver-white with little perceptible trace of color, but the field-device contrast is blatant throughout. The proof strike has created sharp detail overall, even at the right shield corner on the reverse. Population: 5 in 67 Cameo, 0 finer (5/13). PCGS# 85691

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VG8
Easily Readable Date

- 3137 1916 VG8 NGC. CAC.** Considering how frequently the date wears away on pre-1925 Standing Liberty quarters, it is a wonder that this VG specimen shows the date so clearly with only the tops of the digits worn. Lavender-blue and orange-to-brown shadings occupy most of each side, and while a handful of moderate abrasions appear away from the central forms, the overall eye appeal is strong. A great coin that will appeal to a range of collectors. NGC ID# 242Y, PCGS# 5704

1916 Standing Liberty Quarter, VG10
Plainly Legible Date

- 3138 1916 VG10 PCGS.** Faint gold and pink overtones visit medium-gray surfaces with charcoal outlines to the central devices. A legible date is one of this significantly worn coin's top assets. Both sides show the smoothness that sometimes comes from circulation. One of just 52,000 pieces struck for this first-year key date that had a late start in production. NGC ID# 242Y, PCGS# 5704

1916 Standing Liberty Quarter, VG10
First-Year Key

- 3139 1916 VG10 ANACS. Pearl-gray surfaces have deeper shadings in the protected areas as well as scattered blue overtones. Distinctly worn, including at the top of the date, but clear enough to identify and indeed with as strong a date as a collector could hope to find on an example in the Very Good range. NGC ID# 242Y, PCGS# 5704

1916 Standing Liberty Quarter
XF Details

- 3140 1916 — Improperly Cleaned — NGC Details. XF. The stone-gray surfaces exhibit patches of hairlines and occasional granularity, but this low mintage first-year quarter displays ample design definition. Both sides are free from any noticeable abrasions. Luster emerges from the legends, stars, and plumage. NGC ID# 242Y, PCGS# 5704

1916 Standing Liberty Quarter, MS66
Luminous Surfaces, Pale Pastel Toning

- 3141 1916 MS66 PCGS. CAC. While there are few champions of Chief Engraver Charles Barber, especially among those who recall the running battle between him and Augustus Saint-Gaudens and his heirs in 1907, most numismatists would feel at least a degree of sympathy for him for what he went through in 1915 and 1916, having to watch as his coinage designs were replaced. That would be bad enough, but as Roger W. Burdette notes in *Renaissance of American Coinage 1916-1921*, the circumstances were particularly cruel. After consulting with a trio of outside artists, Mint Director Robert Woolley sent a letter to Philadelphia Mint Superintendent Adam Joyce, reprinted by Burdette, which reads in part:

“Please introduce [the artists] to Mr. Barber and request him to give them all possible information regarding the practical side of coin designing. I have assured them that all inquiries will be cheerfully responded to, and that in their efforts to create the best possible design they will receive from Mr. Barber and others at the Philadelphia Mint at all times hearty co-operation.”

The final twist of the knife, in Burdette’s words: “When Superintendent Joyce received the letter the next day, he showed it to the senior staff and had the Engraver, Charles Barber, read and initial the letter.”

One of those replacements was the Standing Liberty quarter, which saw a limited mintage of 52,000 pieces in 1916. Very few examples were set aside in such superlative condition as this piece. The mint luster is positively radiant, and each side has just the slightest hint of pastel iridescence. Outstanding quality in this rare and popular first-year issue. NGC ID# 242Y, PCGS# 5704

**1917 Standing Liberty Quarter, MS67 Full Head
No Finer Coins at NGC**

- 3142 1917 Type Two MS67 Full Head NGC.** A magnificent Superb Gem representative of the first year of the popular Type Two design. This coin displays sharply detailed design elements, with Full Head definition. The pristine surfaces exhibit vibrant mint luster and shades of champagne-gold and ice-blue toning. Census: 12 in 67 Full Head, 0 finer (6/13). NGC ID# 2434, PCGS# 5715

**1918/7-S Quarter, XF40
Even Wear, Strong Underdigit**

- 3143 1918/7-S XF40 PCGS.** Because the 1918-S overdate was discovered so many years after its release, this XF is typical of most survivors. The surfaces are bright and each side has deeper golden-gray patina that outlines the devices. Even wear over the high points, as expected, but the downstroke of the 7 is still bold. NGC ID# 243A, PCGS# 5726

**1921 Standing Liberty Quarter, MS67
Single Finest Non-Full Head Example Certified**

- 3144 1921 MS67 NGC.** The 1921 Standing Liberty quarter is one that is a conditional rarity even at the Gem level, and the present MS67 NGC example is the sole finest certified non-Full Head coin at either NGC or PCGS. PCGS has seen 18 submissions at the MS66 level but has never graded a Superb Gem. The present piece displays a bold strike over surfaces that are virtually immaculate. All of the shield rivets are bold, but there is insufficient detail on the head for a Full Head designation. Light tinges of pinkish-gold and ice-blue appear, but the coin presents as basically untoned. An incredible piece for a fine Registry Set. Census: 1 in 67, 0 finer (6/13). NGC ID# 243H, PCGS# 5740

WASHINGTON QUARTERS

**1935-D Quarter Dollar, MS67
Underrated in Mint State**

- 3145 1935-D MS67 PCGS. CAC.** The 1935-D quarter dollar is considered by many numismatists to be the most underrated date in the series in Mint State grades. Slivers of deep reddish-gold concentrate at the margins of this gorgeous Superb Gem. Its lustrous surfaces are impeccably preserved. Population: 15 in 67, 0 finer (6/13). NGC ID# 244E, PCGS# 5798

**1937-S Quarter, MS67
Top-Notch Registry Set Coin**

- 3146 1937-S MS67 PCGS. CAC.** This top-grade coin will fill a difficult niche in a fine Registry Set. This piece shows silver surfaces with a light accent of gold throughout, deepening to amber and brownish freckles at the rims amid complete luster and near-pristine surfaces. Population: 25 in 67 (2 in 67+), 0 finer (5/13). NGC ID# 244M, PCGS# 5805

EARLY HALF DOLLARS

**1794 Half Dollar, O-101a, VG Details
First Year of Denomination**

- 3147 1794 — Improperly Cleaned — NGC Details. VG. O-101a, R.4.** Mostly pearl-white though protected areas are charcoal-gray. Moderately clouded by cleaning but devoid of consequential abrasions. The stars are clear, and all legends are bold except for the date, which is faint but fully readable. The initial Flowing Hair type was coined for only two years, and the 1794 is much rarer than its 1795 successor. PCGS# 6051

1795 Half Dollar, XF45
O-113a, A over E in STATES

- 3148** 1795 2 Leaves XF45 PCGS. O-113a, R.4. The A over E in STATES mint-blundered variety, mentioned in the *Guide Book* but without a separate line listing. The present better grade example is mostly light blue-green though hints of tan-gold visit the field while sea-green toning adorns the margins. The portrait displays mint-made adjustment marks but the surfaces, though mildly subdued, are surprisingly unabraded. PCGS# 6052

1802 Half Dollar, VF35
O-101, Sole Die Pair

- 3149** 1802 VF35 PCGS. O-101, R.3. The 1801 and 1802 half dollars, the first two years of the Heraldic Eagle reverse design, are both low mintage issues that are elusive in high grades. Mint records indicate a production of only 30,289 of the former and 29,890 of the latter. This mildly luminous example features light to medium silver-gray toning and has only minor marks. NGC ID# 24EE, PCGS# 6065

1806 O-109 Half Dollar, MS63
Pointed 6, No Stem Through Claw
The Usual Early Die State

- 3150** 1806 Pointed 6, No Stem MS63 PCGS. O-109, R.1. This is the usual early die state, although both dies show clash marks and rust pits, with a die crack through the base of the date. Later die states, attributed as O-109a, have a die crack through star 12 toward the neck, not present on this example. This Select Mint State specimen has rich gold toning over silver-gray surfaces with deeper gray peripheries. A few handling marks are evident, including a few small marks in the left obverse field. Overall, this is an attractive and highly appealing example of the type, date, and *Guide Book* variety. Population: 5 in 63, 3 finer (5/13). PCGS# 6073

BUST HALF DOLLARS

1809 O-115 Half Dollar, MS64+ Normal Lettered Edge

- 3151** 1809 Normal Edge MS64+ PCGS. O-115, R.2. An early die state with no evidence of a die crack that connects the first four stars. However, heavy flowlines suggest an intermediate die state. This piece has satin luster with deep gray surfaces inside rings of green, blue, and gold, especially on the obverse. Population: 17 in 64 (1 in 64+), 5 finer (6/13), for all varieties. NGC ID# 24ES, PCGS# 6092

1813 Half Dollar, MS64 50C Over UNI Variety

- 3152** 1813 50C Over UNI MS64 NGC. O-101a, R.4. The reverse die was blundered. The engraver began to enter UNI in the wrong place relative to the eagle, which had already been punched into the die. The letters were then lapped but traces are evident even in the present later die state. This is a high grade example with dusky gunmetal-gray and olive toning. Satiny and remarkably free from contact. Liberty's profile is widely strike doubled. Census: 5 in 64, 1 finer (6/13). NGC ID# 24F2, PCGS# 6104

1817/3 O-101a Half Dollar, MS64 Census Level Specimen

- 3153** 1817/3 MS64 PCGS. CAC. O-101a, R.2. The late die state with a die crack curving down through ME to the ring, eventually reaching the olive leaves. Another crack crosses the olive leaves to UN and the border.

Only about a dozen Mint State examples of this overdate variety have appeared in recent auctions, according to Stephen Herrman's database, and only two of those are clearly finer than this specimen. Both sides exhibit full satin luster beneath intense blue-green and iridescent toning with brilliant russet and gold along the obverse and reverse borders. Population: 4 in 64, 0 finer (6/13). NGC ID# 24F7, PCGS# 6111

**1823 Capped Bust Half, MS64+
O-106a, Tampered 3 Variant**

- 3154** 1823 MS64+ PCGS. CAC. O-106a, R.2. The obverse is known as the Tampered 3, with a distinctive shape unlike any others. This piece rivals the finest known examples of the variety, with lustrous and frosty silver surfaces that host delicate gold and iridescent toning. Population: 45 in 64 (1 in 64+), 5 finer (6/13). NGC ID# 24FJ, PCGS# 6131

**1825 O-110 Half Dollar, MS65+
Census Level Specimen**

- 3155** 1825 MS65+ PCGS. CAC. O-110, R.2. This stunning Gem is likely one of the four or five finest examples of the 1825 O-110 half dollar, based on Census data in the Overton reference alongside auction data in Stephen Herrman's record. This specimen has full cartwheel luster with satin surfaces beneath gold and iridescent toning, exhibiting vivid sky-blue at the borders. Population: 13 in 65 (1 in 65+), 6 finer (5/13), for all 1825 varieties. NGC ID# 24FL, PCGS# 6142

**1826 Capped Bust Half, MS66
Condition Census Specimen, O-118a**

- 3156** 1826 MS66 PCGS. CAC. O-118a, R.1. The reverse has die cracks through the tops of NITED STATES and MERICA on this late die state Premium Gem. Stephen J. Herrman lists three MS66-graded examples in his auction survey, two MS66 NGC specimens and one MS66 PCGS example. This example is the piece he lists as O-118 based on the July 2008 Stack's description (then in an NGC holder), where they failed to mention the die state. These three finest certified examples are all properly attributed as O-118a.

Both sides have vibrant mint luster with satin surfaces and sharp design motifs, with lovely violet and light blue peripheral toning that accents the golden surfaces, creating excellent eye appeal. Population (for all 1826 varieties): 5 in 66, 2 finer (5/13). NGC ID# 24FM, PCGS# 6143

REEDED EDGE HALF DOLLARS

1837 Reeded Edge Half, MS64
Smoky-Gold Surfaces

3157 1837 MS64 PCGS. CAC. The 1837 second-year Reeded Edge halves are popular with type collectors, as the first-year 1836 pieces are so much more expensive grade-for-grade (far fewer were struck). Together they constitute the entire two-year subtype with 50 CENTS on the reverse. This near-Gem show great eye appeal over smoky-gold surfaces with soft yet complete luster and minimal marks. Population: 87 in 64 (3 in 64+), 26 finer (6/13). NGC ID# 24G4, PCGS# 6176

1839 Half Dollar, MS64
Final Appearance of Reich's Design

3158 1839 MS64 PCGS. This Reeded Edge half dollar is the final issue of the Capped Bust design. The new Christian Gobrecht Seated Liberty half dollars were introduced later in the year. This piece has ivory surfaces with brilliant, satin mint luster and bold design motifs. An exceptional example. Population: 34 in 64, 6 finer (6/13). NGC ID# 24G6, PCGS# 6179

SEATED HALF DOLLARS

1841-O Half Dollar, MS64+
Sole MS64+ at PCGS
None Finer at That Service

3159 1841-O MS64+ PCGS. CAC. Both sides have distinct border toning, rich ocean-blue with areas of green on the obverse and violet on the reverse. The interior obverse is frosty with just a thin layer of pale gray toning over the silver surface, while the reverse has a richer medium-gray hue. Sharply struck devices are frosted on the high points. A die crack passes from the rim through the first S in STATES and on to the eagle's beak. While 401,000 1841-O quarters were struck, the date is a significant condition rarity in near-Gem and better because the vast majority of examples went into commerce in and around New Orleans, then one of the busiest ports in the United States. Population: 14 in 64 (1 in 64+), 0 finer (6/13). NGC ID# 24GS, PCGS# 6237

**1843 Half Dollar, Originally Toned MS65
Original Surfaces, Bright Mint Luster**

- 3160 1843 MS65 PCGS. CAC. WB-101.** Unlike many of James Longacre's die-punching efforts from the 1840s, this particular coin is one of his better productions with no obvious repunching or mispunching of the digits in the date. Even though 3.8 million pieces were minted, there are predictably few known in high grades today. Among PCGS-certified coins, only one other Gem has been graded and none are finer (6/13). The toning is several layers deep on each side, mainly presenting gray-rose in the centers with sketchy pale blue around the margins. Even through the rich layers of original toning, the mint luster is thick and vibrant. The strike details are strong in all areas as well, and there are no obvious abrasions, nor would any be expected at this grade level. NGC ID# 24GX, PCGS# 6243
-

**1853 Seated Liberty Half, MS65
Popular Arrows and Rays Design**

- 3161 1853 Arrows and Rays MS65 NGC.** The weight of all silver denominations except the dollar was lowered in 1853 to reflect the increased value of silver to gold on the international market. A pair of arrowheads was added to the design on either side of the date and a glory of rays was added to the reverse on the half dollar to signify the change, creating a short-lived but extremely popular design type for present-day collectors.
- The present coin is a delightful Gem that exhibits sharply defined design elements in most areas, with just a touch of softness on some star centrils. The well-preserved surfaces radiate vibrant mint luster and show a few hints of pale gold toning. No mentionable surface flaws are evident, but some interesting clash marks are present on both sides. The 1853 Arrows and Rays half is rarely seen in higher grades. Census: 27 in 65, 15 finer (6/13). NGC ID# 24JJ, PCGS# 6275
-

**1855-S Arrows Half Dollar, XF40
Low-Mintage First S-Mint Issue**

- 3162 1855-S Arrows XF40 NGC.** After striking only gold coins in 1854, the San Francisco Mint coined 129,950 Seated Liberty half dollars in 1855, all with the popular Arrows design. This coin shows noticeable, but light, wear on the design elements and the lightly marked surfaces are blanketed in shades of pinkish-gray patina. Census: 4 in 40, 26 finer (6/13). NGC ID# 24JR, PCGS# 6284

**1857 Seated Half, MS65+
Only One Finer Coin at PCGS**

- 3163 1857 MS65+ PCGS.** The 1857 Seated Liberty half dollar was produced in large numbers, but few examples can match the quality and appeal of this high-end Gem. The design elements are well-detailed, with a touch of softness on the upper obverse, and satiny mint luster shines through attractive shades of green, blue, and gold toning. Population: 6 in 65+, 1 finer (6/13). NGC ID# 24HS, PCGS# 6290

**1873-CC Seated Half Dollar, AU58
Arrows, WB-102 Variety**

- 3164 1873-CC Arrows AU58 NGC. WB-102.** Half dollars were struck both with and without arrows at the date at the Carson City Mint in 1873. This coin displays the popular Arrows design and a small CC mintmark, with an open 3 in the date. The well-detailed design elements show just a touch of wear and the lightly abraded surfaces retain traces of original mint luster. Census: 7 in 58, 18 finer (6/13). NGC ID# 24L8, PCGS# 6344

**1877 Half Dollar, MS66
Important Condition Rarity**

- 3165 1877 MS66 PCGS.** The obverse has faint die cracks around the date, while the reverse has more prominent cracks, especially below the eagle. This Premium Gem is a sensational example, and it is nearly the finest known as PCGS and NGC have only graded seven finer pieces. Both sides have intense frosty mint luster shining through light gold toning. Population: 23 in 66 (5 in 66+), 2 finer (6/13). NGC ID# 24KK, PCGS# 6355

**1877-CC Seated Half, MS65
Great Carson City Type Coin**

- 3166 1877-CC MS65 NGC.** This Gem 1877-CC Seated half dollar is largely untoned save for a daub of color on the upper reverse, but the silver-white surfaces offer great luster and much eye appeal throughout both sides. Contact marks are minimal, and the strike is better than average, although stopping short of full. Census: 19 in 65, 7 finer (5/13). NGC ID# 24KL, PCGS# 6356

1879 Half Dollar, MS67+
Low-Mintage Date, Sole + Certified Coin

- 3167 1879 MS67+ PCGS. CAC.** The effect of the passage of the Bland-Allison Act of 1878 can be seen immediately on quarters and halves. There simply was not enough manpower (or presses) in the mints to strike both the dollars required by the act as well as the minor coinage needed for circulation. The 1878 issue was the last large-mintage striking through the end of the series in 1891. Only 4,800 halves were struck in 1879. This is one of the finest. The fields display the usual semiprooflikeness with pale golden centers that are surrounded by deeper golden-brown and blue around the margins. Fully struck throughout. Population: 15 in 67 (1 in 67+), 2 finer (5/13). NGC ID# 24KS, PCGS# 6361

Colonel O.C. Bosbyshell, Philadelphia Mint Coiner

PROOF SEATED HALF DOLLARS

1848 Seated Liberty Half Dollar, PR65 Deep Multicolor Toning Finest Certified at PCGS

3168 1848 PR65 PCGS. CAC. The 1848 proof half dollar was produced a full decade before the Mint began their commercial proof set offerings in 1858 and no official records were kept of its mintage. The production total was undoubtedly small, as the coin was noted as a rarity in proof format even in the 19th century. Perhaps half a dozen 19th century collectors included specimens in their collections, mostly as part of complete silver and minor proof sets they had acquired from the Mint. Massachusetts collector Matthew Stickney actually had both a single example and another specimen in a complete proof set when his collection was offered by Henry Chapman in 1907.

Virtually all of the proof sets were later broken up by collectors or coin dealers in the 20th century. Today the 1848 proof Seated dollar has a surviving population of perhaps a half dozen examples, corresponding well with the number of specimens known in proof sets in earlier times. Randy Wiley and Bill Bugert, in their *Complete Guide to Liberty Seated Half Dollars*, state: "Less than 4 known." Walter Breen (1989), on the other hand, lists six examples, including one in the Smithsonian Institution. Similarly, David Akers (1998) estimates five or six specimens, while PCGS estimates 4-6 specimens are extant.

The present coin is probably the finest known example of this rare date. The pleasing surfaces display superb toning. A delicate blend of russet, sky-blue, violet, and greenish-gold resides on the obverse, yielding to mostly soft gold-orange and sky-blue on the reverse. Satiny devices stand out against mirrored fields as the coin is tilted just slightly beneath a light source, and the design features are fully struck. No marks of consequence are visible on the impeccably preserved surfaces, enhancing even more the coin's outstanding eye appeal. Population: 1 in 65, 0 finer (6/13). PCGS# 6392

**1858 Seated Liberty Half Dollar, PR65
First Commercial Proof Set Offering**

- 3169 1858 PR65 NGC.** A sharply detailed Gem from the first year of commercial proof set offerings, this coin displays deeply mirrored fields that are blanketed in shades of pale gold and lavender-blue toning. From a tiny proof mintage of about 300 pieces. Census: 7 in 65 (1 in 65+), 4 finer (6/13). NGC ID# 27TH, PCGS# 6412

**1862 Half Dollar, PR65 Cameo
Boldly Struck**

- 3170 1862 PR65 Cameo PCGS.** This 1862 Gem Cameo Seated half dollar is one of just six examples certified by PCGS, with none finer at that service (6/13). Frosty motifs appear to float over the deep watery fields on both sides, and the features are fully struck throughout. In sum, this piece yields great overall eye appeal. A toning spot just left of the reverse shield will help pedigree this coin. PCGS# 86416

**1865 PR66 No Motto Half Dollar
Ex: Garrett With 19th Century Pedigree**

- 3171 1865 PR66 NGC.** Ex: Garrett. Only 500 proofs were struck of this final year of the No Motto design. Both sides of this brightly mirrored piece are toned in splendid colors. Described in the Garrett catalog as: "Obverse has light golden hues interspersed with dappled magenta and blue. Reverse has mottled light brown, gold, magenta and blue colors. Possibly ex: Redlich Collection (Scott Stamp & Coin Co., (3/1878), lot 571, part of nine-piece proof set; Scott Stamp & Coin Co. (12/1878), part of a nine-piece proof set, lot 591; Garrett I (Bowers and Ruddy, 11/1979), lot 349. NGC ID# 27TS, PCGS# 6419

**1871 Seated Liberty Half, PR67
Contrasted Obverse**

- 3172 1871 PR67 NGC.** In 1988 Walter Breen identified four minor varieties of the proof 1871 half dollars in his *Proof Encyclopedia* from among the 960 pieces struck for the issue; this example appears to be his "weak incomplete stripes [reverse] die of 1870" with the 71 on the obverse apart. His classification was later debunked by Wiley-Bugert who found no variation in the types to justify separate variety listings. The present specimen is an unmarked Superb Gem that is close to a Cameo designation on the obverse, which shows lavish mint frost on silvery centers, although the reverse falls a bit short of the required contrast level. The rims on each side display accents of copper-amber color, and the strike is uniformly bold throughout. There are no contact marks of any import. Census: 2 in 67, 1 finer (6/13). NGC ID# 27U6, PCGS# 6429

**1872 Half Dollar, PR65+ Cameo
Rare Example With Contrasted Surfaces**

- 3173 1872 PR65+ Cameo PCGS. CAC.** The 1872 proof Seated Liberty half dollar, from a mintage of 950 pieces, is seldom encountered in grades above the Gem level, especially in Cameo format. The current high-end Gem displays light golden-tan color and exquisitely struck design features. A couple of minute marks above TR in TRUST will help to identify this piece. Population: 5 in 65 (1 in 65+) Cameo, 2 finer (6/13). PCGS# 86430

**1873 Arrows Half Dollar, PR65
Always With Open 3**

- 3174 1873 Arrows PR65 PCGS.** All 1873 With Arrows half dollars have an Open 3 in the date, as do all other With Arrows coins. This example is sharply struck with considerable contrast, although there is no designation assigned for that contrast. Faint hairlines and contact marks limit the grade. The centers exhibit delicate gold toning, with a frame of magenta and light blue on the obverse. The reverse is similar, with a thicker frame of greenish-blue toning. Population: 11 in 65, 1 finer (6/13). NGC ID# 27UU, PCGS# 6434

1880 Seated Half, PR65 Deep Cameo
The Only PCGS-Certified Deep Cameo

- 3175** 1880 PR65 Deep Cameo PCGS. Struck at the beginning of this interesting, low-mintage decade (that actually began in 1879), mintages were down and remained there through the end of the series. Of the 1,355 proofs struck in 1880, few can equal the depth of mirroring seen in the fields on this piece. The devices are nicely frosted as well, yielding strong cameo contrast on each side. The surfaces are mostly brilliant except for a thin ring of deep russet around both obverse and reverse. Population: 1 in 65 Deep Cameo, none finer (6/13). PCGS# 96441

1883 Half Dollar, PR66 Cameo
Extraordinary Eye Appeal

- 3176** 1883 PR66 Cameo PCGS. CAC. The proof half dollars of 1883 saw a generous mintage of 1,039 pieces, a relatively large number of which are available to collectors today. Cameos are a different story. PCGS has graded 19 Premium Gem Cameos, including, including two Deep Cameos. The current PR66 Cameo displays whispers of russet and reddish-gold at the margins. The design elements are sharply impressed and both sides have been well cared for. This piece exudes exemplary eye appeal. Population: 15 in 66 (2 in 66+) Cameo, 4 finer (6/13). PCGS# 86444

1890 Half Dollar, PR67 Cameo
Concentrically Toned Obverse

- 3177** 1890 PR67 Cameo PCGS. The reverse shows smoke-gray rim toning with a silver center, while the obverse displays more blatant concentric rings of blue and pinkish patina. There is considerable contrast on each side, sufficient for the Cameo designation, despite the moderate obverse toning. Impeccable surface preservation explains the numeric grade. The 590 proofs made of this date complement an also-low 12,000 circulation strikes; the number manufactured for circulation would finally recover in 1891 to 200,000 pieces, the last year of the Seated half design. Population: 4 in 67 (2 in 67+) Cameo, 1 finer (6/13). PCGS# 86451
-

BARBER HALF DOLLARS

1895-S Barber Half Dollar, Appealing MS65 An Important Semikey Date

- 3178 1895-S MS65 PCGS. CAC.** A little over 1.1 million 1895-S Barber halves were struck. Today the issue is a series semikey in all grades, and is especially challenging in the higher Mint State grades. Soft reddish-brown patina around the margins frames the silver-gray centers of this sharply struck Gem. The lustrous surfaces are minimally marked. The CAC sticker affirms the coin's strong eye appeal. Population: 10 in 65 (1 in 65+), 5 finer (6/13). NGC ID# 24LU, PCGS# 6473

1915-D Barber Half Dollar, MS66 Excellent Final-Year Type Coin

- 3179 1915-D MS66 PCGS. CAC.** Attractively toned in shades of sea-green, lavender-gray, and amber, this impressive Premium Gem displays vibrant mint luster and well-detailed design elements, with subtle aesthetic appeal. From the last year of the Barber design. Population: 16 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

1893 Barber Half Dollar, PR67 Cameo Only 792 Pieces Struck

- 3180 1893 PR67 Cameo NGC.** From a tiny proof mintage of 792 pieces, this spectacular Superb Gem exhibits sharply detailed design elements, with just a touch of softness on the right shield point. The deeply mirrored brilliant fields contrast boldly with the frosty devices and eye appeal is terrific. Census: 11 in 67 Cameo, 1 finer (6/13). PCGS# 86540

1893 PR65+ Deep Cameo Half Dollar Sharply Contrasted on Each Side

- 3181 1893 PR65+ Deep Cameo PCGS.** Only 792 proof Barber halves were struck in 1893. While PCGS has graded a fair number of Cameo pieces, Deep Cameos are in short supply. The present high-end Gem Deep Cameo displays stunning white-on-black contrast and sharply struck design elements. This is an extremely attractive specimen in all respects. Population: 4 in 65 (2 in 65+) Deep Cameo, 6 finer (6/13). PCGS# 96540

1897 Half Dollar, PR66 Cameo

- 3182 1897 PR66 Deep Cameo PCGS.** An amazing stark-white Barber half dollar with thick mint frost on the devices and deep mirrored fields. Both sides are boldly detailed and entirely void of toning. Examination with a loupe reveals only a few trivial marks on each side. Population: 9 in 66 Deep Cameo, 16 finer (6/13). PCGS# 96544

1901 Half Dollar, PR66 Interesting Tonal Patterns

- 3183 1901 PR66 PCGS. CAC.** The 1901 is not a notably scarce proof, but few have the extensive colors backed up by the deep mirrors seen on each side of this Gem. Rich shades of blue, yellow, and rose are seen on both obverse and reverse, in varying degrees of intensity, and there is a curious light gray oval in the center of the obverse. Sharply struck throughout. Population: 27 in 66 (2 in 66+), 12 finer (5/13). NGC ID# 24P5, PCGS# 6548

1905 Barber Half, PR67
Fully Struck With Rich Patina

- 3184 1905 PR67 PCGS.** One of the few finest survivors of this midseries Barber half entry, the present Superb Gem 1905 half dollar displays a rich palette of olive, gray, and iridescent (but pastel) aqua, lilac, and violet, along with a full proof strike even on the upper-right shield corner. Population: 12 in 67, 1 finer (6/13). NGC ID# 24P9, PCGS# 6552

1912 Half Dollar, PR66 Cameo
Lightly Toned and Well-Contrasted

- 3185 1912 PR66 Cameo PCGS. CAC.** Generous reflectivity occurs on each side of this Premium Gem proof 1912 half dollar, providing good contrast against the frosted devices on surfaces that show a light blush of pink on each side. A narrow arc of grayish patina covers a portion of the reverse. The sharp proof strike produces essentially full detail throughout. Population: 2 in 66 (1 in 66+) Cameo, 2 finer (6/13). PCGS# 86559

WALKING LIBERTY HALF DOLLARS

1919-D Half Dollar, MS64
Rare Any Finer

- 3186 1919-D MS64 PCGS Secure. CAC.** The 1919-D half dollar ranks among the most prized Walking Liberty condition rarities, both in high-end circulated grades and across the Mint State spectrum. MS64 is the last grade accessible to more than a handful of collectors, as PCGS has certified just 12 coins as MS65 or finer (6/13). This high-end Choice example is frosty with elements of orange, gold, and pink toning over portions of the silver surfaces. The strike is soft on the high central devices, as commonly seen, but with few individually significant marks. A handful of fine abrasions in the right obverse field contribute to the grade. Great eye appeal for a coin not designated as a Gem. NGC ID# 24PZ, PCGS# 6578

**1920-D Walking Liberty Half, MS64
Scarce Issue in High Grade**

- 3187 1920-D MS64 PCGS. CAC.** Shades of lavender-gray, ice-blue, and champagne-gold toning blanket the surfaces of this attractive Choice specimen. The design elements are well-detailed, with the usual touch of softness on the central obverse. Strong mint luster shines through the toning and eye appeal is outstanding. NGC ID# 24R4, PCGS# 6581

**1933-S Walking Liberty Half, MS66
Well-Produced Low-Mintage Issue**

- 3188 1933-S MS66 PCGS.** From a small mintage of nearly 1.8 million pieces, the 1933-S Walking Liberty half dollar is known as a well-produced issue. This impressive Premium Gem features well-detailed design elements and vibrant mint luster on both sides. The pleasing surfaces are enhanced by shades of lavender, gold, and amber patina. Population: 90 in 66 (5 in 66+), 8 finer (5/13). NGC ID# 24RE, PCGS# 6591

**1933-S Walking Liberty Half, MS66+
Sharply Detailed and Lustrous**

- 3189 1933-S MS66+ PCGS.** This high-end Premium Gem possesses tremendous eye appeal, with razor-sharp definition on all design elements and especially vibrant mint luster on both sides. Close inspection with a loupe reveals no mentionable imperfections on the brilliant surfaces. Population: 90 in 66 (5 in 66+), 8 finer (6/13). NGC ID# 24RE, PCGS# 6591

**1937 Half Dollar, MS68
Remarkable High-Grade Business Strike**

- 3190 1937 MS68 PCGS. CAC.** At first glance, this incredibly preserved coin could be mistaken for a proof, so clean and softly reflective are the fields on each side. On further inspection, it becomes clear that the surface is that of a business strike, not sufficiently mirrored for a proof, but it is nonetheless one with a remarkable lack of contact marks and other distractions. The strike is also not as bold as one would expect on a proof, but nonetheless quite sharp, and a loupe will show a few tiny ticks that also attest to business strike status. Soft pinkish hues and hints of iridescent color appear scattered about. A remarkably attractive coin, one of the few finest certified. Population: 3 in 68, 0 finer (6/13). NGC ID# 24RR, PCGS# 6601

**1946 Walking Liberty Half, MS67+
One of Two Finest at PCGS**

- 3191 1946 MS67+ PCGS. CAC.** The 1946 Walking Liberty half is common through the Gem level of preservation, as seen by the thousands of coins that have been certified. The population drops significantly in Premium Gem, but specimens can still be obtained with little difficulty in that grade. Superb Gems, on the other hand, are challenging, with fewer than 100 certified by PCGS and NGC combined. Whispers of soft rainbow toning make occasional visits to the margins of this high-end Superb Gem. Pleasing luster cascades over both sides, each of which exhibits well-struck devices. This piece is one of two MS67+ coins graded by PCGS (6/13). NGC ID# 24SJ, PCGS# 6627

**1947-D Walking Liberty Half, MS67
Excellent Short-Set Registry Coin**

- 3192 1947-D MS67 PCGS.** Faint golden overtones visit softly frosted silver surfaces that brim with luster. While overall definition is a trifle soft, particularly on Liberty's head and branch hand, the remarkably smooth surfaces more than make up any deficit in eye appeal. A small spot of deeper color is visible on a central ray of the sun. This final-year issue has a mintage of just over 3.9 million pieces, of which only 10 have been graded MS67 by PCGS with none MS67+ or finer (6/13), making this coin a Registry essential for short-set and full-series collectors alike. NGC ID# 24SN, PCGS# 6631

**PROOF WALKING LIBERTY
HALF DOLLARS**

1936 Walker, Deeply Mirrored PR67

- 3193 1936 PR67 NGC.** The fields on this early proof glimmer brightly and deeply, more so than on most 1936 proofs. With a little imagination, slight contrast can also be seen against the lightly frosted devices. Pale golden-yellow patina covers each side of this essentially perfect proof Walker. Census: 76 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR67
Only One Finer Coin at PCGS**

- 3194 1936 PR67 PCGS. CAC.** The Philadelphia Mint resumed commercial proof set offerings in 1936, after a two-decade hiatus. Thus, the 1936 proof Walking Liberty half dollar is the first proof issue of the series, with a meager reported mintage of 3,901 pieces. The coins were produced with an all-brilliant finish, precluding much in the way of cameo contrast. This impressive Superb Gem displays razor-sharp definition on all design elements, with deeply mirrored fields and a few hints of pale gold toning. Close inspection reveals no mentionable distractions and eye appeal is outstanding. Population: 28 in 67, 1 finer (6/13). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLAR

1957 Franklin Half, MS67 Full Bell Lines
Infrequently Seen Fully Struck

- 3195** 1957 MS67 Full Bell Lines PCGS. CAC. Most 1957 Franklin half dollars lack Full Bell Lines. The fully struck Superb Gem offered in the present lot is thus a highly desirable coin. Violet, orange, and bluish-gray patina takes on slightly deeper hues on the reverse, and the lustrous surfaces have been well cared for. Population: 13 in 67 Full Bell Lines, 0 finer (6/13). NGC ID# 24TE, PCGS# 86672

PROOF FRANKLIN HALF DOLLAR

1950 Half Dollar, PR66 Cameo
Rare and Undervalued

- 3196** 1950 PR66 Cameo PCGS. CAC. The year 1950 marked the resumption of proof coins at the Philadelphia Mint after a lapse of eight years; 51,386 proof sets were struck in 1950. Rick Tomaska (2011) writes that the quality of the 1950 proof Franklins is very poor due to most exhibiting shallow proof mirrors and pitting on the high points. He further contends that "deeply mirrored gem 1950 Proof Franklins are rare, and appear to be very undervalued at current price levels." The Premium Gem Cameo in the present lot shows considerable field-device contrast and impeccably preserved surfaces. This piece is well deserving of the CAC sticker. Population: 27 in 66 Cameo, 8 finer (6/13). NGC ID# 27VA, PCGS# 86691

EARLY DOLLARS

1795 Flowing Hair Dollar, VF20
Scarce B-7, BB-18 Pairing

- 3197** 1795 Flowing Hair, Three Leaves VF20 PCGS. B-7, BB-18, R.3. Bowers Die State I. More than 80% of all Three Leaves Flowing Hair dollars are B-5, which gives the scarcer B-7 a premium among specialists. This is a deeply toned VF example that displays blended sea-green, dove-gray, and golden-brown shades. A few faint adjustment marks, as made, are noted near Liberty's jaw. The reverse is refreshingly unabraded, while the obverse has faded marks beneath the chin and the L in LIBERTY. Ex: ANA Auction (*Superior*, 8/1975), lot 895, flip included. NGC ID# 24WZ, PCGS# 6852

1795 Flowing Hair Dollar, VF30
Three Leaves, B-6, BB-25

- 3198** 1795 Flowing Hair, Three Leaves VF30 NGC. B-6, BB-25, R.3. Blended tan-gold and stone-gray toning embraces this scarcer variety Flowing Hair dollar. The lower obverse margin displays adjustment marks, but these are of mint origin and fail to affect the technical grade. Post-strike contact is inconsequential. A nicely defined example that retains considerable wing plumage. NGC ID# 24WZ, PCGS# 6852

**1795 Flowing Hair Dollar, Choice AU
Three Leaves, B-5, BB-27**

- 3199 1795 Flowing Hair, Three Leaves AU55 NGC. B-5, BB-27, R.1.** Golden-brown and powder-blue patina adorns this exceptional Flowing Hair type coin. Design elements shimmer with luster and post-strike abrasions are inconsequential. Faint and unimportant mint-made adjustment marks are confined to the areas near Liberty's ear and the obverse margin at 5 o'clock. The strike is consistent aside from select portions of the dentils. Liberty's curls and the eagle's breast display wear commensurate with the designated grade. In recent decades, collector emphasis has focused less on 20th century series in favor of early Federal type, with the crown-sized silver dollar especially popular. NGC ID# 24WZ, PCGS# 6852

**1795 Dollar, Centered Draped Bust
B-15, BB-52, Very Fine**

- 3200 1795 Draped Bust, Centered VF20 PCGS. B-15, BB-52, R.2.** Bowers Die State IV. A charming cream-gray representative. No marks are remotely conspicuous, and the wings and curls exhibit ample detail for the VF20 level. 1795 was the inaugural year of the Draped Bust design, which featured a more mature portrait than its Flowing Hair predecessor. NGC ID# 24X2, PCGS# 6858

**1798 B-1, BB-82 Dollar, VF35
Small Eagle, 13 Stars
Scarce Transitional Issue**

- 3201 1798 Small Eagle, 13 Stars VF35 PCGS. B-1, BB-82, R.3.** The reverse has a radial die crack from the border through the second T of STATES to the wreath. This example has light gray on the devices, with grayish-tan fields, and steel toning near the borders. Scattered marks are consistent with the grade. An important transitional issue with the 13 star obverse and the Small Eagle reverse. NGC ID# 24X5, PCGS# 6867

**1799 Silver Dollar, AU55
B-21, BB-169**

- 3202 1799 7x6 Stars AU55 PCGS. B-21, BB-169, R.3.** Bowers Die State III. This lovely Heraldic Eagle type coin displays golden-brown and lilac-gray toning. Luster is plentiful at the borders and across the motifs. Evenly struck aside from the softness on the lower right (facing) wing characteristic of BB-169. Small marks are present but none detract from the impressive eye appeal. NGC ID# 24X7, PCGS# 6878

1800 Draped Bust Dollar, MS62
Scarce B-8, BB-188 Variety
Second Finest Recorded

3203 1800 MS62 PCGS Secure. B-8, BB-188, R.4. Bowers-Borckardt Die State III, with a delicate reverse die crack through AMER. The 1800 Draped Bust dollar claims a fairly large mintage of 220,920 pieces, with 16 die varieties known for the date. This coin represents the BB-188 variety, easily recognized by the die dot near the inside of the left upright of R in LIBERTY. The BB-188 is a scarce variety, with an estimated surviving population of 150-275 pieces in all grades.

This attractive specimen is recorded as the second finest among the Notable Specimens of BB-188, according to Dave Bowers in his revision of *The Encyclopedia of United States Silver Dollars 1793-1804* that was published earlier this year. The design elements are well-detailed, especially on the obverse, with just a touch of weakness apparent on the central reverse. Both sides display satiny mint luster, with iridescent shades of gold, gray, and ice-blue toning. This piece shows remarkably few contact marks for an early dollar. Population (not differentiated by variety): 7 in 62, 12 finer (6/13).

Ex: ANA Signature Sale (Heritage, 7/1994), lot 7121; Superior (1/1995), lot 951; Stack's (3/1993), lot 506; Queller Collection (Heritage, 4/2008), lot 2068; Hesselgesser Collection; Boston Rarities Sale (Bowers and Merena, 8/2010), lot 1056; FUN Signature Sale (1/2012), lot 3294; ANA Sale (Stack's-Bowers, 8/2012), lot 11485. NGC ID# 24X9, PCGS# 6887

1801 B-2, BB-212 Dollar, XF40
Scarcest Heraldic Eagle Date

- 3204 1801 XF40 PCGS. B-2, BB-212, R.3. Bowers-Borckardt Die State II. The clash marks around the date and the 12 easily visible arrows on the reverse identify the BB-212 variety. The pleasing surfaces are lightly abraded. This well-detailed specimen displays lustrous brilliant centers, with pink, blue, and gold at the peripheries. The 1801 is far scarcer than any other Heraldic Eagle issue of 1798 to 1803. NGC ID# 24XA, PCGS# 6893

1802 Narrow Date Dollar, B-6, BB-241
Near-Mint Example of Noted Type Issue

- 3205 1802 Narrow Date AU58 NGC. B-6, BB-241, R.1. Bowers-Borckardt Die State III, the usual state with lapped obverse die and missing hair detail. The 1802 Narrow Date is among the most accessible of all Heraldic Eagle reverse dollars, popular with both type and series enthusiasts. Though this near-Mint coin shows trifling wear across the high points, broadly semireflective luster remains largely intact with partial green-gold and blue overlay across a pale silver base. An example such as this points out the importance of grading by surface rather than detail, as the eagle's neck shows little of the usual feathering yet the power of the luster is undeniable. NGC ID# 24XB, PCGS# 6895

GOBRECHT DOLLARS

1836 Judd-60 Gobrecht Dollar
Die Alignment I, Proof AU Details

- 3206 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Repaired, Cleaned — NGC Details. Proof AU Details. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). Just the faintest trace of the diagonal die clash line is seen above the eagle's wing, but strong magnification and a good light are required to find it. Still, this is one of the later strikes, numbering 600 pieces. The obverse fields are a bit uneven from repair, and the surfaces on each side are dull gray from cleaning. The only mark of note crosses the neck and lower wing of the eagle.

Christian Gobrecht

**1839 Restrike Gobrecht Dollar, Toned PR63
Judd-104, Minimal Reverse Die Cracking**

- 3207 1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR63 NGC.** Silver. Reeded Edge. Die Alignment IV (the head Liberty is opposite the F in OF). The reverse shows just one area of die cracking, through the tops of MERI. There is no evidence of cracks connecting TE or through the bottom of LAR. If we neatly divide Originals and Restrikes into periods with no die cracks (Originals struck in 1839) and those with reverse die cracks (Restrikes from the late 1850s and 1860s), then this piece would fall into the early Restrike period before all the cracks developed.

This is an example whose obverse is noticeably brighter than the reverse. The color on each side is also different with deeper shadings on the reverse. The obverse was obviously cleaned at one time, the reverse is not obviously hairlined. Deep gray-blue and golden shadings are seen over each side. The strike is strong on Liberty's head but less well-defined on the foot, star centrils, and highest point of the eagle's breast. A couple of navy-blue spots of color are seen below the eagle and another above its tailfeathers, and there is an identifying small area of pinscratching also located in the field below the eagle. PCGS# 11446

SEATED DOLLARS

**1855 Seated Dollar, AU53
Elusive Low-Mintage Date**

- 3208 1855 AU53 NGC.** From a meager reported mintage of 26,000 pieces, the 1855 Seated Liberty dollar is an elusive date in all grades and conditions. This lightly circulated example shows traces of prooflike reflectivity under mottled shades of bluish-gray and sea-green toning. Census: 4 in 53, 42 finer (6/13). NGC ID# 24YU, PCGS# 6943

**1859-O Seated Dollar, MS63
Nice Mint Luster**

- 3209 1859-O MS63 PCGS. CAC.** Sharply detailed in most areas, this attractive Select specimen shows a touch of softness on some star centrils. The mostly brilliant lustrous surfaces show a few hints of pale gold toning and a minimum number of minor contact marks for the grade. Population: 57 in 63, 21 finer (6/13). NGC ID# 24YY, PCGS# 6947

**1860-O Seated Dollar, MS64
Light Multicolor Toning**

- 3210 1860-O MS64 PCGS. CAC.** One of the more available issues of the series, the 1860-O Seated Liberty dollar is still elusive in high grade. This attractive Choice example exhibits well-detailed design elements and slightly subdued mint luster under shades of lavender-gray, sea-green, and blue toning. Population: 35 in 64, 9 finer (6/13). NGC ID# 24Z3, PCGS# 6950

1860-O Seated Liberty Dollar, MS65
Well-Preserved Branch Mint Issue
None Numerically Finer at PCGS

3211 1860-O MS65 PCGS. The 1860-O Seated Liberty dollar claims a substantial mintage of 515,000 pieces, making it one of the more available issues of the series and a favorite choice of type collectors. The 1860-O was primarily intended for use in the China trade, and most of the mintage was probably sent to the Orient near the time of issue. However, it seems that a considerable number remained in domestic hands. Several thousand examples were still in government storage facilities in the 1960s and the issue was well-represented in the great Treasury releases of 1962-1964. The coins from the Treasury hoard were almost all in lower Mint State grades, due to excessive bagmarks. Q. David Bowers states, "I have never seen an MS-64 or MS-65 coin from the Treasury hoard. When such coins come on the market they are usually from cabinets formed years earlier."

Unfortunately, few 19th century collectors were interested in branch mint coins, so few old-time cabinets of the type Bowers refers to included an example of the 1860-O. One early auction appearance was in the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), lot 323, "1860 From the Orleans mint, very fine, scarce." The coin realized \$2.30, to Thomas Warner. The 1860-O remains very rare in Gem condition or better, and the last time Heritage offered a really high-grade specimen was lot 966 of the Dallas Signature Auction in November 2007. The MS66 NGC coin in that offering realized \$63,031.50.

The present coin is a delightful Gem, one of the finest certified at PCGS. The design elements are sharply detailed in most areas, with just a touch of softness on some star centrils. The pleasing surfaces display strong satiny mint luster under attractive shades of pink, gold, and amber patina. Only a few minor contact marks are evident and eye appeal is outstanding. Population: 9 in 65 (1 in 65+), 0 finer (6/13). NGC ID# 24Z3, PCGS# 6950

**1864 Select Seated Dollar
Rare Civil War Issue**

3212 1864 MS63 PCGS. CAC. The 1864 Seated Liberty dollar issue is a rare one, first due to the sparse mintage of 30,700 pieces, second to the extensive hoarding of what little silver was coined during the Civil War years, and third to exporting and melting. The silver-gray surfaces of this Select example display soft luster and well-struck design elements. A few scattered light marks are not offensive. Population: 6 in 63, 14 finer (6/13). NGC ID# 24Z7, PCGS# 6954

**1870-CC Seated Dollar, AU58
First Year of Carson City Mint**

3213 1870-CC AU58 NGC. Six years after Nevada achieved statehood in 1864, a mint opened in Carson City, Nevada, to serve the precious metal mines nearby, particularly those tapping the famous Comstock Lode. While the Morgans are the most famous dollars struck in the "Silver State," Trade dollars and a brief run of Seated dollars preceded them. This near-Mint example comes from the 1870-CC issue that started it all, mintage 12,462 pieces. Still-lustrous fields are gold, lavender, and sky-blue on the obverse with deeper hues across the reverse and just a touch of rub across the high points on each side. NGC ID# 24ZE, PCGS# 6964

**1872 Seated Liberty Dollar, MS64
Excellent Type Coin**

3214 1872 MS64 PCGS. The 1872 Seated Liberty dollar was produced in large numbers, but the date is surprisingly difficult to locate in high grade. This attractive Choice specimen displays well-detailed design elements and lightly marked lustrous surfaces, under shades of champagne-gold and dove-gray patina. Population: 41 in 64 (4 in 64+), 3 finer (6/13). NGC ID# 24ZJ, PCGS# 6968

*Henry Rice, Carson City Mint
Superintendent, 1870-1877*

PROOF SEATED DOLLARS

1851 Seated Dollar Restrike, PR63 Cameo Well-Contrasted Rarity

- 3215 1851 Restrike PR63 Cameo PCGS.** In 1851 the gold was flowing from California, driving down its price relative to silver and upsetting any bimetallic balance the U.S. monetary system once had enjoyed. While gold dollars were made by the millions, their silver Seated counterparts had an unknown but doubtless tiny mintage that inspired the creation of proof restrikes such as this Cameo Select specimen. Both sides have clear contrast through semitransparent golden luster that is at its most opaque near the rims. Lightly hairlined through the fields with a line of shallow reed marks to the left of Liberty's rock but high all-around visual appeal for the grade. Population: 3 in 63 Cameo, 1 finer (5/13). PCGS# 86993

1856 Seated Dollar, Elusive Proof Striking Strongly Toned PR62 Specimen

- 3216 1856 PR62 PCGS.** The exact mintage of proof Seated dollars for 1856 remains a topic of informed speculation, but it is beyond question that such coins are rare today regardless of condition. This PR62 survivor has much to offer the collector. Boldly impressed devices emerge from strongly reflective fields, both aspects draped in dappled gold and blue-green patina. Though a number of hairlines run through the fields and several contact marks are noted at the right obverse field and elsewhere, the overall eye appeal remains solid for the grade. Population: 5 in 62, 20 finer (6/13). NGC ID# 252A, PCGS# 6999

**1856 Seated Liberty Dollar, PR65
Tied for Finest at PCGS**

3217 1856 PR65 PCGS. Proof Seated dollars are the most popular coins in the entire series of silver proofs, a situation that remains unchanged since the time of issue. While mintages for the proof dollars were higher than the subordinate denominations, demand was and still is proportionately higher. The PCGS website suggests a surviving population of 50 to 75 coins in all grades, with this coin being among the finest certified.

The present coin is a gorgeous Gem with excellent contrast between the mirrored fields and frosty devices. A few faint hairlines and contact marks are hidden beneath the appealing gold, lilac, and blue toning that is intermingled on both sides, including small nicks below CA of AMERICA, useful for pedigree tracking. Counted among the finest known examples with fully original toning and exceptional eye appeal. Population: 2 in 65, 0 finer (6/13). NGC ID# 252A, PCGS# 6999

**1859 Seated Liberty Dollar, PR64
800 Pieces Struck, Fewer Issued**

3218 1859 PR64 ANACS. Mint records indicate 800 proof Seated Liberty dollars were struck in 1859, but many specimens went unsold and probably no more than 450 examples were actually distributed. This well-detailed Choice example features reflective surfaces with pale gold toning on both sides. NGC ID# 252D, PCGS# 7002

**1860 Silver Dollar, PR65 Cameo
Questionable Mintage Figure**

3219 1860 PR65 Cameo PCGS. The *Guide Book* reports a mintage of 1,330 proof silver dollars in 1860, a figure that seems questionable. Only two other issues (1861 and 1870) had proof mintages of 1,000 coins, and even those production quantities seem extraordinary, given the number of survivors. PCGS has certified 198 proof 1860 silver dollars, compared to 213 proofs of 1863 with a mintage of only 460 coins. The actual mintage of the 1860 was probably in the range of about 500 proofs.

One of those proofs is the Gem Cameo specimen offered in this lot, with extraordinary intermingled iridescence on the obverse and champagne toning with peripheral blue on the reverse. This is a spectacular specimen. Population: 8 in 65 Cameo, 4 finer (6/13). PCGS# 87003

**1868 Seated Dollar, PR66 Cameo
Magnificently Preserved and Toned**

3221 1868 PR66 Cameo NGC. The number of business strike dollars more than tripled from 1867 to 1868, but the number of proofs actually declined. With only 600 proofs issued, the 1868 is elusive in any grade. It is rare to see a proof Seated Liberty dollar with a Cameo designation, a fact supported by the population figures from NGC and PCGS. Between these two services 474 proof 1868 dollars have been graded, a number that undoubtedly includes many resubmissions. Of these just 69 are Cameos with another 13 awarded a Deep or Ultra Cameo designation — just over 17% of the total population. Even without the Cameo finish, few 1868 dollars exist at the PR66 level. This magnificent proof striking is bright and flashy. Each side has a near-brilliant centers that is surrounded by golden-rose at the margins, then deep blue. PCGS# 87016

**1864 Seated Dollar, PR64+ Cameo
Deeply Reflective Fields**

3220 1864 PR64+ Cameo PCGS. CAC. The later Civil War date 1864 is seldom available as a business strike or proof. This impressive Choice Cameo proof exhibits deeply mirrored fields and noticeably frosted devices. This date is rarely seen with contrast. Population: 15 in 64 (1 in 64+) Cameo, 2 finer (6/13). PCGS# 87007

**1871 Seated Liberty Dollar, PR64
960 Pieces Struck**

- 3222 1871 PR64 PCGS.** This Seated Liberty silver dollar is a splendid Choice proof specimen that features fully mirrored fields around its satin devices, with pale gold and iridescent toning on both sides that prevent a Cameo designation. Population: 49 in 64 (1 in 64+), 19 finer (6/13). NGC ID# 252T, PCGS# 7019

**1873 Seated Dollar, PR65
Deep Multicolor Toning**

- 3223 1873 PR65 NGC.** The obverse of this spectacular Gem proof is patinated in shades of lavender-gray, with highlights of blue and green, while the central reverse is lime-green and the peripheries are cobalt-blue. The design elements are sharply detailed and the fields are brightly reflective under the toning. Census: 17 in 65, 5 finer (5/13). NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

**1873 Trade Dollar, MS64
High-Grade First-Year Survivor**

- 3224 1873 MS64 PCGS. CAC.** Deep rose-pink tones fail to impede the generous luster on this first-year Trade dollar. A few small field marks account for the grade, along with a bold strike and good eye appeal. Most of the mintage of this issue was either exported and melted, or well-circulated if it survives today. Population: 46 in 64 (1 in 64+), 14 finer (6/13). NGC ID# 252W, PCGS# 7031

**1875 Trade Dollar, MS64+
Highly Lustrous, Lightly Toned**

- 3225 1875 MS64+ PCGS. CAC.** Type Two Reverse without berry under claw. This is a remarkable near-Gem Trade dollar that exudes thick mint frost, fully evident beneath the variegated shades of pale blue, gray, and golden patina. As often seen on this issue, the strike is somewhat less than complete over the highest portions of the design. Just a few small abrasions are scattered over each side. Population: 19 in 64 (1 in 64+), 3 finer (6/13). NGC ID# 2534, PCGS# 7037

**1877-S Trade Dollar, MS64+
Outstanding Type Coin**

- 3226 1877-S MS64+ PCGS. Large S.** A splendid Trade dollar type coin that boasts blazing luster, smooth surfaces, and peripheral hints of chestnut-gold toning. Sharply struck and exceptionally attractive for the designated grade. Minor clash marks (as made) are noted on each side of the eagle's neck. NGC ID# 253E, PCGS# 7046

1878-CC Trade Dollar, AU58
Last Carson City Series Issue

3227 1878-CC AU58 NGC. The introduction of the Morgan dollar in 1878 tolled the death knell for the Trade dollars, even though the series gasped a few more breaths in the form of proof-only issues in the early 1880s before expiring altogether. Treasury Secretary John T. Sherman (younger brother to Civil War legend General William Tecumseh Sherman) on Feb. 22, 1878, dispatched a letter ordering that the production of Trade dollars for circulation cease. (Sherman actually authorized the discontinuance in late 1877, but technical loopholes allowed the production of 1878-CC and 1878-S Trade dollars. In any case, they had been demonetized to avoid becoming fiat money some two years previously, on July 22, 1876; falling silver prices during the 1870s meant that the Trade dollar by 1876 contained only 91 cents' worth of silver if melted, compared to \$1.02 when the series began in 1873.) The Bland-Allison Act, passed on Feb. 28, 1878, authorized the "Bland" silver dollars, or Morgan dollars as we know them now.

In Carson City, Nevada, that facility struck only 97,000 examples of the 1878-CC issue, with 44,148 of those melted in July. Rusty Goe writes in *The Mint on Carson Street* that "it is plausible that the remaining 52,852 pieces circulated domestically, most likely not all in the Carson City area, but nevertheless in the western states. This would explain the incongruity of a low mintage and at the same time a higher survival ratio."

Pinkish-gray patina appears on each side of this scarcely circulated coin, which shows a few scattered handling marks and light rub on the high points, in keeping with the grade. Census: 9 in 58, 27 finer (5/13). NGC ID# 253F, PCGS# 7047

1878-S Trade Dollar, MS65
Rich Toning and Luster

3228 1878-S MS65 PCGS. CAC. The last Trade dollar issue to be made in quantity, the 1878-S represents the last gap of the denomination as a true "Trade" coin; in 1878, Philadelphia struck only proofs, a prelude to the similar string of dates to follow, while much of Carson City's meager output was melted without being released. Based on its Gem status, it is clear that this 1878-S example never circulated, either, but the survival of a few exceptional coins is unsurprising given an output of more than 4.1 million pieces. The obverse is light gold-gray with brown border-toning, while the reverse has cartwheel luster under richer, dappled orange and blue-green patina. Population: 22 in 65 (1 in 65+), 27 finer (6/13). NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

1874 Trade Dollar, PR64 Deep Cameo
700 Pieces Struck, Only Two Finer at PCGS

3229 1874 PR64 Deep Cameo PCGS. CAC. From a nominal proof mintage of 700 pieces, this spectacular Choice example exhibits well-detailed design elements, with just a touch of softness on the eagle's leg and claws. The devices show rich mint frost that contrasts profoundly with the deeply mirrored fields and eye appeal is terrific. Population: 3 in 64 Deep Cameo, 2 finer (6/13). PCGS# 97054

1879 Trade Dollar, PR66 Cameo
Sharp Strike and Good Contrast

3230 1879 PR66 Cameo PCGS. Few Trade dollars of the 1879 vintage are found in so high a grade with Cameo surfaces. Good contrast prevails between the frosty devices and the highly reflective fields, despite the differing color palettes between the two sides, more golden and smoke-gray on the obverse and pale rose tones on the reverse. Even a loupe reveals only a couple of scattered, trivial marks consistent with the grade. The proof strike is quite sharp, if just short of full. The 1879 proof Trade dollars, struck to the extent of 1,541 pieces, was the first of the proof-only issues that would conclude the series. Population: 9 in 66 Cameo, 4 finer (6/13). PCGS# 87059

1880 Trade Dollar, PR64+ Cameo
Deeply Reflective, Lightly Toned

3231 1880 PR64+ Cameo PCGS. CAC. Always popular as a representative of this curious type, the substantial proof mintage of 1,987 pieces ensures availability of the 1880 through a wide range of conditions. This noticeably contrasted example is draped in light golden toning over each side with strongly reflective mirrors in the fields. Little is seen to keep this dollar from a Gem grade. Population: 55 in 64 (2 in 64+) Cameo, 39 finer (6/13). PCGS# 87060

1880 Trade Dollar, PR66+ Cameo
Deeply Toned Reverse

3232 1880 PR66+ Cameo PCGS. This coin is a tale of two sides. The obverse is largely untuned silver-white, while the reverse displays deep pinkish-rose patina. The devices on each side, however, are lavishly frosted, setting up marvelous contrast against the reflective fields. The proof strike is quite sharp overall, save for some softness on the obverse stars. Contact marks are trivial. Even though the 1880 Trade dollar proof mintage was the largest of the series-ending proof-only issues, few survivors attain the PR66 grade, and fewer still appear with the Cameo designation. Population: 9 in 66+ Cameo, 6 finer (6/13). PCGS# 87060

1882 Trade Dollar, PR66 Cameo
Popular Proof-Only Issue

3233 1882 PR66 Cameo PCGS. Trade dollars were only produced in proof format in 1882, with a generous reported mintage of 1,097 pieces to satisfy collector demand. It is likely that some examples went unsold and were melted after the close of the year. The date is not too difficult to locate in grades up to the Gem level, but Premium Gem specimens, with the Cameo designation, are very rare.

The present coin is a delightful Premium Gem, spectacularly toned in iridescent shades of golden-brown, lavender-gray, and cerulean-blue. The design elements are sharply detailed in most areas, showing just a trace of the softness typically seen on some stars and Liberty's head. The deeply mirrored fields contrast boldly with the frosty devices to produce a startling cameo effect. Eye appeal is terrific. Population: 7 in 66 Cameo, 3 finer (5/13). PCGS# 87062

MORGAN DOLLARS

1878-CC Morgan Dollar, MS66 First-Year Branch Mint Issue

- 3234 1878-CC MS66 PCGS.** The 1878-CC is a perennially popular issue among collectors as it is both the first year of the Morgan design and it was struck at the Carson City Mint. Only the Reverse of 1878 (with parallel top arrow feathers) was used to produce the 1878-CC. This issue is readily available through MS65. Premium Gems, such as the present offering, are scarce, and higher-grade specimens are very rare. The silver-gray surfaces exhibit well struck devices, including strong detail in the hair above Liberty's ear. Both sides have been well cared for. PCGS has seen only five pieces finer (6/13). NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, MS62 Richly Toned Reverse

- 3235 1879-CC MS62 PCGS. CAC.** Normal Mintmark. From a mintage of 756,000 pieces, the 1879-CC Morgan dollar is the second-rarest Carson City issue, behind the 1889-CC. Light orange-gold patina clings to the obverse rims, ceding to a more extensive and deeper hue of this palette on the reverse, framed by cobalt-blue and lavender around the margin. The design elements are well struck, and light roller marks are visible at the obverse center. This piece exudes pleasing eye appeal, affirmed by the CAC sticker. NGC ID# 253T, PCGS# 7086

1879-CC Capped Die Morgan Dollar, MS62 Scarcer of the Two *Guide Book* Varieties

- 3236 1879-CC Capped Die MS62 PCGS. VAM-3.** A Top 100 Variety. This is the scarcer of the two *Guide Book* varieties for the semikey 1879-CC. The minute die chips within the mintmark area are evident on this MS62 example. The lustrous silver-gray surfaces show relatively well-defined motifs, though the center areas are a tad soft. Scattered minute marks determine the grade. A die crack travels through the tops of the first six letters in PLURIBUS. NGC ID# 253T, PCGS# 7088

1879-CC Morgan Dollar, MS64+ Capped Die, VAM-3

- 3237 1879-CC Capped Die MS64+ PCGS. VAM-3.** A Top 100 Variety. The 1879-CC Morgan dollar claims a small mintage of 756,000 pieces and the issue is always in demand because of the charismatic mintmark. Some coins, including the present example, show the remnants of a smaller CC stamped under the primary mintmark, creating the popular Capped Die variety discovered by Art Kagan in 1962. The date is also doubled on the obverse of this issue, a fact noticed by Leroy Van Allen in 1965.

The present coin is a high-end Choice example, with well-detailed design elements and vibrant cartwheel mint luster. The creamy surfaces show a few hints of golden-tan toning and some minor signs of contact that are consistent with the grade. Eye appeal is outstanding. PCGS has graded 11 numerically finer examples (6/13). NGC ID# 253T, PCGS# 7088

**1880-CC Morgan Dollar, MS66+
Low-Mintage CC-Mint Issue**

3238 1880-CC MS66+ PCGS. CAC. From a low mintage of 591,000 pieces, the 1880-CC Morgan dollar is always in demand from series enthusiasts. This high-end Premium Gem displays well-detailed design elements and vibrant mint luster, with a few hints of golden-tan toning and no mentionable surface flaws. PCGS has graded 28 numerically finer examples (6/13). NGC ID# 2542, PCGS# 7100

**1881-CC Dollar, MS66+ Prooflike
Dazzling and Brightly Mirrored**

3241 1881-CC MS66+ Prooflike PCGS. CAC. This is an exceptional Carson City type coin. The fields are deeply reflective and the devices are just as thickly frosted, the combination yielding the desirable cameo effect. Each side is also exceptionally clean for a CC dollar. Most of each side is brilliant, the only exception is a dab of light golden on the left reverse margin. Population: 31 in 66 (1 in 66+) Prooflike, 0 finer (5/13). NGC ID# 2547, PCGS# 7127

**1880-O Morgan Dollar, MS64+
Elusive Issue in Higher Grades**

3239 1880-O MS64+ PCGS. CAC. The 1880-O is an available date in lower grades, but it is quite elusive at the MS65 level, making this high-grade Choice specimen a good balance of quality and value. This coin displays sharply detailed design elements and vibrant mint luster with outstanding eye appeal. PCGS has graded 32 numerically finer examples (6/13). NGC ID# 2543, PCGS# 7114

**1885-CC Dollar, MS66+ Prooflike
Great-Looking Survivor**

3242 1885-CC MS66+ Prooflike PCGS. CAC. High-grade examples of this issue survived well into the 20th century to be dispersed in the great Treasury hoards. This piece shows excellent preservation and a sharp strike over well-contrasted surfaces with a light pinkish-gold tone, far finer than most examples seen. A great-looking Carson City Morgan. Population: 29 in 66 (1 in 66+) Prooflike, 1 finer (6/13). NGC ID# 254S, PCGS# 7161

1880-S Dollar, Exceptional MS68

3240 1880-S MS68 PCGS. CAC. Large S. An eye-catching and contrasted 1880-S dollar with bright reflectivity in fields that remain resolutely silver-white with just a hint of patina at certain angles. Heavily frosted over the devices and crisply struck throughout. At the MS68 grade level, this is *almost* unsurpassable as a type coin. PCGS has certified only five pieces finer (6/13). NGC ID# 2544, PCGS# 7118

**1886-O Morgan Dollar, MS64
Exceedingly Rare Any Finer**

3243 1886-O MS64 PCGS. The 1886-O Morgan dollar is common in circulated grades and scarce in Mint State. Anything finer than near-Gem is exceedingly rare. Bowers notes that most were released in the 19th century or melted in 1918. The lustrous surfaces of this MS64 coin display whispers of reddish-gold and russet at the margins, slightly deeper in hue on the reverse. The design elements are well brought up, including decent definition in the centers. PCGS has seen a mere three pieces finer (6/13). NGC ID# 254W, PCGS# 7168

1888-O 'Scarface' Dollar, MS62
VAM-1B4, Most Dramatic State

- 3244** 1888-O Scarface MS62 PCGS. VAM-1B4. A Top 100 Variety. The latest and most dramatic major die state with the diagonal "scar" across both the cheek and neck. The 1888-O was a banner issue for fascinating varieties, since the "Hot Lips" VAM-4, "Shooting Star" VAM-7A, "Doubled Arrows" VAM-9, and "Clashed E" VAM-1A are also widely collected. This is a satiny example with cream-gray centers and deeper lavender borders. The centers are typically impressed but marks are chiefly confined to the left obverse. Population: 25 in 62 (2 in 62+), 9 finer (6/13). PCGS# 133918

'Scarface' 1888-O Dollar, MS63
VAM-1B4, Harrison Stage 10

- 3245** 1888-O Scarface MS63 ANACS. VAM-1B4. A Top 100 Variety. Ash Harrison Stage 10, per the ANACS holder. The terminal major die state with the jagged diagonal crack extending from the cheek across the neck. VAMworld.com describes the "Scarface" variety as "the mother of all Morgan die breaks" and credits its discovery to Martin Field in 1979. Hopefully, Martin held on to his example, since today the variety commands many multiples of the price of a regular '88-O. The present lustrous example has delicate gold toning and only minor contact. The centers show the incompleteness inescapable for the variety. Unknown at NGC or PCGS in grades above MS63. PCGS# 133918

1889-CC Morgan Dollar, Unc Details
Elusive Carson City Issue

- 3246 1889-CC — Altered Surfaces — PCGS Genuine. Unc Details.** The 1889-CC is the most elusive Carson City Morgan dollar, prized by collectors in all grades and conditions. This sharply detailed example shows slightly subdued mint luster over pink and gold surfaces with only minor contact marks. The still-attractive surfaces show signs of artificial enhancement. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Uncirculated Details
Fully Struck, Lightly Marked

- 3247 1889-CC — Improperly Cleaned — NGC Details. Unc.** The key Carson City dollar, the 1889-CC is typically found in cleaned VF or XF grades. Examples with full design definition comprise only a small fraction of survivors. The present pearl-gray representative is subdued from dipping, but is well struck and only lightly abraded aside from faint marks on the cheek near the mouth. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS62
Brilliant and Semiprooflike

- 3248 1889-CC MS62 NGC.** The 1889-CC Morgan dollars were the first struck after Carson City reopened after its four-year hiatus from 1886 through 1889. The original production of 350,000 silver dollars was later reduced by melting of a large portion of the issue. Today collectors prize 1889-CC dollars in any grade. In the higher circulated grades and the Mint State levels, they are not only prized, but they are also exceptionally well-made and boldly struck, sometimes appearing with semiprooflike, prooflike, or occasionally even deep mirror prooflike surfaces. Bowers writes that the luster "varies from rather shallow and satin-like to frosty, but usually not deeply frosty." This is one of the pieces that shows significant reflectivity in the fields. The surfaces are brilliant, the strike strong throughout, and there are a few small abrasions peppered mainly over the portrait of Liberty. NGC ID# 2559, PCGS# 7190
-

1889-CC Dollar, MS61
Deep Mirror Prooflike
Remarkably Reflective

- 3249 1889-CC MS61 Deep Mirror Prooflike PCGS.** While the 1889-CC dollar's mintage does not attract special attention within the context of the Carson City series, because most examples were released to circulation (rather than Treasury speculators or GSA bidders), the 1889-CC dollar is a popular rarity in Mint State. This Deep Mirror Prooflike example is particularly exciting thanks to bold mirrors that persist through scattered moderate abrasions. Both sides show a degree of gold-orange peripheral toning set against central silver, and the reverse appears relatively clean for the MS61 designation. NGC ID# 2559, PCGS# 97191

1891 Silver Dollar, MS65
Frosty, Untoned Example

- 3250 1891 MS65 PCGS.** Despite the large mintage of nearly 9 million coins — the Sherman Silver Purchase Act of 1890 spurred the Mint to produce even-larger gluts of Morgan dollars — the 1891 issue is seldom seen above the Gem grade; bagmarks are, expectedly, the usual culprit. This relatively unmarked, untoned Gem boasts frosty surfaces and a clean cheek on Liberty. A couple of small hits on the eagle are in context with the grade. PCGS has seen only three numerically finer pieces (5/13). NGC ID# 255G, PCGS# 7204

1891 Morgan Dollar, MS65
Dark Multicolor Toning

- 3251 1891 MS65 PCGS.** Although the 1891 Morgan dollar is a reasonably available issue at the Gem level, it is a prime condition rarity in finer grades. This well-detailed MS65 specimen displays frosty cartwheel mint luster under shades of golden-gray and violet toning. PCGS has graded only three numerically finer examples (6/13). NGC ID# 255G, PCGS# 7204

1892-O Morgan Dollar, MS65
Especially Vibrant Luster

- 3252 1892-O MS65 PCGS.** The 1892-O Morgan dollar can be located in Gem condition with some patience, but finer examples are very rare. This impressive MS65 specimen displays well-detailed design elements and especially vibrant mint luster. The well-preserved surfaces show just a trace of gold and violet toning. PCGS has graded five numerically finer examples (6/13). NGC ID# 255N, PCGS# 7216

1892-S Morgan Dollar, AU58
Popular Condition Rarity

- 3253 1892-S AU58 PCGS.** The 1892-S is among the several Morgan dollar dates to demonstrate condition rarity. While an XF45 example is not particularly challenging, prices increase dramatically through the AU grades and any Mint State example is a very scarce coin. This near-Mint representative has faint golden toning over the semireflective obverse fields and the cartwheel luster across the reverse. Though the rubbed status of the hair over Liberty's ear is inescapable and a shallow long mark affects Liberty's cheek, the arm's-length eye appeal of this coin is incredible. NGC ID# 255P, PCGS# 7218

1893-CC Morgan Dollar, MS61
Nice for the Grade

- 3254 1893-CC MS61 PCGS.** The majority of Mint State 1893 Morgan dollars from the Carson City Mint are in the lower grade levels, resulting from most examples being extensively bagmarked. The present MS61 specimen reveals the usual grade-limiting marks, though we hasten to add that these are less severe than usually seen. While the eagle's breast displays the typical weakness of the issue, the extremities of the wings, also typically weak, are relatively well-defined. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Scarce, Final Year Issue

- 3255 1893-CC MS63 PCGS.** This impressive Carson City Morgan dollar is the final issue of the Nevada Mint. Housed in a green-label PCGS holder, this Select Mint State dollar has fully brilliant luster with scattered marks expected for the grade. The devices have a typical strike and exhibit subtle mint frost with satiny fields. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64
Well Struck, Lightly Toned

- 3256 1893-CC MS64 NGC. VAM-2.** This die pair was later used to strike the 12 branch mint proofs that commemorated the reversion of the Carson City Mint to assay office status. This example might be designated as VAM-2A in the future, since the N in IN is clashed in front of Liberty's neck. Much better struck than the usual '93-CC, the present near-Gem offers dynamic luster, faint almond-gold toning, and smooth surfaces. NGC ID# 255S, PCGS# 7222

1893-S Dollar, XF Sharpness
Pockets of Mint Luster

- 3257 1893-S — Improperly Cleaned — NGC Details. XF.** The rarest business issue Morgan dollar, the 1893-S commands strong prices even in Fair 2, a grade with a combined 49 pieces certified by NGC and PCGS. Most '93-S Morgans, though, are evenly distributed in grades between Good and XF. The present stone-gray example has been dipped but exhibits ample bright luster on the motifs and margins. Only lightly and unobtrusively abraded. NGC ID# 255U, PCGS# 7226

Gem 1894-S Morgan Dollar
Lightly Toned Condition Rarity

- 3258 1894-S MS65 NGC.** The Gem level is the highest grade seen — albeit infrequently — for the 1894-S Morgan dollar, a grade level where the issue is quite popular and the subject of strong bidding activity. This silver-white piece is frosty with a hint of gold patina, the surfaces showing a few luster grazes consistent with the grade but no mentionable marks. The strike is adequate save for the hair over the ear, where some roller marks appear. A conditional rarity in the Morgan series. Census: 44 in 65 (1 in 65+), 9 finer (6/13). NGC ID# 255X, PCGS# 7232

1898 Morgan Dollar, MS67
No Numerically Finer Coins at PCGS

- 3259 1898 MS67 PCGS.** This magnificent Superb Gem Morgan dollar displays well-detailed design elements and incredibly vibrant mint luster on both sides. The mostly brilliant surfaces show no mentionable distractions, with a few hints of violet and amber toning on the reverse. Population: 41 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 2568, PCGS# 7252

1900-O/CC Dollar, MS66
Colorful Example of VAM-8

- 3260 1900-O/CC MS66 PCGS. VAM-8. A Top 100 Variety.** The 1900-O/CC dollars are the last coins to bear Carson City's mintmark, albeit in a semi-effaced form. This colorful and pleasingly lustrous example has waves of red-to-gold toning with blue-violet hues on the obverse and windows of silver on the reverse. For the collected 1900-O/CC varieties, Population: 86 in 66, 2 finer (5/13). NGC ID# 256G, PCGS# 7268

1901 Silver Dollar, MS63
Philadelphia Mint Condition Rarity

- 3261 1901 MS63 PCGS.** The 1901 Morgan dollar is a condition rarity that is normally found in circulated grades, or at best in the lower Mint State grades. This Select Mint State piece presents an excellent opportunity for the advanced collector, as PCGS as only certified 31 finer examples (6/13). A typical strike results in central weakness over Liberty's ear as usual. Both sides of this piece have brilliant, satin luster beneath delicate champagne toning. The obverse and reverse peripheries display rich gold, lavender, and sea-green toning that enhances the eye appeal. This Morgan dollar represents the first year of operation at the third Philadelphia Mint on Spring Garden Street. NGC ID# 256J, PCGS# 7272

**1901-S Morgan Dollar, MS66
Brilliant, Exceptional Quality**

3262 1901-S MS66 PCGS. Gentle rose and apricot hues visit this lustrous, well struck, and gorgeously preserved Morgan dollar. Like all S-mint Morgans of its era, the 1901-S is very scarce in Uncirculated grades, and unblemished survivors of the present quality are undeniably rare. In fact, PCGS has certified only one piece finer. Jules Reiver was well known for his extensive holdings (by die state and variety) of early U.S. coins, but he collected later series as well.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21653, which realized \$4,600. NGC ID# 256L, PCGS# 7276

PROOF MORGAN DOLLARS

**1882 Morgan Dollar, PR67 Cameo
One Finer Coin at NGC**

3263 1882 PR67 Cameo NGC. This deeply mirrored Superb Gem exhibits sharply detailed design elements with rich mint frost that contrasts boldly with the pristine fields. A few hints of pale gold toning add to the incredible visual appeal. From a generous proof mintage of 1,100 pieces. Census: 9 in 67 Cameo, 1 finer (6/13). PCGS# 87317

**1890 Morgan Dollar, PR64 Cameo
Only 590 Pieces Coined**

3264 1890 PR64 Cameo PCGS. CAC. Only 590 proof Morgan dollars were struck in 1890 and few examples show the bold cameo contrast of this sharply detailed Choice example. The devices are richly frosted and stand out boldly against the deeply mirrored fields. Shades of lavender-gray, champagne-gold, and violet toning enhance the outstanding eye appeal. A few minor hairlines and contact marks prevent an even higher grade. Population: 21 in 64 Cameo, 22 finer (6/13). PCGS# 87325

**1895 Silver Dollar, PR55
Affordable Lightly Worn Specimen**

3265 1895 PR55 NGC. Collectors understandably like to purchase the nicest specimens of their targeted coin that they can afford, but the 1895 proof Morgan dollar poses a special challenge, since there are no business strike examples to be had at a lesser price. Only 880 proof 1895 Morgans were struck, although it is likely that most survive today — at least, it is likely that they survive in about the same proportion as any other Morgan dollar proof issue. The existence of a few circulated 1895 proofs has clouded the issue, but it remains true today that no verifiable business strike has ever been found, despite the reported mintage of 12,000 pieces. While this piece is clearly not a business strike, it would fit nicely in an AU set. It was either circulated briefly or carried as a pocket piece. We tend to think it was the former as there are several larger diagonal marks on the cheek of Liberty. An irregularly shaped planchet flaw is also noted in the left obverse field. Light rose-colored surfaces show significant deep gray patina surrounding the devices on each side. NGC ID# 27ZR, PCGS# 7330

1897 Dollar, PR65 Cameo
Deeply Mirrored and Strongly Contrasted

- 3266 1897 PR65 Cameo PCGS. CAC.** Almost to a one, the 731 proof dollars from 1897 are well-produced, yielding strong visual appeal. This is a cameo example, and the contrast is evident even through the multiple layers of pale rose and green on the obverse; the same colors are present on the reverse but are deeper in hue. The fields are deeply mirrored and there are only the slightest imperfections present on this lovely, toned Gem proof. Population: 8 in 65 Cameo, 10 finer (6/13). PCGS# 87332

1898 Dollar, Brilliant PR64 Deep Cameo
Stark White-on-Black Contrast

- 3267 1898 PR64 Deep Cameo PCGS.** This is a simply breathtaking proof Morgan. Struck in the well-known year for high-quality proofs, 1898, the contrast between the fields and devices just could not be more profound. The devices are chalk-white and the fields ink-black. Each side is completely free from color. The PR64 designation seems a bit harsh at first glance. A few light hairlines can be seen in the fields, but the primary deterrent to a higher grade is a small cluster of hairlines on the upper reverse around the word OF. PCGS# 97333

1898 Dollar, PR67 Ultra Cameo
Exceptional Quality

- 3268 1898 PR67 Ultra Cameo NGC.** Just the faintest trace of apricot toning is seen over each side of this fully struck and exceptionally preserved Superb Gem. All legends and devices are thickly frosted, and the glowing surfaces provide great contrast against the darkly mirrored fields. Only 735 proofs were struck, and high-grade specimens of this well-produced issue are under formidable demand from series and type specialists. The overall eye appeal of this piece is exceptional throughout, despite a fingerprint fragment barely detectable in the right obverse field.

Ex: Long Beach Signature (Heritage, 9/2005), lot 6197; Atlanta Signature (Heritage, 4/2006), lot 1205. PCGS# 97333

1900 Dollar, PR65 Cameo
Largely Untoned and Well-Contrasted

- 3269 1900 PR65 Cameo PCGS.** The silver-gray surfaces show just a touch of patina near the obverse rim, but there is much contrast between the deeply mirrored, midnight-black fields and well-frosted devices. Any Gem proof Morgan dollar is rare and in demand, but this Cameo Gem adds considerable eye appeal and good surface preservation into the mix. Population: 8 in 65 Cameo, 6 finer (6/13). PCGS# 87335

PEACE DOLLARS

1923-D Peace Dollar, MS66 Conditional Rarity

- 3270 1923-D MS66 PCGS. CAC.** The 1923-D Peace dollar is a relatively available issue, but the Premium Gem level of the present piece is about as good as it gets for the issue. Dusky golden toning complements softly lustrous surfaces with few marks of any consequence and great eye appeal. Population: 78 in 66 (1 in 66+), 1 finer (5/13). NGC ID# 257G, PCGS# 7361

1923-S Dollar, MS65 Subtle Pastel Iridescence

- 3271 1923-S MS65 PCGS. CAC.** The obverse displays pastel olive-green and ice-blue toning. The reverse exhibits richly dappled orange, lavender, and forest-green patina. Lustrous and crisply struck with smooth fields and only delicate grazes on the portrait. Housed in an old green label holder. NGC ID# 257H, PCGS# 7362

1925 Peace Dollar, MS67 Only One Finer Coin at NGC

- 3272 1925 MS67 NGC. CAC.** The 1925 Peace dollar is very scarce in MS67 condition, and virtually unobtainable any finer. This delightful Superb Gem exhibits sharply detailed design elements and frosty mint luster, under attractive shades of champagne-gold toning. Census: 68 in 67, 1 finer (6/13). NGC ID# 257L, PCGS# 7365

1927 Peace Dollar, MS66 Elusive and Tied for Finest

- 3273 1927 MS66 PCGS.** The 1927 Peace dollar is elusive even at the Gem level, and the present Premium Gem is one of only eight at PCGS with none finer (5/13). Despite the relatively large mintage of 848,000 pieces, Gems are seldom seen, although they are well-produced coins when they appear. Roger Burdette calls this the rarest Philadelphia Mint Peace dollar in Uncirculated — not the 1928, as often thought. Dusky silver surfaces show daubs of gold and amber near the rims with frosty silver interiors. Note how unabraded both Liberty's cheek and the eagle high points are. The strike is bold throughout. Population: 8 in 66, 0 finer (5/13). NGC ID# 257S, PCGS# 7370

**1934-S Peace Dollar, MS64+
Important Key in High Grade**

- 3274 1934-S MS64+ PCGS. CAC.** From a mintage of just over 1 million pieces, the 1934-S Peace dollar is the most difficult issue of the series to locate in Mint State condition. This high-end Choice example displays sharply detailed design elements and vibrant mint luster, with attractive hints of pale gold toning. NGC ID# 257Z, PCGS# 7377

**1935 Peace Dollar, MS66+
Tied for Finest at PCGS**

- 3275 1935 MS66+ PCGS. CAC.** The last Philadelphia entry in the Peace dollar series, struck in an amount exceeding 2.5 million pieces. This piece is fully struck throughout both sides, showing complete detail on Liberty's high-point hair and the eagle feathers on the reverse. The preservation is equally remarkable, making this scarcely patinated piece tied with one other for the finest graded at PCGS (6/13). NGC ID# 2582, PCGS# 7378

GOLD DOLLARS

**1852-C Gold Dollar, MS64
Sharp Interior Detail**

- 3276 1852-C MS64 NGC. Variety 2.** The reverse is distinguished by repunching on the base of the 1 in the date. The 1852-C gold dollar has a four-figure mintage, and while a handful of exceptional coins are known, resubmissions make them seem more common than they really are. This near-Gem has pale yellow surfaces, radiant with semireflective luster, unusual given the typical state for the series. Excellent intricate detail graces Liberty's portrait and the wreath opposite, though a few of the surrounding stars show softness. Minimally abraded with a small copper spot to the left of the neck. Census: 7 in 64, 5 finer (6/13). NGC ID# 25BR, PCGS# 7518

**1854-D Gold Dollar, AU58
Elusive Low-Mintage Issue**

- 3277 1854-D AU58 NGC.** Luster illuminates the peripheries of this unmarked almond-gold near-Mint Dahlonega example. Portions of the hair and wreath are incompletely brought up, but most design elements are crisply struck. Only 2,935 pieces were struck. Census: 24 in 58, 24 finer (6/13). NGC ID# 25BZ, PCGS# 7526

1854 Type Two Gold Dollar, MS64+
Superlative Eye Appeal

- 3278 1854 Type Two MS64+ NGC. CAC.** This MS64+ Type Two gold dollar with the added CAC green endorsement will no doubt prove popular with date and type collectors alike. It is a safe bet that a full-fledged Gem of this elusive type will cost quite a lot more. This piece shows great luster over yellow-gold surfaces with the typically seen clash marks on each side. The obverse is markedly free of all but a couple of minuscule field ticks. A couple of slightly larger, but still small, marks appear on the reverse, consistent with the high-end near-Gem designation. Nothing diminishes the strong eye appeal on this coin. Census: 5 in 64+, 37 finer (6/13). NGC ID# 25C3, PCGS# 7531

1854 Type Two Gold Dollar, MS65
Small Indian Head Obverse

- 3279 1854 Type Two MS65 PCGS.** The 1854 Type Two gold dollar is a common date by most measures. Indeed, it can be located through the near-Gem level of preservation with relatively little difficulty. The Gem population decreases significantly, but this grade level can still be acquired with patience and searching. Examples grading higher than MS65 are elusive.
- The lustrous surfaces of the Gem in this lot display peach-gold patina imbued with traces of mint-green. Its design features are better struck than ordinarily seen, including the usually weak obverse portrait and the 85 of the date. A couple of fine linear marks on the cheek appear to be as made. Population: 54 in 65 (3 in 65+), 14 finer (6/13). NGC ID# 25C3, PCGS# 7531

**1854 Type Two Gold Dollar, MS65+
Outstanding Type Coin**

- 3280 1854 Type Two MS65+ PCGS. CAC.** It is common with rarities for every grade point, Plus designation, and CAC sticker to have a big impact on price. The Type Two gold dollars are unusual in that some of the massive price shifts seen within the Mint State grade spectrum also apply to the most available coins of the design as well as the least. This MS65+ example with CAC label clearly is a cut above the "typical" Gem. Its orange-gold luster, satiny and swirling, surrounds pleasingly detailed and carefully preserved surfaces. Fantastic all-around eye appeal. Population: 54 in 65 (3 in 65+), 14 finer (6/13). NGC ID# 25C3, PCGS# 7531

**1855-O Gold Dollar, MS61
New Orleans Type Set Key**

- 3281 1855-O MS61 NGC. CAC. Variety 2.** The sole Type Two New Orleans issue, and thus requisite for assemblers of O-mint type sets. This lime-green representative is only lightly abraded and displays ample luster. The strike is good for the issue despite the unavoidable softness on the 8 in the date, which is opposite the highest relief portion of the portrait. One of just three CAC examples at the MS61 level. Census: 23 in 61, 34 finer (6/13). NGC ID# 25C7, PCGS# 7535

**1857-D Gold Dollar, MS61
Low-Mintage Rarity**

- 3282 1857-D MS61 NGC. Variety 9-L.** A Mint State wheat-gold example of this later and low mintage Dahlonega dollar. A mere 3,533 pieces were issued, and no survivors are known in grades above MS62. The present coin has unmarked surfaces. The borders and motifs glimmer with luster. The strike is good though incomplete on the wreath knot and the 85 in the date. Census: 2 in 61, 4 finer (6/13). NGC ID# 25CF, PCGS# 7546

**1858-D Gold Dollar, MS61
Scarce, Late-Date Dollar**

- 3283 1858-D MS61 PCGS. Variety 10-M.** The sole known dies for this challenging issue. Only 3,477 pieces were struck, most of which were melted or lost long ago. A crisply struck piece with few marks and suitable luster. Liberty's profile is clashed onto the central reverse field, as made. Population: 9 in 61, 20 finer (5/13). Ex: Dallas Signature (Heritage, 11/2006), lot 1895. NGC ID# 25CJ, PCGS# 7549

**1859-C Gold Dollar, AU58
Final C-Mint Gold Dollar**

- 3284 1859-C AU58 NGC. Variety 1.** The final-year Charlotte Mint gold dollar issue, the 1859-C has a mintage of only 5,235 pieces. The present straw-gold representative lacks any mentionable marks and exhibits glimmers of luster on the lettering, wreath, and headdress. The strike shows the blending on the curls, date, and dentils expected for rustic branch mint production. Census: 26 in 58, 22 finer (5/13). NGC ID# 25CM, PCGS# 7552

1863 Gold Dollar, MS63
Scarce, Low-Mintage Date

- 3285 1863 MS64 PCGS.** Only 6,200 gold dollars were struck in 1863 during the height of the Civil War. The coins are quite rare, with the estimated number of survivors standing at 100 to 140 pieces. Although 300 fewer coins were minted in 1864, the number of 1863 survivors is lower and therefore they are scarcer. Lovely canary-gold color provides this Select example with a pleasing appearance. The strike details are remarkably strong throughout and the coin was struck from slightly rotated dies. A couple of shallow scuffs in the left obverse field prevent an even higher grade. Population: 4 in 64, 7 finer (6/13). NGC ID# 25CX, PCGS# 7562

1864 Gold Dollar, MS64
Low-Mintage Civil War Issue

- 3286 1864 MS64 PCGS. CAC.** The 1864 gold dollar claims a low Civil War era mintage of 5,950 pieces. This impressive Choice example exhibits well-detailed design elements, with a touch of softness on the date and denomination. Satiny mint luster radiates from the lightly marked orange and rose-gold surfaces. Population: 9 in 64, 14 finer (6/13). NGC ID# 25CY, PCGS# 7563

1874 Gold Dollar, MS68
First Example So Graded by PCGS

- 3287 1874 MS68 PCGS. CAC.** In the post-Civil War period, no gold dollar issue enjoyed such a high mintage as the 1874, though even it did not reach 200,000 business strikes produced. It is worth noting that the 1874 is also much less available in MS68 than later lower-mintage issues that were specifically saved, particularly the 1880 and 1881. In fact, this is the first PCGS-graded MS68 example of the 1874 (6/13), which lends this coin immediate importance to gold dollar Registry enthusiasts. Sun-yellow luster with a few hints of lighter gold has broad swirls across each side. NGC ID# 25DC, PCGS# 7575

1880 Gold Dollar, MS67
Sparkling Semiprooflike Fields

- 3288 1880 MS67 PCGS. CAC.** Only 1,636 gold dollars were struck in 1880. Fortunately, a number of high-quality specimens were saved by contemporary numismatists. This high-end Superb Gem is boldly struck throughout with attractive canary-yellow color. The fields are bright and semiprooflike with little cartwheel intermixed. NGC ID# 25DJ, PCGS# 7581

1883 Gold Dollar, MS67
Reflective, Well-Preserved Surfaces

- 3289 1883 MS67 PCGS. CAC.** Orange-gold surfaces on this stunning Superb Gem are reflective and fairly prooflike, as often seen given the low mintage of 10,800 coins for circulation. The 1883 gold dollar is not a condition rarity even at this grade level, but examples such as this piece are quite well-made and attractive. PCGS has seen only 10 numerically finer (5/13). NGC ID# 25DM, PCGS# 7584

PROOF GOLD DOLLARS

1866 Gold Dollar, PR64 Ultra Cameo
Stunning Field-Motif Contrast

- 3290 1866 PR64 Ultra Cameo NGC.** Fewer than 20 proof gold dollars of 1866 are thought to still exist from a reported mintage of 30 pieces. NGC and PCGS have certified about 40 specimens, meaning that many represent resubmissions or more than 20 were in fact struck. In any event, the present near-Gem Ultra Cameo displays stunning gold-on black contrast and exquisitely struck design features. Both sides have been very well cared for. Census: 1 in 64 Ultra Cameo, 8 finer (6/13). PCGS# 97616

1884 Gold Dollar, PR67 Cameo
High-End Example of a More Accessible Issue

- 3291 1884 PR67 Cameo NGC.** The 1884 was the first proof gold dollar issue to reach four figures as a gift-giving craze on the East Coast got into full swing. This is an uncommonly well-preserved specimen of that famous issue, a Cameo Superb Gem with clear contrast between sharply struck, lightly frosted devices and lemon-gold mirrors that are a touch watery on the obverse. For collectors assembling a date set of these marvelous coins or looking to begin a proof gold cabinet with a high-end dollar, this is an excellent selection. Census: 12 in 67 Cameo, 2 finer (6/13). NGC ID# 25EU, PCGS# 87634

1887 Gold Dollar, PR63 Cameo
Frequently Seen Proof Gold Issue

- 3292 1887 PR63 Cameo NGC.** The late-date gold dollars are the most accessible classic proof gold coins in U.S. numismatics, and the 1887 issue (official mintage 1,043 pieces) is no exception. This Cameo Select piece is well-contrasted with minor hairlines and contact found in the pale yellow-gold fields. Census: 7 in 63 Cameo, 39 finer (6/13). NGC ID# 25EX, PCGS# 87637

1888 Gold Dollar, PR67 Cameo
Dramatic Field-Device Contrast

- 3293 1888 PR67 Cameo NGC.** A generous mintage of 1,079 proof gold dollars was accomplished in 1888, the penultimate year for the denomination. Experts suggest as many as 150-200 coins may still be extant in all proof grades. Speculation in the denomination was widespread at the time, and a number of high-grade business-strike specimens were saved by collectors, as well as some truly spectacular proofs, like the present coin. This magnificent Superb Gem features sharply detailed design elements and pleasing yellow-gold surfaces, with a few accents of red. The frosty devices contrast boldly with the mirrored fields creating a startling cameo effect. Terrific eye appeal complements the high technical grade. Census: 5 in 67 Cameo, 3 finer (6/13). NGC ID# 25EY, PCGS# 87638

EARLY QUARTER EAGLES

1802 Quarter Eagle, AU58
Popular Spike Shield, BD-1 Variety

- 3294 1802 AU58 NGC. CAC. BD-1, R.4.** Bass-Dannreuther Die State a/b. A small mintage of 3,035 Capped Bust Right quarter eagles was achieved in 1802, with three die varieties known for the date. The same obverse die was used for all three varieties and it shows a minor imperfection under the final digit of the date that was mistaken for a 1 for many years, causing this issue to be listed as an overdate in many publications. Most present-day numismatists agree that this quarter eagle is not an overdate, and it is no longer listed as such in the *Guide Book*, but PCGS still lists the issue as 1802/"1". The reverse die is the famous Spike Shield variety that was also used to coin the JR-3 1802 dimes and the JR-2 1803 dimes. Probably no more than 90-120 examples of the BD-1 1802 quarter eagle survive today in all grades.

This impressive near-Mint example displays well-detailed design elements with just a trace of wear on the high points of the devices. The pleasing yellow and greenish-gold surfaces retain much of their original mint luster and show only minor abrasions, although some planchet adjustment marks are evident on the central reverse. Census: 21 in 58, 26 finer (6/13). NGC ID# 25F6, PCGS# 7650

‘1824/1’ Quarter Eagle, BD-1, MS61
Overdated Obverse/Leftover Reverse Die

3295 1824/1 MS61 PCGS. BD-1, R.5. As with so many other early quarter eagle issues, only a single die pair was needed for the meager production of 1824 quarter eagles, a reported 2,600 coins. In fact, *no new dies at all* were needed for the 1824 issue. No quarter eagles were recorded to have been struck in 1822 or 1823, so for 1824, the Mint personnel overdated a leftover 1821 obverse die (one that was unused in 1821) with a 4 and reused the same (previously used) reverse die as in 1821. Serviceable dies were still a scarce commodity at this stage of Mint history, and, as John Dannreuther points out, “even with the 1824/1 strikings included, the reverse die had been used for only a little over 9,000 coins, up to that point.” (The 1821 quarter eagle mintage is given as 6,448 examples.)

The 1824 quarter eagle are technically all “1824/1” overdates, but the overdate feature faded as more coins were struck, and it is scarcely visible on the present piece. See the Harry Bass Foundation example, which shows the overdate feature prominently (and is a piece that Bass and Michael Brownlee, and later John Dannreuther, considered/consider a one-sided proof).

The last two digits in the date are more closely spaced than the first two, and star 1 points to the center of a dentil; star 6 points to the top border of the headband. Stars 1 and 13 are equidistant from the bust. On the reverse, the reused die shows the fraction widely spaced, the numerator high and the denominator low.

This MS61 PCGS-graded piece is strictly Mint State but shows a few scattered abrasions and planchet roughness, largely on the portrait. On the reverse, strike weakness is confined to the same area as on the Bass coin: the left (facing) shield border, the left wing adjacent, and the left claw, less so but still moderately on the right claw. A few thin, wispy marks appear on the reverse but are in keeping with the grade. The softly lustrous surfaces are medium yellow-gold and retain ample eye appeal. Population: 6 in 61, 4 finer (5/13). NGC ID# 25FF, PCGS# 7663

1831 Quarter Eagle, BD-1, MS62
Single Die Pair for the Year

- 3296 1831 MS62 PCGS. BD-1, R.4. Bass-Dannreuther die state uncertain but likely c/c, shortly after the lapping to remove clash marks. A one-die-pair year that is very scarce regardless of condition, the 1831 quarter eagle poses a significant challenge to the *Guide Book* collector as well as the early gold specialist. This MS62 representative is pleasing for the date with surprisingly reflective sun-yellow surfaces that show traces of orange and overlying patina. Excellent detail, especially on the reverse, with generous all-around eye appeal.
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 8088. NGC ID# 25FM, PCGS# 7671

LIBERTY QUARTER EAGLES

1844-D Two and a Half, MS62
Nearly Fully Struck

- 3297 1844-D MS62 NGC. Variety 5-I (formerly 5-H). An exceptional Dahlonega quarter eagle that has minimal marks and a broad peripheral band of cartwheel luster. The open fields are mildly prooflike. Coined from boldly clashed dies. The strike is uncommonly crisp for the Georgian facility, since only the reverse dentils and the high relief hair curl above the ear lack an absolute impression. Minor, slender strike-throughs (as produced) are noted near stars 2 and 12 and on the reverse beneath the second S in STATES. A mintage of 17,332 pieces confirms the rare date status of this relatively early D-mint emission. Census: 5 in 62, 6 finer (6/13). NGC ID# 25GV, PCGS# 7736

**1852-C Two and a Half, AU55
Unabraded and Attractive**

- 3298 1852-C AU55 NGC. Variety 1.** Just one pair of dies was used to strike the 9,772 1852-C quarter eagles. About 200 examples have survived. The present olive-gold representative has minimal wear but has a soft appearance at the centers due to a typical impression. However, the stars, legends, and dentils are sharp. No marks are apparent. A prominent obverse wire rim between 8 and 1 o'clock suggests collar difficulties at the Charlotte facility. Census: 23 in 55, 25 finer (6/13). NGC ID# 25HS, PCGS# 7764

**1856-D Quarter Eagle, AU50
Only 874 Pieces Produced
Ex: Ashland City**

- 3299 1856-D — Planchet Lamination, Obverse — AU50 PCGS. Variety 20-N.** The 1856-D has the lowest mintage in the Dahlonega series of quarter eagles, with a tiny emission of only 874 coins. It narrowly trails the 1840-D as the rarest D-mint of in high grade, and in all grades only 45 pieces may be extant. All 1856-D quarter eagles were carelessly manufactured, a surprising fact when one considers how few pieces were struck. Also surprising is that die rust is commonly seen on the few surviving specimens. Slight evidence of die rust can be seen here on the neck of Liberty, but more importantly, a rim-to-rim, angling planchet flaw is seen across the right side of the obverse.
Ex: *Ashland City Collection (FUN Signature, 1/2003)*, lot 4706. NGC ID# 25J9, PCGS# 7779

**1860-C Two and a Half, AU58
Final Charlotte Issue**

- 3300 1860-C AU58 NGC. Variety 1.** A nicely struck and attractive peach-gold Borderline Uncirculated example. Neither side displays consequential marks. 1860 was the final year of quarter eagle production at Charlotte, and the low mintage of 7,469 pieces suggests the Southern gold fields were largely played out. Census: 23 in 58, 11 finer (6/13). NGC ID# 25JT, PCGS# 7792

**1866 Two and a Half, AU55
Impressively Low Mintage of Only 3,080 Pieces**

- 3301 1866 AU55 NGC.** A delightful Choice AU example, this light yellow example retains considerable luster with slight weakness confined to the eagle's leg. Just 3,080 business strikes were produced throughout the year, and survivors are rare in all grades. Census: 2 in 55, 12 finer (5/13). NGC ID# 25K7, PCGS# 7803

**1892 Quarter Eagle, MS67
None Finer at PCGS**

- 3302 1892 MS67 PCGS.** As a denomination, the quarter eagle experienced severe neglect beginning in 1880 and lasting for more than two decades. The 1892 has the smallest quarter eagle business strike mintage of its decade, just 2,440 pieces, and collecting the date poses a challenge even for those with the financial wherewithal to pursue the finest examples. This magnificent Superb Gem will provide an end to one collector's search. Flashy, swirling apricot and yellow-gold luster surrounds intricately detailed, delicately frosted devices. Carefully preserved with incredible eye appeal. A tiny copper spot at the denticles between the first 2 of the denomination and the nearby bullet can serve as a pedigree marker. Population: 3 in 67, 0 finer (6/13).
Ex: Central States Signature (Heritage, 5/2004), lot 9154; New York Signature (Heritage, 7/2004), lot 8043. NGC ID# 25LG, PCGS# 7844

**1902 Two and a Half, MS67
Exceptional Type Coin**

- 3303 1902 MS67 PCGS.** Post-1900 quarter eagles make terrific type coins. They can be found in MS67 ever so often, and when found in MS65 or better they are exceptionally attractive coins. This is such an example, a coin that displays thick, even reddish-tinted mint frost and no mentionable abrasions on either side. Population: 38 in 67, 0 finer (6/13). NGC ID# 25LT, PCGS# 7854

**1902 Quarter Eagle, MS67
Tied for Finest at PCGS**

- 3304 1902 MS67 PCGS.** The obverse has a mix of honey-gold and sun-yellow shadings, the latter hue dominating the reverse. Sharply struck devices and swirling fields share a remarkable smoothness. A faint diagonal line on Liberty's cheek is among the few imperfections warranting individual notice on this amazing type coin. Population: 38 in 67, 0 finer (6/13). NGC ID# 25LT, PCGS# 7854

**1904 Quarter Eagle, MS68
Tied for Finest Certified**

- 3305 1904 MS68 NGC.** Astonishing quality in a Coronet quarter eagle of any date. The coin is virtually perfect, only the most insignificant evidence of contact on Liberty's nose can be discerned under light magnification. Equally impressive is the luster, which swirls around the surfaces as it is angled beneath a light and shows a lovely mixture of orange-gold and lilac patina. The strike is also complete on all the design elements. Those interested in a one-of-a-kind representative of this popular gold type coin really should examine this lot. Census: 5 in 68, 0 finer (6/13).

Ex: ANA Signature (Heritage, 8/2004), lot 7175; FUN Signature (Heritage, 1/2010), lot 2108. NGC ID# 25LV, PCGS# 7856

**1906 Quarter Eagle, MS67
Fully Struck With Impeccable Preservation**

- 3306 1906 MS67 PCGS.** The early-20th century P-mint quarter eagles are some of the most well-produced issues in the late Liberty Head series, occasionally found in splendid states of preservation such as this piece. Bounteous luster flows from both sides of this impeccable coin, which additionally offers a full strike over apricot-gold surfaces. A great type coin, and seldom seen finer. Population: 40 in 67, 2 finer (5/13). NGC ID# 25LX, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

**1897 Quarter Eagle, PR63 Deep Cameo
High Production Quality**

- 3307 1897 PR63 Deep Cameo PCGS. CAC.** The 1897 quarter eagle was produced during the high point of contrasted proofs, a period generally considered to cover the years 1896, 1897, and 1898. Even at the PR63 level, the exceptional care in production is evident on this coin. The fields display mirrored blackness against the heavily frosted devices. Numerous tiny contact marks are dotted throughout the fields on both sides, explaining the grade; but the arm's length appearance is actually much more impressive than the technical grade. Population: 2 in 63 Deep Cameo, 11 finer (5/13). NGC ID# 288L, PCGS# 97923

1898 Quarter Eagle, PR68 Deep Cameo
Sole Finest at PCGS

3308 1898 PR68 Deep Cameo PCGS. If there is a “golden age” for classic proof U.S. coinage, surely it spans the years 1896 to 1898, when coins large and small were given great care and attention in creating boldly mirrored specimens with magnificently frosted devices. While other issues in nearby years, perhaps from 1893 to 1901, are also famous for their attractive proofs (it is a boon for collectors that the proof-only 1895 Morgan dollar is from an issue that “comes nice”), the best proofs from the 1896-1898 period seem to have that “something extra” that sets them apart even from the best specimens of other dates.

This recently certified 1898 quarter eagle, graded PR68 Deep Cameo by PCGS, is the sole Deep Cameo coin at that level for the grading service (6/13). A coin such as this must be appreciated at all possible angles and distances: the arm’s-length beauty of a coin that is clearly contrasted no matter the angle to the light but most strongly when the mirrors flash around the frosted devices, the close inspection that reveals the subtle “orange-peel” texture of the fields, the razor-sharpness of the devices under thick frost, and the fantastic all-around preservation that only comes into focus under a loupe. While no coin is immune to criticism, only the pettiest and most pessimistic of collectors could find fault with this tiny beauty. Enthusiasts of proof gold coinage, on the other hand, will find plenty to celebrate. NGC ID# 288M, PCGS# 97924

1904 Liberty Quarter Eagle, PR63
Elusive 20th Century Proof

- 3309 1904 PR63 PCGS.** Only 170 proof Liberty quarter eagles were struck in 1904, making the issue the most elusive proof of the 20th century series. This lemon-yellow Select example exhibits razor-sharp definition on all design elements and deeply mirrored fields with a few minor contact marks and hairlines. Population: 16 in 63, 32 finer (6/13). NGC ID# 288U, PCGS# 7930

INDIAN QUARTER EAGLES

1909 Quarter Eagle, MS65
Few Graded Finer

- 3310 1909 MS65 PCGS.** The Indian's cheek is noteworthy for its lack of abrasions, unusual for the type but among the reasons this quarter eagle rates a Gem grade. The surfaces are deep reddish-gold but reveal hints of subtle hazel iridescence near the rims on each side, especially the reverse. A great type coin: PCGS has seen only 17 submissions numerically finer (6/13). NGC ID# 288Z, PCGS# 7940

1910 Quarter Eagle, MS65+
Sparkling Mint Luster

- 3311 1910 MS65+ PCGS. CAC.** The sparkling mint luster is this coin's strong suit. Magnification reveals a few small marks scattered over each side, but these are inconsequential, especially when viewed in the context of this normally heavily abraded series. Sharply struck overall, with just a bit of softness on the lowest feather of the headdress. NGC ID# 2892, PCGS# 7941

1911-D Quarter Eagle, Well-Struck AU55
In High Demand in All Grades

- 3312 1911-D AU55 PCGS.** The yellow- to peach-gold surfaces of this Choice AU quarter eagle display traces of luster in the recessed areas. The design features are nicely brought up, including the eagle's shoulder and the mint mark. The 1911-D is in high demand in all levels of preservation. This piece exudes pleasing overall eye appeal. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU58
Excellent Eye Appeal

- 3313 1911-D AU58 NGC.** The 1911-D issue needs no introduction to series specialists, but others might be interested to know it is the sole key, elusive in all grades within the Liberty Head quarter eagle series, due to the low mintage of 55,680 pieces. This near-Mint State example shows excellent eye appeal over khaki-gold surfaces with minimal marks, a bold strike, and just a trace of the expected high-point rub. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU58
Well-Defined Mintmark

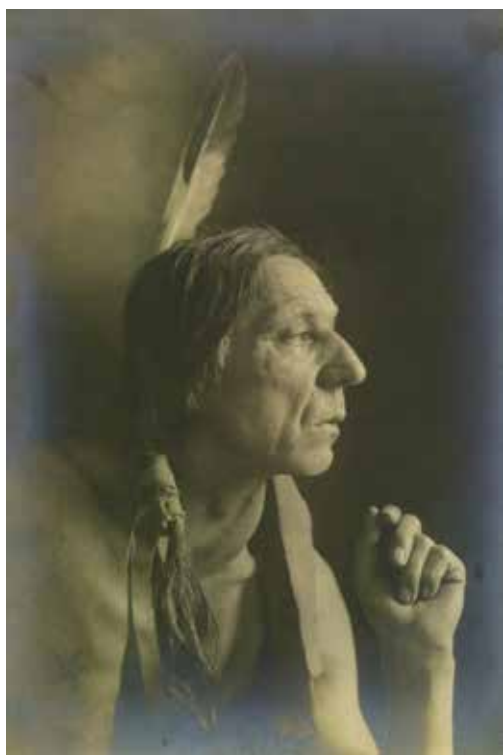

- 3314 1911-D AU58 NGC.** The 1911-D is the key to the Indian quarter eagle series in all grades. It not only boasts the lowest mintage (55,680 pieces), but few were saved at the time of issue. The yellow-gold surfaces of this near-Mint State example display ample luster and are minimally marked. The design elements are well-defined, including the eagle's shoulder feathers and the mintmark. This is a pleasing specimen for the discriminating collector. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU58
Low-Mintage Series Key

- 3315 1911-D AU58 PCGS. CAC. Vivid shades of orange and rose-gold patina blanket the surfaces of this near-Mint series key. The design elements are sharply detailed and the mintmark is boldly delineated. The lightly abraded surfaces retain vibrant original mint luster on both sides. Eye appeal is outstanding. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, MS63
Rich Color and Bright Mint Luster

- 3316 1911-D MS63 NGC. The old numismatic saw goes, "Buy the keys first," but as coin (and precious metals) prices have generally been on an upward slope for quite a number of years, there are increasing numbers of collectors who no longer complete entire sets of a single series. The new collecting approach comes out in the "Box of 20" style of numismatics, buying the best (or most beautiful, most costly, most key dates, most rare ... add your own personal attributes) 20 coins a collector can obtain. Some claim that numismatists who complete sets are collectors, while those who purchase "only key coins" are closet investors. In any case, the 1911-D quarter eagle appeals to many camps, as both series completists and key-date buyers need to obtain one for their collections. This is a rich orange-gold example that displays thick, sparkling mint luster. The main deterrent to an even higher grade are a couple of marks in the left obverse field. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS63
Famous Key Date**

- 3317 1911-D MS63 PCGS.** PCGS lists this coin as a “Strong D,” and indeed the mintmark is plainer than often seen. (It is a curiosity of the Bela Lyon Pratt “sunken relief” style that the mintmark, if one is present, is the only feature that is raised above the plane of the field.) This key-date quarter eagle has crisp all-around detail with clear interiors and pendants, with only the bottom of the lowest left incomplete. Lightly abraded apricot-gold surfaces have a subtle peach blush on the obverse that makes for fascinating eye appeal. This will be a “dream coin” for many collectors and is worth pursuing. NGC ID# 2894, PCGS# 7943

**1914 Quarter Eagle, Well-Struck MS63
Second Lowest Mintage of the Series**

- 3318 1914 MS63 PCGS. CAC.** This Select quarter eagle displays subtle peach-gold hues. The design elements are well-defined, including fairly sharp definition in the feathers on the eagle’s shoulder. A few scattered light marks determine the grade. The 1914 has the second-lowest mintage for the series. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS64
Second-Rarest Series Issue**

- 3319 1914 MS64 PCGS.** The surfaces show bold luster and minimal signs of contact on this condition rarity within the series, the second-rarest issue behind the 1911-D. The Indian’s cheek shows only a couple of minuscule ticks, and some slightly larger ones appear in the obverse field nearby. The overall eye appeal is excellent on this wheat-gold example. PCGS has certified only 54 submissions numerically finer (6/13). NGC ID# 2898, PCGS# 7946

**1914 Indian Quarter Eagle, MS64
Sharply Detailed and Lustrous**

- 3320 1914 MS64 NGC.** The 1914 Indian quarter eagle is a challenging date in high grade. This impressive Choice example displays sharply detailed design elements and vibrant mint luster throughout. The rich yellow-gold surfaces show a few highlights of green with only minor signs of contact. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS64
Scarce Any Finer**

- 3321 1914 MS64 PCGS.** Wheat-gold luster overall with touches of apricot and orange. Well-defined with touches of frostiness and only a few marks of any individual significance. While the 1914 quarter eagle is forever in the 1911-D’s shadow, it is conditionally very scarce any finer than this near-Gem. NGC ID# 2898, PCGS# 7946

1914 Quarter Eagle, MS64
Second-Rarest Indian Two and a Half

- 3322 1914 MS64 NGC. CAC.** From a mintage of 240,000 pieces, the 1914 quarter eagle is the second-most elusive issue in the Indian series. This attractive Choice example exhibits sharply detailed design elements throughout, with vivid greenish-gold surfaces that show a few hints of rose and vibrant mint luster on both sides. NGC ID# 2898, PCGS# 7946

1914-D Quarter Eagle, MS64+
Conditional Rarity

- 3323 1914-D MS64+ PCGS. CAC.** The deep orange-red color is accompanied by spectacular luster and equally strong eye appeal on this conditional rarity. This high-end piece shows a good strike and is only a few stray field marks away from a Gem grade — where it would be far, far more expensive. Population: 43 in 64+, 42 finer (6/13). NGC ID# 2899, PCGS# 7947

1915 Quarter Eagle, MS65
Excellent Type Coin

- 3324 1915 MS65 PCGS.** Certified in a green-label holder, this 1915 Indian Head quarter eagle in Gem condition is a great example for the grade and an excellent choice for a type set. Rich orange-gold surfaces show accents of lighter yellow amid full luster on well-struck and lightly marked surfaces. Excellent eye appeal. PCGS has seen only four numerically finer (5/13). NGC ID# 289A, PCGS# 7948

1915 Indian Quarter Eagle, MS65
Very Rare in Higher Grades

- 3325 1915 MS65 PCGS.** The 1915 Indian quarter eagle is not too difficult to locate in MS65 condition, but the issue is conditionally very rare in higher grades. This attractive Gem displays well-detailed design elements and slightly granular mint luster, with well-preserved orange-gold surfaces and outstanding visual appeal. PCGS has graded four numerically finer examples (6/13). NGC ID# 289A, PCGS# 7948

1928 Quarter Eagle, MS66
Important Condition Rarity

- 3326 1928 MS66 PCGS.** Although a plentiful issue from a mintage of 416,000 pieces, the 1928 is an important condition rarity that is rarely encountered above MS64, and this Premium Gem is tied for the finest that PCGS or NGC have certified. The two services have seen fewer than 30 Premium Gem specimens. Both sides of this beauty have brilliant and frosty yellow-gold luster with a few trivial copper spots, and some coppery-orange toning at the upper left reverse. Only a few widely scattered, trivial marks are present. Population: 10 in 66, 0 finer (6/13). NGC ID# 289E, PCGS# 7952

PROOF INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, PR63
First Year of the Matte Finish

- 3327 1908 PR63 NGC.** Proofs of this year are always a popular item with collectors. Not only is it the first year of issue for the reduced relief Indian design, and a low mintage date with only 236 struck, but all proofs also have a distinctive and quite lovely deep khaki color. The surfaces of this example are attractive, although not quite perfect. A noticeable mar is seen in the center of the reverse on the eagle's wing. This offering represents a rare opportunity to purchase a matte proof Indian quarter eagle at an affordable price.
Ex: Long Beach Signature (Heritage, 9/2006), lot 3405. NGC ID# 289G, PCGS# 7957

1914 Quarter Eagle, PR65
Rich Orange-Gold Color

- 3328 1914 PR65 NGC.** During the "Renaissance of American Coinage," the U.S. Mint adapted its proofing processes to novel designs such as Bela Lyon Pratt's sunken-relief quarter eagles and half eagles. Proof purchasers, however, were not uniformly interested in the intentionally dulled matte proofs, with many preferring the mirror-finish pieces that had come before. After two years of experimentation with an in-between "Roman Gold" finish, the Mint gave up on trying to please all customers and returned to a matte finish for all proof gold coins until the end of such striking in 1915.

This 1914 Gem proof comes from the next-to-last issue in its series. Its orange-gold surfaces show a touch of khaki-green overtone and are carefully preserved save for a shallow diagonal flaw at the cheekbone. The official mintage for the proof 1914 quarter eagle was just 117 pieces, and survivors are scarcer than the combined certified population with its many resubmissions would suggest. NGC ID# 289N, PCGS# 7963

THREE DOLLAR GOLD PIECES

1854 Three Dollar, MS65
Quality First-Year Example

- 3329 **1854 MS65 PCGS.** While it has the highest mintage of the three dollar series (and is the only one to reach the six figures), the 1854 three dollar is not so available in Gem condition as its novelty status might suggest. In fact, MS65 coins such as this are condition rarities. The swirling, half-pillowy luster that would become a three dollar trademark is in full evidence here, primarily pale yellow with hints of greenish-gold. Only a few light grazes, the most prominent of which is to the left of the reverse wreath, preclude an even finer designation. Population: 20 in 65, 11 finer (5/13). NGC ID# 25M3, PCGS# 7969

1857 Three Dollar Gold, MS62
Few High-Grade Specimens Saved

- 3330 **1857 MS62 PCGS.** The pleasing orange-gold surfaces of this attractive MS62 specimen retain much of their original satiny mint luster and show only the expected number of minor contact marks for the grade. The well-detailed design elements show a touch of softness on the date and denomination. Population: 28 in 62, 27 finer (6/13). NGC ID# 25MA, PCGS# 7976

1857 Three Dollar, MS62
Semiprooflike, Reddish Patina

- 3331 **1857 MS62 PCGS.** The 1857 had a substantial mintage (for the series) of 20,891 pieces, but the vast majority entered circulation with few set aside in mint condition. Only 45 to 60 Uncirculated pieces are believed known. This piece is particularly attractive for the grade with the usual semiprooflike fields, and in this case significant reddish patina lays over the heavily striated fields. Lightly abraded with a couple of shallow planchet flakes out of the obverse fields. Population: 28 in 62, 27 finer (6/13). NGC ID# 25MA, PCGS# 7976

**1860-S Three Dollar Gold, Near-Mint
Generous Remaining Luster**

- 3332 1860-S AU58 PCGS.** With the exception of the singular 1870-S three dollar gold piece, the last mintmarked issue of that denomination is the 1860-S from a decade earlier. This is a lightly rubbed representative from that final mass-production issue of 7,000 pieces, pale yellow-gold with flat high points but generous field luster that shows few interruptions. Obverse detail is excellent, though the lower wreath shows a degree of the softness that commonly is found on non-Philadelphia threes. Mint State examples are rarities, with just three graded so far by PCGS (6/13). NGC ID# 25MF, PCGS# 7981

**1862 Three Dollar Gold, MS61
Popular Civil War Date**

- 3333 1862 MS61 PCGS.** The 1862 three dollar gold piece claims a low-mintage of 5,750 pieces, struck during the severe economic stresses of the Civil War. This attractive Mint State example features light yellow and rose-gold surfaces that retain much of their original mint luster and show a scattering of minor contact marks on both sides. Population: 5 in 61, 43 finer (6/13). NGC ID# 25MH, PCGS# 7983

**1872 Three Dollar, MS62
Bright, Reflective Fields**

- 3334 1872 MS62 NGC.** Only 2,000 circulation strikes were produced of the 1872 three dollar. As one would expect from such a low mintage, the initial polish didn't have time to wear off the dies. The result is what is seen here: bright, prooflike fields. Numerous small abrasions are peppered over each side and explain the grade. Well struck. NGC ID# 25MV, PCGS# 7994

**1878 Three Dollar, MS65
Top-Notch Eye Appeal**

- 3335 1878 MS65 PCGS.** The 1878 three dollar gold issue is the last of the three well-known dates that usually serve for type purposes, along with the 1854 (technically a one-year subtype) and the 1874. The 1878 is accordingly quite popular at the Gem level, although finer-graded examples are much more elusive. This splendid PCGS-certified example displays impeccable golden-orange surfaces with blazing luster and none of the usually seen mix of frosty and prooflike areas. Contact marks are few and scattered, and the bowknot shows a hint of strike softness — mere quibbles compared to the overall top-notch eye appeal. NGC ID# 25MZ, PCGS# 8000

**1883 Three Dollar, MS61 Prooflike
Fully Reflective Fields**

- 3336 1883 MS61 Prooflike NGC. CAC.** The 1883 had a very low mintage of only 900 pieces, and it is an issue that can occasionally be located with fully prooflike fields. This bright yellow-gold example shows none of the usually encountered mint frost intermixed with the reflectivity. Numerous small to medium-sized marks are scattered over each side, explaining the grade. PCGS# 78005

**1885 Three Dollar Gold, MS61 Prooflike
Only 801 Pieces Struck**

- 3337 1885 MS61 Prooflike NGC.** Only 801 business-strike three dollar gold pieces were struck in 1885, as the series wound down to an end by the end of the decade. This impressive MS61 example displays reflective prooflike fields and sharply detailed design elements, with the expected number of minor contact marks for the grade. Census: 3 in 61 Prooflike, 17 finer (6/13). PCGS# 78007

**1886 Three Dollar, MS61
One of 1,000 Business Strikes**

- 3338 1886 MS61 PCGS.** Yellow-gold surfaces are semireflective, not uncommon for an issue of just 1,000 business strikes, with a streak of orange at the upper left obverse. Generally well-defined and pleasing despite a number of fine abrasions that combine to account for the grade. Population: 14 in 61, 36 finer (6/13). NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar, Reflective MS63
Deep Reddish Patina**

- 3339 1887 MS63 PCGS.** While Mint records indicate that 6,000 business strikes were produced of the 1886 three, the net distribution may have been less because of meltings in the Mint. This is a brightly reflective example that displays deep red-gold color over each side. A comet-like grease stain (as struck) is located in the field by the M in AMERICA. NGC ID# 25NA, PCGS# 8009

PROOF THREE DOLLAR GOLD PIECES

1854 Three Dollar Gold, PR63 Cameo Rare Proof From First Year of Series

3340 1854 PR63 Cameo PCGS. The recorded proof mintage of only 15 pieces appears to be on the low side and does not square with the fact that two different pairs of proof dies were employed. On one of those dies, the ES in STATES is in a straight line, and the lettering is bolder and more deeply impressed into the die. On the other die, the S is slightly lower than the E, and the lettering is not so deep. While it is possible that some catastrophic die failure occurred after one or a handful of pieces were struck, more likely is that the recorded mintage is erroneous ... or could restrikes have been made later?

Bowers' series reference offers these comments:

"On April 28, 1854, the Mint struck 15 Proof examples that were sent by Mint Director James Ross Snowden to the Secretary of the Treasury James Guthrie in Washington. Others were retained at the Mint, including two by Chief Engraver Longacre. Interested numismatists could obtain specimens there. This was initiated what became an uninterrupted string of Proof issues, although production was exceedingly low for the next several years."

While there is no record of restrikes, this would certainly not be the only U.S. coin for which restrikes are suspected but unproven. As a one-year subtype (with small DOLLARS, 1854 only) and a first-year issue, perhaps the subsequent demand for proof examples required the striking of extra pieces beyond the original 15 coins. Various Mint personnel working there in the 1850s were far from averse to making "on-demand" issues when the correct bell was rung. But that is mere speculation. This coin is one of two PR63 Cameo proofs at PCGS, with two finer, both PR64 Cameo (6/13).

The present example offers rich orange-gold surfaces with considerable contrast present. The S in STATES is lower than the E, without the deeply impressed lettering characteristic of the other proof die. A couple of light scrapes are noted on Liberty's cheek, and a couple of dark toning spots on the obverse: one in back of the eye, and one behind the headdress. On the reverse a similar dark spot occurs at the bottom of the 1, and a patch of light yellow-gold patina is noted through DO in DOLLARS. A highly desirable early proof example of this historic and unusual denomination.

Ex: Dr. Robert J. Loewinger Collection; FUN Signature Auction (1/2007), lot 3121; FUN Signature (Heritage, 1/2010), lot 2144; ANA Signature (Heritage, 8/2010), lot 3461; Philadelphia Signature (Heritage, 8/2012), lot 5329. NGC ID# 289R, PCGS# 88017

1882 Three Dollar Gold, PR62
Only 76 Pieces Struck

- 3341 1882 PR62 NGC. From a mintage of just 76 pieces, the 1882 proof three dollar gold piece is seldom encountered in any grade. This attractive PR62 example displays reflective greenish-gold surfaces with a few minor contact marks and well-detailed design elements. Census: 3 in 62, 6 finer (6/13). NGC ID# 28AR, PCGS# 8046

1883 Three Dollar Gold, PR62 Cameo
One of 89 Proofs Struck

- 3342 1883 PR62 Cameo NGC. While the three dollar gold issue never reached the proof-versus-business strike absurdity of the three cent nickels, where several dates have proof mintages larger than the number of circulation coins struck, there are several cases where proofs make up a substantial minority of the year's total output. The recorded strikings for the 1883 three dollar, for instance, are 89 proofs against just 900 business strikes. This PR62 Cameo representative has clear contrast and a few copper spots near the rims of the yellow-gold surfaces. Substantially hairlined in the fields, yet pleasing at arm's length. Census: 1 in 62 Cameo, 29 finer (6/13). NGC ID# 28AS, PCGS# 88047

PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, XF Details
Accessible Example of Famous Type

- 3343 1879 Flowing Hair, Judd-1635, Pollock-1832, R.3, — Plugged, Harshly Cleaned — NGC Details. XF Details. The 1879 and 1880 gold stellas are sufficiently famous and distinctive that they receive a full page of attention in the 2014 *Guide Book*, where they are listed in the gold section despite their technical status as patterns. In his 1988 *Encyclopedia*, Walter Breen discusses the well-known numismatic legend about stellas appearing on the necklaces of D.C. madams, perhaps with the present piece in mind. It has a prominent plugged hole, which affects the C for "copper" in the obverse legend and much of the word FOUR on the reverse. The reverse has a decent appearance aside from the plug at 6:30, but the obverse displays wear on the portrait, and that side is bright and hairlined from cleaning. Yet for many collectors who would otherwise be shut out of owning this famous issue, all the problems taken together are not enough to wipe away this truth: it is still a Stella.

EARLY HALF EAGLES

1795 Small Eagle Five Dollar, BD-3 AU Details Example

3344 1795 Small Eagle — Damaged — NGC Details. AU. BD-3, High R.3. The year 1795 saw the first production of half eagles at the Philadelphia Mint, with a reported mintage of 8,707 pieces. Two major design types were struck during the year, one with the Small Eagle reverse and the other with the Heraldic Eagle reverse. There are 12 die varieties known for the Small Eagle reverse, with the present coin representing the relatively available BD-3 variety, characterized by the position of star 11 joining both the Y in LIBERTY and star 12 on the obverse, and the position of the leaf end under I in UNITED on the reverse. John Dannreuther believes the BD-3 variety accounts for 2,000-3,000 pieces of the original mintage, with perhaps 175-225 examples surviving today.

The present coin displays bright greenish-gold surfaces, with sharply detailed devices, and strong mint luster. Several rim bumps, the most serious at 6 o'clock and 8 o'clock on the obverse, and a short, deep scratch on the truncation of the bust are the mentionable flaws on this otherwise attractive early gold piece.

Ex: ANA Signature (Heritage, 3/2008), lot 1452; Long Beach Signature (Heritage, 6/2010), lot 1602; Coinfest Signature (Heritage, 10/2010), lot 4752.

1795 Small Eagle Five, AU58
First Year of Gold Coinage
Rare BD-8 Variety

3345 1795 Small Eagle AU58 PCGS. BD-8, High R.5. Bass-Dannreuther Die State a/a. This 1795 Small Eagle, BD-8, is among the rarer die combinations of the 12 known for the year, coming in at High R.5 or 30-40 known in the BD guide. The BD-8 is easily recognized by numerous characteristics: Stars 1 and 2 touch, and star 1 appears to poke straight inward to the lowest hair curl directly to its right. The tip of the 5 barely overlies the bust, and the 1 is just barely free of the hair. The stars are arranged awkwardly 10 and 5, so that star 10 (topmost left star) touches one point into the cap, while star 15, the lowest on the right, is considerably distant from the bust front.

On the reverse, the wreath shows three berries, one on the outside left, placed high, and two on the outside right. There is no berry on the inside left. (Another reverse has three berries, but the outside left berry is low.)

Numismatists today can tell by the early state of the obverse that this was the first use. Nonetheless, the obverse die of this pairing was also used to make not only the BD-9 and BD-10 marriages, but also trotted out again in 1798 with a Large Eagle reverse die to make the unique 1795 Large Eagle coin, BD-13. John Dannreuther writes that "This is [the] most used obverse die of 1795 (number of varieties), as one fourth had this die. Since it was also used for the Large Eagle variety BD-13, this obverse lasted much longer than the usual early dies. As dies were so precious to the early Mint, this certainly must have been a pleasant change."

This attractive near-Mint example is still somewhat lustrous throughout the antique-gold surfaces, which show a few small sprinkled abrasions from light circulation, but the only mentionable mark on the obverse is a small curving one in the right field, before Liberty's nose and mouth. A small group of marks in the lower reverse field, under the eagle's right (facing) wing, is also undistracting. There are no visible planchet adjustment marks on either side. NGC ID# 25ND, PCGS# 8066

1798 BD-5 Half Eagle, AU53
Large 8, Heraldic Eagle

- 3346** 1798 Large Eagle, Large 8, 13 Star Reverse AU53 PCGS. CAC. BD-5, R.5. Bass-Dannreuther Die State c/b. An early stage of the "terminal" die state, with a crack in the left obverse field from star 7 to a curl below the cap, and with a short crack from the bottom of the E to below the R. However, there is no evidence of the continuation of the first crack through the 8 to the border. The reverse has four stars aligned down to the right from star 3, and four stars aligned down the left from star 4, like crossed swords over the eagle's head. Star 8 joins the eagle's beak, and that solitary feature is diagnostic for the variety. Perhaps 40 examples of BD-5 are known. This piece has a distinct greenish appearance on lemon-yellow surfaces with considerable remaining luster. Population: 18 in 53, 45 finer (6/13). NGC ID# 25NN, PCGS# 8078

1803/2 Half Eagle, BD-1, MS61
Generous Mint Luster

- 3347** 1803/2 MS61 PCGS. BD-1, R.4. Bass-Dannreuther Die State b/c, the reverse showing several cracks but not yet progressed to breaks. Generous all-around luster is apricot-gold with a few splashes of peach, softly swirling and excellent for a coin more than two centuries old. On the obverse, a straight flaw from the tip of the bust diagonally down to the rim shows "fresh metal," indicating a post-striking flaw of some kind; by contrast, the reverse with its soft strike and crisscrossing sets of die adjustment marks at the bottom and left of the shield is all as-struck and in isolation would warrant a better grade than MS61. NGC ID# 25NY, PCGS# 8084

1803/2 Half Eagle, MS62
Scarce Perfect T, BD-4 Specimen

3348 1803/2 MS62 PCGS. CAC. BD-4, R.4. Bass-Dannreuther Die State c/c. Mint records indicate 33,506 Capped Bust Right half eagles were struck in 1803 and four die varieties are known for the date. All four varieties are overdates, with this coin representing the scarce BD-4 variety, easily recognized by the perfect T in LIBERTY. Probably no more than 125-175 examples of the BD-4 survive today in all grades, and the variety probably accounted for 6,000-9,000 pieces of the reported mintage. The obverse die was only used on this variety and numismatists noted the Perfect T as long ago as the 19th century. The reverse die was especially durable, and it was used previously to strike the 1803 BD-3 variety and later used on four varieties in 1804.

The present coin is an attractive MS62 example, with well-detailed design elements and lustrous greenish-gold surfaces. A few minor adjustment marks are evident in the obverse field, but only a few scattered contact marks are present. Both side show an extensive network of die cracks, indicating a late state of the dies. Population: 47 in 62, 38 finer (6/13). NGC ID# 25NY, PCGS# 8084

1804 Capped Bust Right Five, MS62
Normal 8, Small 4, BD-2 Variety

3349 1804 MS62 NGC. CAC. BD-2, High R.4. Bass-Dannreuther Die State c/e. Mint records tell us that 30,475 Capped Bust Right half eagles were struck in 1804, split between seven different die varieties. This coin represents the BD-2 variety, with a Small 4 in the date and TE in UNITED spaced close together. This obverse die has been called a Small 8 in the past, but Harry Bass showed that this 8 is actually from the correct numeral punch set for this issue. The BD-2 is probably the most available variety of the date, but it still has a surviving population of only 70-90 pieces in all grades.

The present coin is an attractive MS62 example with sharply detailed design elements, except for some slight incompleteness of detail due to lapping on the cloud below A in STATES. The pleasing surfaces retain much original mint luster and only minor contact marks are evident. A few mint-made adjustment marks are visible on the bust. Census: 23 in 62 (1 in 62+), 21 finer (6/13). NGC ID# 25P2, PCGS# 8085

1808 Half Eagle, XF45
Wide 5D, BD-4 Variety

3350 1808 XF45 NGC. BD-4, High R.3. Bass-Dannreuther Die State c/a. The Wide 5D in the denomination identifies the BD-4 variety, with a surviving population of 175-225 pieces in all grades. This coin exhibits lightly worn well-detailed design elements and the minimally abraded yellow and greenish-gold surfaces retain traces of original mint luster. NGC ID# 25PA, PCGS# 8102

1808 Capped Bust Left Half Eagle, MS64
Normal 5D, BD-3 Variety

3351 1808 MS64 PCGS. BD-3, R.4. Bass-Dannreuther Die State b/e. A substantial mintage of 55,578 Capped Bust Left half eagles was accomplished in 1808, with four die varieties known for the date. Two of the four varieties are overdates. This coin represents the BD-3 variety, which shares the same normal date obverse with BD-4, but has the easily recognized reverse with normal spacing on the 5D in the denomination. BD-3 is a scarce variety, with a surviving population of 100-125 examples in all grades. This issue is extremely rare in higher grades.

The present coin is an impressive Choice example with sharply detailed design elements, pleasing peach-gold surfaces, and vibrant mint luster throughout. Both sides exhibit extensive clash marks, but few signs of contact are present. Eye appeal is outstanding. Population: 14 in 64, 2 finer (6/13). NGC ID# 25PA, PCGS# 8102

1810 Half Eagle, MS63
Large Date, Large 5, BD-4

3352 1810 Large Date, Large 5 MS63 PCGS. BD-4, R.2. Bass-Dannreuther Die State b/b. The 1810 Capped Bust Left half eagle is known in four die varieties, including this most available BD-4 variety, with a Large Date and a Large 5 in the denomination. The BD-4 probably accounted for 75,000-90,000 pieces of the large reported mintage of 100,287 examples for the date. The surviving population is around 500-750 specimens in all grades. The obverse die was used previously to strike the very rare 1810 BD-3 variety and this was the only use of the reverse.

This coin displays well-detailed design elements with just a touch of softness on the eagle's claws. The pleasing orange and rose-gold surfaces show only minor signs of contact, but many small adjustment marks are hidden in the dentils. Vibrant satiny mint luster adds to the ample eye appeal. Population: 37 in 63 (1 in 63+), 36 finer (6/13). NGC ID# 25PG, PCGS# 8108

1811 Half Eagle, MS63
Small 5, BD-2

3353 1811 Small 5 MS63 PCGS. BD-2, R.3. Bass-Dannreuther Die State e/a with a die crack between stars 9 and 10. The two 1811-dated half eagle varieties share a common obverse die that shows more space between the 18 than between the 81, and all the 1's in the date appear to lean slightly left. The Tall 5 reverse, BD-1, is actually a holdover from the 1810 BD-1, while the Small 5 reverse uses the same digit punch as that for 1810, but the die is unique to this year. This well struck example has good luster and only minor grazes on the cheek and obverse field. The reverse is well preserved save for a faint mark near the E in UNITED. Population: 36 in 63, 21 finer (6/13). NGC ID# 25PH, PCGS# 8109

**1811 Small 5 Half Eagle, BD-2, MS63
Reverse Rotated 45 Degrees to Left**

- 3354** 1811 Small 5 MS63 PCGS. BD-2, R.3. Bass-Dannreuther Die State d/a, not clashed on the reverse, though the obverse shows faint cracking between stars 9 and 10. Both varieties of the 1811 half eagle are scarce regardless of grade. This Small 5 piece has softly swirling luster, perfectly suited to the coin's age and circumstances of striking. Sun-yellow and peach-gold surfaces show a few faint imperfections, most visibly shallow scrapes to the left of Liberty's lips, but the all-around eye appeal makes this an excellent coin for the type or date enthusiast. For the Small 5 variety, Population: 36 in 63, 21 finer (6/13). NGC ID# 25PH, PCGS# 8109

**1812 Wide 5 D. Five Dollar
BD-1, Unc Details**

- 3355** 1812 — Cleaning — PCGS Genuine. Unc Details. BD-1, R.3. Wide 5 D. Die State a/a. This is a well-defined example of this variety with the oddly spaced denomination. Both of the graver lines are obvious on the reverse. The surfaces are bright yellow-gold, yet retain generous amounts of mint luster surrounding the devices. Minimally abraded.

**1814/3 Half Eagle, BD-1, MS61
Low-Mintage Overdate**

- 3356** 1814/3 MS61 NGC. CAC. BD-1, High R.4. Bass-Dannreuther Die State c/d. Only 15,454 Capped Bust Left half eagles were struck in 1814, with a single die variety known for the date. All examples seen are overdates, with the remnants of an undertype 3 visible at the top of the final digit in the date. This coin is from a late state of the dies, with die cracks and clash marks on both sides. This was the only use of the obverse die, but the reverse was also used to strike the BD-2 variety in 1813 and the rare and famous 1815 half eagle the following year. The 1814/3 is a very scarce issue in its own right, as the surviving population numbers no more than 80-100 pieces in all grades.

This coin is an attractive Mint State specimen with well-detailed design elements and vivid orange and rose-gold surfaces that display much original mint luster. A scattering of minor contact marks on both sides explains the grade. Census: 10 in 61, 28 finer (6/13). NGC ID# 25PN, PCGS# 8117

1818 Half Eagle, BD-1, MS62
Rare 'Normal Dies' Variety With
John Reich's Notched Star Punches

3357 1818 MS62 PCGS. BD-1, R.5. Bass-Dannreuther Die State b (early)/a. The half eagles of 1818 are “unique among early half eagles and, really, all the early gold coins,” in the words of John Dannreuther, for the three monogamous (single-use each) die pairings, obverse-reverse marriages 1-A, 2-B, and 3-C, respectively, for the BD-1, BD-2, and BD-3. Although John Reich had left the employ of the Philadelphia Mint the year before, in 1817, someone, presumably Robert Scot, to whom the different obverse head punch is attributed, grabbed Reich’s “secret notch” punch for all stars on the obverse of the BD-1. The three obverse dies are all slightly different, but since the reverse dies are all single-use as well, it suffices to describe the BD-1 as the Normal Dies pairing, while BD-2 is the STATESOF variety, and the BD-3 is the 5D over 50 blunder.

This piece is in an interesting die *stage*, as it shows prominently the die crack on the reverse from the D in the denomination through the bases of AMERICA, yet there is no trace of the other die crack that Bass described as “now strong, from edge, past leaf, to tip of left-most claw, edge of shield, in front of eagle’s throat, through head, into field, to ribbon at S.” As Bass-Dannreuther estimate this die pairing was used to strike somewhere from 10,000 to 15,000 of the 48,000-plus pieces known for the date, it is unsurprising that more than one die *stage* might be known.

The surfaces are medium yellow-gold with bold luster present amid a few minor contact marks and thin, wispy straight pinscapes, some nearly blending in with a few minor planchet adjustment marks in the center obverse. The eye appeal is excellent throughout both sides, with a strong strike. Population: 7 in 62, 5 finer (5/13). NGC ID# 25PR, PCGS# 8119

CLASSIC HALF EAGLE

1834 Plain 4 Half Eagle, MS62
First Head, McCloskey 3-B

3358 1834 Plain 4 MS62 NGC. First Head, Breen-6501, McCloskey 3-B, R.1. An early die state with no evidence of the usual die crack on Liberty’s cheek, and no indication of a die crack through star 7. This example has reflective fields with a faint greenish appearance on its reflective light yellow surfaces. A splendid specimen. NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

1847 Half Eagle, MS63
Remarkably Clean and Lustrous

3359 1847 MS63 PCGS. From a substantial mintage of 915, 981 pieces, but infrequently offered in mint condition. This is an extremely attractive MS63 example exhibiting full, pleasing mint luster, an excellent strike, and far below the average number of normally-seen abrasions. Only wispy pinscapes in the obverse and reverse fields, prevent a higher grade assessment. This coin has a lot of eye appeal. Population: 19 in 63 (1 in 63+), 5 finer (6/13). Ex: *Denver Signature* (Heritage, 8/2006), lot 5503. NGC ID# 25TL, PCGS# 8231

**1856 Liberty Half Eagle, MS64
Only One Finer Coin at PCGS**

- 3360 1856 MS64 PCGS.** The 1856 Liberty half eagle is much more difficult to locate than its substantial mintage of 197,990 pieces would suggest, especially in high grade. Mint State examples are as elusive as some of the sought-after contemporary issues from the Southern mints (Dahlonaga and Charlotte) that garner the lion's share of customer attention in today's market. Heritage has not offered an MS64-graded specimen since 2002, and the finest-known MS65 NGC Milas coin was sold by Stack's in 1995 for \$46,200.

The present coin is a delightful Choice specimen, with well-detailed design elements that exhibit especially sharp definition on the peripheral devices. The pleasing yellow and rose-gold surfaces display vibrant mint luster and only minor signs of contact. Eye appeal is outstanding. Population: 1 in 64, 1 finer (6/13). NGC ID# 25UV, PCGS# 8266

**1858-C Five Dollar, MS60
Popular Charlotte Type Coin**

- 3361 1858-C MS60 NGC. Variety 1.** The 1858-C is one of the more frequently encountered Charlotte fives with an estimated 275-375 pieces believed extant in all grades. However, it is conditionally challenging in Uncirculated condition with only 10-15 individual pieces believed known. This example has light reddish-gold surfaces and shows the usual semireflective fields. However, as the grade would indicate, each side is peppered with numerous small to medium-sized abrasions. NGC ID# 25V8, PCGS# 8277

1860-C Half Eagle, MS62
Generous Luster, Minimal Abrasions

3362 1860-C MS62 NGC. Variety 1, the only dies. Small date logotype close to the rim, large C mintmark nearly touching the juncture of the stem and fletchings. The mintage of the 1860-C half eagle was 14,813 pieces, the lowest for any Charlotte half eagle since the 1846-C. The 1860-C half eagle is a difficult issue to grade; even though many examples including the present piece show full star radials, some of the central hair details on Liberty, and more so on the reverse, show "incomplete hubbing," as Doug Winter points out, leading to notably weak detail which, nonetheless, is not due to strike weakness. This example shows generous mint luster over golden-yellow surfaces with a modicum of small ticks on each side. The combined NGC and PCGS population data show nine submissions at the MS62 grade level, and five are finer (6/13). NGC ID# 25VG, PCGS# 8285

1862 Half Eagle, XF40
Low-Mintage Wartime Issue

3363 1862 XF40 NGC. Moderate wear appears on each side consistent with the grade, but there are no singular marks, and much eye appeal remains on the surfaces of this XF40 1862 half eagle. Pleasing deep orange-red color and the bold strike are pluses. The low mintage during the Civil War was 4,465 coins, and we suspect the certified populations are littered with duplicates. Census: 3 in 40, 29 finer (5/13). NGC ID# 25VP, PCGS# 8292

1866-S No Motto Five, XF45
Elusive Issue, Unknown in Mint State

3364 1866-S No Motto XF45 NGC. San Francisco produced the 1866-S Motto half eagle in a quantity more than four times as large as the elusive No Motto five, 34,920 coins versus 9,000. Most of the few minted circulated widely in the Old West of the era. This Choice XF piece is far finer than the average circulated certified example (this is redundant, as none are known in Mint State), which is about VF30. The surfaces show a scattering of ticks and the expected moderate wear, along with a somewhat irregular strike (softness on a couple of letters of LIBERTY and the curls nearby) and a couple of larger scrapes in the obverse. NGC ID# 25VY, PCGS# 8300

1877-CC Five Dollar, Choice XF
Smooth, Original Surfaces

3365 1877-CC XF45 NGC. Variety 1-B. This moderately circulated piece shows a decent strike on both sides, and there are no relevant abrasions for a gold coin from the rough-and-tumble 1870s West with 15 points of wear. The apricot-gold surfaces are well defined and display hints of luster. Rare in all grades. Census: 19 in 45, 31 finer (6/13).
Ex: St. Louis Central States (5/2007), lot 3640, which realized \$4,887.50. NGC ID# 25X2, PCGS# 8343

1881-CC Half Eagle, AU58
Low-Mintage Carson City Issue

- 3366 1881-CC AU58 PCGS. CAC. Variety 1-A**, sole dies for the year. Generous mint luster remains on the surfaces of this barely circulated AU58 1881-CC half eagle, a coin that also offers a sharp strike, if not quite full, and excellent eye appeal. The surfaces are medium yellow-gold. A thin scrape on Liberty's cheek and a couple of blunt hits on the neck require a short mention. The low mintage of this half eagle issue — 13,886 pieces, or nearly half the number of eagles Carson City struck in this year — makes it popular, and this piece's CAC sticker will make it more so. Population: 6 in 58, 3 finer (6/13). NGC ID# 25XE, PCGS# 8356

1884 Half Eagle, MS65
Tied for Finest at NGC

- 3367 1884 MS65 NGC.** With a mintage just shy of 200,000 pieces, this mid-1880s half eagle issue from Philadelphia is not an obvious candidate for condition rarity, and coins through MS62 are readily available. By the Select level, however, the date is genuinely scarce, and Gems are prime rarities. This example, one of two MS65 coins certified by NGC with none finer at that service (5/13), has solid reverse detail and orange-laced sun-yellow luster with generous frost. The surfaces are without prominent marks, though a graze above the bridge of Liberty's nose shines and thus appears more prominent than it is. NGC ID# 25XN, PCGS# 8364

1890-CC Half Eagle, MS63+
First Carson City Five Since 1884

- 3368 1890-CC MS63+ NGC. CAC. Variety 1-A**, only known die pair for the mintage of 53,800 coins. Yellow-gold surfaces on this Select Mint State coin show a sharp strike overall with good eye appeal, despite a few tiny brownish flecks confined largely to the obverse fields. Good luster complements a sharp strike, and a few scattered ticks and luster grazes account for the grade. NGC ID# 25Y3, PCGS# 8376

**1893-S Five Dollar, MS65
Great Example of an Underrated Issue**

- 3369 1893-S MS65 NGC.** An impressively preserved example of the 1893-S five dollar, an underrated issue from the same date and mint as its more famous Morgan dollar counterpart. Yellow-gold surfaces show aspects of orange, most visibly at the margins. Sharp on the reverse, though the hair at Liberty's temple is soft. One of the best survivors for the issue, with only one MS66 or finer coin in the combined certified population (6/13). NGC ID# 25YD, PCGS# 8386

**1901-S Liberty Five, MS67
Tied for Finest Certified at PCGS**

- 3370 1901-S MS67 PCGS. CAC.** From a huge mintage of more than 3.6 million pieces, the 1901-S Liberty half eagle is a plentiful issue, and the first choice of mintmark type collectors. Of course, the population thins out in higher grades, and the 1901-S is very rare at the MS67 level, and virtually unobtainable any finer. This incredible Superb Gem exhibits well-detailed design elements, with just a trace of softness on some of the stars. The well-preserved honey-gold surfaces display vibrant mint luster throughout and eye appeal is tremendous. Population: 2 in 67, 0 finer (6/13). NGC ID# 25YX, PCGS# 8404

**1907 Liberty Half Eagle. MS66
No Finer Examples at PCGS**

- 3371 1907 MS66 PCGS.** A spectacular Premium Gem from the last year of the Liberty design, this coin exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces display vivid shades of orange and lilac patina, with outstanding eye appeal. Population: 22 in 66, 0 finer (6/13). NGC ID# 25ZC, PCGS# 8416

INDIAN HALF EAGLES

**1909-O Indian Five, AU Details
Final O-Mint Issue**

- 3372 1909-O — Smoothed — PCGS Genuine. AU Details.** The 1909-O is the only O-mint Indian half eagle, from a low mintage of 34,200 pieces coined during the final year of operations at the New Orleans Mint. This still-attractive specimen shows signs of smoothing on the obverse surfaces, but it retains much original mint luster and vivid green and orange-gold patina. NGC ID# 25ZK, PCGS# 8515

**1909-O Five, AU Details
Key to the Five Dollar Indian Series**

- 3373 1909-O — Cleaning — PCGS Genuine Secure. AU Details.** The surfaces are just a tad too bright to be believable, but believe that this is a genuine 1909-O five dollar. The mintmark is complete, but better defined on the right side, as seen on many of this issue. The strike details are remarkably sharp and there are no untoward abrasions in the fields. Slight friction over the high points is noted.

1909-O Half Eagle, AU58
Last New Orleans Gold Issue

3374 1909-O AU58 PCGS. The 1909-O half eagle is a standout rarity within the Indian Head series due to its low production of 34,200 pieces. The next-lowest mintage within the series was more than double that, the 1911-D half eagle at 72,500 coins. The 1909-O half eagle's small mintage nonetheless pales beside some of the 19th century O-mint issues, such as the 1879-O double eagle (2,325 minted); the 1879-O eagle, even lower at 1,500 coins struck; or the 1883-O ten dollar, at 800 pieces made. Even though the 1909-O half eagle's production looks generous alongside some of those notable rarities, it is a conditional rarity as well, and for all practical purposes most collectors will have to make do with a nice XF-AU or low-Mint State example. This is a bright near-Mint piece that retains generous amounts of satiny luster. Well-struck overall, just a little soft on the lowest part of the headdress, and minimally abraded. NGC ID# 25ZK, PCGS# 8515

1910-S Half Eagle, MS62
Low Survival Rate

3375 1910-S MS62 PCGS. CAC. The 1910-S Indian half eagle is more elusive than its mintage of 770,200 pieces suggests, and the issue is very scarce even in lower Mint State grades. This well-struck piece displays pleasing yellow-gold color. A few small ticks appear at the rims. PCGS has awarded higher numeric grades to only 46 examples (6/13). NGC ID# 28DM, PCGS# 8519

1911-D Half Eagle, AU58
A Key Within the Series

3376 1911-D AU58 PCGS. The 1911-D half eagle is a low-mintage rarity but not the sole standout within its series simply because, unlike in the quarter eagles, other series issues are also rare, such as the 1909-O and 1929. This near-Mint State 1911-D shows great luster over medium khaki-gold surfaces. The high points show just a touch of rub and a few light contact marks, but the eye appeal is excellent. NGC ID# 28DR, PCGS# 8521

1914 Half Eagle, MS64+
Seldom Seen Finer

3377 1914 MS64+ PCGS. CAC. Excellent detail for the design with complete pendants on the necklace and strong interiors. The obverse is remarkably clean, and while the sun-gold reverse shows scattered light abrasions in the fields, the MS64+ grade is well-justified. A small copper spot is noted at the R in TRUST. PCGS has graded just 29 pieces as MS65 or better (6/13). NGC ID# 28DU, PCGS# 8527

1916-S Five Dollar, MS64
Rich Reddish-Gold Color

3378 1916-S MS64 NGC. The 1916-S is conditionally rare, and this near-Gem is awash in rich reddish-gold color. Pleasingly frosted in finish, both sides are sharply struck over all but the very highest points of the design. Generally distraction-free save for a few wispy abrasions in the left obverse and upper reverse fields.

Ex.: Long Beach Signature (Heritage, 9/2002), lot 8302; Long Beach Signature (Heritage, 2/2003), lot 8308. NGC ID# 28DY, PCGS# 8532

PROOF INDIAN HALF EAGLE

1914 Half Eagle, PR66
High-Quality Matte Proof

3379 1914 PR66 NGC. The mintage of the 1914 half eagle matte proof is given as 125 pieces, but that high number is at odds with the total survivors today. Public (collector-dealer) dissatisfaction with the matte proofs was at such a peak that few of those minted were actually distributed, and the rest were melted as unsold. The Mint continued fiddling with the matte proof format even in this late year, marginally increasing the microscopic granule size of the 1913 issue to a bit larger, a move that makes the 1914 matte proofs appear a tad darker. This piece has surfaces with mustard-gold color that are nearly free of marks, save for a small field tick between stars 1 and 2. A couple of tiny indents in the planchet near 9 o'clock on the reverse are Mint-made and as struck. These are exceedingly minor quibbles that are consistent with the PR66 grade; this is nonetheless a high-quality coin of stunning aesthetic beauty. Census: 12 in 66, 11 finer (6/13). NGC ID# 2800000000, PCGS# 8545

EARLY EAGLES

1797 BD-2 Eagle, AU58 First Heraldic Eagle Variety

3380 1797 Large Eagle AU58 NGC. BD-2, High R.4. Bass-Dannreuther Die State b/b. The obverse has the usual double die crack through the final 7, from the border to the bust. The reverse has a die crack between the S and O, from the border to cloud 7. There is no mention of that crack in the Bass-Dannreuther reference, even though it is visible on the plate coin in that book.

John Dannreuther indicates that this is the first Heraldic Eagle variety struck in 1797, and we agree with that observation. As the first variety of a new design, this is a popular choice with type collectors. About 100 examples are known in all grades. A trace of wear appears on the high points, with light yellow-gold luster and hints of pale orange patina. An attractive piece showing only scattered, trivial marks. NGC ID# 25ZY, PCGS# 8559

1797 Capped Bust Right Eagle, AU58+
Heraldic Eagle Reverse
BD-2 Variety

3381 1797 Large Eagle AU58+ PCGS. BD-2, High R.4. Bass-Dannreuther Die State b/b. This variety marks the beginning of the Heraldic Eagle design type, part of a transitional year mintage that began with coinage of the earlier Small Eagle reverse design. The 1797 Heraldic Eagle ten claims a mintage of 10,940 pieces, split between three die varieties. All 1797 Heraldic Eagle tens are from a single obverse die that has a prominent double die crack from the border through the final 7 to the bust. That crack is heavy below the 7 on this example, branches into two parallel cracks through the 7, and continues as a delicate single crack to the drapery.

The reverse of this coin features an eagle with a long thin neck, identifying the very scarce BD-2 variety. The BD-2 variety has a surviving population of 80-100 examples in all grades and probably accounted for 3,500-5,000 pieces of the reported mintage. This was the only use of this reverse die. When W. Elliot Woodward cataloged an example of the 1797 Heraldic Eagle ten in lot 846 of the Randall Collection (Woodward, 7/1885), he noted:

"1797 No. 1; reverse, large eagle; obverse with 16 large stars; proof

The following lot was another 1797 which he called variety No. 2, distinguished by the "small stars" on the obverse. Although we realize today that the same obverse was used on all three varieties of this date and type, Harry Bass noted that the obverse stars on the other two varieties have shortened points, due to lapping. This probably accounts for Woodward's large and small stars designation on the two varieties, with the large stars corresponding to BD-2. Recent auction sales of the BD-2 include the AU58 NGC coin in lot 5177 of the FUN Signature (Heritage, 1/2011) that realized \$40,250.

A lovely and lustrous yellow-gold specimen, this example shows prooflike reflectivity in sheltered areas. The obverse exhibits the usual shallow strike characteristic of this die, while the reverse has a bold strike. Faint hairlines are hidden beneath deeper honey-gold toning. Eye appeal is quite strong for the grade. Population: 26 in 58+, 38 finer (6/13). NGC ID# 25ZY, PCGS# 8559

LIBERTY EAGLES

1839 Head Of 1838 Ten Dollar, XF45 Two-Year Design Subtype

- 3382 1839 Type of 1838, Large Letters XF45 NGC.** The Head of 1838 leans forward and has a curved truncation. A sweeping curl covers most of the ear, though the lobe shows. This important introductory design subtype was coined in limited quantity only in 1838 and for part of 1839 before its replacement by the familiar bust that ruled the denomination until 1907. The present example has pleasing sharpness and lacks any mentionable abrasions across the moderately luminous wheat-gold surfaces. NGC ID# 262E, PCGS# 8576

1839 Liberty Eagle, XF45 Type of 1838

- 3383 1839 Type of 1838, Large Letters XF45 PCGS.** The sharper point of the bust truncation over star 13 identifies the Type of 1838. The attractive greenish-gold surfaces retain considerable amounts of mint luster and show the expected number of minor abrasions for the grade. The well-detailed design elements are lightly worn. Traces of prooflike reflectivity show in sheltered areas on the reverse. Population: 23 in 45, 48 finer (6/13). NGC ID# 262E, PCGS# 8576

1855-O Ten Dollar, AU53 Difficult New Orleans Issue

- 3384 1855-O AU53 NGC. Variety 2.** By 1855, West Coast gold was chiefly coined at San Francisco, and the relatively new gold dollar and double eagle denominations diverted further bullion from the O-mint No Motto ten. The mintage of 18,000 pieces makes the 1855-O a much better date. The present honey-gold example displays a few thin obverse marks but is relatively lightly abraded for the grade and issue. Census: 18 in 53, 24 finer (6/13). NGC ID# 263M, PCGS# 8617

1858 Ten Dollar, Very Fine Well-Known Philadelphia Rarity

- 3385 1858 VF20 PCGS.** The meager mintage of 2,521 pieces is less than half that of the famous 1870-CC, and has long made the 1858 a desirable date among No Motto devotees. The present example has XF sharpness and displays glimpses of luster, though the orange and aqua surfaces are mildly bright and glossy, and we note field abrasions near stars 10 and 13. Housed in an old green label holder. Ex: Long Beach Signature (Heritage, 5/2008), lot 3405, which realized \$5,462.50. NGC ID# 263W, PCGS# 8625

1894-O Ten Dollar, MS63 Conditionally Rare

- 3386 1894-O MS63 PCGS. Variety 2.** Motto New Orleans eagles have invariably low mintages. Post-1883 issues were saved in some quantity, but were loosely stored and are typically encountered in AU55 to MS62 grades. The present well struck Select example is a standout due to its dynamic luster and minimally marked peach-gold surfaces. Population: 17 in 63, 1 finer (6/13). NGC ID# 2676, PCGS# 8730

1897 Eagle, MS65 Impeccable Surface Preservation

- 3387 1897 MS65 PCGS.** Brilliant luster over frosty orange-gold surfaces make this late-19th century eagle a keeper, certified as a Gem by PCGS. Despite the mintage exceeding 1 million coins, only nine have met this grade level at PCGS, with but two finer (5/13). Each side is uniformly well-struck and displays impeccable preservation. NGC ID# 267D, PCGS# 8737

1903 Ten Dollar, Conditionally Rare MS65

- 3388 1903 MS65 NGC.** The 1903 ten dollar piece can be obtained with relatively little trouble through the MS63 level of preservation. Near-Gems are scarce and Gems are extremely elusive. Beyond MS65 this issue is virtually unobtainable. The yellow-gold surfaces of this Gem exhibit well-struck design elements. A shallow milling mark left of Liberty's nose and another above the eagle's neck may help identify the coin. Census: 10 in 65, 0 finer (6/13). NGC ID# 267V, PCGS# 8752

1903-O Eagle, MS64 Only One Finer at PCGS

- 3389 1903-O MS64 PCGS. Variety 2.** The New Orleans Mint was in the news in 1903 due to discussion about its closing, which finally occurred six years later after the Denver Mint was opened. The January 10, 1903 issue of the *New Orleans Times-Picayune* reported:

"The present stock of bullion is all at Philadelphia, and inasmuch as that Mint can easily meet all requirements, Director Roberts has decided not to ship any bullion from there to New Orleans after July 1 next, or to plan for coinage operations at the latter place after that date. This means that the Treasury Department intends to close the New Orleans Mint."

The same newspaper reported in December that the Mint would continue operations. Struck during the unsettling times, this Choice Mint State eagle has brilliant and frosty yellow-gold luster with scattered, trivial marks. Population: 13 in 64, 1 finer (6/13). NGC ID# 267W, PCGS# 8753

PROOF LIBERTY EAGLE

1903 Eagle, PR64 Great-Looking, Reflective Surfaces

- 3390 1903 PR64 PCGS.** The long-running Liberty Head eagle series saw only 96 proofs struck of the 1903 issue, shortly before the series' end in 1907 and in the year after the Mint went to a no- to low-contrast production method for proofs. This near-Gem is certified in an old green-label holder, a highly reflective piece with perceptible contrast between the midnight-black fields and deep orange-gold devices. A few tiny ticks in the obverse fields and a small planchet flake on Liberty's neck account for the grade, but this is a great-looking coin that should prove popular with type collectors or connoisseurs of proof gold. Population: 22 in 64, 6 finer (6/13). NGC ID# 28GA, PCGS# 8843

INDIAN EAGLES

1907 No Periods Ten Dollar, MS64
Well-Defined Reverse

- 3391 1907 No Periods MS64 NGC. CAC. Though a degree of softness is noted on Liberty's hair, the eagle's feathers are better-defined than usually seen on this first-year Saint-Gaudens eagle issue. A handful of tiny marks on the jaw and a few other flaws scattered on the lustrous apricot-gold surfaces preclude an even finer designation. NGC ID# 28GF, PCGS# 8852

1907 Indian Eagle, MS64+
Ideal No Periods Type Coin

- 3392 1907 No Periods MS64+ NGC. CAC. A high-end Choice representative of this popular first-year type coin, with incredibly vibrant mint luster and well-detailed design elements that show just a touch of softness on Liberty's hair. The pleasing yellow and greenish-gold surfaces display no marks worthy of individual mention. NGC ID# 28GF, PCGS# 8852

1907 Indian Eagle, MS65+
Ideal First-Year Type Coin

- 3393 1907 No Periods MS65+ PCGS. CAC. Saint-Gaudens' beautiful Indian design debuted on the eagle in 1907, with a limited production of Wire Rim and Rolled Edge pieces that were not widely distributed and are often collected with the pattern series today. The No Periods design was the first Indian ten issued to the general public and it boasts a substantial mintage of 238,864 pieces, making it an available date and a popular type coin.

This high-end Gem displays well-detailed design elements, with just a touch of the typical softness on the hair. The vivid orange-gold surfaces exhibit vibrant mint luster on both sides with a few hints of lilac. Two minor marks in the left reverse field are the only mentionable flaws. Eye appeal is terrific. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS66+
Splendid Surfaces and Pristine Preservation**

- 3394 1907 No Periods MS66+ PCGS. CAC.** The 1907 No Motto eagle, also known as the 1907 No Periods, is perennially popular as a type coin due to its wide circulation at the time of issue, where many examples were saved or put aside. As Mint Engraver Charles Barber's reinterpretation of the Augustus Saint-Gaudens design for the requirements of high-speed coinage, it was the first issue of the new design that most Americans ever saw, after a lifetime (for many) of the old, outdated Liberty Head eagle design. This example boasts splendid luster over surfaces that show a splendid strike and essentially pristine preservation. Population: 15 in 66+, 7 finer (6/13). NGC ID# 28GF, PCGS# 8852

1908 Ten Dollar With Motto, MS64

- 3395 1908 Motto MS64 PCGS. CAC.** The motto IN GOD WE TRUST was added to the design of the Indian ten dollar in 1908, despite the opinion of President Theodore Roosevelt that this amounted to blasphemy. The lustrous yellow-gold surfaces of this near-Gem specimen exhibit well struck design elements. A few minute marks prevent Gem status. NGC ID# 28GJ, PCGS# 8859

**1908 Indian Ten, MS65
Popular Motto Type**

- 3396 1908 Motto MS65 NGC.** A delightful Gem representative from the first year of the Motto design, this coin exhibits razor-sharp definition on all design elements and the well-preserved surfaces show rich yellow and rose-gold patina. Vibrant mint luster adds to the considerable eye appeal. Census: 73 in 65 (1 in 65+), 43 finer (6/13). NGC ID# 28GJ, PCGS# 8859

**1908 With Motto Ten, MS65
Top-Notch Eye Appeal**

- 3397 1908 Motto MS65 PCGS. CAC.** Great strike detailing and excellent overall surface preservation are the hallmarks of this solid Gem 1908 With Motto eagle. This piece would make a great type coin, especially for collectors of first-year types. Gems of this issue are seen far less often than lower-Mint State coins, and anything in MS66 grade is even yet more elusive and quite a bit more expensive. This piece boasts nice, even orange-gold color with a clean cheek on the portrait and few marks elsewhere as well. The strike is uniformly sharp, and the eye appeal is top-notch. Population: 70 in 65 (2 in 65+), 39 finer (6/13). NGC ID# 28GJ, PCGS# 8859

1908-S Eagle, MS64
Flashy Luster and Strong Eye Appeal

3398 1908-S MS64 PCGS. The low mintage of the 1908-S eagle was a shade less than 60,000 coins, but there are some remarkably high-grade survivors, and it is an extremely well-produced issue overall. This near-Gem shows the bold strike typical of the issue, with flashy luster and the strong eye appeal that usually characterizes the issue. The surfaces are mostly apricot-gold. The cheek of Liberty is fairly clean and free of all but a couple of small marks, and a few small ticks appear on the reverse as well, on the upper eagle's wing. Population: 33 in 64, 34 finer (6/13). NGC ID# 28GL, PCGS# 8861

1910-D Ten Dollar, MS66
Great High-End Type Coin

3399 1910-D MS66 PCGS. CAC. The 1910-D eagle has the second-highest mintage in the Saint-Gaudens series, behind only the 1926, and it is the go-to issue for mintmarked type. Like any other Saint-Gaudens ten, though, it is genuinely elusive in MS67 condition, if not strictly rare, and anything finer is an extreme rarity. This apricot-gold Premium Gem offers swirling luster with just a hint of satin paired with a strong cartwheel effect. While the detail on the hair over Liberty's ear is a trifle soft, the all-around visual appeal is excellent and only a few modest blemishes preclude an even finer designation. Population: 38 in 66 (5 in 66+), 1 finer (5/13). NGC ID# 28GS, PCGS# 8866

1911 Eagle, MS66
Well-Made Type Coin

3400 1911 MS66 PCGS. Many collectors love (and rightly so) the Saint-Gaudens eagle series. If one so desired, a “decade type set” for each decade the series was produced could be assembled at the Premium Gem level between four issues, the 1907 No Motto (No Periods), the 1911, the 1926, and the ubiquitous 1932 issue. The 1911 is among the best-produced issues in the series, usually showing great luster and a bold strike.

This Premium Gem is no exception, an extremely eye-appealing example displaying bold luster and a strong strike over surfaces that are virtually unmarked. A great-looking type coin. Population: 25 in 66, 9 finer (5/13). NGC ID# 28GT, PCGS# 8868

1914 Eagle, MS65
Sharply Struck, Seldom Seen So Fine

3402 1914 MS65 PCGS. The 1914 eagle is occasionally available in the Gem grade and even beyond for a price, and it is a well-produced issue that lacks what Garrett and Guth call the “curious die wear” that afflicts numerous branch mint issues within the series, appearing as an inner rim or railroad well onto the obverse periphery of those coins. This Gem shows excellent luster over surfaces that show the most minor signs of contact, away from the prime focal areas. It is the strike, however, that really puts this piece at the top of the pack for eye appeal, quite sharp if a hair away from full. Population: 33 in 65 (1 in 65+), 10 finer (6/13). NGC ID# 28H2, PCGS# 8875

1914 Eagle, MS64+
Blazing Luster

3401 1914 MS64+ NGC. Blazing luster runs over orange-gold surfaces on this near-Gem 1914 eagle. Like most examples of this available issue, the strike is quite sharp and the eye appeal is excellent. The paucity of marks puts this piece into a higher grade category. Census: 1 in 64+, 52 finer (6/13). NGC ID# 28H2, PCGS# 8875

LIBERTY DOUBLE EAGLES

1850-O Double Eagle, MS60 First-Year O-Mint Twenty

3403 1850-O MS60 NGC. Variety 3. The New Orleans Mint had been open already for a dozen years when the new smallest and largest gold denominations were introduced, the gold dollar and double eagle, both precipitated as coinage vehicles for the great abundance of newly mined California gold. New Orleans was the logical dropping-off point for much of the new gold dust and ingots, and essential for those who wanted federal coinage; it would be four years yet before a federal mint would open in San Francisco in 1854, leaving Territorial coiners as the only alternative (and neither Dahlonega nor Charlotte, which along with New Orleans opened in 1838, were equipped to strike double eagles, or eagles for that matter).

The 1850-O double eagle production was a largish 141,000 coins, but these pieces were meant to circulate, and circulate they did. The average certified example is only Choice XF or thereabouts.

This medium yellow-gold example is strictly Uncirculated, no high-point rub or wear visible on either side. The strike is actually quite sharp, but the grade derives, as expected, from extensive (but mostly small) handling marks, thin scrapes and grazes, and only the occasional larger mark. For example, we note three milling marks in the right obverse field, clearly where the coin contacted the edge of another coin in a bag at some point. A few other medium-sized marks appear in the left obverse field and on Liberty's cheek, and a small dark spot occurs at star 2. The reverse shows a few similar largish marks, including a curving scrape through the D of UNITED and continuing into part of the glory of rays on the left side. Note, however, the full mint luster throughout both sides. Census: 1 in 60, 3 finer (5/13).

Offerings of this issue in Mint State are infrequent — this is the first Uncirculated coin we have auctioned in four years — and astute bidders will act accordingly. NGC ID# 268G, PCGS# 8903

1851 Double Eagle, MS61
Excellent Eye Appeal

- 3404 1851 MS61 NGC.** Generous mint luster covers each side of this Mint State second-year issue in the double eagle series, one launched due to vast new influxes of California gold. This piece shows more field chatter that determines the grade rather than singular marks, although some small ticks and luster grazes are present. The eye appeal is nonetheless excellent for the grade. Census: 29 in 61 (1 in 61+), 26 finer (5/13). NGC ID# 268H, PCGS# 8904

1852-O Double Eagle, XF45
Pursued New Orleans Type

- 3405 1852-O XF45 PCGS. Variety 1.** Though New Orleans struck double eagles in 13 different years, most of those issues are rare to very rare, and even the more available issues are subject to demand from O-mint type collectors. The present honey-gold twenty displays noticeable luster and has only a single relevant mark, a faded and localized abrasion above Liberty's jaw. A mint-made strike-through is noted between star 3 and Liberty's mouth. Traces of orange and russet patina near the rims attest to the originality. NGC ID# 268L, PCGS# 8907

1854-S Double Eagle, Unc Details
First San Francisco Issue

- 3406 1854-S — Obverse Damage — NCS. Unc Details.** The San Francisco Mint began coinage operations in 1854, with most of the production being focused on double eagles. Despite a couple of fairly deep scratches in the left obverse field, this coin is a most attractive representative of that important mintage. The design elements are sharply detailed and the lustrous surfaces are remarkably clean, aside from the noted damage. The pleasing peach-gold surfaces show highlights of green. NGC ID# 268U, PCGS# 8913

1857-S Liberty Twenty, MS64
Vibrant Luster, Vivid Color

- 3407 1857-S MS64 PCGS. CAC. Variety 20A.** This coin is not specifically pedigreed to the S.S. *Central America*, but the surfaces are vibrant and highly lustrous, a characteristic almost never seen on 1857-S double eagles that don't come from that famous shipwreck. Plus, it is the "Spiked Shield" die variety. Sharply struck throughout, the coin shows only the slightest abrasions that would keep it from a full Gem grade, only a few paper-thin luster grazes on the cheek and a small cluster of milling marks on the neck. An exceptionally attractive Type One Double Eagle. Population: 74 in 64, 39 finer (6/13). NGC ID# 2696, PCGS# 8922

1857-S Spiked Shield Twenty, MS66

- 3408 1857-S MS66 PCGS. CAC. Variety 20-A.** Spiked Shield, although not attributed on the PCGS insert. This piece has recently been certified, or more likely recertified, in the latest-generation PCGS holder with insert of blue transitioning to white at the bottom. While this Premium Gem 1857-S twenty is not specifically provenanced to the S.S. *Central America*, it certainly bears every hallmark, including its status as the most widely found die variety recovered from that historic shipwreck. This piece has that "SSCA look" about it as well, light canary-yellow around the rims ceding to deeper honey-gold in the interiors. Generous luster and few mentionable marks complete the broad eye appeal. NGC ID# 2696, PCGS# 8922

1860-S Double Eagle, MS61
Scarce Issue in Uncirculated Grades

- 3409 1860-S MS61 PCGS.** Even though there were 18 examples salvaged from the S.S. *Brother Jonathan*, those pieces graded between XF40 and AU50. A couple of dozen Uncirculated pieces are known, but the 1860-S is infrequently offered at public auction. This MS61 has lovely, frosted mint luster and rich variegated reddish-gold and yellow-gold patina. While there are numerous small abrasions over each side, none are large or worthy of individual mention. The strike details are somewhat irregular with complete star definition on the obverse, but somewhat weak detailing on Liberty's hair and the oval of stars on the reverse. NGC ID# 269F, PCGS# 8931

1861 Double Eagle, MS61
Deep, Mellow Reddish-Gold Color

- 3410 1861 MS61 PCGS.** This is a far more appealing coin than the numerical grade might imply, starting with the deep, mellow-reddish-gold color. Cartwheel luster covers each side, and a bit of grayish patina on Liberty's cheek is undistracting. Mentionable abrasions are few, and the strike is excellent. Certified in a green-label holder. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, MS62+
A Sharp Type Coin

- 3411 1861 MS62+ PCGS.** The 1861 Liberty Head double eagle saw a huge mintage of nearly 3 million pieces, making it an available Type One issue, and a favorite choice of type collectors. The yellow-gold surfaces of this high-end MS62 example exhibit well-struck design features. A few small abrasions do not detract. Population: 71 in 62 (3 in 62+), 47 finer (6/13). NGC ID# 269G, PCGS# 8932

1861-O Double Eagle, Choice AU

Interesting Die Markers, Relatively Unabraded

3412 1861-O AU55 PCGS. The New Orleans Mint struck Liberty Head doubles eagles in a continuous string from the series' introduction in 1850 until the Civil War closed the facility in 1861, a hiatus that would last until 1879. The dozen O-mint issues from 1850 through 1861 include a handful that are collectible for a price in Choice AU, and a couple of fabulous rarities (1854-O and 1856-O) that are guaranteed to cause a sensation at auction in nearly any grade.

The 1861-O is a median rarity within this wide range of O-mint twenties, although within the 1861 date, it has been somewhat overshadowed by the 1861-S Paquet Reverse. Douglas Winter ranks it seventh of 13 issues (including the anomalous 1879-O) both overall and in high grade (AU50 and higher).

The 1861-O is famous for another reason, being successively struck by the United States (5,000 coins), the State of Louisiana after it seceded from the Union (9,750 pieces), and the Confederate States of America (2,991), for a total of 17,741 examples in all. Various numismatists have attempted to connect die states and die markers of the 1861-O double eagle and its siblings with the three successive striking authorities. Winter believes that more than one obverse die was used, since some coins show weak dates, some strong dates; he claims that the strong date coins usually show a die crack from the rim above star 2 toward the chin. This piece, however, is just such a coin, with a strong date and absolutely no sign of any die crack in that position.

Some other coins show signs of "strengthening" at the date, in the form of three raised V-shaped lines. Bowers believes these are evidence of the Confederacy's lack of numeral punches to strengthen a working die.

This piece is interesting in that it has a strong date, no die crack, and no evidence of any strengthening or raised die lines in the date area; but it will not solve the problem of which dies in which states were used under which entity. It is an attractive, lightly circulated coin with semiprooflike reflectivity appearing in the fields and much eye appeal. It also has an anomaly of its own. An area of improperly mixed alloy appears in the planchet behind Liberty's hairbun, an area that has toned over and created a couple of small planchet voids. The toned-over area runs to the rim nearby. This anomaly is clearly of Mint origin. A small scrape appears just above the toned area, but overall, the surfaces are far less abraded than usual for an issue normally found with heavy handling marks. The reverse is well-struck and attractive, consistent with the grade, and shows no unusual characteristics. A great example of this historic issue. Population: 16 in 55, 6 finer (5/13). NGC ID# 269J, PCGS# 8934

1863 Liberty Twenty, Near-Mint
Solid Example of Civil War Date

- 3413 1863 AU58 PCGS. CAC.** Though overeager resubmissions to NGC make the 1863 double eagle appear far more available than it is in near-Mint and low Mint State grades, the PCGS figures lay out the date's rarity plainly: 13 coins in AU58 and 18 finer (5/13). While this example shows undeniable evidence of wear, particularly on the obverse where dulled cheeks and hair below the coronet are plain, the reverse luster is near-complete, its peach-gold luster showing occasional green accents. Modestly abraded, as expected, with a small copper spot visible near the bottom of star 8 on the obverse. NGC ID# 269P, PCGS# 8939

1863-S Twenty, AU58
Good Eye Appeal

- 3414 1863-S AU58 PCGS. CAC.** Most of the luster remains on this attractive Type One S-mint twenty, complementing the appealing orange-gold color and good eye appeal. A scattering of small marks shows a short stay in circulation, along with a couple of larger marks in the right obverse field near the date. Population: 62 in 58, 43 finer (6/13). NGC ID# 269R, PCGS# 8940

1863-S Liberty Twenty, MS62
Attractive Type One Coin

- 3415 1863-S MS62 PCGS.** The 1863-S Liberty double eagle claims a large mintage of 966,570 pieces, struck at the height of the Civil War era. Like most Type One double eagles, the 1863-S was easily located in lower grades but virtually unobtainable in Mint State before the shipwreck finds of recent times. The recovery of the *S.S. Republic* and the *S.S. Brother Jonathan* yielded nearly 300 relatively high-grade pieces, but most examples seen are in AU grades, and the 1863-S remains rare in MS62 condition.

This attractive MS62 example exhibits well-detailed design elements and pleasing orange and rose-gold surfaces with only minor signs of contact. Satiny mint luster adds to the outstanding eye appeal. Population: 13 in 62, 7 finer (6/13). NGC ID# 269R, PCGS# 8940

1865 Double Eagle, MS64
Ex: S.S. Republic Shipwreck

- 3416 1865 MS64 NGC.** Ex: S.S. Republic. Dazzling cartwheel luster sweeps this fully struck almond-gold near-Gem. Minor delicate grazes are present but are fewer than expected for the MS64 level. The 1865 was considered rare in Uncirculated grades prior to the recovery of the S.S. Republic shipwreck, which occurred on October 18, 1865. The ship carried \$400,000 in coins destined for New Orleans, which had a shortage of currency due to the recent Civil War. Many of the coins were freshly minted Philadelphia double eagles. The wreck was located in August 2003 and about one-third the value of the transported coins was recovered. As of (6/13), NGC has certified a total of 288 1865 twenties as S.S. Republic, 73 in MS64 and 22 finer. NGC ID# 269U, PCGS# 8943

1865-S Twenty Dollar, MS64
Ex: S.S. Brother Jonathan

- 3417 1865-S MS64 PCGS.** Ex: S.S. Brother Jonathan. A paddle steamer, the S.S. Brother Jonathan foundered July 30, 1865, on an uncharted rock on the coastline of California near Crescent City. The wreck was located in 1993 and gold coins were first discovered at the site in 1996. The recovered coins from the shipwreck principally consisted of 1865-S double eagles and were auctioned by Bowers and Merena on May 30, 1999. The present lot is an outstanding peach-gold near-Gem with smooth fields and sweeping luster. The strike is full on the major devices though incomplete on selected peripheral elements. NGC ID# 269V, PCGS# 8944

1870 Twenty Dollar, AU55
Rare in Mint State

- 3418 1870 AU55 PCGS.** From a mintage of 155,150 pieces, the 1870 Type Two Liberty Head double eagle is a scarce date in all grades. About Uncirculated is the average grade seen, and Mint State pieces are rare. The yellow-gold surfaces of this AU55 example display luster in the recessed areas and are nicely struck. A few scattered light marks are not significant. NGC ID# 26A7, PCGS# 8957

1873 Type Two Double Eagle, MS63
Open 3 Variant

- 3419 1873 Open 3 MS63 PCGS.** The Open 3 double eagles were struck after the Closed 3 emission, with the numeral being modified because Chief Coiner A. Loudon Snowden believed it looked too much like an 8. This attractive Select example displays smooth orange and peach-gold surfaces with vibrant mint luster and sharply detailed design elements. PCGS has graded nine numerically finer examples (5/13). NGC ID# 26AH, PCGS# 8967

1873 Open 3 Double Eagle, MS63
Rare Any Finer

- 3420 1873 Open 3 MS63 PCGS.** The 1873 Open 3 double eagle is readily available through About Uncirculated. Mint State pieces are scarce through the Select level of preservation and rare any finer. The lustrous, yellow-gold surfaces of this MS63 specimen exhibit well-struck design features and reveal just a few light grade-determining grazes. PCGS has graded only nine coins higher (6/13). NGC ID# 26AH, PCGS# 8967

1876-CC Twenty, AU58
Carson City Centennial Double Eagle

- 3421 1876-CC AU58 PCGS. CAC.** A slight thinning of the luster in the fields rather than perceptible high-point wear is the tipoff to the lightly circulated status of this near-Mint example of Carson City's double eagle issue for the nation's Centennial. Exuberant luster nonetheless remains and is nearly complete, over surfaces that show attractive red-orange color and a scattering of small marks. A well-struck example. NGC ID# 26AW, PCGS# 8977

1880-S Double Eagle, MS62
Nice Color and Luster

- 3422 1880-S MS62 PCGS. CAC.** The design elements of this attractive MS62 specimen are sharply detailed throughout and the vivid greenish gold surfaces show only minor signs of contact. Vibrant mint luster radiates from both sides, adding to the considerable eye appeal. Population: 83 in 62 (2 in 62+), 6 finer (6/13). NGC ID# 26BB, PCGS# 8993

1882-S Twenty Dollar, MS62
Popular S-Mint Twenty

- 3423 1882-S MS62 NGC.** Type Three S-mint Liberty Head twenties are a popular and fun series to collect. Some surprisingly nice coins can be found, in some cases, for little premium over a type example. This high-mintage date is a case in point, with attractive orange-gold color and good luster over surfaces that show typical marks for the grade. NGC has seen only 14 submissions numerically finer (6/13). NGC ID# 26BG, PCGS# 8998

1883-CC Twenty Dollar, MS60
Rare in Mint State

- 3424 1883-CC MS60 NGC. Variety 2-A.** A peach-gold example of this widely collected and lower mintage Carson City emission. Cartwheel luster brightens both sides and the surfaces are only moderately abraded for the designated grade. The strike is good though the curls near the hair bun are incomplete. NGC ID# 26BH, PCGS# 8999

1889-CC Twenty, AU55
Lustrous for the Grade

- 3425 1889-CC AU55 NGC.** Lustrous for the grade, and marks are uncommonly few. Both attractive and recommended. A low-mintage Carson City twenty that carries name recognition from its silver dollar counterpart. The facility re-opened in 1889 after a four-year slumber as a mere assay office. The openings and closings in 1885, 1889, and 1893 were greatly influenced by the changes in party of the Presidency.
Ex: *FUN Signature (Heritage, 1/2009)*, lot 5795. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, AU58

- 3426 1889-CC AU58 NGC. CAC. Variety 1-A.** An original peach-gold Borderline Uncirculated representative of this popular and scarce Carson City issue. The fields display mint flash, especially at the borders, and the curls show only light wear. Marks are fairly minor given the size and alloy, though we note a faint reed impression on the cheekbone and an abrasion at the PL in PLURIBUS. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS61
Underrated in Mint State

- 3427 1889-CC MS61 PCGS. CAC.** While the 1889-CC dollars are famous as rarities, the double eagles of the same date with less than a tenth of the mintage remain underrated, in part because of their accessibility in Mint State relative to their Carson City twenty dollar peers. This well-defined example offers intricate detail on Liberty's portrait and occasional coppery accents at the high points and margins of an otherwise yellow-orange example, the emphasis on "orange" for the reverse. Quality eye appeal despite numerous fine abrasions and a planchet flaw just to the left of star 11 on the obverse. Population: 48 in 61, 61 finer (5/13). NGC ID# 26BV, PCGS# 9011

1889-S Double Eagle, MS63
Semireflective Fields

- 3428 1889-S MS63 NGC.** Bright, semireflectivity over orange-gold surfaces is the calling card of this Select Mint State 1889-S double eagle, a coin with great eye appeal and a sharp strike. Few examples of the issue are graded finer at either service, another plus for this piece among Registry Set collectors. NGC has seen six numerically finer, all at the MS64 level (5/13). NGC ID# 26BW, PCGS# 9012

**1894 Twenty Dollar, MS65
Condition Rarity, In-Demand Type**

3429 1894 MS65 PCGS. Gem Liberty Head double eagles, relatively speaking, are many, many times rarer than the Saint-Gaudens twenties; collectors eagerly stretch to acquire nice examples at auction. The sole exception to this conditional rarity is, of course, the ultracommon 1904 date, which currently comprises about 80% of the 5,500 or so Liberty Head Type Three examples at PCGS. Nonetheless, PCGS has seen nearly 100,000 submissions at the Gem grade of the Saint-Gaudens With Motto type, all dates — about 18 times more than the Liberty Head Type Threes.

This Gem 1894 Liberty Head thus emerges as a conditional rarity for the type and the date — but it is also a mighty attractive coin in its own right. Deep, thorough mint bloom radiates from each side, the surfaces a mellow reddish-orange and every bit as unperturbed as the grade suggests. The surprisingly bold strike has produced full star centrils around the obverse periphery, and good articulation of Liberty's hair details. On the reverse, all of the fine detailing in the glory of rays, the eagle's feathers, and the shield stripes are equally well brought up. A great type coin. Population: 2 in 65, 0 finer (5/13). NGC ID# 26CB, PCGS# 9025

**1901 Twenty Dollar, MS65
Lustrous and Sharply Struck**

3430 1901 MS65 PCGS. Radiant luster adorns both sides of this lovely Gem double eagle and the strike is strong throughout, including the star centrils on both sides, Liberty's hair and the eagle's plumage. A few minor scuffs possibly preclude a higher grade. This date is very popular as a type coin as a large hoard surfaced in the 1990s. NGC ID# 26CS, PCGS# 9039

**1904 Liberty Double Eagle, MS66
Excellent Color and Luster**

3431 1904 MS66 PCGS. The orange and rose-gold surfaces of this delightful Premium Gem show a few highlights of green patina, with no mentionable distractions. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. Eye appeal is extraordinary. PCGS has graded only two numerically finer examples (6/13). NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS66
Ideal Type Coin**

3432 1904 MS66 PCGS. The 1904 Liberty double eagle was produced in large quantities and many high-quality type coins are available in today's market. Few survivors can match the quality and appeal of the present coin, however. This delightful Premium Gem displays sharply detailed design elements and vibrant mint luster, with well-preserved peach-gold surfaces. PCGS has graded only two numerically finer examples (6/13). NGC ID# 26CY, PCGS# 9045

**1904-S Double Eagle, MS65
A Type Coin With Character**

- 3433 1904-S MS65 PCGS.** The 1904-S double eagle, like its Philadelphia counterpart, is a generously minted type issue, though it is far less available in Gem condition and a decided rarity any finer, with just three MS66 or better coins graded by PCGS (6/13). This MS65 coin has solid interior detail, though the stars around are blunt, with a reddish-violet copper spot at the back of Liberty's yellow-orange neck. NGC ID# 26CZ, PCGS# 9046

**1905-S Double Eagle, MS64
Rare Any Finer**

- 3434 1905-S MS64 NGC. CAC.** The 1905-S Liberty Head double eagle comes from a large mintage of more than 1.8 million pieces, but the issue is very challenging in Mint State as many pieces were shipped overseas. Orange-gold luster cascades over both sides of this near-Gem and the design elements are sharply struck. NGC has seen only seven finer examples (6/13). NGC ID# 26D3, PCGS# 9048

**1907-S Double Eagle, MS64+
Conditionally Rare**

- 3435 1907-S MS64+ NGC.** Despite its large mintage, the 1907-S Liberty double eagle is a condition rarity in grades above the Choice level. This high-end Choice example exhibits well-detailed design elements and vibrant mint luster, with light yellow and rose-gold surfaces that show few signs of contact. NGC has graded 17 numerically finer examples (6/13). NGC ID# 26D9, PCGS# 9054

PROOF LIBERTY DOUBLE EAGLES

**1901 Liberty Twenty, PR61 Cameo
Only 96 Pieces Struck**

- 3436 1901 PR61 Cameo NGC.** Only 96 proof Liberty double eagles were struck in 1901 and the surviving population numbers no more than 40-50 examples in all grades. Many examples seen are in impaired condition and the population data for high-grade specimens has been distorted by many crossovers and resubmissions.

The present coin is an attractive PR61 example that exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields to produce a startling cameo effect. The lemon-yellow surfaces show the expected number of minor contact marks for the grade. Census: 4 in 61 Cameo, 21 finer (6/13). NGC ID# 26EN, PCGS# 89117

**1907 Liberty Twenty, PR62
Scarce Final-Year of the Design**

- 3437 1907 PR62 PCGS.** The Liberty double eagle design had been struck since 1850, and the 1907 was the final year of issue. This date is somewhat overlooked as most of the focus in this year is on the new gold coins designed by Augustus Saint-Gaudens. Only 78 proof Liberty twenties were produced, and as on the previous five years, few show any degree of contrast. This is a deeply reflective proof with even medium orange-gold color. A few contact marks and obvious hairlines explain the grade. PCGS has certified six others in PR62, and there are only 28 finer (6/13). NGC ID# 26EV, PCGS# 9123

HIGH RELIEF DOUBLE EAGLE

**MCMVII High Relief Wire Rim Twenty
Uncirculated Details**

- 3438 1907 High Relief, Wire Rim — Cleaning — Genuine PCGS. Unc. Details.** The high points are mildly glossy and the fields are slightly luminous, but this satiny green-gold High Relief twenty is well impressed and only lightly abraded. The numismatic value of the issue was recognized upon release, and most of the production promptly entered collector hands, though many were cleaned, used as pocket pieces, or had the wire rim removed.

SAINT-GAUDENS DOUBLE EAGLES

**1908 No Motto Twenty, MS67
Razor-Sharp Strike, Excellent Preservation**

- 3439 1908 No Motto MS67 PCGS. CAC.** The excellent strike begins at the face of Liberty but is obvious throughout both sides, making bold many details that normally are somewhat soft. Beautiful orange-gold surface color complements the excellent preservation and paucity of marks. This example is not pedigreed to the Wells Fargo Hoard, but we would not be at all surprised to discover that as its source. Population: 81 in 67 (2 in 67+), 1 finer (6/13). NGC ID# 26F6, PCGS# 9142

**1908-D No Motto Double Eagle, MS65+
Few Seen Finer**

- 3440 1908-D No Motto MS65+ PCGS.** The fine-grained surfaces on this 1908-D No Motto twenty show a somewhat mattelike texture as a result, displaying lovely apricot-orange color and a bold strike in addition. A few small marks on Liberty's right (facing) calf are far from overt, but overall the surfaces are quite well-maintained. Population: 6 in 65+, 10 finer (6/13). NGC ID# 26F7, PCGS# 9143

**1909 Twenty Dollar, MS64
Scarce and Underrated Issue**

3441 1909 MS64 PCGS. CAC. The 1909 is one of the most overlooked issues in a series that has a number of notable rarities. The mintage of 161,282 is about evenly divided between normal date pieces, such as this one, and overdates. This example displays bright green-tinged satiny mint luster and there are no obvious abrasions on either side, just a few light ones scattered about. NGC ID# 26FB, PCGS# 9150

**1909-D Twenty, MS64+
Deep Reddish Patina**

3442 1909-D MS64+ PCGS. The 1909-D has the lowest mintage D-mint in the Saint-Gaudens series with only 52,500 pieces struck. The mint luster on this example is softly frosted and the color is somewhat out of the range of what is usually seen, with rich, even reddish patina over each side. Well-struck and minimally marked. NGC ID# 26FD, PCGS# 9152

**1910 Double Eagle, Lustrous MS65
Rare Any Finer**

3443 1910 MS65 PCGS. The 1910 double eagle is available with little difficulty in MS64 and lower grades. Full Gems are only located with patience and searching, however, and higher-grade specimens are highly elusive. Indeed, PCGS and NGC combined have graded fewer than 10 coins better than MS65. The lustrous, yellow-gold surfaces of this Gem exhibit well-struck devices and are minimally marked. NGC ID# 26FF, PCGS# 9154

**1911 Double Eagle, MS65
Low Mintage, High Grade**

3444 1911 MS65 NGC. Yellow-gold luster has a distinct orange overtone, particularly on the obverse. Cartwheel luster is warm and inviting, and aside from a small nick on Liberty's knee there are no marks of particular significance. Though peripheral details such as the top of the torch and the leaves at Liberty's foot are soft, the interior detail is solid for this Philadelphia issue of fewer than 200,000 pieces. While such a low mintage is not a strict barrier to availability in Gem condition, the 1911 twenty qualifies as conditionally scarce at that level and rare any finer. NGC ID# 26FJ, PCGS# 9157

1912 Saint-Gaudens Twenty, MS65
Only Three Numerically Finer Coins at NGC

3445 1912 MS65 NGC. The 1912 Saint-Gaudens double eagle claims a mintage of just 149,750 pieces, and no double eagles were produced at the branch mints that year. Accordingly, the date is scarce-to-rare in all grades today and virtually unobtainable above the MS65 level.

The present coin is a delightful Gem that exhibits sharply detailed design elements and well-preserved peach-gold surfaces with vibrant frosty mint luster. A few hints of rose and lilac enhance the considerable visual appeal and close inspection reveals no mentionable distractions. Census: 17 in 65 (1 in 65+), 3 finer (6/13). NGC ID# 26FM, PCGS# 9160

1913 Twenty, MS64
Better Luster Than Usually Encountered

3446 1913 MS64 PCGS. The 1913 is a condition rarity in the Saint-Gaudens series, not caused by the low mintage but an inexplicable absence of coins graded finer than MS64. PCGS has only certified 10 pieces finer (6/13). This is a sharply struck example with softly frosted surfaces that show slight evidence of metal flow. NGC ID# 26FN, PCGS# 9161

1914 Double Eagle, MS64
Rare Issue in Higher Grades

3447 1914 MS64 PCGS. From a small mintage of 95,250 pieces, the 1914 Saint-Gaudens double eagle is not too difficult to locate in Choice condition, but the population thins out drastically in higher grades. This sharply detailed MS64 specimen displays vibrant mint luster and vivid greenish-gold surfaces with outstanding eye appeal. PCGS has graded 39 numerically finer examples (5/13). NGC ID# 26FS, PCGS# 9164

1914-S Double Eagle, MS66
Near-Pristine Surfaces

3448 1914-S MS66 PCGS. The 1914-S Saint-Gaudens issue is a great one for type set purposes or for those brave souls working on a complete set. PCGS has certified only one coin "technically finer" than the present MS66 example, that piece being the sole MS66+ (5/13). Several dozen are graded at the Premium Gem level. This example exhibits surfaces that are remarkably free of marks. The coloration is attractive orange-gold accented in occasional hints of lilac. Some strike weakness appears around the peripheries — often seen on this issue — but the eye appeal is excellent. NGC ID# 26FU, PCGS# 9166

1916-S Double Eagle, MS66
Well-Detailed and Lustrous

3449 1916-S MS66 NGC. The 1916-S Saint-Gaudens double eagle is only scarce at the MS66 level, but finer examples are extremely rare. This attractive Premium Gem exhibits well-detailed design elements and frosty mint luster, with well-preserved greenish-gold surfaces that show a few hints of lilac. NGC has graded three numerically finer examples (6/13). NGC ID# 26FX, PCGS# 9169

1921 Saint-Gaudens Twenty, MS61

Key Series Date
Rarely Seen Finer

3450 1921 MS61 NGC. No double eagles were struck until November of 1921, when a small mintage of 90,000 pieces was accomplished. A larger delivery of 438,500 coins was achieved the following month, making a respectable total for the year, but none of the coins were released to the general public. No other gold denominations were struck at all that year, and the double eagles were intended to serve strictly as currency reserves. Accordingly, the great majority of the mintage remained in storage in Treasury vaults and Federal Reserve Banks until the Gold Recall of 1933, when they were melted and stored as ingots in the Fort Knox Bullion Repository.

A few coins were eventually released to well-connected collectors by Mint or Treasury officials through unofficial channels, the source for most high-grade coins we know about today. A few were also released into circulation, as the issue is one of the few Saint-Gaudens double eagles that is seen more often in circulated grades than Mint State. No large number of 1921 double eagles was ever found in foreign holdings, but David Akers remembers receiving as many as six specimen in a single shipment from Paul Wittlin, the European buyer for Jim Kelly and Paramount. Finally, research conducted by Dr. Charles W. Green in Mint records in the 1930s indicated that only 21 specimens of the 1921 double eagle had been released to the general public through official channels. Today, no more than 50-60 are extant in Mint State grades, with a like number of surviving circulated specimens.

The present coin is an attractive MS61 example, with well-detailed design elements and vibrant mint luster. The vivid green and orange-gold surfaces are lightly abraded for the grade, and this coin possesses ample eye appeal. This offering represents an important opportunity to acquire one of the classic rarities in 20th century coinage. Census: 17 in 61, 20 finer (6/13). NGC ID# 26G2, PCGS# 9172

1922-S Twenty Dollar, MS64
Seldom Seen Finer

- 3451 1922-S MS64 PCGS.** Mellow reddish-orange color cedes to lighter yellow hues closer to the rims on this highly lustrous near-Gem. A few scattered, minor marks determine the grade. The 1922-S is seldom seen in Gem grade due to the tremendous number that were melted decades ago. The reverse is rotated about 30 degrees clockwise with respect to the obverse. Population: 38 in 64+, 15 finer (6/13). NGC ID# 26G4, PCGS# 9174

1924-D Double Eagle, MS62
Semikey Mintmarked Issue

- 3452 1924-D MS62 PCGS.** Copious mint luster appears on orange-gold surfaces on each side of this semikey issue in the Saint-Gaudens series. A scattering of small- to medium-sized marks is consistent with the grade, but much eye appeal remains throughout. The strike is bold on the reverse, although some weakness appears on the Capitol dome. NGC ID# 26G8, PCGS# 9178

1926-D Double Eagle, AU58
Scarce Underrated Issue

- 3453 1926-D AU58 PCGS.** Until the 1950s, the 1926-D Saint-Gaudens double eagle was considered to be one of the rarest issues of the series. The emergence of a few specimens in European holdings altered the rarity rankings somewhat, but no large number of coins has ever surfaced overseas. The 1926-D has gone from being an impossible rarity to "just" a rare and underrated issue in recent times, but most of the foreign discoveries were not high-grade coins and the 1926-D remains the fourth-rarest issue of the series in high grade.

The present coin is an attractive near-Mint example, with well-detailed design elements that show just the slightest trace of wear on the high points. The bright yellow and greenish-gold surfaces are lightly abraded, with vibrant mint luster and considerable eye appeal. This coin should find a home in a fine collection of Saint-Gaudens double eagles. NGC ID# 26GE, PCGS# 9184

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67 Commemorating 'The Industry of Women'

3454 1893 Isabella Quarter MS67 PCGS. The net distribution of the Isabella quarter dollar was 24,214 pieces, and commemorated "the industry of women." Cobalt-blue, orange-gold, and lavender patination is more extensive and deeper on the reverse of this Superb Gem. Its lustrous surfaces have been well cared for. Population: 33 in 67 (2 in 67+), 5 finer (6/13). NGC ID# 28HR, PCGS# 9220

1900 Lafayette Dollar, MS66+ Rarely Encountered Finer

3455 1900 Lafayette Dollar MS66+ PCGS. CAC. DuVall 2-C. Here is an absolutely stunning 1900-dated Lafayette dollar, struck in December 1899 as were all 36,026 pieces. Lafayette (1757-1834) appears on the obverse with his close friend, George Washington. A mounted Lafayette appears on the reverse. Prior to his 20th birthday, Lafayette volunteered for the American cause during the Revolutionary War, and was commissioned a Major General. Many years later, Lafayette received a heroes welcome when he returned to America in 1824.

This gorgeous Premium Gem is a fitting tribute to Lafayette and Washington, featuring delicate peripheral gold toning over frosty and highly lustrous ivory surfaces. Population: 84 in 66 (1 in 66+), 5 finer (6/13). NGC ID# 28N8, PCGS# 9222

**Superb Gem 1938 Arkansas Half
Tied for Finest Certified**

3456 1938 Arkansas MS67 PCGS. CAC. Arkansas was admitted as a state on June 15, 1836, and the Arkansas commemoratives marked the centennial celebration, although the first examples were issued in the 99th year, and the last of the five year series in the 103rd year.

None of the Arkansas half dollars, minted in Philadelphia, Denver, and San Francisco, had significant collector demand, with a total distribution for all 15 issues of just 85,301 coins, or an average of only 5,686 coins per issue. The 1938 Arkansas half dollars had a distribution of only 3,156 coins at each mint (3,155 at Denver). Only the three 1939 issues had lower mintages.

This beautiful Superb Gem has brilliant satin luster with faint champagne color, framed by deep gold and steel peripheral toning. A pristine, sharply struck specimen with excellent eye appeal. Population: 9 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 28J7, PCGS# 9245

**1936-D Columbia Half Dollar, MS68
Distinctive Peripheral Toning**

3457 1936-D Columbia MS68 PCGS. The Columbia half dollar commemorates the 150th anniversary of the designation of Columbia as the capital of the state of South Carolina. Examples of the 1936-D are widely available today, most in the MS64 to MS66 range. Reddish-gold and yellow toning gravitate to the margins of this lustrous MS68 specimen, and each side is sharply struck. Population: 21 in 68 (3 in 68+), 0 finer (6/13). NGC ID# 28K6, PCGS# 9292

**1928 Hawaiian Half, MS66
Multicolor Reverse**

3458 1928 Hawaiian MS66 PCGS. The notable lack of visible contact marks competes with the multicolor surfaces on this Premium Gem Hawaiian for the prime attraction. Most of the obverse and about half of the reverse is pale bluish-gray, but then the reverse blooms out into gorgeous saffron and cinnamon hues. A stellar example of this key commemorative half. Population: 86 in 66 (5 in 66+), 2 finer (5/13) NGC ID# 28KE, PCGS# 9309

**1952 Half Dollar, MS67
Washington-Carver**

3459 1952 Washington-Carver MS67 PCGS. A single MS68 1952 Washington-Carver half dollar is the finest PCGS certified example of the entire series. This Superb Gem is one of only 39 MS67 PCGS examples among all 12 issues. This beauty has frosty mint luster and intense iridescent toning. Population: 15 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 28MV, PCGS# 9434

**1936 Wisconsin Half Dollar, MS68
Extraordinary Quality**

- 3460 1936 Wisconsin MS68 PCGS. CAC.** The 1936 Wisconsin commemorative half is readily available through the Premium Gem level of preservation. The certified population decreases in MS67, but examples can still be located in that grade. The supply of this issue in the lofty grade of MS68, however, is severely limited. The highly lustrous surfaces of the present specimen are virtually perfect, and the sharply struck design elements serve to enhance the coin's overall eye appeal. Population: 27 in 68 (4 in 68+), 0 finer (6/13). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

**1905 Lewis and Clark Gold Dollar, MS65
Two Green Labels, PCGS and CAC**

- 3461 1905 Lewis and Clark MS65 PCGS. CAC.** The 1905 Lewis and Clark gold dollar is considerably scarcer than its 1904 predecessor because those early commemorative buyers who collected by type had already purchased an example and the net sales of the 1905 issue were only about two-thirds of the previous year's. This green-gold near-Gem offers swirling, dynamic luster and smooth surfaces marked only by inconsequential field grazes. Housed in a green label holder. PCGS has graded only 73 examples of this issue as MS66 or finer (6/13), an indication of the issue's notable scarcity in better-than-Gem grades. NGC ID# 26HD, PCGS# 7448

**1915-S Pan-Pac Quarter Eagle, MS66
Top-Notch Example, Lavish Reddish-Gold Color**

- 3462 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC.** The 1915-S Pan-Pac quarter eagle is the most popular of the four gold commemoratives issued for this signal event that is actually also *affordable* by the vast majority of collectors. This Premium Gem PCGS example with the CAC endorsement is the "sweet spot" for most collectors, as PCGS has seen only 12 in 66+ and 27 finer (6/13). This piece is encapsulated in a PCGS blue-label holder from several generations ago, showing untroubled surfaces with lavish, rich reddish-gold color. A top-notch example. NGC ID# 26HK, PCGS# 7450

**1917 McKinley Gold Dollar, MS67
More Difficult Than the 1916**

- 3463 1917 McKinley MS67 PCGS.** The 1917 McKinley Memorial gold dollar (with an estimated distribution of 5,000 pieces) is more difficult to locate than the 1916 issue (with an estimated distribution of 15,000 pieces). The lustrous surfaces of this brass-gold specimen exhibit well-struck design features and are nicely preserved. Population: 57 in 67, 0 finer (6/13). NGC ID# 26HG, PCGS# 7455

**1926 Sesquicentennial Quarter Eagle, MS66
Tied for Finest at PCGS**

- 3464 1926 Sesquicentennial MS66 PCGS.** This impressive Premium Gem exhibits vivid mint-green and light pinkish-orange color over its frosty yellow-gold luster. Both sides have bold design definition. An exceptional example that is tied for the finest PCGS has certified (6/13). NGC ID# 26HL, PCGS# 7466

MODERN BULLION COINS

1999 Silver Eagle, MS70 Surprising Condition Rarity

- 3465** 1999 Silver Eagle MS70 NGC. While the 1999 one-ounce silver American Eagle is not especially noteworthy from a quick glance at the *Guide Book*, the combined certified population tells a different story. Out of more than 7.4 million pieces struck, only 90 have been awarded a perfect MS70 grade — all by NGC, as PCGS has given no such designation to an example of the issue. While this representative shows a degree of milk-spotting to the left, particularly on the reverse above 1 OZ, there are no post-striking faults to speak of and the all-around eye appeal is excellent for this modern marvel. NGC ID# 26JX, PCGS# 9947

2000 Silver Eagle, MS70 Turn-of-the-Millennium Issue

- 3466** 2000 Silver Eagle MS70 NGC. The turn-of-the-millennium date is part of the attraction here, but so are the pristine surfaces and the incredible popularity of this “modern silver dollar” series. This piece is untuned throughout both sides and shows the typical soft, glowing luster that the “business strikes” normally display. NGC ID# 26JZ, PCGS# 9949

2000 Silver Eagle, MS70 Ex: 20th Anniversary Collection

- 3467** 2000 Silver Eagle MS70 NGC. Ex: 20th Anniversary Collection. A technically perfect representative that shows elements of milk-spotting, most visibly around the obverse margins and on her lower skirt. A small cluster of minuscule planchet voids appears between the RT of LIBERTY, while a few tiny dark flecks are scattered in the reverse fields. NGC ID# 26JZ, PCGS# 9949

2000 Silver American Eagle, MS70 Distinctly Toned

- 3468** 2000 Silver Eagle MS70 NGC. This example has a soft blue-silver appearance with a blush of rose, semifrosted with occasional as-made luster breaks where a brighter metallic appearance is visible. Marvelously detailed. The 2000 silver American Eagle is scarce in MS70 with all examples but one being certified by NGC (6/13). NGC ID# 26JZ, PCGS# 9949

2000 Silver Eagle, MS70 Millennium Set

- 3469** 2000 Silver Eagle MS70 NGC. Millennium Set. A flawless silver Eagle with a bold strike, this specimen has brilliant and highly lustrous white surfaces that are absolutely pristine. Although NGC has certified 200 of these as MS70, they are still in high demand with collectors. NGC ID# 26JZ, PCGS# 9949

TERRITORIAL GOLD

1860 Clark, Gruber Ten Dollar, AU55 Kagin-3, Pikes Peak Design

- 3470** 1860 Clark, Gruber & Co. Ten Dollar AU55 NGC. K-3, R.5. A late die state of this iconic pioneer gold issue. A bold die crack ventures from 3 o'clock to 4:30 across the right border of the landscape. Lesser cracks are noted through the RK in CLARK, the PIK in PIKES, and the EAK in PEAK. The reverse imitates the Federal ten dollar piece, while the obverse differs through a dramatic volcanic representation of Pikes Peak, designed by an East Coast engraver without access to a drawing of the mountain. The present lemon-gold example is lightly circulated and mildly bright with noticeable mint luster. Marks are inconsequential except for a small rim ding beneath the TE in TEN. Listed on page 394 of the 2014 *Guide Book*. PCGS# 10137

1860 Clark, Gruber Twenty, VF35 Copper Die Trial, K-4a

- 3471** 1860 Clark, Gruber \$20 Copper Die Trial VF35 PCGS. K-4a, R.5. The dies for these patterns were engraved in Philadelphia, with a fanciful triangular representation of Pike's Peak on the obverse. Struck in copper with a reeded edge. This coin shows even wear on the slightly granular chocolate-brown and olive surfaces, retaining all important design detail, at least in outline. Housed in a green label holder. Population: 3 in 35, 13 finer (6/13). PCGS# 10146

1854 Kellogg Twenty, AU Details K-1a, Bright Orange-Gold Color

- 3472** 1854 Kellogg & Co. Twenty Dollar — Improperly Cleaned — NCS. AU Details. K-1a, R.4. The distinguishing characteristics of the 1a from Variety 1 is the weak center shaft of the middle arrow on the reverse. High-grade Kellogg twenties are a challenge to locate, including those in AU. This is an obviously cleaned example whose surfaces are bright orange-gold. Numerous small abrasions are peppered through the fields, as one would expect. Well but not fully struck, with a touch of friction evident over the high points. PCGS# 10222

1849 Mormon Quarter Eagle, K-1, AU55
Seldom Encountered in Higher Grades

3473 1849 Mormon Quarter Eagle AU55 PCGS. K-1, High R.5. The Mormon quarter eagles were struck from gold dust collected along the American River in California by members of the Mormon Battalion returning from the Mexican War, soon after the Gold Rush began in 1848-49. There was almost no circulating coinage in the Mormon settlement at the time, causing great difficulties in the local economy. A mint was established in Salt Lake City under the direction of Brigham Young, with all the equipment being manufactured there by Mormon craftsmen and blacksmiths.

Unfortunately, no trained assayer was available, leading to well-publicized problems with the fineness of the issue. Although produced from the native California gold, additional alloys were present which brought the fineness below the stated value on the coins. Light weight specimens were also reported. The coinage was a local success, as merchants of the Mormon church would accept the coins at face value, but outside the settlement they were only accepted at a steep discount. Still, the coins enabled the Mormons to purchase needed goods from neighboring communities until an adequate supply of U.S. coinage reached the area in the early 1860s.

The present chestnut-gold example has pleasing sharpness on the clasped hands, and the minutely grainy surfaces exhibit only a few faint slide marks. The obverse die is buckled through the lower portion of the all seeing eye, which weakens that area, and is diagnostic for this issue. Listed on page 393 of the 2014 *Guide Book*. Population: 8 in 55, 3 finer (6/13).

Ex: *Long Beach Signature (Heritage, 2/2006)*, lot 3769. PCGS# 10259

PATTERNS

1854 Copper-Nickel Ring Dollar Design Judd-140, PR64

- 3475** 1852 Gold Dollar, Judd-140, Pollock-167, Low R.7, PR64 PCGS. CAC. One of the proposed solutions to the problem of the undersized and easily lost gold dollar was an annular pattern. The large center perforation (as struck) and narrow margin forces a simple design. The obverse has only USA above the hole with 1852 below, while the reverse has a series of laurel sprigs amidst heavy concentric die lines. Curiously, no denomination is stated. Struck in copper-nickel with a plain edge. The surfaces are gray-tan and there are no perceptible abrasions. The leaves show a bit of high-point striking softness. PCGS# 11589

1868 Ten Cent Pattern in Nickel Braided Hair Design, Judd-647, PR66

- 3476** 1868 Ten Cents, Judd-647, Pollock-720, Low R.6, PR66 NGC. The obverse features the almost identical design used on large cents from 1843 to 1857. The reverse is similar to the large cent design except the wreath is smaller and open, and TEN CENTS appears in its center. Struck in nickel with a plain edge. The same obverse was used for one cent and ten cents patterns in 1868, struck in copper and in nickel. About two dozen of these nickel patterns are known. The surfaces are typical of nickel coins struck during this period. Little mirroring is seen in the fields, and the only marks of any note are a couple of short ones in the field above the head of Liberty. PCGS# 60865

1875 Twenty Cent in Nickel, PR66 Cameo Judd-1402, 'Liberty at the Seashore' Extremely Rare

- 3477** 1875 Twenty Cents, Judd-1402, Pollock-1545, R.8, PR66 Cameo PCGS. CAC. Ex: Denali Collection. The Bailly-designed obverse featuring the popular "Liberty at the Seashore" design, with Liberty seated, holding a pole with a Liberty Cap above and the other arm resting on a globe. This is paired with a reverse very similar to the regular issued design. Struck in nickel with a plain edge. Light chestnut-gold shades overlie the mirrored surfaces. A needle-sharp and flawless Premium Gem of this extremely rare pattern. In recent decades, only two different examples have appeared at auction, the first of which is the present piece:

1) PR66 Cameo PCGS. Portland ANA (Heritage, 8/1998), lot 5150; Sacramento ANA (Heritage, 3/1999), lot 5732.

2) Gem proof. Dr. Walter Lee Crouch Collection (Superior, 6/1977), lot 377; Byron Johnson Collection (Robert L. Hughes, 1/1979, lot 47); Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1060. PCGS# 61709

1875 Judd-1405 Twenty Cent Piece, PR66
'Liberty at the Seashore'

- 3478 1875 Twenty Cents, Judd-1405, Pollock-1548, Low R.7, PR66 PCGS. Ex: Denali Collection. Seated Liberty at the seashore with 13 stars surrounding and the date 1875 in the exergue below. She holds an olive branch with her right hand and rests her left hand on a globe inscribed LIBERTY. A steamship with sails can be seen to the left. It is often noted that the smoke trails behind the ship, but the sails are billowed in the forward direction. The reverse displays the denomination 20 CENTS within an olive wreath and UNITED STATES OF AMERICA around. Struck in aluminum with a plain edge. This is a hairline-free and fully struck specimen with delicate tan-gray toning. A loupe reveals a few unimportant spots on the rims and minor retained reverse laminations at 1, 4, and 8 o'clock. Ex: *Rare Coin Review* #24 (Bowers and Ruddy, 1974), page 59. PCGS# 61712

"Heritage Magazine for the Intelligent Collector is a big, beautiful publication with writing that is both entertaining and informative and photos that are glorious to behold."

—Tony Isabella, Comics Buyer's Guide

With each issue, *Heritage Magazine for the Intelligent Collector* gives readers priceless insights into the vintage collectibles and fine art that matter most to the world's most passionate collectors.

► **INSIGHTFUL INTERVIEWS & FEATURES**

Each issue includes exclusive interviews with world-class collectors who share their wisdom and knowledge about collecting.

► **FULL-COLOR PHOTOGRAPHY**

Eye-popping photography gives you a detailed look at the world's top collectibles and fine art. A *Free Pull-Out Poster* is included in each issue.

► **COLUMNS BY TOP EXPERTS**

Some of the top collecting experts tackle topics such as intelligent collecting, trusts and estates, and collecting with kids, and focus on specific categories such as coins, fine and rare wines, vintage jewelry and comics and comic art.

► **AUCTION PREVIEWS & PRICES REALIZED**

Get a sneak peek at upcoming blockbuster auctions, in addition to prices realized for some of the world's most sought-after treasures.

► **COLLECTING CATEGORIES COVERED**

Decorative arts, fine art, illustration art, Texas art, firearms and militaria, U.S. coins, world and ancient coins, comics and comic art, currency, entertainment memorabilia, American Indian art, Americana and political, rare books, Civil War, manuscripts, natural history, photography, space exploration, jewelry and timepieces, movie posters, pop culture, sports collectibles, fine and rare wine, silver and vertu.

PATTERNS

1854 Large Cent Design in Smaller Format
Judd-160, Bright PR65 Brown

- 3479** 1854 One Cent, Judd-160, Pollock-187, R.4, PR65 Brown PCGS. Ex: Bass Jr Collection. These patterns were a part of the Mint's experiments with a smaller diameter cent. The design is similar to the contemporary large cent but omits the stars and shrinks the wreath. Struck in copper or bronze with a plain edge. Both compositions are included in this single Judd number. Metallurgical analysis is required to determine if the piece is bronze or copper. Some later strikes show traces of die rust, not seen on this piece. The fields are bright and lighter in color than usually seen. Die clashing can be seen on the lower left portion of the obverse. PCGS# 11659

1854 Bronze Cent Pattern
Judd-161 Original, PR53

- 3480** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR53 NGC. The obverse and reverse designs are similar to the adopted Braided Hair designs, but without stars on the obverse and struck on a smaller-sized planchet. These popular patterns are known in copper, bronze, and orioide. This example is struck in bronze and has a plain edge. The surfaces are deep brown with evidence of light handling over the high points of the design and also in the fields. PCGS# 11663

1854 Judd-161 Cent, PR64 Brown
Original Striking, No Stars

- 3481** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR64 Brown NGC. The design is similar to the issued Mature Head large cent, except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in copper with a plain edge. The present nicely struck specimen displays wood-grain surfaces with variegated apricot-gold and lavender-brown toning. Contact marks are absent and there are no obtrusive spots. PCGS# 11663

1855 Large Format Flying Eagle Cent
Judd-168 Original, PR55

- 3482** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR55 PCGS. CAC. Eagle Eye Photo Seal. The design shows a large eagle surrounded by 13 stars on the obverse, while on the reverse ONE CENT is surrounded by a thick laurel wreath which is, in turn, surrounded by UNITED STATES OF AMERICA. Struck in bronze with a plain edge. This Judd number covers both copper and bronze examples, but the composition is known for this piece. It is stated on the insert as: 87.4 % copper, 11% tin, and 1.6% zinc. We have handled several other pieces that have been analyzed, but they have all had a copper content in excess of 90%. This is a glossy brown example with slight high-point friction evident on each side. Die clashing is apparent on each side, as always. PCGS# 11721

1868 Five Cent Pattern in Nickel
Judd-633, PR64

- 3483** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR64 PCGS. The obverse design is that of the three cent nickel, as adopted, but on a larger planchet, with minor design modifications appropriate to the larger diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. This is the variant with the higher date. Struck in nickel with a plain edge. Light gray-lilac toning is seen over each side of this moderately mirrored pattern. PCGS# 60851

1869 Three Cent Nickel in Copper
Judd-678, PR64 Brown

- 3484** 1869 Three Cent Nickel, Judd-678, Pollock-757, Low R.7, PR64 Brown PCGS. The regular three cent nickel dies were used to strike this copper piece with a plain edge. It is probable that this pattern, like so many others minted in the late 1860s and 1870s, was earmarked for the coin collecting public as a special emission of the U.S. Mint in Philadelphia. It is doubtful that Congress had approved, or even had knowledge, of such activities. The devices are sharply struck and the fields are moderately mirrored. The medium brown surfaces display splashes of pale blue and green toning. Minor surface marks and tiny spots prevent a higher grade. Only about a half dozen examples of this pattern variety are known, according to USPatterns.com. PCGS# 60903

1869 Standard Silver Dime in Silver
Judd-696, PR67 ★ Cameo

- 3485** 1869 Standard Silver Ten Cents, Judd-696, Pollock-775, R.5, PR67 ★ Cameo NGC. The head of Liberty is crowned with three large stars and the motto is displayed in a banner beneath the bust. The reverse has 10 CENTS in the center, surrounded by a thick wreath of oak and laurel, at the upper periphery is STANDARD SILVER with the date below. Struck in silver with a reeded edge. Ocean-blue and ruby colors frame the lightly toned centers of this splendid Superb Gem. Well struck and impressively preserved, the present piece can be identified in future auction appearances by a right-leaning lintmark (as made) within the lower half of the 0 in 10. Ex: Long Beach Signature (Heritage, 9/2005), lot 4195. PCGS# 60921

1869 Standard Silver Quarter in Copper
Judd-736, PR65 Red
Finest Certified

- 3486** 1869 Standard Silver Quarter Dollar, Judd-736, Pollock-817, R.7, PR65 Red NGC. Standard Silver design with Liberty facing right on the obverse, a single star on a head band that is inscribed with the word LIBERTY, a scroll is below with the motto on it, and around the remainder of the obverse periphery is UNITED STATES OF AMERICA. The reverse has 25 CENTS in the center and is surrounded by an oak and laurel leaf wreath, STANDARD SILVER above, and the date below. Struck in copper with a plain edge. Mostly cherry-red with glimpses of lilac and areas of straw-gold on the left fields. A couple of tiny gray obverse freckles provide identifiers. Ex: Santa Clara Signature (Heritage, 11/2001), lot 6746; Orlando FUN (Heritage, 1/2008), lot 3597, which realized \$6,900. PCGS# 80963

1870 Standard Silver 10 Cents, PR64
Judd-825, Silver, Reeded Edge

- 3487 1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR64 PCGS. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date on the exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD in small letters is centered above the wreath. The reverse rim is unusually wide. Struck in silver with a reeded edge. Crisply struck and essentially brilliant with good field reflectivity. A small spot is noted at 12 o'clock and a dark fleck on the right obverse field is accompanied by trivial hairlines. PCGS# 61069

1870 Standard Silver 10 Cents, PR64 Brown
Judd-851, Copper, Reeded Edge

- 3488 1870 Standard Silver Ten Cents, Judd-851, Pollock-958, Low R.7, PR64 Brown NGC. Standard Silver design for the dime with a bust of Liberty facing right on the obverse ornamented with a single star. The legend UNITED STATES OF AMERICA is at the top, and the motto IN GOD WE TRUST is on a scroll below. The denomination 10 CENTS and the date 1870 are centered on the reverse within a wreath of cotton and corn. The word STANDARD is at the upper border. Struck in copper with a reeded edge. The present fully struck near-Gem is unabraded and displays mottled russet-brown toning over sea-green surfaces. PCGS# 61095

1870 Standard Silver Dime, PR66
Judd-867, Silver, Reeded Edge
Single Finest at PCGS

- 3489 1870 Standard Silver Ten Cents, Judd-867, Pollock-963, High R.6, PR66 PCGS. CAC. Ex: Denali Collection. A Standard Silver design that shows a bust of Liberty, facing right, with UNITED STATES OF AMERICA above and IN GOD WE TRUST on a scroll below. The reverse has 10 CENTS in the center, surrounded by an oak and laurel wreath with STANDARD SILVER above and the date in the exergue. Struck in silver with a reeded edge. Attractively toned golden-brown, navy-blue, and plum-mauve with the richest shades near the rims. The well struck devices and reflective fields combine for imposing eye appeal. The single finest certified at PCGS (6/13). PCGS# 61111

William Barber's 1870 Seated Liberty Half
Judd-929, PR65 Red and Brown

- 3490 1870 Standard Silver Half Dollar, Judd-929, Pollock-1034, R.7, PR65 Red and Brown PCGS. CAC. Ex: Denali Collection. The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed in raised letters; a Liberty pole is positioned behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse features the denomination 50 / CENTS encircled by an agricultural wreath, with the word STANDARD spelled out above. Struck in copper with a reeded edge. This is an elegant example of this scarce pattern, richly toned with gold and pumpkin-orange shadings in addition to mahogany and more colorful sapphire and violet hues. Carefully preserved and outstanding. Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4570, which realized \$9,775. PCGS# 71174

**William Barber 1870 Seated Half Dollar
Judd-937 in Aluminum, PR65 Cameo
Single Finest PCGS-Certified**

- 3491 1870 Half Dollar, Judd-937, Pollock-1044, High R.7, PR65 Cameo PCGS. CAC.** William Barber's Seated Liberty design depicts Liberty seated on the obverse facing left, with a Liberty pole behind her. She holds an olive branch in her left hand, and supports a shield with her right hand. The word LIBERTY is also in raised letters. The reverse is from a regular issue Liberty Seated die. Struck in aluminum with a reeded edge. This beautiful design was also struck in silver and copper; all three compositions were made with a reeded edge and plain edge. Fewer than a half dozen of this aluminum striking are believed known. The fully struck and evenly frosted motifs contrast with the seamless fields. PCGS has certified 3 specimens with the present piece as the single finest (6/13).
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 8472, which realized \$9,775. PCGS# 61183

**1879 Goloid Metric Dollar
Judd-1617, Brilliant PR62**

- 3492 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR62 PCGS.** William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. The obverse design is similar to the one seen on the famous half union patterns of 1877. The surfaces on this example are completely brilliant, and appear to be silver but few (if any) pieces have undergone metallurgical testing. Light hairlining and a couple of minor contact marks determine the grade. PCGS# 61995

**1879 Goloid Metric Dollar, Gem Proof
Judd-1626, Attractive Patina**

- 3493 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR65 PCGS. CAC.** William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. Dappled powder-blue, lilac-red, and caramel-gold toning endows this precisely struck and satiny Gem. A carbon fleck near obverse star 11 but otherwise nearly pristine. Population: 6 in 65, 2 finer (6/13). PCGS# 62004

GOLD DOLLARS

- 3494 1849 No L MS64+ NGC.** A flashy piece with yellow luster that offers a semireflective gleam within the reverse wreath. Strongly detailed and pleasingly preserved with just a few too many minor marks for full Gem status. NGC ID# 25B7, PCGS# 7501
- 3495 1849 Open Wreath MS63 PCGS.** The gold dollar made its debut in 1849, with a mintage of 687,500 pieces at the Philadelphia Mint. The vivid orange-gold surfaces of this pleasing Select example show a few minor contact marks, with vibrant mint luster and well-detailed design elements. Housed in a green label holder. NGC ID# 25B9, PCGS# 7502
- 3496 1849 Open Wreath MS63 NGC.** The upper reverse of this sharply defined Select Mint State piece has several die cracks. This example has full frosty mint luster with brilliant light yellow surfaces. NGC ID# 25B9, PCGS# 7502
- 3497 1849 Closed Wreath MS63 NGC.** A well-detailed Select gold dollar from the first year of the denomination, this coin displays lustrous yellow and rose-gold surfaces with only minor signs of contact. PCGS# 7503
- 3498 1850 MS64 NGC.** The distinct greenish cast to this brilliant lemon-yellow gold dollar suggests freshly mined California gold as the source of the metal. This sharply defined Choice Mint State beauty is destined for an advanced collection. Census: 39 in 64 (2 in 64+), 16 finer (6/13). NGC ID# 25BF, PCGS# 7509
- 3499 1853-D XF45 NGC. Variety 5-G.** Lightly abraded for the grade, this low-mintage issue from the Dahlonega Mint retains a few traces of original mint luster and exhibits well-detailed design elements, with most of the wear on Liberty's hair. NGC ID# 25BW, PCGS# 7523
- 3500 1854 Type One MS64 NGC.** This sharply detailed honey-gold specimen has exceptional luster with frosty light yellow surfaces, showing full mint brilliance. Several die cracks on each side add to the collectibility of this near-Gem. NGC ID# 25BY, PCGS# 7525
- 3501 1854 Type One MS64+ PCGS. CAC.** This near-Gem, representing a transitional year for gold dollars, is the final Type One issue of the series. Both sides have an exquisite strike with frosty and fully brilliant yellow-gold luster. NGC ID# 25BY, PCGS# 7525

1855 Gold Dollar, MS62
Piquant Memento of the Early Mint

3502 1855 MS62 PCGS. The 1855 gold dollar issue is a favorite of collectors for numerous reasons. The 1854 splits its issue between Type One and Type Two pieces, but all 1855 gold dollars are Type Two, the modified Indian Princess Head design. There is no confusion. Additionally, the double slanted or italic 5s in the date remind numismatists of the piquant early Mint times in which the pieces were struck, contemporary with the large cents featuring the same-style numerals. This MS62 offers bold luster on orange-yellow surfaces. Both sides are boldly clashed, the reverse more so and showing typical weakness on the 8 in the date and LL in the denomination. The obverse shows a few Mint-made tiny planchet defects and a few thin contact marks and tiny luster grazes consistent with the grade. NGC ID# 25C4, PCGS# 7532

3503 1855-O AU55 NGC. Variety 2. A sun-gold Choice AU example of the only New Orleans Type Two issue. The mintage of 55,000 pieces makes it more available than its Charlotte and Dahlonega counterparts, though considerably scarcer than Philadelphia gold dollars of the date. Partly lustrous and smooth aside from inconspicuous strike-throughs on the forehead curls. NGC ID# 25C7, PCGS# 7535

1855-O Gold Dollar, AU58

3504 1855-O AU58 NGC. Variety 1. All five mints active during the 1850s struck Type Two gold dollars. New Orleans examples are much more elusive than those from Philadelphia, yet collectible relative to their Dahlonega, Charlotte, and San Francisco cousins. The present O-mint piece displays ample bright sun-gold luster while the open fields are toned dusky apricot. Free from consequential marks. NGC ID# 25C7, PCGS# 7535

1856-S Type Two Gold Dollar, AU53
Normal Mintmark

3505 1856-S Type Two AU53 NGC. Normal mintmark. As the only Type Two gold dollar struck in 1856 (and the only Type Two gold dollar coined at the San Francisco Mint), the 1856-S issue enjoys considerable popularity. This briefly circulated example shows distinct wear across the high points, yet the deep butter-yellow surfaces remain remarkably lustrous. NGC ID# 25C8, PCGS# 7536

3506 1857-C — Damage — Genuine PCGS. AU Details. Variety 1. Both sides show minor surface damage in the left fields. The design elements are softly struck as almost always seen on this issue and the mint luster is slightly subdued. NGC ID# 25CE, PCGS# 7545

3507 1857-D XF45 NGC. Variety 9-L. A pleasing Choice XF example of what Winter has labeled “the most underrated Dahlonega gold dollar,” rich yellow-gold with glimpses of this issue’s signature frosty luster in the fields. Light wear on the high points merges with a typically soft strike, but the eye appeal holds up well. A mere 3,533 pieces were produced.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2531. NGC ID# 25CF, PCGS# 7546

3508 1859 MS64 NGC. The light yellow and rose-gold surfaces of this attractive Choice example show only a few minor contact marks on both sides. Satiny mint luster adds to the considerable visual appeal. NGC ID# 25CL, PCGS# 7551

3509 1859-S AU53 NGC. CAC. Both green and orange overtones make themselves plain on this lightly rubbed but still-lustrous San Francisco gold dollar. Well-defined with few significant abrasions, and one of just 15,000 pieces struck. NGC ID# 25CP, PCGS# 7554

3510 1860-S AU58 NGC. This lightly abraded near-Mint gold dollar retains much original mint luster and design detail. From a mintage of 13,000 pieces. Census: 52 in 58, 38 finer (5/13). NGC ID# 25CT, PCGS# 7557

1860-S Gold Dollar, MS62
Only 13,000 Pieces Struck

3511 1860-S MS62 NGC. A representative from the last issue of gold dollars at the San Francisco Mint for a decade, this piece is one of only 13,000 coins struck. Brilliant luster and attractive yellow-gold color combine for nice eye appeal on this example. Census: 7 in 62, 9 finer (5/13). NGC ID# 25CT, PCGS# 7557

- 3512 1866 MS64 PCGS. CAC.** Here is an extremely important gold dollar issue, struck just after the end of the Civil War, with a mintage that was limited to just 7,100 coins. Heavy clash marks and striae are evident on both sides of this brilliant and reflective yellow-gold dollar. Population: 13 in 64 (1 in 64+), 26 finer (6/13). NGC ID# 25D2, PCGS# 7565

**1870 Gold Dollar, MS65
Only 6,300 Pieces Minted**

- 3513 1870 MS65 PCGS.** A stunning Gem and an extremely important opportunity for the advanced collector. This piece has highly lustrous yellow-gold surfaces with brilliant mint frost and minimal surface marks. Heavy die polishing lines are noted on the reverse. Population: 8 in 65, 13 finer (6/13). NGC ID# 25D6, PCGS# 7569

**1870-S Gold Dollar, MS61
Last Branch Mint Gold Dollar**

- 3514 1870-S MS61 NGC.** The 1870-S is the last gold dollar struck at a branch mint. With a mintage of 3,000 pieces, this is a popular issue and a true rarity. Only about 125 to 170 specimens are estimated to have survived to the present day, 35 to 50 of which are Mint State. Most of the latter are in the MS60 to MS62 range. Deep orange-gold patina blushed with lavender and sky-blue graces the lustrous surfaces of this MS61 example, and the strike is sharp throughout. A series of moderate-size contact marks in the right obverse field are all that stand in the way of a higher grade. Census: 10 in 61, 20 finer (5/13). NGC ID# 25D7, PCGS# 7570

1873 Open 3 Gold Dollar, MS66

- 3515 1873 Open 3 MS66 PCGS. CAC.** A boldly impressed example of the Open 3 type, this Premium Gem is impressively lustrous with canary-yellow and sun-gold hues on each side. As expected at this grade level, there are only a few tiny disturbances visible in the fields, and the eye appeal is spectacular. The PCGS Population data has not changed since this coin was offered in June 2010. Population: 12 in 66, 2 finer (6/13).
Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1500. NGC ID# 25DB, PCGS# 7573

- 3516 1873 Closed 3 MS62 PCGS. CAC.** Prominent clash marks are limited to the obverse. Trivial surface marks appear on the lemon-yellow surfaces of this fully lustrous specimen. The obverse is satiny with reflective reverse fields. Population: 14 in 62, 21 finer (5/13). NGC ID# 25DA, PCGS# 7574

- 3517 1874 MS66 NGC. CAC.** An exquisite peach-gold Premium Gem that boasts smooth and evenly struck surfaces. Well preserved though we note tiny mint-made alloy spots at 2 o'clock on the obverse and 9 o'clock on the reverse. Encased in a former generation holder. NGC ID# 25DC, PCGS# 7575

- 3518 1876 MS64 PCGS.** Flashy with glimmers of watery reflectivity in the obverse fields. Light sea-green overtones grace pale yellow surfaces. A well-struck near-Gem. Population: 33 in 64 (1 in 64+), 12 finer (6/13). NGC ID# 25DE, PCGS# 7577

- 3519 1877 MS63 PCGS.** The vivid orange-gold surfaces of this attractive Select specimen show accents of lilac and only minor signs of contact. The prooflike fields show definite elements of contrast with the sharply detailed design elements. Population: 26 in 63, 55 finer (5/13). NGC ID# 25DF, PCGS# 7578

- 3520 1877 MS63 NGC.** With a mintage of a mere 3,920 pieces, this lustrous, semiprooflike, and attractive specimen is as visually appealing as it is scarce. Census: 20 in 63, 37 finer (5/13).
Ex: *FUN Signature* (Heritage, 1/2003), lot 1455. NGC ID# 25DF, PCGS# 7578

**1879 Gold Dollar, MS66
Low-Mintage Condition Rarity**

- 3521 1879 MS66 PCGS.** Great luster and premium eye appeal compete for top honors on this Premium Gem 1879 gold dollar. The surfaces are fairly prooflike, an expected occurrence given the low mintage of 3,000 circulation strikes. Deep orange-gold color is intermixed with lilac and a paucity of marks complete the attractive picture. Most of LIBERTY on the headband is effaced — this was raised on working dies, of course, so it could be easily removed by injudicious polishing. Population: 47 in 66 (5 in 66+), 3 finer (5/13). NGC ID# 25DH, PCGS# 7580

**1879 Gold Dollar, MS66
Reflective Fields**

- 3522 1879 MS66 PCGS. CAC.** Scattered copper spots and trivial marks on this Premium Gem prevent an even higher grade and finest certified status. This specimen has brilliant yellow surfaces, with satiny, slightly reflective fields and exceptional eye appeal. Population: 47 in 66 (5 in 66+), 3 finer (6/13). NGC ID# 25DH, PCGS# 7580

1880 Gold Dollar, MS67
Just 1,636 Pieces Minted

- 3523 1880 MS67 PCGS.** A fully prooflike example provided with a Superb Gem MS67 grade by PCGS. This example represents a low-mintage date, and is one of just 1,636 coins struck. Many of the mintage were hoarded, and today, examples are elusive but certainly not impossible to locate. CA of AMERICA are weakly impressed, typical of business strike examples. A small orange spot is visible outside the left branch of the wreath.
Ex: Dallas Signature (Heritage, 11/2005), lot 3854. NGC ID# 25DJ, PCGS# 7581

1881 Gold Dollar, MS67
Excellent Type Candidate

- 3524 1881 MS67 PCGS.** Compared to other gold dollars, the 1881 had a moderate mintage of 7,620 coins, and quite a number of those survive in high grades. This Superb Gem exhibits boldly defined devices and satiny yellow-gold surfaces with a small planchet flake at the reverse rim at 7 o'clock. NGC ID# 25DK, PCGS# 7582
- 3525 1882 MS65 PCGS.** Primarily peach-gold though ruby-red congregates at the upper obverse margin. Pristine except for a single faint diagonal flaw on the cheek. Only 5,000 business strikes were produced. NGC ID# 25DL, PCGS# 7583
- 3526 1883 MS64 NGC.** Showing minimally marked surfaces with some degree of prooflike reflectivity throughout. Slight softness is also encountered on some of the devices.
Ex: Long Beach Signature (Heritage, 2/2005), lot 7526; Long Beach Signature (Heritage, 9/2005), lot 4277. NGC ID# 25DM, PCGS# 7584
- 3527 1883 MS66 PCGS.** Glimmers of blue-green and lavender are set against a gold-orange backdrop. A lovely Premium Gem from late in the gold dollar's run, one of 10,800 business strikes. NGC ID# 25DM, PCGS# 7584

1884 Gold Dollar, MS66
Elusive in High Grade

- 3528 1884 MS66 PCGS.** This issue has the fourth lowest business strike mintage of the final decade for gold dollars. A boldly defined Premium Gem, this example has a few trivial, grade-limiting surface marks on each side. The fields are mildly reflective and display brilliant lemon-yellow and pale orange color. Population: 18 in 66, 19 finer (6/13). NGC ID# 25DN, PCGS# 7585
- 3529 1885 MS66 PCGS.** Pale and partly reflective with glimpses of green against pale canary-yellow. This well-struck Premium Gem comes from an issue of only 11,156 business strikes. Population: 29 in 66, 14 finer (6/13). NGC ID# 25DP, PCGS# 7586
- 3530 1886 MS65 PCGS. CAC.** Pale yellow with "split luster," frosted in certain areas and reflective in others. Quality detail is a further essential component to the all-around eye appeal. Population: 43 in 65, 20 finer (6/13). NGC ID# 25DR, PCGS# 7587
- 3531 1887 MS63 NGC. CAC.** Well-defined with a semireflective sheen but also significant swirling luster along the margins on the reverse. One of 7,500 business strikes produced. NGC ID# 25DS, PCGS# 7588
- 3532 1887 MS66 PCGS. CAC.** Semi-cartwheel yellow-gold luster has touches of orange. Excellent detail, particularly on the reverse, and a marvelously appealing type coin. Population: 68 in 66 (1 in 66+), 25 finer (6/13). NGC ID# 25DS, PCGS# 7588
- 3533 1888 MS64 PCGS.** A beautiful apricot-gold representative that has splendid preservation and the look of a higher grade. Only 15,500 pieces were struck for this penultimate issue.
Ex: New York Signature (Heritage, 7/2004), lot 7997. NGC ID# 25DT, PCGS# 7589

1888 Gold Dollar, MS67
Exceptional Eye Appeal

- 3534 1888 MS67 PCGS.** This impressive Superb Gem has frosty yellow luster with delicate orange and pinkish-rose accents. Traces of light bluish-green appear at the obverse border. An exceptional example that is rarely seen at this or finer grade levels. Population: 42 in 67 (1 in 67+), 5 finer (6/13). NGC ID# 25DT, PCGS# 7589
- 3535 1889 MS65 PCGS.** Yellow-orange luster softly swirls across each side of this well-defined Gem. While the act abolishing the gold dollar was not passed until 1890, the last non-commemorative examples of the denomination were struck the previous year. NGC ID# 25DU, PCGS# 7590

- 3536 1889 MS65+ PCGS.** This final-year gold dollar has an unusual mix of colors, including deep orange, straw-gold, and blue-green. Sharply struck with great all-around eye appeal. NGC ID# 25DU, PCGS# 7590
- 3537 1889 MS65 PCGS. CAC.** The final year of issue for the gold dollars except for a few later commemoratives. This Gem has light yellow surfaces and frosty luster with minimal marks and above average design definition. NGC ID# 25DU, PCGS# 7590
- 3538 1889 MS66 PCGS.** Straw and wheat shadings prevail on the obverse, while the reverse has orange attributes prominent at the upper part of the wreath. A quality final-year gold dollar. Ex: *ANA Signature (Heritage, 3/2003)*, lot 6187. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, Satiny MS67

- 3539 1889 MS67 NGC.** This is an interesting coin that shows more brown patina than the usual yellow or orange-gold. The surfaces are more satiny also, rather than the expected bright mint frost. The strike details are uncommonly sharp throughout, even for this normally well-produced date. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

- 3540 1887 — Bent — NGC Details. Proof.** Later date proof gold dollars are much rarer than their mintages, since most were ordered by jewelers for conversion to love tokens or other defacements. The present butter-gold specimen has a bend left of the 1 in the denomination but otherwise has only a few thin abrasions. Crisply struck and flashy. NGC ID# 25EX, PCGS# 7637

CLASSIC QUARTER EAGLES

- 3541 1834 Classic AU50 NGC. Breen-6140, Variety 3, R.4.** Large Head. Scarcest of the Classic, No Motto quarter eagle varieties for 1834, distinguished by prominent curls on Liberty's head and a close AM and unlangued eagle on the reverse. Violet peripheral overtones yield to pale, radiant-worn yellow interiors. NGC ID# 25FS, PCGS# 7692
- 3542 1834 Classic AU50 PCGS. CAC. Breen-6140, Variety 2, R.3.** Large Head. Deep, original reddish patina covers the fields and devices, except for the highest portions which are yellow-gold. A few small marks are noted in the field above the eagle; otherwise a clean Classic quarter eagle. NGC ID# 25FS, PCGS# 7692
- 3543 1834 Classic AU55 PCGS. Breen-6140, Variety 2, R.3.** The Large Head obverse is combined with the Wide AM reverse. This Choice AU specimen has greenish-yellow surfaces with faint field reflectivity, showing scattered grade-consistent handling marks. NGC ID# 25FS, PCGS# 7692
- 3544 1834 Classic AU58 NGC. Breen-6138, Variety 1, R.1.** The Small Head variety, believed to be the first Classic quarter eagle marriage since the other three 1834 marriages have the same portrait style as the 1835. The present straw-gold representative has a good strike and lacks relevant abrasions. NGC ID# 25FS, PCGS# 7692

- 3545 1839-O XF45 NGC. Breen-6153, Variety 28, R.4.** The Close Fraction die variety of the only New Orleans Classic issue. This apricot-gold two and a half has medal turn and surprisingly minor abrasions. Liberty's curls exhibit moderate wear but the eagle is sharp and ample luster fills the borders and motifs. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 3546 1843 AU58 NGC.** Pale and radiant with a few touches of green against a pale yellow base. Minor marks and rub account for the grade. The 1843 quarter eagle is heavily resubmitted in the NGC *Census Report* but remains a condition rarity in Mint State. NGC ID# 25GL, PCGS# 7727
- 3547 1843 AU58 NGC.** Yellow-gold surfaces have a touch of duskiness, unsurprising given the age of the coin. Both sides remain lustrous with only minor wear crossing the high points of the modestly abraded surfaces. NGC ID# 25GL, PCGS# 7727
- 3548 1844-D — Improperly Cleaned — NGC Details. Unc. Variety 5-I (formerly 5-H).** This rare date Dahlonega quarter eagle is somewhat bright but the faintly hairlined sun-gold surfaces lack consequential abrasions. The centers show incompleteness of strike usual for the Southern facility but there is no apparent wear.
- 3549 1850-O AU58 NGC. Variety 4.** Four die pairs are known despite a mintage of only 84,000 pieces. This yellow-gold Borderline Uncirculated representative is void of visible marks and provides good eye appeal. Slightly out of parallel dies cause a crisp strike on half the coin and a typical impression on the other half. NGC ID# 25HK, PCGS# 7758
- 3550 1852 MS64 NGC.** This attractive Choice specimen offers well-detailed design elements, with a touch of softness on the central reverse, and brightly lustrous yellow and rose-gold surfaces. Census: 61 in 64, 7 finer (5/13). NGC ID# 25HR, PCGS# 7763

1853 Quarter Eagle, MS64+ Conditionally Rare

- 3551 1853 MS64+ NGC. CAC.** The substantially increased gold supply increased the price of silver in relation to gold, and silver coins all but disappeared from commerce. The quarter eagles were struck in large quantities to aid commercial transactions. Nearly 1.5 million quarter eagles were coined in 1853, yet few survive in Mint State grades, and NGC has only certified 20 pieces finer than this example. Both sides have bold design motifs with frosty yellow-gold luster that shows a delicate green tint. NGC ID# 25HV, PCGS# 7767
- 3552 1854 MS63 PCGS.** Boldly impressed on the obverse with particularly noteworthy detail on Liberty's hair, though the eagle is softer. Yellow-gold luster has wispy abrasions to define the grade, not marks of individual significance. Population: 44 in 63, 39 finer (5/13). NGC ID# 25HX, PCGS# 7769
- 3553 1856-S AU58 PCGS.** Light yellow-gold overall with a surprising radiance given the age of the piece. A hint of green suggests California silver alloy, not surprising for a third-year San Francisco coin. Population: 15 in 58, 23 finer (6/13). NGC ID# 25JB, PCGS# 7781

- 3554 1858 MS62 NGC. CAC.** Pleasing gold color, with hints of rose and orange, provides this coin with an attractive appearance. There are no mentionable marks. Census: 17 in 62, 14 finer (5/13). NGC ID# 25JG, PCGS# 7786
- 3555 1861 Old Reverse, Type One AU58 NGC.** The 1861 has a higher mintage than all other issues from the 1860s combined, but the vast majority of those pieces are the Type Two Reverse with small, separated arrowheads. The Type One Reverse is very scarce. A smooth and partly lustrous apricot-gold example. NGC ID# 25JW, PCGS# 97794
- 3556 1861 New Reverse, Type Two MS62 NGC.** The 1861 Liberty quarter eagle with the New Reverse is an available issue and a popular choice of type collectors. This impressive MS62 example displays sharply detailed design elements and vibrant mint luster on both sides. NGC ID# 25JX, PCGS# 7794
- 3557 1871-S AU58 NGC.** This satiny near-Mint specimen has faint hairlines and a trace of high-point wear with a few other trivial marks. From a mintage of only 22,000 coins, high grade survivors are elusive, and NGC has only certified 21 finer examples (6/13). NGC ID# 25KJ, PCGS# 7814
- 3558 1893 MS65 NGC.** This delightful Gem possesses outstanding eye appeal, with especially vibrant mint luster and razor-sharp definition on all design elements. Census: 52 in 65, 33 finer (5/13). NGC ID# 25LH, PCGS# 7845
- 3559 1893 MS65 PCGS.** A fully brilliant and sharply struck Gem from a mintage of only 30,000 coins, this quarter eagle has delicate rose toning and a hint of green over its lustrous yellow surfaces. Population: 44 in 65, 20 finer (6/13). NGC ID# 25LH, PCGS# 7845
- 3560 1893 MS65 PCGS.** All quarter eagles from 1880 to 1899 were minted at Philadelphia. The highest circulation-strike production that period occurred in 1893, when 30,000 pieces were coined. This Gem has brilliant satin luster with bright yellow-gold surfaces and full design definition. Population: 44 in 65, 20 finer (6/13). NGC ID# 25LH, PCGS# 7845
- 3561 1894 MS63 PCGS.** Flashy and decidedly prooflike with a strong cartwheel spin to the copper-gold surfaces. Strongly struck and attractive despite a scattering of light abrasions. One of just 4,000 business strikes produced. NGC ID# 25LJ, PCGS# 7846
- 3562 1896 MS65 PCGS.** Despite a scant mintage of 19,070 pieces, the 1896 quarter eagle is a type coin in most grades. As a Gem, however, it is genuinely scarce. This flashy wheat-gold example has bold interior detail and strong cartwheel luster. Population: 67 in 65, 25 finer (6/13). NGC ID# 25LL, PCGS# 7848
- 3563 1897 MS65 PCGS. CAC.** This boldly defined Gem exhibits frosty yellow-gold luster with hints of green color and delicate rose overtones. An impressive example from a low mintage of 29,700 coins. PCGS has only certified 38 examples as MS66 or finer (6/13). NGC ID# 25LM, PCGS# 7849
- 3564 1898 MS65 PCGS. CAC.** The 1898 quarter eagle, mintage 24,000 pieces, can be found in most grades through near-Gem. This MS65 piece occupies a higher tier of rarity, however, with anything finer conditionally scarce. Orange overtones are generous on this sun-gold piece that shows a few small coppery dots on the reverse. NGC ID# 25LN, PCGS# 7850
- 3565 1899 MS65 PCGS.** Pale golden surfaces show hints of apricot and straw. Crisply detailed with shimmer-swirling luster and smooth eye appeal for its issue of 27,200 business strikes. Population: 68 in 65 (1 in 65+), 24 finer (6/13). NGC ID# 25LP, PCGS# 7851
- 3566 1900 MS66 PCGS.** Honey-gold luster swirls across each side, occasionally veering toward orange. A well-defined turn-of-the-century quarter eagle, ideal for the type enthusiast. Population: 66 in 66 (1 in 66+), 8 finer (6/13). NGC ID# 25LR, PCGS# 7852
- 3567 1901 MS66 PCGS.** The bright yellow and rose-gold surfaces of this impressive Premium Gem radiate vibrant mint luster and show no mentionable signs of contact. Population: 84 in 66 (2 in 66+), 12 finer (5/13). NGC ID# 25LS, PCGS# 7853
- 3568 1901 MS66 PCGS.** This immaculate Premium Gem has enchanting orange-gold surfaces and the cartwheel luster of a Morgan dollar. Sharply struck with only the tiniest of marks. Population: 84 in 66 (2 in 66+), 12 finer (6/13). Ex: *Dallas Signature (Heritage, 10/2006), lot 2537; ANA Signature (Robert Korver, 3/2007), lot 1764.* NGC ID# 25LS, PCGS# 7853
- 3569 1902 MS66 PCGS.** Vibrant satiny mint luster and sharply detailed design elements are the hallmarks of this Premium Gem. Light greenish-gold surfaces have no mentionable distractions, adding to the exceptional eye appeal. NGC ID# 25LT, PCGS# 7854
- 3570 1902 MS66 PCGS.** Crisply detailed with primarily wheat-gold surfaces and a few touches of apricot-orange. This Premium Gem offers smooth eye appeal for type collectors. NGC ID# 25LT, PCGS# 7854
- 3571 1903 MS66 PCGS.** Primarily apricot-gold with a measure of orange visiting the margins. Pleasingly detailed, as many early 20th century Liberty quarter eagles are, and carefully preserved. NGC ID# 25LU, PCGS# 7855
- 3572 1904 MS66 PCGS.** Light orange overtones visit the rich yellow-gold surfaces. Swirling luster has a strong cartwheel effect. While the 1904 quarter eagle is available for a price even in MS66, PCGS has graded only 44 examples as MS67 or better (6/13). NGC ID# 25LV, PCGS# 7856
- 3573 1905 MS65 PCGS.** Rich sun-gold luster takes on an orange overtone on the reverse. Intricately detailed and pleasingly preserved, a great Gem for the type or date enthusiast. NGC ID# 25LW, PCGS# 7857
- 3574 1905 MS66 NGC.** Greenish-gold patina with delicate rose accents occupies the lustrous surfaces of this Premium Gem. Sharply struck and minimally marked. Tough to locate any finer. NGC ID# 25LW, PCGS# 7857
- 3575 1905 MS66 PCGS.** Pale and bright with a primarily straw-gold obverse and more green and yellow tints on the reverse. Well-defined and an excellent type coin for the 20th century enthusiast. NGC ID# 25LW, PCGS# 7857
- 3576 1905 MS66 PCGS. CAC.** Swirling apricot-gold luster has areas of both paler yellow and deeper orange. Impressively detailed with satin texture and a small copper spot near star 13 on the obverse. NGC ID# 25LW, PCGS# 7857
- 3577 1905 MS66+ NGC. CAC.** Gleaming luster and rich honey-gold color provide this high-end Premium Gem with tremendous eye appeal. Subtle hints of green are present on both sides. A few tiny alloy spots appear. NGC ID# 25LW, PCGS# 7857
- 3578 1906 MS66 PCGS.** Rich sun-gold and butter-yellow shadings are prominent on this late-date Liberty quarter eagle. Intricately detailed with green-gold accents visible on the reverse. NGC ID# 25LX, PCGS# 7858
- 3579 1907 MS65 PCGS.** Beautiful peach-gold patina is predominant, although the obverse margin offers sea-green. Boldly struck and lustrous with only minuscule contact. Housed in a green label holder. NGC ID# 25LY, PCGS# 7859
- 3580 1907 MS66 NGC.** Vibrant luster exudes from the golden surfaces of this Premium Gem, and a solid strike provides sharp definition of the design features. This is a wonderful piece for a high-grade type collection. NGC ID# 25LY, PCGS# 7859
- 3581 1907 MS66 PCGS.** Pleasingly detailed with frost-swirls of luster curling around the sun-gold portrait and eagle. Great eye appeal, as befits a Premium Gem. PCGS has graded 73 examples as MS67 or finer (6/13). NGC ID# 25LY, PCGS# 7859

INDIAN QUARTER EAGLES

- 3582 1909 MS63 NGC.** The pleasing orange-gold surfaces of this attractive Select specimen display a few highlights of rose and show few signs of contact. The design elements are well-detailed and visual appeal is quite strong. NGC ID# 288Z, PCGS# 7940
- 3583 1910 MS63 NGC.** This impressive early series Indian quarter eagle exhibits well-detailed design elements and vibrant mint luster, with pleasing greenish-gold surfaces that show few signs of contact. NGC ID# 2892, PCGS# 7941
- 3584 1911 MS64+ PCGS.** Yellow and sun-gold surfaces shade toward orange in isolated areas. Smoother than often seen for this issue, though the fields around the well-defined devices show just a few too many marks to allow for full Gem status. NGC ID# 2893, PCGS# 7942

1912 Two and a Half, MS64+ Very Close to Gem

- 3585 1912 MS64+ PCGS.** Pale yellow-gold color is seen over each side of this remarkably well-struck Indian quarter eagle. This type is usually encountered heavily abraded, which accounts for the small number of high-grade examples known relative to the mintages. This piece shows no obvious abrasions on the obverse or reverse. NGC ID# 2896, PCGS# 7944
- 3586 1913 MS64 PCGS. CAC.** The design elements of this attractive Choice example are well-detailed and the vivid orange-gold surfaces show minimal signs of contact. Eye appeal is outstanding. NGC ID# 2897, PCGS# 7945
- 3587 1913 MS64 NGC. CAC.** Dusky surfaces exhibit delicate green patina over the frosty luster of this sharply defined Choice Mint State Indian quarter eagle. NGC ID# 2897, PCGS# 7945
- 3588 1914 MS62 NGC.** Yellow-orange luster is subtle but complete. All-around detail is above-average, including complete pendants on the necklace. A quality quarter eagle from the year World War I broke out in Europe. NGC ID# 2898, PCGS# 7946
- 3589 1914 MS62 NGC.** From a mintage of 240,000 pieces, the 1914 Indian quarter eagle is the second-scarcest date of the series. This lovely example displays pleasing gold surfaces with subtle hints of orange. NGC ID# 2898, PCGS# 7946
- 3590 1914 MS62 PCGS.** The reverse is even orange-gold, while the obverse ranges from light yellow to near-red. Better-defined than usually seen, though the fields harbor a number of wispy abrasions and pinpoint marks. NGC ID# 2898, PCGS# 7946
- 3591 1914-D MS63 PCGS.** A rich orange-gold Select Mint State specimen, showing hints of pale blue patina. This sharply struck Denver quarter eagle has excellent eye appeal. NGC ID# 2899, PCGS# 7947
- 3592 1914-D MS63 NGC.** This attractive Select specimen displays sharply detailed design elements and vibrant mint luster, with pleasing yellow and greenish-gold surfaces. A few minor marks in the left obverse field explain the grade. NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64 Scarce Denver Mint Issue

- 3593 1914-D MS64 PCGS.** The 1914-D is among the rarest issues in the Indian quarter eagles beyond this MS64 grade level. This well-struck piece is primarily khaki-gold with a trace of rose in the obverse letter interiors, broadening out to bold rose color in the reverse fields. A scattering of small marks appears before the Indian's profile but the surfaces elsewhere show few signs of contact. NGC has seen only 44 finer (6/13). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64+ Obverse Die Cracks

- 3594 1914-D MS64+ PCGS.** A few obverse die cracks are noted, unusual for the Indian design gold pieces. A coin for the connoisseur, this conditionally rare 1914-D quarter eagle is boldly detailed and exhibits impressive lemon-yellow luster with frosty surfaces showing minimal surface marks on each side. PCGS has only certified 42 finer examples (6/13). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64 Second of Three Denver Issues

- 3595 1914-D MS64 PCGS. CAC.** The Denver Mint coined just three issues of Indian quarter eagles including the rare 1911-D, the scarce 1914-D, and the common 1925-D. This Choice Mint State representative of the middle issue has bright yellow surfaces with frosty mint luster and excellent design definition. A highly appealing representative. NGC ID# 2899, PCGS# 7947
- 3596 1915 MS64 PCGS.** An impressive Choice specimen with well-detailed design elements and vibrant mint luster throughout. The pleasing yellow and rose-gold surfaces show few signs of contact. NGC ID# 289A, PCGS# 7948

- 3597 1915 MS64+ PCGS. CAC.** An impressive specimen, this near-Gem Indian quarter eagle is the last of the early years before a decade intermission. This piece has frosty light yellow luster with excellent eye appeal. NGC ID# 289A, PCGS# 7948
- 3598 1925-D MS65 NGC.** Boldly struck with pale wheat-gold luster shimmering across each side. The 1925-D quarter eagle was the start of the quarter eagle's brief renaissance but the last Denver issue for the denomination. NGC ID# 289B, PCGS# 7949
- 3599 1926 MS64+ PCGS. CAC.** This high-end Choice example exhibits well-detailed design elements and slightly subdued matte-like mint luster over vivid orange-gold surfaces. Only a few minor contact marks are evident. NGC ID# 289C, PCGS# 7950
- 3600 1928 MS65+ PCGS.** Both sides of this high-end Gem display great yellow color and lustrous surfaces. The coin is well-struck, providing exceptional eye appeal. PCGS has certified only 10 examples as MS66 or finer (6/13). NGC ID# 289E, PCGS# 7952

1929 Quarter Eagle, MS65 Final Issue of the Series

- 3601 1929 MS65 NGC.** The final issue of the Indian quarter eagle series, and a plentiful date through MS64. However, in MS65 this issue is scarce, and it is rare any finer. NCG has only certified three examples finer than this Gem (6/13). This piece has wisps of pink color over its brilliant light yellow surfaces with frosty luster and excellent eye appeal. Sharply struck and highly appealing. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

1854-D Three Dollar, Fine Details Key to the Three Dollar Series

- 3602 1854-D — Ex-Jewelry — PCGS Genuine. Fine Details.** The surfaces have been highly polished and the design elements are soft as a result. Numerous small abrasions are seen over each side also. The bright yellow-gold of the coin shows faint traces of red around the devices. In spite of its problems, this is still the key to the three dollar series with only 1,120 pieces struck. NGC ID# 25M4, PCGS# 7970
- 3603 1855 AU55 NGC. CAC.** The well-detailed design elements of this Choice AU specimen show just a trace of wear on the high points and the lightly abraded surfaces display traces of original mint luster. NGC ID# 25M6, PCGS# 7972

- 3604 1855 AU58 NGC.** Luster illuminates the headdress, wreath, and legends of this minimally circulated and moderately abraded butter-gold representative. First year of the large DOLLARS subtype. NGC ID# 25M6, PCGS# 7972

1855 Three Dollar Gold, MS61+ Ideal Type Coin

- 3605 1855 MS61+ NGC.** A lovely Mint State specimen, this 1855 three dollar gold piece represents the third highest mintage of the denomination behind 1854 and 1878. This piece has frosty light yellow luster with minimal marks for the grade. An exceptional example for the date or type collector. NGC ID# 25M6, PCGS# 7972
- 3606 1856-S VF30 PCGS.** Small S. This almond-gold San Francisco type coin has a smooth appearance and the expected degree of wear on the curls and wreath. The most available of the S-mint issues but the Small S variant is scarce. NGC ID# 25M9, PCGS# 7975
- 3607 1856-S XF45 PCGS. CAC.** Medium S. A caramel-gold representative with smooth surfaces and moderate wear on the wreath and hair. San Francisco threes are scarcer than their Philadelphia counterparts, particularly in better grades. NGC ID# 25M9, PCGS# 7975
- 3608 1857 XF45 NGC.** This lightly circulated Choice XF example presents well-detailed design elements that retain most of their original detail. The lustrous orange-gold surfaces show only minor abrasions. NGC ID# 25MA, PCGS# 7976
- 3609 1859 AU50 PCGS.** A few field marks are evident on each side of this three dollar gold piece, with considerable remaining luster and wisps of pale green patina. Minor die clashing is noted in the obverse and reverse fields. NGC ID# 25MD, PCGS# 7979
- 3610 1860 — Reverse Scratched — NGC Details. AU.** The lower right reverse quadrant has several pinscratches, mostly to the right of the date. Otherwise, this butter-gold example is well defined and attractive with substantial luster throughout the legends. A scant 7,036 pieces were struck. NGC ID# 25ME, PCGS# 7980
- 3611 1861 — Rim Damage — NGC Details. AU.** The pale orange and rose-gold surfaces of this lightly circulated three dollar gold piece are lightly abraded and retain traces of original mint luster. There is some minor damage on the obverse rim at 11 o'clock. NGC ID# 25MG, PCGS# 7982

**1865 Three Dollar, Choice XF
Remarkably Low Mintage**

- 3612 1865 XF45 NGC.** The early date combined with a very low mintage (even for this series) of only 1,140 pieces, makes the 1865 irresistible to collectors. Even wear is seen across both sides, and small abrasions are scattered throughout. Light reddish accents surround the peripheries with slightly lighter interiors. NGC ID# 25ML, PCGS# 7986

**1870 Three Dollar, AU58
Elusive Reconstruction Era Issue**

- 3613 1870 AU58 PCGS.** With a small mintage of only 3,500 coins, the 1870 is obviously a scarce issue, produced at a time when these coins still circulated. This light yellow specimen has brilliant surfaces with reflective fields and minimal surface marks. Population: 41 in 58 (1 in 58+), 33 finer (6/13). NGC ID# 25MS, PCGS# 7991

- 3614 1871 AU50 PCGS.** Considerable luster remains on this reflective honey-gold specimen, with hints of green patina. An attractive piece that exhibits limited wear on the high points. NGC ID# 25MU, PCGS# 7993

- 3615 1874 AU50 PCGS. CAC.** Housed in a green label holder, this lightly circulated three dollar gold piece shows just a touch of wear on the well-detailed design elements and the lustrous surfaces display only minor abrasions. NGC ID# 25MX, PCGS# 7998

- 3616 1874 AU55 NGC.** A lightly worn but still amply lustrous apricot-caramel example of the popular three dollar type issue. Softly struck at the bottom of the wreath with scattered marks that leave the coin just shy of near-Mint status. NGC ID# 25MX, PCGS# 7998

- 3617 1878 MS60 NGC.** At the lowest Mint State level, this light yellow three dollar gold piece is still attractive with reflective fields and trivial marks of no consequence. NGC ID# 25MZ, PCGS# 8000

- 3618 1879 AU53 PCGS.** Only 3,000 three dollar gold pieces were struck in 1879, and some of them may have been melted at the Mint in later years. This attractive AU53 specimen offers semiprooflike surfaces and lightly worn design elements, with only minor contact marks in the fields. NGC ID# 25N2, PCGS# 8001

- 3619 1883 — Improperly Cleaned — NGC Details. AU.** Just 900 pieces were struck for this later-date three dollar gold issue. Though the present example is brass-gold glossy from cleaning, its wear is modest and its popularity is secure. NGC ID# 25N6, PCGS# 8005

- 3620 1888 AU55 PCGS. CAC.** This Choice AU three dollar gold piece retains almost all of its original design detail and shows traces of mint luster on the lightly abraded surfaces. From a business-strike mintage of 5,000 pieces. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1800 Half Eagle, BD-5
AU Sharpness**

- 3621 1800 — Mount Removed — NGC Details. AU. BD-5, High R.3.** Formerly mounted at 3, 9, and 12 o'clock at the reverse. The TE in STATES, the AM in AMERICA, and the ED in UNITED are crudely re-engraved. The rims have minor dings at 11 o'clock at the obverse and 5:30 and 6:30 on the reverse. A vertical bend is evident at the centers, and the cap and curls show moderate wear. Toned caramel-gold and rose-red. NGC ID# 25NW, PCGS# 8082

- 3622 1810 Large Date, Large 5 — Mount Removed — NGC Details. XF. BD-4, R.2.** The edge between 11:45 and 12:30 displays solder remnants. The yellow-gold surfaces are glossy from cleaning but there are no mentionable marks. Struck from moderately rotated dies. NGC ID# 25PG, PCGS# 8108

CLASSIC HALF EAGLES

- 3623 1834 Plain 4 AU55 PCGS. McCloskey 2-A, R.1.** The well-detailed design elements of this Choice AU half eagle show a touch of wear on Liberty's curls. The lustrous antique-gold surfaces are lightly abraded for the grade. NGC ID# 25RR, PCGS# 8171

- 3624 1835 AU58 NGC. Breen-6504, McCloskey 1-A, R.2.** Light green-gold toning visits this evenly struck second-year type coin. Luster fills the borders, portrait, and eagle. Small abrasions are scattered though the only relevant marks are a line on the cheek and a slight reverse rim ding at 2 o'clock. NGC ID# 25RV, PCGS# 8173

**1835 Half Eagle, Mint State
Well Struck, Clashed Dies**

- 3625 1835 MS60 NGC. Breen-6504, McCloskey 1-A, R.2.** Classic half eagles are readily collected in VF and XF grades, but Uncirculated examples of the type are scarce. The present sun-gold example has flashy luster and a bold strike. Clashed within the shield and coronet. Field marks are scattered but none require singular mention. NGC ID# 25RV, PCGS# 8173

3626 1836 AU53 NGC. Breen-6509, McCloskey 4-C, R.3. Second Head, Large Date. Modestly worn with an uneven strike on the stars but generally good portrait and eagle detail. A scrape on Liberty's yellow-gold neck contributes to the grade. NGC ID# 25RY, PCGS# 8174

3627 1836 AU55 NGC. Breen-6509, McCloskey 2-A, R.4. The bright antique-gold surfaces of this attractive Choice AU specimen are minimally abraded and lustrous while the well-detailed design elements show only a trace of wear. NGC ID# 25RY, PCGS# 8174

**Mint State 1836 Half Eagle
Second Head, Small Wide Date**

3628 1836 MS60 NGC. Breen-6508, McCloskey 5-D, R.3. Breen's Second Head, Small Wide Date variety. Nine die varieties are known for the date and only one is truly rare, the Script 8 McCloskey 7-F. The present Block 8 butter-gold representative has minimally marked surfaces. The strike is sharp though slight incompleteness is noted on the eyebrow and shoulder curls. NGC ID# 25RY, PCGS# 8174

3629 1838 AU55 NGC. Breen-6515, McCloskey 2-B, R.1. The Small Arrows, Large 5 variety. A sharply struck Choice AU Classic type coin. The caramel-gold surfaces display moderate marks though none merit singular mention. Luster fills the legends and motifs. NGC ID# 25S4, PCGS# 8176

3630 1838 — Rim Damage — NGC Details. Unc. Breen-6515, McCloskey 2-B, R.1. Aside from a noticeable rim bruise at 6:30 on the obverse, this coin is an attractive representative of the Classic Head half eagle, with well-detailed design elements and vibrant mint luster throughout.

LIBERTY HALF EAGLES

3631 1839 AU55 NGC. An early Coronet half eagle with pale, radiant lemon-gold surfaces. Softly struck devices are rubbed on the high points, while the surfaces as a whole show moderate abrasions. NGC ID# 25S7, PCGS# 8191

**1844-O Half Eagle, MS60
Scarce O-Mint Type in Uncirculated**

3632 1844-O MS60 NGC. The 1844-O can be located in Extremely Fine and About Uncirculated condition, but Mint State pieces are quite scarce. The bright yellow-gold surfaces of this MS60 example possess splashes of grayish-tan, and exhibit well-struck design elements. Distributed light marks are visible on each side. Ex: Long Beach Signature (Heritage, 2/2009), lot 2722. NGC ID# 25TA, PCGS# 8222

**1847-D Liberty Five, AU53
Popular Dahlonega Type Coin**

3633 1847-D AU53 NGC. Variety 19-K (formerly 16-L). The 1847-D Liberty half eagle is one of the more available issues from the Dahlonega Mint, with a surviving population of 275-325 examples in all grades. This lightly circulated example retains much of its original design detail and mint luster, with pleasing yellow and greenish-gold surfaces. Census: 22 in 53, 53 finer (5/13). NGC ID# 25TP, PCGS# 8234

**1847-D Half Eagle, AU53
Smooth Green-Gold Surfaces**

3634 1847-D AU53 NGC. Variety 19-K (formerly 16-L). A well defined green-gold Dahlonega example. The strike is sharp for the Southern facility though the fletchings and hairbun show blending. Unmarked aside from a faded thin line between stars 5 and 6. The mintage of 64,405 pieces is about 7% of its Philadelphia counterpart. NGC ID# 25TP, PCGS# 8234

3635 1849 AU58 NGC. Sun-gold in color overall, with the protected areas revealing shades of peach, this near-Mint example displays a pleasing strike. Although numerous marks are present, none are worthy of individual mention. Census: 39 in 58 (1 in 58+), 30 finer (5/13). NGC ID# 25TV, PCGS# 8240

3636 1849-C — Cleaning — PCGS Genuine. AU Details. Variety 1. Die State II, the typically seen state with crack between the dot and the U of UNITED. Distinctly worn with lemon-gold surfaces glossy from cleaning and a few reverse digs, though still a desirable piece of Charlotte gold.

3637 1850-C — Damage — PCGS Genuine. Unc. Details. Variety 4. The mintmark is lightly entered and placed further right than usual, fully over the E in FIVE. This caramel-gold Charlotte type coin has substantial luster but a deep pinscratch is noted beneath the bust truncation and a small area of tooling is present beneath the earlobe. NGC ID# 25TZ, PCGS# 8244

1851-O Half Eagle, AU53
Good Color and Luster

- 3638 1851-O AU53 NGC. Variety 2.** From a mintage of 41,000 pieces, the 1851-O Liberty half eagle is a scarce issue, with a surviving population of 85-95 examples in all grades. This lightly circulated specimen shows better-than-average detail on the design elements, as the 1851-O is known for its weak strike. The lightly abraded greenish-gold surfaces retain much original mint luster. Census: 21 in 53, 36 finer (5/13). NGC ID# 25U9, PCGS# 8249

- 3639 1853-C Fine 12 NGC. Variety 1.** The 1853-C Liberty half eagle is one of the more available issues from the Charlotte Mint and a favorite choice of mintmark type collectors. This evenly worn example displays problem-free greenish-gold surfaces. NGC ID# 25UE, PCGS# 8254

- 3640 1853-D Large D — Obverse Lamination — XF40 NGC. Variety 34-Y.** While the holder specifies an obverse lamination — and the flaw at the left-side stars is a doozy — another, smaller apparent lamination floats above the eagle's head. Distinctly worn surfaces retain faint gold-orange luster. Moderately abraded. NGC ID# 25UF, PCGS# 8255

- 3641 1854 AU58 NGC. CAC.** Lightly rubbed on well-struck devices but with considerable wheat-gold radiance remaining in the fields. A modestly abraded Philadelphia half eagle with solid arm's-length eye appeal. NGC ID# 25UG, PCGS# 8256

- 3642 1854-C VF30 NGC. Variety 2.** The mintmark is fully visible but lightly entered above the E in FIVE. By comparison, Variety 1 has a bold mintmark over the V in FIVE. This midgrade Charlotte No Motto five is refreshingly unabraded. The open fields are wheat-gold while protected areas exhibit deeper orange shades. NGC ID# 25UH, PCGS# 8257

- 3643 1854-D Weak D AU55 NGC. Variety 31.** The Dahlonega source is confirmed by the obverse die, Variety 31, used to strike both Medium and Large D examples, although no portion of the mintmark is readily apparent. The bright orange-gold surfaces are smooth on this Choice AU example, aside from wispy marks on the field near the denomination. Census: 2 in 55, 3 finer (5/13). PCGS# 98258

- 3644 1856-D — Obverse Scratched — NGC Details. XF. Variety 39-FF (formerly 33-BB).** A pair of slightly faded pinscratches on the portrait form a vee, but there are no other relevant marks. A golden-brown representative of this low mintage Dahlonega issue. The strike is typical on Liberty's curls and the eagle's neck. NGC ID# 25UX, PCGS# 8268

1870 Five Dollar, AU55
Low-Mintage Issue, Scarce in High Grades

- 3645 1870 AU55 PCGS.** Both Philadelphia and San Francisco gold was largely ignored during the 1860s and 1870s, this issue being a good case in point. Only 4,000 pieces were struck. It appears that only two pieces have been certified in mint condition, making this Choice AU one of the finest known. The devices are well defined overall, the fields have an underlying sparkling brightness but it is partially subdued by the numerous small to medium-sized abrasions scattered over each side. Population: 6 in 55, 4 finer (6/13). NGC ID# 25W9, PCGS# 8319

1875-S Half Eagle, AU55
Far Finer Than Usually Seen

- 3646 1875-S AU55 NGC.** This is a high grade for this low-mintage, heavily circulated issue, as the average certified grade barely reaches XF40. This example displays ample remaining design detail for the grade. Well struck, the surfaces show modest wear with numerous small abrasions on each side. Census: 10 in 55, 7 finer (5/13). Ex: Long Beach Signature (Heritage, 2/2007), lot 4594. NGC ID# 25WV, PCGS# 8338

1878 Half Eagle, MS64+
Only Five Finer at PCGS

- 3647 1878 MS64+ PCGS. CAC.** Mint State examples of the 1878 five dollar are scarce through MS63 and rare any finer. This highly lustrous and well-preserved piece displays brass-gold surfaces that include greenish-gold and orange on the reverse, and exhibit sharply struck design elements. Population: 17 in 64 (2 in 64+), 5 finer (6/13). Ex: New York Signature (Heritage, 12/2011), lot 4575. NGC ID# 25X4, PCGS# 8345

- 3648 1880 MS64 PCGS. CAC.** Apricot-orange overtones make this swirling near-Gem a visual delight. Solidly detailed with minor abrasions and a copper spot above the E in UNITED on the reverse. NGC ID# 25XA, PCGS# 8351

**1881-S Half Eagle, MS65
None Finer at NGC**

- 3649 1881-S MS65 NGC.** Despite the substantial mintage of 969,000 pieces, the 1881-S Liberty half eagle is rare in Gem condition. This delightful Gem displays sharply detailed design elements and vibrant cartwheel mint luster on both sides. The light yellow-gold surfaces show a few highlights of rose and a few minor contact marks in the obverse fields. Census: 20 in 65, 0 finer (5/13). NGC ID# 25XF, PCGS# 8357

- 3650 1883 MS64 NGC.** A sharp strike, brilliant lemon-yellow surfaces, and frosty luster characterize this Choice Mint State condition rarity. NGC and PCGS have combined to certify just 43 examples as MS64 and only eight finer pieces, including resubmissions (6/13). Census: 22 in 64 (1 in 64+), 4 finer (6/13). NGC ID# 25XK, PCGS# 8361

1890-CC Half Eagle, MS62

- 3651 1890-CC MS62 NGC. CAC. Variety 1-A.** Significantly scarcer than its 1891-CC successor, the 1890-CC is nonetheless collectible in Uncirculated grades, though Gems are very rare. The present MS62 peach-gold example is lightly abraded and shows only minor inexactness of strike at the centers. Luster dominates design elements and is slightly diminished across the exposed fields. NGC ID# 25Y3, PCGS# 8376

- 3652 1891-CC AU53 PCGS.** Die variety uncertain, as there is no evidence of any lower-left obverse die cracks or date repunching. This orange-gold example with reddish margins has minor wear on the high points but few marks of any significance. NGC ID# 25Y5, PCGS# 8378

- 3653 1891-CC AU55 NGC. Variety 2-A.** The scarcer of two confirmed die pairs. A lightly circulated Carson City five with bright peripheral luster and a good strike. The mildly bright surfaces show few marks besides a small obverse rim nick at 4:30. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS63
Great Type Coin**

- 3654 1891-CC MS63 PCGS. CAC.** This sharp-looking Select 1891-CC is a medium yellow-gold, quite attractive and lustrous despite a scattered of minor marks that determine the trade. The relatively large mintage of 208,000 half eagles for the 1891-CC makes it a popular target for type collectors, as does its usually good eye appeal, in evidence here. NGC ID# 25Y5, PCGS# 8378

- 3655 1895 MS64 PCGS.** This attractive Choice specimen displays vibrant mint luster and well-detailed design elements, with pleasing orange-gold surfaces that show few signs of contact. PCGS has graded 23 numerically finer examples (5/13). NGC ID# 25YH, PCGS# 8390

- 3656 1900 MS64 NGC. CAC.** Strongly struck with dusky apricot at the margins and brighter yellow interiors. A subtly frosty character lights up the cartwheel luster on each side. NGC ID# 25YU, PCGS# 8400

**1900 Liberty Half Eagle, MS65
Turn-of-the-Century Type Coin**

- 3657 1900 MS65 PCGS.** This spectacular Gem displays especially vibrant mint luster and sharply detailed design elements throughout. The well-preserved yellow and peach-gold surfaces show few signs of contact, the worst being a short diagonal mark on Liberty's jaw. Population: 92 in 65 (1 in 65+), 8 finer (5/13). NGC ID# 25YU, PCGS# 8400

- 3658 1903-S MS64 NGC. CAC.** The 3 in the date is lightly repunched south, an unlisted and undoubtedly scarce variety. A lustrous peach-gold and lime-green Choice Liberty type coin. Well preserved save for a short thin field mark beneath the chin. NGC ID# 25Z3, PCGS# 8408

- 3659 1906 MS64 PCGS.** This near-Gem has solid arm's-length eye appeal. The portrait's broad outlines are well-defined, while the yellow-gold fields around have a swirling mix of satiny and frosty textures. A handful of abrasions at the back of Liberty's neck contribute to the grade. NGC ID# 25Z9, PCGS# 8413

1906-D Half Eagle, MS65

First Denver Mint Issue

3660 1906-D MS65 NGC. The Denver Mint opened in 1906 and this lovely Gem is a stunning representative of the first mintage from that facility. The design elements are well-detailed, with just a touch of softness on the arrow fletching, while the well-preserved peach-gold surfaces radiate vibrant mint luster. Census: 56 in 65, 10 finer (5/13). NGC ID# 25ZA, PCGS# 8414

3661 1907 MS64 NGC. CAC. Pleasingly detailed overall with a mix of light yellow and deeper orange shadings. Sweeping luster graces pleasing surfaces that show just a few too many small marks for a finer designation. NGC ID# 25ZC, PCGS# 8416

3662 1907-D MS64 PCGS. The vivid orange-gold surfaces of this attractive Choice example display vibrant mint luster and the design elements are well-detailed. A thin vertical scratch near star 11 is the only mark of note. Housed in a green label holder. NGC ID# 25ZD, PCGS# 8417

3663 1907-D MS64 NGC. CAC. Strong detail on the major design elements with small copper-ruby spots embedded in a gold-orange surface. Minimally abraded with only a small collective of marks to preclude Gem status. NGC ID# 25ZD, PCGS# 8417

3664 1907-D MS65 PCGS. The frequently seen variety with the mintmark tilted sharply to the left. This Gem has sharp details with frosty light yellow luster and pristine surfaces. PCGS has certified just 17 examples as MS66 or better (6/13). NGC ID# 25ZD, PCGS# 8417

PROOF LIBERTY HALF EAGLE

1900 PR55 Half Eagle

Deep Reflectivity Remains in the Fields

3665 1900 PR55 PCGS. A remarkably high number (for the time) of proofs were struck in 1900, with 230 pieces produced. Most likely a great many were melted as this date is not significantly more available than others. In spite of brief handling, this piece retains significant depth of reflectivity in the fields. Light contact marks are evenly distributed over each side. NGC ID# 28D6, PCGS# 8495

INDIAN HALF EAGLES

3666 1909-S AU58 NGC. Luminous orange-gold surfaces have glimmers of lighter yellow and deeper violet accents. A touch of rub has surprisingly little impact on the all-around eye appeal. NGC ID# 25ZL, PCGS# 8516

3667 1909-S AU58 PCGS. CAC. This lightly circulated near-Mint Indian five displays sharply detailed design elements with just a trace of wear on the vivid orange-gold surfaces. Vibrant mint luster is evident on both sides. NGC ID# 25ZL, PCGS# 8516

3668 1910-D MS62 PCGS. CAC. Generally well-struck with luminous apricot-gold surfaces. Though close examination reveals a number of wispy marks and a few deeper abrasions, the arm's-length eye appeal is strong. NGC ID# 28DL, PCGS# 8518

3669 1911-D AU53 NGC. Lightly but distinctly worn, this piece retains strong detail on the crescent in the headdress. Both sides are pale yellow with occasional apricot overtones and a degree of coppery "fill" in the reverse lettering. NGC ID# 28DR, PCGS# 8521

3670 1911-D AU55 NGC. The 1911-D Indian half eagle is a low-mintage issue and one of the keys to the series. This Choice AU example is well-detailed and lustrous and the surfaces are minimally abraded for the grade. NGC ID# 28DR, PCGS# 8521

3671 1912 MS63 PCGS. The vivid orange-gold surfaces of this lustrous Select specimen are accented by a few amber alloy spots. The design elements are well-detailed and the surfaces show a few grade consistent contact marks. NGC ID# 28DS, PCGS# 8523

3672 1912 MS63 PCGS. Yellow-orange overall with the deepest hues and coppery areas at the obverse margins. Well-defined with a shallow scrape to the left of the portrait's neck. NGC ID# 28DS, PCGS# 8523

1912 Indian Five, MS64

Elusive Any Finer

3673 1912 MS64 PCGS. While the mintage of 790,000 coins, might suggest otherwise, the 1912 is a definite condition rarity that is elusive in finer grades. PCGS has only certified 48 pieces better than this Choice Mint State specimen (6/13). Both sides have bright orange luster with pale blue patina, strong design details, and frosty surfaces. NGC ID# 28DS, PCGS# 8523

3674 1912-S AU58 PCGS. CAC. The 1912-S is a well-known condition rarity in Uncirculated grades. This near-Mint example has lightly abraded, orange-gold surfaces with just a touch of high-point friction. NGC ID# 25ZN, PCGS# 8524

3675 1913 MS63 PCGS. This sharply detailed Select specimen displays lustrous orange and rose-gold surfaces that show only minor signs of contact. Eye appeal is strong for the grade. NGC ID# 28DT, PCGS# 8525

**1913 Half Eagle, MS64
Great Type Coin**

3676 1913 MS64 PCGS. The 1913 half eagle is a great representative of the series for type-set purposes due to its overall excellent surface qualities. The present near-Gem is a case in point, well-struck with frosty luster over yellow-orange surfaces that show super eye appeal. The overall strike is bold. A couple of minor ticks, largely on the reverse, account for the grade. Much more elusive in Gem. NGC ID# 28DT, PCGS# 8525

3677 1915 MS63 PCGS. Ex: Rive d'Or Collection. Gold-orange surfaces have several coppery areas, including several ink-spot places on and near the reverse eagle. Lightly abraded but decently detailed. NGC ID# 28DX, PCGS# 8530

**1916-S Five Dollar, MS62
Last San Francisco Half Eagle**

3678 1916-S MS62 NGC. After the 1916-S issue, the half eagle was done as a circulating denomination save for a six-figure mintage of 1929 that saw limited distribution. This lemon-gold San Francisco piece has unusually strong detail on the central design elements. Though the fields show a number of fine abrasions, substantial marks are few. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

3679 1842-O XF40 NGC. Variety 2. Lightly worn, with the typical number of minor abrasions for the grade, the orange-gold surfaces of this pleasing XF example show remnants of prooflike reflectivity in sheltered areas. NGC ID# 262N, PCGS# 8587

**1847 Ten Dollar, MS60
Scarce Type in Mint State**

3680 1847 MS60 PCGS. Rounded Bun subtype. A shield ring is faintly evident atop the second vertical stripe. While the Motto type is common in Uncirculated grades, the No Motto is notoriously difficult to secure in Mint State. The present sun-gold example has a good strike and ample bright luster. The upper reverse field is moderately abraded and the obverse has hairlines, most evident near 12 o'clock. NGC ID# 262Z, PCGS# 8597

3681 1850 Large Date AU53 NGC. S.S. Republic. The 1850 Liberty eagle is a scarce and underrated date, especially in high grade. This pleasing AU53 example displays just a touch of wear on the design elements and the yellow-gold surfaces show prooflike reflectivity in sheltered areas. NGC ID# 2637, PCGS# 8603

3682 1850 Large Date AU58 NGC. CAC. The Large Date variant is by far the more frequently encountered of the date, and thus the logical choice for type purposes. This green-gold example retains significant mint luster, but numerous small abrasions are peppered over each side. Census: 53 in 58, 21 finer (5/13). NGC ID# 2637, PCGS# 8603

3683 1850-O XF45 PCGS. Variety 1. This better date green-gold New Orleans No Motto ten lacks any mentionable marks and displays ample traces of glimmering luster. The devices are lightly brought up. A few specks of orange patina are near star 12. NGC ID# 2639, PCGS# 8605

3684 1851-O AU53 PCGS. CAC. Variety 2. This impressive New Orleans ten displays vivid orange and greenish-gold surfaces with bright satiny mint luster and well-detailed design elements. The surfaces are moderately abraded for the grade. NGC ID# 263B, PCGS# 8607

3685 1853 AU55 NGC. This attractive Choice AU specimen exhibits well-detailed design elements, with just a touch of wear on the high points, and lustrous surfaces that show only the expected number of minor abrasions for the grade. NGC ID# 263E, PCGS# 8610

**1856 Eagle, MS60
Good Luster and Color**

3686 1856 MS60 NGC. This piece is a textbook example of an MS60 coin, but one that nonetheless offers great eye appeal at arm's length due to the good luster and color. A closeup inspection reveals the scattered small- to medium-sized marks accompanied by a few larger ones, situated on the cheek and chin of Liberty. The strike is bold on the reverse, although strike softness shows on the obverse stars. Census: 11 in 60, 14 finer (6/13). NGC ID# 263P, PCGS# 8619

3687 1858-S — Cleaned — ANACS. AU Details, Net XF40. Just 11,800 pieces were struck for the 1858-S eagle and many saw heavy use in commerce. This example is only lightly worn, though obviously cleaned, with glossy yellow-orange surfaces that show purple in the protected areas near the devices. A pinscratch is noted behind Liberty's neck, while a sizable abrasion appears above the eagle's head. Housed in a small-format holder. NGC ID# 263Y, PCGS# 8627

**1859-S Ten Dollar, AU Details
Rare No Motto Issue**

3688 1859-S — Reverse Rim Filed — NGC Details. AU. The San Francisco ten dollar issues struck before 1879 are a parade of rarities. The 1859-S has a mintage of 7,000 pieces, but since none were saved by collectors, only 40 to 60 examples have survived, per PCGS. The present almond-gold ten has Choice AU luster and sharpness, and the eye appeal is considerable due to the generally unmarked fields and devices. However, the lower half of the reverse rim is filed. NGC ID# 2643, PCGS# 8630

**1880-CC Ten, Near Mint
Low Mintage, Few Finer**

3689 1880-CC AU58 PCGS. Variety 1-B. This well struck sun-gold eagle exhibits lustrous major devices and a bright band of luster at the margins. Moderately abraded overall, though we note faint hairlines on the right obverse field and a slender mark on the bust truncation. A better Carson City issue with a mintage of only 11,190 pieces. Population: 15 in 58, 3 finer (6/13). NGC ID# 265T, PCGS# 8688

**1886-S Eagle, MS64
Tied for Finest Certified**

3690 1886-S MS64 NGC. This highly lustrous Choice Mint State example represents a high mintage issue with a low survival rate. In fact, neither NGC nor PCGS have certified a finer example. This piece has a bold strike with frosty mint luster and brilliant yellow surfaces that show only scattered marks. Census: 18 in 64 (2 in 64+), 0 finer (6/13). NGC ID# 266G, PCGS# 8709

3691 1888-S MS63+ PCGS. CAC. Better-defined than often seen, particularly on the stars around the portrait. Glimmers of flashy luster are light yellow overall but share a few orange tendencies near the rims. PCGS has graded only three examples as MS64 or better (6/13). NGC ID# 266M, PCGS# 8714

3692 1891-CC AU58 PCGS. Variety 2-B. Carson City tens are low mintage, though the 1891-CC is the most prevalent of the denomination from that facility. This sun-gold eagle has vibrant partial luster and a few moderate marks on the left obverse field. NGC ID# 266U, PCGS# 8720

3693 1891-CC AU58 PCGS. CAC. Variety 2-B. The vivid orange-gold surfaces of this attractive near-Mint specimen are lightly abraded and display vibrant mint luster on both sides. The well-detailed design elements show just a touch of wear. NGC ID# 266U, PCGS# 8720

**1891-CC Eagle, MS62
Popular Carson City Issue**

3694 1891-CC MS62 PCGS. Variety 1-A. A lustrous butter-gold Carson City ten with occasional accents of plum-mauve patina. Sharply struck and attractive for the grade, though small marks are evident when examined beneath a loupe. The 1891 and 1891-CC have similar mintages but the latter issue is more available in Uncirculated grades. NGC ID# 266U, PCGS# 8720

**1892-CC Ten, AU58
Deep Color and Luster**

3695 1892-CC AU58 PCGS. CAC. Deep, attractive color and luster are hallmarks of this near-Mint State 1892-CC ten, a great survivor from the small mintage of 40,000 pieces in the next-to-last year of Carson City Mint production. The reddish-orange color complements the nearly full mint luster and a sharp strike over problem-free surfaces. Population: 27 in 58 (1 in 58+), 33 finer (5/13). NGC ID# 266W, PCGS# 8722

1892-CC Eagle, MS60
Low-Mintage Carson City Issue

- 3696 1892-CC MS60 NGC. Variety 1-A. FS-501.** The ball of the 9 is centered between dentils and repunching shows on the 8 and 9 under their middle strokes. Triple-punching shows on the motto on reverse. This coin is strictly Mint State (and well-struck at that), but a scattering of small- to medium-ticks and thin scrapes determines the grade. The lustrous yellow-gold surfaces nonetheless show the impression of a higher-graded coin. From a low mintage of 40,000 coins. NGC ID# 266W, PCGS# 8722

1892-S Eagle, MS63
Important Condition Rarity

- 3697 1892-S MS63 PCGS.** An outstanding example of the low mintage, conditionally rare 1892-S eagle, showing a lovely blend of delicate green and orange patina on its frosty yellow-gold surfaces. Both sides show myriad grade-consistent marks, but none stand out among the others. Population: 67 in 63 (3 in 63+), 2 finer (6/13). NGC ID# 266Y, PCGS# 8724
- 3698 1894 MS64+ NGC.** Nearly 2.5 million eagles were minted in Philadelphia in 1894, with few high grade survivors. In fact, NGC and PCGS have combined to certify just 18 examples finer than this specimen (6/13). A brilliant and lustrous example, this near-Gem is sharply struck with brilliant yellow surfaces. NGC ID# 2675, PCGS# 8729
- 3699 1896-S AU58 Prooflike NGC.** The bright yellow-gold surfaces of this lightly circulated Liberty eagle display prooflike reflectivity in sheltered areas and the design elements are well-detailed and minimally worn. Census: 1 in 58 Prooflike, 0 finer (5/13). PCGS# 78736
- 3700 1899 MS64 PCGS.** This Choice Mint State specimen ranks high among survivors of this issue, with only 39 finer certified by PCGS (6/13). This example is sharply defined with only a few scattered marks on its brilliant and lustrous light yellow surfaces. NGC ID# 267J, PCGS# 8742
- 3701 1899 MS65 NGC.** This impressive Gem displays slightly subdued mint luster and well-detailed design elements, with well-preserved peach-gold surfaces that show minimal signs of contact. NGC ID# 267J, PCGS# 8742
- 3702 1899-O MS61 PCGS. Variety 1.** A lustrous turn-of-the-century New Orleans gold eagle, well-defined on peripheral and central devices alike. Though numerous fine abrasions pepper the flashy yellow-orange surfaces, the overall eye appeal is strong for the grade. NGC ID# 267K, PCGS# 8743

- 3703 1902-S MS64+ NGC.** A few marks on Liberty's profile prevent a higher grade to this near-Gem 1902-S eagle. Both sides are sharply defined with brilliant yellow-gold luster and reflective surfaces. NGC ID# 267U, PCGS# 8751
- 3704 1902-S MS64 PCGS. CAC.** Astoundingly bright with pale golden interiors and richer yellow at the rims. Interior detail is excellent, though isolated stars show a smidgen of softness. NGC ID# 267U, PCGS# 8751
- 3705 1902-S MS65 PCGS.** Peach-red centers with forest-green borders framing. Potent luster sweeps this intricately struck Gem. Smooth aside from light marks near 9 o'clock on each side. Population: 93 in 65 (1 in 65+), 7 finer (6/13). NGC ID# 267U, PCGS# 8751
- 3706 1904 MS64 PCGS. CAC.** Semireflective and flashy with a decidedly lemon-yellow cast. Great eye appeal and preservation for an issue with a low-six-figures mintage and substandard savings rate. Population: 40 in 64 (1 in 64+), 3 finer (6/13). NGC ID# 267Y, PCGS# 8755
- 3707 1906-D MS64 NGC.** First year of operations in Denver, and this well-made Choice Mint State example is a lovely representative of that coinage. Trivial marks appear on the brilliant lemon-yellow surfaces of this frosty and well-struck specimen. NGC ID# 2685, PCGS# 8760

1907 Liberty Ten, MS65
Transitional Coinage Year

- 3708 1907 MS65 NGC.** The 1907 Liberty eagle is much more difficult to locate in high grade than the large mintage of 1.2 million pieces would suggest. This delightful Gem exhibits sharply detailed design elements and satiny mint luster, with pleasing peach-gold surfaces that show few signs of contact. Census: 88 in 65 (2 in 65+), 6 finer (6/13). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

1907 Indian Ten, MS63
Smooth, Lustrous Fields

- 3709 1907 No Periods MS63 PCGS.** This lustrous green-gold first year Indian type coin is nicely struck and minimally abraded for the Select level. Designer Augustus St. Gaudens died on August 3, 1907, and saw only patterns of his ten dollar creation. Breen (1988) credits Barber with the actual engraving of the No Periods variety. Housed in a green label holder. NGC ID# 28GF, PCGS# 8852

- 3710 1910 MS63+ PCGS. CAC.** This high-end Select specimen exhibits sharply detailed design elements and slightly subdued mint luster, with pleasing orange and rose-gold surfaces that show a few minor contact marks on both sides. NGC ID# 28GR, PCGS# 8865
- 3711 1910-D MS63 NGC.** Apricot-gold luster is satiny with hints of orange. Well-struck for the date but with a cluster of marks on Liberty's cheek and a few nicks on the beveled rims. NGC ID# 28GS, PCGS# 8866
- 3712 1911 MS63 NGC.** Strong yellow-gold luster with a faint orange cast visiting the reverse. The obverse shows light abrasions on Liberty's face as well as a shallow pincscratch to the left of her nose. NGC ID# 28GT, PCGS# 8868
- 3713 1912 MS63 NGC.** Dusky orange overtones grace this satiny Select ten dollar from an issue of just over 400,000 pieces. Scattered small flaws include several on and near Liberty's face, but the reverse eye appeal is generous for the grade. NGC ID# 28GW, PCGS# 8871

**1915-S Eagle, AU58
Fourth Lowest Mintage**

- 3714 1915-S AU58 PCGS.** Only 59,000 Indian eagles were struck in San Francisco during the year, and that was the fourth lowest mintage of any Indian Head eagle aside from the 1907 Periods issues. This near-Mint example has a trace of high-point wear with lustrous light yellow surfaces. NGC ID# 28H6, PCGS# 8879
- 3715 1926 MS64 NGC.** Light apricot-gold overall with a patch of peach at the top left reverse. Boldly lustrous with a good cartwheel, a pleasing near-Gem suitable for type collections of similar grade. NGC ID# 28H9, PCGS# 8882
- 3716 1932 MS65 PCGS.** Hints of greenish overtone appear at the central obverse of an otherwise yellow-gold Gem. Decent detail for the date and a strong draw for the type collector. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

**1850 Twenty Dollar, Extremely Fine
Always-Popular First Year of Issue**

- 3717 1850 XF40 NGC. CAC.** Light wear is evident on the high points, but there is still nice detail available on the design features. The surfaces are semi-bright yellow-gold, and display some hints of luster in the recesses. A few minute marks are scattered about, but none are large or offensive.
Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1995. NGC ID# 268F, PCGS# 8902

**1851-O Double Eagle, VF35
Type One O-Mint Issue**

- 3718 1851-O VF35 PCGS.** This early New Orleans double eagle displays moderate even wear on the design elements and lightly abraded green and orange-gold surfaces with a few traces of original mint luster. The 1851-O claims a substantial mintage of 315,000 pieces but high-grade specimens are seldom encountered. NGC ID# 268J, PCGS# 8905

**1853 Twenty Dollar, AU53
Early P-Mint Liberty**

- 3719 1853 AU53 NGC.** The prevailing orange-gold color complements traces of deeper lilac and golden-brown in the device interstices on this well-struck coin. Despite the large mintage exceeding 1.26 million pieces, most circulated examples seen are VF to Choice XF. This AU53 piece shows a scattering of mostly small, grade-consistent marks, but there are no singular signs of contact. NGC ID# 268M, PCGS# 8908
- 3720 1855-S AU53 NGC.** This pleasing Type One double eagle exhibits lightly abraded greenish-gold surfaces with much remaining mint luster and well-detailed design elements. A few hints of orange and rose enliven the fields. NGC ID# 268X, PCGS# 8916

**1857 Twenty Dollar, AU58
Attractive, Still-Lustrous Type One**

- 3721 1857 AU58 PCGS.** The 1857 is a scarce date, with most available specimens grading VF or XF, although AU and occasional Uncirculated pieces are seen. This AU58 specimen boasts bright peach-gold surfaces that display nearly complete luster. The design elements are generally well-defined, though portions of Liberty's hair are weak. A few small abrasions are noted over each side, and a long, diagonal planchet lamination is apparent in the lower left reverse quadrant.
Ex: *Dallas Signature* (Heritage, 11/2005), lot 4461; *West Palm Beach Signature* (Heritage, 7/2009), lot 1965. NGC ID# 2693, PCGS# 8920

1858-S Twenty, AU55
Attractive and Lightly Abraded

- 3722 1858-S AU55 NGC.** The San Francisco Mint managed to strike well over 800,000 examples of this early double eagle, likely many deriving from newly mined California gold and others from newly melted Territorial gold coins and ingots. This Choice AU example exhibits a scattering of light marks, fewer than expected, over surfaces that still show much luster, attractive orange-gold color, and a bold strike. NGC ID# 2699, PCGS# 8925

- 3723 1861 VF35 PCGS.** Until we saw this piece, we were not actually sure that 1861 double eagles actually entered circulation. Traces of pale blue patina appear on the light yellow surfaces of this noticeably worn Type One double eagle. NGC ID# 269G, PCGS# 8932

1861 Type One Twenty, AU58
Excellent Type Candidate

- 3724 1861 AU58 PCGS.** This pleasing near-Mint specimen represents the classic type issue in the Type One double eagle series, although the 1857-S and 1865-S are more plentiful in the modern, post-treasure numismatic era. Before the treasure discoveries of the 1990s, the 1861 was the common issue. This example has a hint of green on its light yellow surfaces with virtually full luster and trivial marks. NGC ID# 269G, PCGS# 8932

1863-S Double Eagle
Medium S, Choice AU

- 3725 1863-S AU55 PCGS. Breen-7216.** Medium S. Scarcer than the Small S Breen-7217 variety. A sun-gold double eagle with a small area of rose-red near obverse star 6. Pockets of bright luster illuminate the radiant and typically abraded surfaces. The 1863-S is collectible in AU though Uncirculated examples are very scarce. NGC ID# 269R, PCGS# 8940

- 3726 1866-S Motto — Improperly Cleaned — NGC Details. AU.** The yellow and greenish-gold surfaces of this lightly abraded double eagle have an unnatural sheen that may indicate a cleaning in the past. Still attractive, this coin represents the first year with the motto IN GOD WE TRUST. NGC ID# 269Y, PCGS# 8950

1866-S Double Eagle, AU50
First Type Two Issue

- 3727 1866-S Motto AU50 NGC. CAC.** The first issue of the Type Two design was struck at Philadelphia and San Francisco. Those struck in California are usually found in lower grades as they actually circulated at the time of issue. This lovely AU specimen has light high-point wear with some luster remaining on each side. Attractive yellow surfaces are minimally marked and show traces of delicate orange toning. NGC ID# 269Y, PCGS# 8950

1873 Open 3 Double Eagle, MS62
Ideal Type Two Representative

- 3728 1873 Open 3 MS62 PCGS. CAC.** The 1873 Liberty double eagle with an Open 3 in the date is probably the most available Type Two twenty and enjoys great popularity with type collectors. This attractive MS62 example displays well-detailed design elements and lustrous orange and rose-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 26AH, PCGS# 8967

1873-S Double Eagle, MS61
Popular Closed 3 Variant

- 3729 1873-S Closed 3 MS61 NGC.** The 1873-S Liberty double eagle with a Closed 3 in the date is seen more often than its Open 3 counterpart. The design was modified partway through the year and most double eagle production at the San Francisco facility had been completed before the Open 3 dies arrived from Philadelphia. This attractive Mint State example is well-detailed and brightly lustrous, with a few noticeable contact marks in the left obverse field. NGC has graded 30 numerically finer examples (5/13). NGC ID# 26AL, PCGS# 8969

1873-S Closed 3 Twenty, MS61
Bright, Semireflective Fields

- 3730 1873-S Closed 3 MS61 NGC.** This more-available date variant is a popular and widely used coin used to represent the scarce Type Two design type. This is a particularly attractive piece, and one that appears finer than the stated grade, with semireflective fields on each side. The luster is a bit thin, but there are no obvious abrasions on either side. NGC ID# 26AL, PCGS# 8969

1873-S Liberty Double Eagle, AU58
Elusive Open 3 Variant

- 3731 1873-S Open 3 AU58 PCGS.** Unlike its Philadelphia counterpart, the 1873-S Liberty double eagle is most often seen with a Closed 3 in the date. This more elusive Open 3 example displays lustrous greenish-gold surfaces with a moderate number of minor abrasions for the grade. Population: 76 in 58, 53 finer (5/13). NGC ID# 26AM, PCGS# 8979

1874-CC Double Eagle, XF45
Appealing Surfaces

- 3732 1874-CC XF45 PCGS. Variety 3-A.** Moderate circulation wear on each side is consistent with the Choice XF grade of this early Carson City double eagle, one of the more available Type Two issues due to the moderate mintage of just over 115,000 pieces. Scattered abrasions throughout each side are to be expected, but are nonetheless not overly bothersome, and the surfaces retain much appeal. NGC ID# 26AP, PCGS# 8971

- 3733 1875 MS61 NGC.** A pleasing representative of the 1875 Type Two double eagle, this is the only readily collectible gold issue of the year from the Philadelphia Mint, as the other denominations had extremely limited mintages. This example displays attractive design elements and mint luster, with a scattering of minor contact marks that explain the grade. A few small copper alloy spots appear on each side. NGC ID# 26AS, PCGS# 8973

1876 Liberty Twenty, MS62
Vibrant Mint Luster

- 3734 1876 MS62 PCGS. CAC.** Like most Type Two double eagles, the 1876 Liberty twenty is rare in high grade. Even in lower Mint State condition, the 1876 is scarce. This impressive MS62 specimen exhibits well-detailed design elements and especially vibrant mint luster with ample eye appeal. PCGS has graded 50 numerically finer examples (5/13). NGC ID# 26AV, PCGS# 8976

- 3735 1879-S MS60 NGC.** A lustrous honey-gold Uncirculated Type Three twenty that has a sharp strike and fewer field marks than is associated with the MS60 grade. One slender area of granularity is beneath the O in OF. NGC ID# 26B9, PCGS# 8991

1883-CC Twenty, AU55
Heyday of the Carson City Mint

- 3736 1883-CC AU55 NGC.** The bright yellow-gold surfaces of this Choice AU double eagle show great eye appeal for the grade, even though there is a smattering of small marks and ticks consistent with the grade that appear on each side. This was the heyday of the Carson City Mint, an era in which miners from the nearby Comstock Lode deposited sufficient gold that Carson City in all made more than \$1 million worth of gold coins for the second year in a row — most of it double eagles. NGC ID# 26BH, PCGS# 8999

- 3737 1883-S MS62 NGC.** The light greenish-gold surfaces of this attractive MS62 specimen are brightly lustrous and lightly marked for the grade. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 26BJ, PCGS# 9000

- 3738 1887-S MS61 NGC.** A frosty and fully lustrous example of the lower mintage 1887-S double eagle, from a production of only 283,000 coins. This piece has the usual moderate surface marks associated with the grade, including a few small scrapes on Liberty's cheek. Lovely delicate green and pink toning appear on the yellow-gold surfaces. NGC ID# 26BS, PCGS# 9007

**1889 Twenty Dollar, MS62
Scarce, Low-Mintage Issue**

3739 1889 MS62 PCGS. The 1889 is all too often overlooked, most likely because few collectors specialize in Liberty twenties. However, only 44,000 pieces were struck and few were set aside in Uncirculated grades. The mint luster on this example is especially thick, frosted, and reddish-tinged. A few unfortunate scrapes account for the grade. NGC ID# 2695, PCGS# 9010

3740 1889-CC — Repaired — NGC Details. AU. Variety 1-A. This lightly circulated Carson City twenty is a bit bright and hairlined from cleaning, and the olive-green toning is unusual. Possibly smoothed on the field near the AM in AMERICA, but no obvious repair is readily evident. NGC ID# 26BV, PCGS# 9011

3741 1889-S MS62 PCGS. An attractive Mint State specimen, this San Francisco Mint double eagle has scattered marks that are consistent with the grade. Both sides have brilliant yellow luster with hints of pale orange overtones. NGC ID# 26BW, PCGS# 9012

**1890 Liberty Twenty, MS62
Lower-Mintage Philadelphia Issue**

3742 1890 MS62 PCGS. CAC. The 1890 Liberty double eagle claims a limited business-strike mintage of 75,940 pieces. This pleasing MS62 example displays lightly marked orange and rose-gold surfaces with well-detailed design elements and slightly subdued frosty mint luster. PCGS has graded 38 numerically finer examples (5/13). NGC ID# 26BX, PCGS# 9013

**1892-CC Liberty Twenty, XF45
Popular CC-Mint Type Coin**

3743 1892-CC XF45 PCGS. CAC. Variety 1-A. From a mintage of 27,265 pieces, the 1892-CC Liberty double eagle is one of the more available Carson City issues. This Choice XF example displays pale yellow-gold hues on the luminous obverse with a slightly more orange cast to the reverse. Though her features are lightly rubbed, Liberty retains crisp hair detail. NGC ID# 26C6, PCGS# 9020

**1899 Liberty Double Eagle, MS64+
Elusive Issue in Higher Grades**

3744 1899 MS64+ NGC. Shades of yellow, orange, rose, and peach patina blanket the lustrous surfaces of this high-end Choice specimen. The design elements are well-detailed and the surfaces are well-preserved, but a few contact marks on the cheek prevent a Gem designation. The 1899 is seldom encountered in higher grades. NGC ID# 26CM, PCGS# 9035

**1903-S Double Eagle, MS64
Vibrant Luster, Vivid Color**

3745 1903-S MS64 NGC. Sharply struck with bright golden-orange color and the expected mint frost that this popular issue is known for. Minimally abraded, this upper-end coin is very close to the elusive Gem level and eye appeal is outstanding. NGC has graded 22 numerically finer examples (5/13). NGC ID# 26CX, PCGS# 9044

3746 1904 MS64 NGC. Not even King Midas could obtain every example of the 1904, but type collectors prize the issue for its quality and eye appeal. The present lustrous green-gold representative has a good strike and smooth fields. One slender vertical mark is noted behind the mouth and a small spot is near WE. NGC ID# 26CY, PCGS# 9045

3747 1904 MS64 ★ NGC. The vivid greenish-gold surfaces of this attractive Liberty double eagle show prooflike reflectivity on both sides, with a scattering of minor contact marks that define the grade. The design elements are well-detailed and visual appeal is quite strong. NGC ID# 26CY, PCGS# 9045

3748 1904-S MS64 NGC. 1904 was the peak year for Liberty twenty dollar coinage. The 1904-S is plentiful but quality examples are always in demand as representatives of their type. The present near-Gem has olive-gold margins and apricot centers. Housed in a prior generation holder. NGC ID# 26CZ, PCGS# 9046

1904-S Liberty Twenty, MS65
Only One Numerically Finer Coin at NGC

- 3749 1904-S MS65 NGC.** Somewhat scarce at the Gem level, the 1904-S Liberty twenty is a prime condition rarity in finer grades. This attractive Gem displays pleasing green and orange-gold surfaces with vibrant mint luster and few signs of contact. The sharply detailed design elements add to the outstanding visual appeal. NGC has graded only one numerically finer example (5/13). NGC ID# 26CZ, PCGS# 9046

- 3750 1906 MS61 NGC.** The 1906 is a low-mintage Philadelphia issue, one of three key P-mint dates in a five-year span, along with 1902 and 1905. Their combined production totals fewer than 70,000 coins, while the 1904 exceeded 6 million pieces. This satiny Mint State example has sharp details and excellent luster with pleasing eye appeal. NGC ID# 26D4, PCGS# 9049

- 3751 1907 MS64 PCGS.** The 1907 Liberty double eagle is easily located in MS64 condition, but finer examples are conditionally rare. This attractive Choice example is sharply struck and brightly lustrous, with pleasing peach-gold surfaces. PCGS has graded 14 numerically finer examples (5/13). NGC ID# 26D7, PCGS# 9052

1907-D Liberty Twenty, MS64+
Final Denver Mint Issue

- 3752 1907-D MS64+ PCGS. CAC.** The second and final Denver Mint Liberty double eagle is frequently encountered in Mint State grades, but usually at the lower levels. This Choice specimen is sharply defined with brilliant yellow-gold luster and frosty surfaces. Minimal and trivial marks prevent a finer grade. NGC ID# 26D8, PCGS# 9053

PROOF LIBERTY DOUBLE EAGLES

1903 Proof Twenty, AU Details
Only 158 Proofs Struck

- 3753 1903 — Soldered — NGC Details. Proof, AU Details.** This piece was apparently used for display purposes at one time; traces of solder can be seen on the upper reverse in the area of the motto. Significant reflectivity is seen in the fields of this lower mintage proof. Only 158 pieces were struck. Handling marks are peppered over each side, especially on the cheek of Liberty.

SAINT-GAUDENS DOUBLE EAGLES

- 3754 1907 Arabic Numerals MS64 PCGS. CAC.** Pleasing luster and honey-gold color provide this near-Gem with lovely eye appeal. Subtle rose and orange highlights add to the appearance. The piece exhibits a strong strike. NGC ID# 26F5, PCGS# 9141

1907 Reduced Relief Twenty, MS64+
Remarkably Lustrous

- 3755 1907 Arabic Numerals MS64+ PCGS. CAC.** The 1907 is always popular as the first year of the new, innovative type. This piece has remarkably thick mint luster, and the yellow-gold color shows just the slightest tinge of reddish patina. Only slight abrasions can be found, and most of those require magnification. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty, MS65
Rich Reddish-Orange Mint Frost

- 3756 1907 Arabic Numerals MS65 PCGS.** Rich reddish-orange patina is seen over both sides with good definition and only a few small contact marks. This is a nice example with glowing, frosted mint luster. The 1907 has retained its popularity over the years mostly because of its first-year status, and because it is one of only two years of the No Motto design type. NGC ID# 26F5, PCGS# 9141

**1907 Arabic Numerals, MS65
Design Modified by Charles Barber**

- 3757 1907 Arabic Numerals MS65 PCGS.** After several months of striking High Reliefs on hydraulic presses, Charles Barber reduced Saint-Gaudens' design so it would be practical for high-speed, one-pass coinage using a regular steam press. This is a lovely example of the reduced relief, one that has superior mint luster, no obvious marks, and a strong strike throughout. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Twenty, MS65
Arabic Numerals**

- 3758 1907 Arabic Numerals MS65 PCGS.** The first collectible Saint-Gaudens double eagle after the High Relief issue, this 1907 is ideal for type collectors to represent the new design. This Gem has frosty yellow-gold luster with sharp design motifs and pristine surfaces showing only a few scattered, minuscule marks. NGC ID# 26F5, PCGS# 9141
- 3759 1908 No Motto MS65 PCGS.** Wheat-gold and green-gold with areas of apricot and orange. A thin layer of patina has settled over each side. A quality Gem example of this popular No Motto type issue. NGC ID# 26F6, PCGS# 9142
- 3760 1908 No Motto MS66 NGC.** Yellow-orange luster is smooth under a wispy layer of patina. Well-struck with only a shallow cut paralleling the underside of Liberty's branch arm in the way of an even finer grade. NGC ID# 26F6, PCGS# 9142
- 3761 1908 No Motto MS66 NGC.** Broad and shimmering apricot-gold luster is the key to this Premium Gem's eye appeal. Though little-marked, a certain flatness of strike contributes to the grade. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Twenty, MS66+
Razor-Sharp Strike and Great Luster**

- 3762 1908 No Motto MS66+ PCGS. CAC.** The 1908 No Motto double eagle is an archetype of the series due to its bold strikes, sharp luster, and thoroughgoing eye appeal. This MS66+ piece demonstrates those qualities in admirable array, effulgent luster on orange-yellow surfaces with a razor-sharp strike and no mentionable marks. NGC ID# 26F6, PCGS# 9142

-
- 3763 1908 No Motto, Wells Fargo Nevada MS66 PCGS.** The Wells Fargo Hoard more than tripled the population of this issue in MS66 and made high-grade coins of the No Motto type far more accessible. This nifty piece has attractive orange-gold surfaces that sport strong luster, as well as sharply struck devices. Well-preserved and appealing, though a couple of small ticks are noted on the obverse devices. *Ex: Dallas Signature (Heritage, 10/2006), lot 3456.* PCGS# 99142

- 3764 1908 No Motto, Wells Fargo Nevada MS66 PCGS.** Short Rays Obverse. The gently shimmering honey-gold fields are essentially void of contact, save for a few obscure ticks beneath the eagle's breast. The strike is razor-sharp on the Capitol building, while Liberty's chest and knee are nicely defined, as is the often mushy leg of the flying eagle. *Ex: Dallas Signature (Heritage, 10/2006), lot 3459.* PCGS# 99142

- 3765 1908 Motto MS63 PCGS.** Faintly orange-tinged against a yellow-gold base. Though this example is lightly abraded, it is a reasonable Select coin from the challenging initial P-mint Motto Saint-Gaudens double eagle issue. NGC ID# 26F8, PCGS# 9147

**1908 Double Eagle, MS64
First With Motto Issue**

- 3766 1908 Motto MS64 PCGS.** The 1908 Motto double eagle had a rather low mintage of 156,258 coins, and survivors are seldom found in Gem grades. This near-Gem has a sharp strike with brilliant yellow luster and delicate orange overtones. Both sides are frosty and attractive. PCGS has only certified 27 finer examples (6/13). NGC ID# 26F8, PCGS# 9147

-
- 3767 1909-S MS64 PCGS.** Yellow-gold with aspects of orange and watery flashiness. The textured obverse has few marks of any severity, though the reverse has a shallow yet grade-defining pinscratch on the sun disc. NGC ID# 26FE, PCGS# 9153

**1913-S Double Eagle, MS63
Low-Mintage S-Mint Issue**

3768 1913-S MS63 PCGS. Only 34,000 Saint-Gaudens double eagles were struck at the San Francisco Mint in 1913, a remarkably low production total for any 20th century coin. This well-detailed Select example displays lustrous yellow and orange-gold surfaces, with the expected number of minor contact marks for the grade. NGC ID# 26FR, PCGS# 9163

3769 1914-S MS65 NGC. Yellow and apricot shadings prevail on this low-key but appealing Gem. Well-defined for a San Francisco coin with only minor striking softness. NGC ID# 26FU, PCGS# 9166

**1915 Double Eagle, MS64
Elusive Philadelphia Issue**

3770 1915 MS64 PCGS. An important issue in the Saint-Gaudens series, the 1915 had a minimal mintage of only 152,000 coins. This Choice Mint State specimen shows grade-consistent marks on its brilliant and frosty light yellow surfaces. Both sides have strong details. PCGS has only certified 42 finer examples (6/13). NGC ID# 26FV, PCGS# 9167

**1916-S Double Eagle, MS65
Well-Struck With Great Luster**

3771 1916-S MS65 PCGS. The 1916-S double eagle was the last of the series produced at either San Francisco or Philadelphia until 1920. The issue is generally available up to Gem and Premium Gem levels and is a well-produced issue, although bagmarks can sometimes be a problem. Not so on this Gem, which shows generous luster over glowing golden-orange surfaces, a bold strike, and only a few scattered, small ticks consistent with the grade. Great eye appeal. NGC ID# 26FX, PCGS# 9169

**1920 Double Eagle, MS64
Nigh-Impossible Finer**

3772 1920 MS64 PCGS. The 1920 double eagle had a low mintage of just 228,250 coins, and surviving examples are rare in top grades. In fact, PCGS has only certified one finer example (6/13). This piece has satiny surfaces with bold design features and brilliant yellow luster. It is a lovely near-Gem that will find a home in an advanced collection. NGC ID# 26FY, PCGS# 9170

3773 1922 MS64 PCGS. CAC. Yellow-orange luster is strong under a thin veil of patina. Well-defined with a few shallow cuts in the fields to account for the grade. This piece has two "green labels," one the PCGS insert and the other from CAC. NGC ID# 26G3, PCGS# 9173

3774 1924 MS65 PCGS. This impressive Gem displays well-detailed design elements and vibrant mint luster on both sides. The bright orange-gold surfaces show hints of green and lilac, with few signs of contact. NGC ID# 26G7, PCGS# 9177

3775 1924 MS66 NGC. The 1924 Saint-Gaudens double eagle claims a huge mintage of 4.3 million pieces and even MS66-graded specimens can be located without too much difficulty. This attractive Premium Gem displays well-detailed design elements and vibrant mint luster, with light orange and rose-gold surfaces that show few signs of contact. NGC ID# 26G7, PCGS# 9177

3776 1924 MS66 PCGS. This orange-gold Premium Gem type coin offers vibrant luster and an intricate strike. Exceptionally smooth surfaces confirm the lofty quality. Housed in a green label holder. NGC ID# 26G7, PCGS# 9177

3777 1924 MS66 NGC. The 1924 Saint-Gaudens double eagle is a favorite choice of type collectors because of its availability in high grade. This well-detailed Premium Gem displays vibrant mint luster and pleasing yellow and rose-gold surfaces. NGC ID# 26G7, PCGS# 9177

3778 1924 MS66 NGC. Well struck and virtually pristine, with clean, smooth surfaces and glowing radiant luster. The subtly variegated colors are beautiful to look at. The surfaces present a somewhat matte-like texture.
Ex: Long Beach Signature (Heritage, 2/2006), lot 3699. NGC ID# 26G7, PCGS# 9177

3779 1924 MS66 PCGS. An uncommonly nice 1924 double eagle that is accented in lovely orange and green patina and is virtually free of the troublesome abrasions so often seen on these coins. NGC ID# 26G7, PCGS# 9177

3780 1924 MS66 PCGS. CAC. An impressive Premium Gem, this 1924 double eagle has a bold strike and only a few minimal marks to prevent an ever higher grade. A pleasing example with brilliant yellow luster. NGC ID# 26G7, PCGS# 9177

**1924 Double Eagle, MS66+
Immaculate High-Grade Type Coin**

- 3781 1924 MS66+ PCGS. CAC.** Just extraordinary quality. One would need to spend many thousands of dollars more to find a technically superior coin, and it would be doubtful that the eye appeal would be significantly better. The obverse displays bright fields, one is tempted to say semiprooflike, but that is inconsistent with this design type. The strike is strong throughout and, of course, there are no obvious marks. NGC ID# 26G7, PCGS# 9177

**1924 Double Eagle, MS66+
Ideal Type Issue**

- 3782 1924 MS66+ PCGS. CAC.** With a mintage of more than 4 million coins and a generous survival rate, the 1924 double eagle is the most plentiful in the series. This Premium Gem has a bold strike and brilliant luster with frosty yellow-gold surfaces and exceptional eye appeal. An excellent candidate for the type collector. NGC ID# 26G7, PCGS# 9177

- 3783 1925 MS66 NGC.** Moderately patinated over yellow-gold luster. Detail is generally pleasing, as is the preservation. The 1925, despite being available for a price in Premium Gem, is a rarity any finer. NGC ID# 26GA, PCGS# 9180

**1925-S Double Eagle, AU Details
Lightly Abraded, Minimally Worn**

- 3784 1925-S — Improperly Cleaned — NGC Details. AU.** The well-detailed design elements of this pleasing Saint-Gaudens double eagle show just a trace of wear on the high points, and the light green and orange-gold surfaces show only minor abrasions. A slightly unnatural sheen indicates the coin was lightly cleaned at some time in the past. NGC ID# 26GC, PCGS# 9182

**1925-S Twenty Dollar, Unc Details
Series Melt Rarity**

- 3785 1925-S — Cleaned — ANACS. Unc Details. Net MS60.** This is one of those “see for yourself” coins, although our opinion is that the golden-orange surfaces retain much eye appeal, even if they are a bit bright. We have certainly seen worse in non-net-graded holders. The 1925-S double eagle, like so many mintmarked coins in the later Saint-Gaudens series, is a melt rarity whose original mintage is completely irrelevant. NGC ID# 26GC, PCGS# 9182

-
- 3786 1926 MS66 PCGS.** A well preserved pumpkin-orange Premium Gem. Sweeping luster illuminates minimally abraded surfaces. Streaks of slightly deeper peach and gunmetal toning visit the right obverse. Only a few examples have been certified finer by PCGS. Housed in a green label holder. NGC ID# 26GD, PCGS# 9183

**1926-S Double Eagle, MS62
Low Survival Rate**

- 3787 1926-S MS62 PCGS.** Despite a high mintage of more than 2 million coins, the 1926-S is an important issue in the series, as most of those struck were melted within a decade, and others were exported where many more were melted. This pleasing Mint State piece has satin luster with yellow-gold brilliance and minimal marks. NGC ID# 26GE, PCGS# 9185

**1927 Saint-Gaudens Twenty, MS66
Ideal Type Coin**

- 3788 1927 MS66 NGC.** The 1927 Saint-Gaudens double eagle claims a large mintage of more than 2.9 million pieces, making it an available date and a popular type issue. This impressive Premium Gem displays well-detailed design elements and vibrant mint luster, with well-preserved orange and rose-gold surfaces. Eye appeal is excellent. NGC ID# 26GG, PCGS# 9186

- 3789 1928 MS66 PCGS.** A lightly patinated yellow-orange example from the highest-mintage double eagle issue in U.S. history. Well-defined for the time with a single vertical cut noted on the feathered part of the eagle's leg. NGC ID# 26GK, PCGS# 9189
- 3790 1928 MS66+ NGC.** This high-end Premium Gem displays vibrant mint luster and virtually pristine orange-gold surfaces, with attractive highlights of rose. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26GK, PCGS# 9189

TERRITORIAL GOLD

**A. Bechtler Gold Dollar, XF45
27G., 21 C., Plain Edge, K-24**

- 3791 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge XF45 NGC. K-24, R.3.** The August Bechtler K-24 variety is reasonably available, but seldom seen in high grade. This Choice XF example displays well-detailed design elements with traces of original mint luster. There are some significant surface anomalies on both sides but the devices are only slightly worn. Listed on page 376 of the 2014 *Guide Book*. PCGS# 10040

CALIFORNIA FRACTIONAL GOLD

- 3792 1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS66+ PCGS.** A magnificent butter-gold high grade example of the Period Two octagonal Liberty quarter type. Moderately prooflike and well struck. A later die state with the date weakened by lapping. Population: 26 in 66 (1 in 66+), 1 finer (6/13). PCGS# 10541
- 3793 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS64+ PCGS.** A flashy canary-gold near-Gem of this scarce Indian octagonal variety. Well struck and attractive with only a few faint field hairlines. Population: 15 in 64 (1 in 64+), 1 finer (6/13). PCGS# 10621

**1872 BG-815 Round Liberty Quarter, MS63
Very Rare, First Heritage Appearance**

- 3794 1872 Liberty Round 25 Cents, BG-815, High R.7, MS63 PCGS.** The very rare BG-815 shares the same obverse die with BG-814 and BG-816 but the lapped reverse die is unique to the present variety. It is identified by two berries inside each side of the wreath. To our knowledge, this is the first appearance of the variety in a Heritage auction. None have been certified by NGC. This sharply struck and flashy canary-gold example has an unknown pedigree but can be identified by a brief hair-thin vertical line near the left wreath end. PCGS# 10676
- 3795 1880/76 Indian Round 25 Cents, BG-885, R.3, MS65 Prooflike NGC.** This Christopher Mohrig variety is the sole 1880-dated round quarter marriage listed in Breen-Gillio. Apricot and lime toning graces the smooth and reflective fields. Well struck despite widely rotated dies. Census: 4 in 65 Prooflike, 2 finer (6/13). PCGS# 710746
- 3796 1872 Liberty Octagonal 50 Cents, BG-913, R.4, MS66 NGC.** A magnificent honey-gold Premium Gem of this well engraved Period Two variety. Well struck and moderately prooflike with outstanding preservation. Census: 4 in 66, 3 in 66 Prooflike, 1 in 67 (6/13). PCGS# 10771
- 3797 1871 Liberty Round 50 Cents, BG-1041, High R.6, MS62 PCGS.** Typical of these small, privately made California gold pieces, this example has considerable central weakness with frosty devices and mirrored fields. Population: 3 in 62, 2 finer (6/13). PCGS# 10870

FLYING EAGLE CENTS

- 3798 1857 MS63 PCGS.** Medium to deep dove-gray and golden-brown toning encompasses this mark-free and satiny Flying Eagle type coin. A soft strike on peripheral elements limits the market grade. NGC ID# 2276, PCGS# 2016
- 3799 1857 MS63 NGC. CAC.** This lustrous peach-gold and stone-gray cent is mark-free and has minimal carbon. The grade is limited solely by the soft strike on the eagle's tail and throughout much of the wreath. NGC ID# 2276, PCGS# 2016
- 3800 1857 MS64 PCGS.** The well-preserved surfaces of this attractive type coin display bright mint luster with mixed original red and light brown color and well-detailed design elements. NGC ID# 2276, PCGS# 2016
- 3801 1857 MS64 PCGS. CAC.** A fully struck peach-gold and olive-green near-Gem. Carbon and contact is inconsequential, though we note a small mint-made strike-through above the O in ONE. Housed in a green label holder. NGC ID# 2276, PCGS# 2016
- 3802 1857 MS64 NGC. CAC.** The obverse is dusky peach-gold while the reverse is olive-gold. Lustrous and unmarked with a crisp strike on the eagle and moderate blending on the cotton leaves. The Flying Eagle cent was struck for circulation only in 1857 and 1858. NGC ID# 2276, PCGS# 2016

Gem 1857 Flying Eagle Cent

- 3803 1857 MS65 NGC.** The 1857 Flying Eagle cent is seldom encountered in grades above the Gem level. This attractive MS65 piece exhibits sharply detailed design elements and frosty mint luster on mostly red surfaces that show a few traces of light brown. NGC has graded 14 numerically finer examples (6/13). NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, MS65

First Collectible Issue

- 3804 1857 MS65 PCGS.** This first collectible Flying Eagle cent is ideal for type collectors, and will also appeal to date collectors. Trivial carbon flecks and surface marks are minimal and consistent with the grade. Both sides have frosty luster with tan and golden-brown surfaces. PCGS has only certified 14 finer examples (6/13). NGC ID# 2276, PCGS# 2016
- 3805 1858 Overdate, Doubled Die Obverse AU55 NGC. Snow-7, FS-302.** Large Letters. High Leaves. Closed E in ONE. Not to be confused with the Snow-1, FS-301 *Guide Book* variety. On the present Snow-7 example, UNITED is die doubled toward the rim and a trace of the upper right corner of the underdigit 7 is evident. A lightly circulated walnut-brown cent with marks confined to the field beneath the beak. PCGS# 37384
- 3806 1858 Large Letters MS63 PCGS.** High Leaves Reverse. Closed E in ONE. A sharply struck golden-tan example of this final Flying Eagle date. The lustrous surfaces are uncommonly smooth despite small ticks near the M in AMERICA. NGC ID# 2277, PCGS# 2019

INDIAN CENTS

- 3807 1859 MS64 PCGS. CAC.** Vibrant mint luster radiates from the well-preserved coppery red surfaces of this well-detailed Choice specimen. No mentionable distractions are noted and eye appeal is outstanding. NGC ID# 227E, PCGS# 2052

1859 Indian Head Cent, MS65

First-Year Type Coin

- 3808 1859 MS65 PCGS. CAC.** The 1859 Indian Head cent is always in demand with first-year type collectors, as well as series enthusiasts. The present coin is a delightful Gem, with sharply detailed devices. The fields are reflective, and display iridescent red, lavender, and golden-brown patina. Only 20 pieces are finer at PCGS (6/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3133. NGC ID# 227E, PCGS# 2052

- 3809 1861 MS65 PCGS. CAC.** All design elements exhibit razor-sharp definition and the well-preserved copper-red surfaces radiate vibrant mint luster. Close inspection with a loupe reveals only one small carbon spot, above the T in CENT. NGC ID# 227G, PCGS# 2061

1861 Indian Cent, MS66
Only Three Numerically Finer Coins at NGC

- 3810 1861 MS66 NGC. CAC.** A golden-tan Premium Gem whose lustrous fields and devices display only minimal carbon and contact. Well struck, even on the feather tips and shoulder curl. The lowest mintage copper-nickel date, the 1861 carries a substantial premium over its 1862 and 1863 successors. Census: 41 in 66 (1 in 66+), 3 finer (5/13). NGC ID# 227G, PCGS# 2061

- 3811 1863 MS65 PCGS. CAC.** Sharply struck and lustrous with smooth orange-gold, rose-red, and olive-green surfaces. One small flan flake on the field near the forehead. Housed in an old green label holder. NGC ID# 227J, PCGS# 2067

1866 Indian Cent, MS65 Red
Only Five Finer at PCGS

- 3812 1866 MS65 Red PCGS. CAC.** The mintage of Indian cents dropped substantially in 1866, to a fairly modest 9.8 million pieces. This attractive Gem displays original red surfaces that show a few microscopic specks of carbon and some light crimson shadings. The design elements are well-detailed and the surfaces are brightly lustrous. Population: 25 in 65 Red, 5 finer (6/13). NGC ID# 227P, PCGS# 2087

- 3813 1867 MS64 Red and Brown PCGS. CAC.** A heavy clash mark from the C in CENT appears in front of the Indian's eye on this Choice Mint State cent. Both sides have frosty light orange luster with mellow brown toning. NGC ID# 227R, PCGS# 2089

- 3814 1870 MS64 Red and Brown PCGS. CAC.** This attractive Choice specimen displays lightly marked surfaces with a mix of original red and light brown patina. The design elements are well-detailed and the fields are brightly lustrous. NGC ID# 227U, PCGS# 2098

- 3815 1873 Open 3 MS65 Red and Brown PCGS.** This sharply defined Gem is designated as Red and Brown, but it is virtually full red with only slight mellowing of the frosty orange mint luster. Wisps of blue and violet toning appear on the obverse. Population: 55 in 65 Red and Brown, 3 finer (6/13). NGC ID# 227Y, PCGS# 2107

1873 Doubled LIBERTY Cent, AU50
Key Snow-1 Variety

- 3816 1873 Doubled LIBERTY, Closed 3 AU50 NGC. Snow-1, FS-101.** Strong die doubling on LIBERTY distinguishes this key Guide Book variety. Within the series, only the 1888/7 is considered more desirable. This is a glossy chocolate-brown and sea-green representative with only a hint of wear on the ribbon and shoulder curl. Smooth overall despite minor contact on the cheek and a pair of faint thin lines above CENT. PCGS# 2115

- 3817 1877 VF20 NGC.** A pleasing example of the low-mintage key to the series, this lovely coin displays even wear and retains much original design detail. The surfaces are an attractive chocolate brown color. NGC ID# 2284, PCGS# 2127

- 3818 1877 — Environmental Damage — NCS. XF Details.** What appears to be a slender horizontal flan flaw at the base of the Indian's nose is deemed environmental damage by NCS. A couple of minor spots are noted on the reverse near 7:30, but this mahogany-brown key date cent would satisfy a majority of collectors. NGC ID# 2284, PCGS# 2127

1877 Indian Cent, AU58
Low-Mintage Series Key

- 3819 1877 AU58 NGC.** A pleasing near-Mint example of this low-mintage key date, with well-detailed design elements that show just a trace of wear on the high points. The smooth brown surfaces show two minor depressions in the left obverse field, one near the nose and the other near I in UNITED. NGC ID# 2284, PCGS# 2127

- 3820 1883 MS64 Red PCGS. CAC. Snow-8, FS-401.** Per the *Cherry-pickers' Guide*, "the tops of two digits (likely an 8 and a 3) protrude from the denticles beneath the date. This misplaced date variety is very obvious and therefore quite popular." Sharply struck and decidedly prooflike with two small spots between OF and AMERICA. Housed in a first generation holder. NGC ID# 228A, PCGS# 2147

- 3821 1887 MS65 Red NGC. CAC.** A gorgeous lemon-gold Gem. Carbon-free and nearly devoid of contact. The strike is bold aside from the uppermost feather tips. Certified in a prior generation holder. Census: 22 in 65 Red, 4 finer (6/13). NGC ID# 228F, PCGS# 2159

- 3822 1894 Doubled Date MS62 Red and Brown PCGS. Snow-1, FS-301.** The undertype doubling is easily visible to the right of the primary numerals in the date. This interesting MS62 example shows a touch of softness on the design elements under mingled shades of orange-red and lilac patina. Population: 2 in 62 Red and Brown, 17 finer (5/13). PCGS# 92188

- 3823 1901 MS66 Red PCGS. CAC.** Small splashes of toning are present on the obverse of this lustrous Premium Gem example. The colors include cherry, pink, and golden yellow. A few minor contact marks and tiny as-made strike-throughs are present, but pose little distraction, if any, to this attractive piece. Population: 58 in 66 (3 in 66+) Red, 2 finer (5/13). NGC ID# 228W, PCGS# 2210

1902 Indian Cent, MS66 Red

- 3824 1902 MS66 Red PCGS. CAC.** A few minuscule carbon flecks are evident on each side of this Premium Gem. The lustrous surfaces exhibit brilliant light orange color with hints of pale gold and violet toning. An exceptional example and rarely found finer. Population: 46 in 66 (1 in 66+) Red, 9 finer (6/13). NGC ID# 228X, PCGS# 2213

- 3825 1908 MS66 Red PCGS.** This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved original red surfaces with a few microscopic carbon flecks on both sides. Population: 45 in 66 (1 in 66+) Red, 1 finer (5/13). NGC ID# 2295, PCGS# 2231

- 3826 1909-S MS64 Red and Brown PCGS.** This key date to the Indian Head cent series displays pleasing golden-tan patination over lustrous surfaces. Sharply struck, with no notable impairments. Outstanding eye appeal.
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 5281. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

- 3827 1859 PR64 PCGS.** A beautiful butter-gold near-Gem of this single-year type, which is common as a business strike but very scarce in proof format. Intricately struck and flashy with only trivial carbon. Encapsulated in a first generation holder. NGC ID# 2299, PCGS# 2247

1862 Copper-Nickel Cent, PR66+ Cameo Deeply Mirrored, Light in Color

- 3828 1862 PR66+ Cameo PCGS.** The 1862 is the usual choice for a copper-nickel type coin, and this piece shows why. The fields demonstrate uncommonly deep reflectivity and the devices are heavily frosted, the combination yielding strong contrast on each side. The surfaces are virtually free from contact marks, and there is just the slightest sprinkling of carbon present. Most of the original gray-tan color remains with just the slightest presence of reddish patina surrounding the devices. Population: 25 in 66 (3 in 66+) Cameo, 3 finer (6/13). PCGS# 82259

1864 Indian Cent, PR63 Ultra Cameo Copper-Nickel Type

- 3829 1864 Copper Nickel PR63 Ultra Cameo NGC. CAC.** Despite the presence of a few faint hairlines and trivial contact marks, this sensational Indian cent presents amazing eye appeal through its iridescent toning over the light tan surfaces. The devices are fully lustrous within a deeply mirrored frame. Census: 1 in 63 Ultra Cameo, 6 finer (6/13). PCGS# 92265
- 3830 1864 Bronze No L PR63 Red and Brown PCGS.** Green-gold, orange, peach, lavender, near-violet — this No L bronze cent packs plenty of colors into a small space. Lightly hairlined with a few easily visible carbon spots but a pleasing and desirable coin nonetheless. Population: 11 in 63 Red and Brown, 82 finer (6/13). NGC ID# 229F, PCGS# 2277

1864 Indian Cent, PR64 Red Cameo Bronze No L Variant

- 3831 1864 Bronze No L PR64 Red Cameo PCGS.** The 1864 proof No L Indian cent claims a reported mintage of just 150 pieces, but most numismatists believe that figure is too low, based on number of survivors. The actual production total might reasonably be twice that number. The present coin is a magnificent Cameo example, with original red surfaces, brightly reflective mirrors, and sharply detailed frosty devices. Population: 8 in 64 Cameo, 5 finer (5/13). PCGS# 82278

- 3832 1873 Closed 3 PR65 Red and Brown NGC. CAC.** Lemon-gold over most of the obverse with mellowing to blue-green plain at the right reverse. Crisp detail and reflectivity are this Closed 3 coin's tickets to strong eye appeal. NGC ID# 229S, PCGS# 2307

- 3833 1882 PR65 Red PCGS.** Peach-gold patina has pink-lavender accents along the margins. A lively Red Gem specimen from one of the more generously produced issues in the series, ideal for type enthusiasts. Population: 18 in 65 Red, 18 finer (6/13). NGC ID# 22A3, PCGS# 2335

- 3834 1885 PR66 Red and Brown PCGS.** Brick-red aside from somewhat deeper hues on the cheek. A penetratingly struck Premium Gem with gorgeously smooth and carbon-free surfaces. Population: 43 in 66 (1 in 66+) Red and Brown, 18 finer (6/13).
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 364. NGC ID# 22A6, PCGS# 2343

- 3835 1894 PR65 Red PCGS. CAC.** This stunning Gem proof retains original orange-red surfaces, with sharply detailed design elements and deeply mirrored fields. No mentionable distractions are evident. Population: 27 in 65 Red, 9 finer (6/13). NGC ID# 22AG, PCGS# 2371

- 3836 1903 PR66 Red and Brown NGC.** This is an awesome example, with fully struck, mark-free surfaces. The obverse shows startlingly vivid cherry-red and sea-green colors, while the reverse is primarily mahogany-brown in the fields and electric-blue on the devices. Census: 12 in 66 Red and Brown, 6 finer (5/13).
Ex: *Long Beach Signature (Heritage, 9/2003)*, lot 5581. NGC ID# 22AS, PCGS# 2397
- 3837 1907 PR67 Brown NGC.** Violet-red and cobalt-blue colors dance across the obverse surfaces of this Superb Gem proof, while the reverse shows vivid periwinkle-blue color on the devices, and glossy brown-black fields. Fully struck and seemingly free of hairlines, carbon, or contact. Census: 3 in 67 Brown, 0 finer (5/13).
Ex: *Long Beach Signature (Heritage, 9/2003)*, lot 5585. NGC ID# 22AW, PCGS# 2408

LINCOLN CENTS

- 3838 1909 VDB MS64 Red NGC.** A roll of 50 1909 VDB cents, each certified MS64 Red by NGC. Each of the 50 coins have a sharp strike and brilliant orange mint luster, a few showing the typical and trivial carbon flecks that are expected for the grade. The cataloger has not examined the individual pieces for possible Doubled Die varieties or other variants. (Total: 50 coins) NGC ID# 22AZ, PCGS# 2425
- 3839 1909 VDB MS67 Red PCGS.** Ex: Ron Bozarth Collection. Orange and gold colors intermingle throughout this highly lustrous and meticulously struck Superb Gem. An attractively preserved first year representative. NGC ID# 22AZ, PCGS# 2425
- 3840 1909-S VDB AU50 PCGS.** Even chocolate-brown patina covers each side with an outline of charcoal around the devices and within the recesses. Remarkably clean, problem-free surfaces. NGC ID# 22B2, PCGS# 2426
- 3841 1909-S VDB AU50 NGC.** A pleasing olive-brown specimen of this first-year key, with just a touch of wear on the well-detailed design elements. The all-important designer's initials are boldly defined. NGC ID# 22B2, PCGS# 2426
- 3842 1909-S VDB AU50 NGC.** A lightly circulated deep chocolate-brown representative of this famous introductory branch mint issue. Field marks are virtually absent though the portrait displays unimportant abrasions. NGC ID# 22B2, PCGS# 2426
- 3843 1909-S VDB AU58 PCGS. CAC.** A lightly circulated example of this famous key, with bold VDB and pleasing medium brown surfaces that show streaks of red on the upper obverse and much underlying mint luster. NGC ID# 22B2, PCGS# 2426
- 3844 1909-S VDB — Environmental Damage — PCGS Genuine. Unc Details.** Overall the surfaces are quite attractive with good remaining mint luster. However, there is a significant carbon spot on the shoulder of Lincoln's coat, explaining the ED designation. NGC ID# 22B2, PCGS# 2426
- 3845 1909-S VDB — Environmental Damage — PCGS Genuine. Unc Details.** The reverse is just a bit too dark and "crusty," thus the ED designation. Otherwise, the obverse displays fading remnants of original red around the devices. Sharply struck. NGC ID# 22B2, PCGS# 2426
- 3846 1909-S VDB MS63 Brown PCGS.** The obverse and reverse are somewhat mismatched in that the obverse shows subdued brown-gray patina with significant streakiness in the planchet that is often seen on this issue. More than half of the reverse displays original mint red. Lightly spotted, more noticeably so on the reverse. NGC ID# 22B2, PCGS# 2426
- 3847 1909-S VDB MS63 Red and Brown PCGS.** From an original "roll" of 34 pieces, this example has glossy brown centers with rich original red around the margins. Remarkably clean surfaces, just a few specks of carbon on each side. NGC ID# 22B2, PCGS# 2427

- 3848 1909-S VDB MS64 Red and Brown PCGS.** The surfaces of this key Lincoln cent retain much of their original red color, mixed with attractive shades of light brown. The design elements are well-detailed and a few minor contact marks are evident on the cheek. NGC ID# 22B2, PCGS# 2427
- 3849 1909-S VDB MS64 Red and Brown NGC.** The obverse of this attractive Choice example is mostly original red, while the reverse is dominated by pleasing light brown patina. The design elements are well-detailed with a touch of softness on the designer's initials. NGC ID# 22B2, PCGS# 2427
- 3850 1909-S VDB MS64 Red and Brown PCGS.** This is an attractive near-Gem example of this first-year key. The obverse has more brown present than the reverse, and the reverse is nearly fully red. Sharply struck throughout with only a few small dots of carbon present. NGC ID# 22B2, PCGS# 2427
- 3851 1909-S VDB MS64 Red and Brown PCGS.** Sharply struck with steel-gray fields that are surrounded by significant areas of bright mint red on each side. A few tiny specks of carbon are present on each side. NGC ID# 22B2, PCGS# 2427
- 3852 1909-S VDB MS64 Red and Brown PCGS.** The original mint red is slightly mellowed over each side and well-balanced in appearance. The strike details are strong throughout and there are the expected small carbon spots that are scattered over each side. NGC ID# 22B2, PCGS# 2427
- 3853 1909-S VDB MS64+ Red and Brown PCGS.** This is a lovely, well-balanced S VDB that shows significant mint red, especially on the obverse. The strike is strong and there are no obvious marks on either side. NGC ID# 22B2, PCGS# 2427
- 3854 1909-S VDB MS64 Red and Brown PCGS. CAC.** Splendidly unabraded and lustrous with only inconsequential carbon. The orange-gold surfaces have slightly mellowed. Fully struck with sharp detail on the designer's initials. Certified in an old green label holder. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Deep Orange Mint Color

- 3855 1909-S VDB MS65 Red and Brown PCGS. CAC.** Lustrous deep orange surfaces host traces of bluish patina on this impressive Gem. While designated Red and Brown, this is a full Red specimen with slightly mellowed color. Here is an appealing specimen that will make a nice addition to an advanced collection. NGC ID# 22B2, PCGS# 2427
- 3856 1909-S VDB MS63 Red NGC. CAC.** A lustrous apricot-gold key date cent with minimal carbon and no visible contact. The strike is intricate throughout. Outstanding quality for the collector in search of a high-end example.
Ex: *Orlando FUN Signature (Heritage, 7/2011)*, lot 3143, which realized \$2,760. NGC ID# 22B2, PCGS# 2428
- 3857 1909-S MS66 Red PCGS.** This impressive Premium Gem has frosty luster with brilliant golden-orange surfaces. A single dark toning splash appears near Lincoln's nose. The strike is bold and the eye appeal is exceptional. PCGS has only certified four finer examples (6/13). NGC ID# 22B4, PCGS# 2434
- 3858 1909-S S Over Horizontal S MS65+ Red PCGS. CAC. FS-1502.** A few tiny carbon spots are visible with a glass, and they are hardly worth mentioning. This brilliant Gem has frosty orange luster and bold design motifs. PCGS# 92434

3859 1911-S MS65 Red and Brown NGC. Enough peach color remains, particularly on the central reverse, to render this otherwise mahogany and walnut coin Red and Brown. Pleasingly detailed overall and carefully preserved for an issue of just over 4 million pieces that seldom was saved deliberately. NGC ID# 22B9, PCGS# 2448

3860 1911-S MS65 Red and Brown NGC. CAC. Partial woodgrain toning mixes rose, orange, and mahogany shadings with a sense of duskiness overall. Quality detail with only minor carbon at the margins. NGC ID# 22B9, PCGS# 2448

3861 1911-S MS65 Red PCGS. Pale copper-gold and richer apricot-to-peach hues converge on this 1911-S cent but never slip into the Brown shades. Partial woodgrain patterning includes a degree of carbon in a line to the right of Lincoln's head. NGC ID# 22B9, PCGS# 2449

1912-S Cent, MS65 Red Challenging S-Mint With Full Mint Red

3862 1912-S MS65 Red NGC. The novelty of the Lincoln cent had worn off somewhat by 1912 and far fewer pieces were spared from circulation. Those that were saved seldom maintain their full, original red color. This well-struck Gem exhibits a light honey-gold and pale orange appearance, with subtle blushes of rose at the base of the reverse. Census: 26 in 65 Red, 1 finer (5/13).
Ex: New York Signature (Heritage, 11/2003), lot 5312. NGC ID# 22BC, PCGS# 2458

3863 1914-D AU55 PCGS. CAC. A Choice AU specimen of this key date Lincoln cent, with sharply detailed design elements and pleasing light brown surfaces that show only a few minor abrasions. NGC ID# 22BH, PCGS# 2471

3864 1914-D — Improperly Cleaned — NGC Details. Unc. An unnaturally vivid patina of orange-red and lilac blankets the lustrous surfaces of this important key Lincoln cent. The design elements are sharply detailed and the fields show only minor signs of contact. NGC ID# 22BH, PCGS# 2471

1914-D Cent, MS63 Red and Brown Smooth and Close to Full Red

3865 1914-D MS63 Red and Brown NGC. The obverse is lilac-red, the reverse is orange-gold, and both sides approach a Red designation. Boldly struck and lustrous with blushes of powder-blue on the obverse margin at 2 o'clock and 3:30. An unabraded and impressive example of this low mintage Denver Mint key. NGC ID# 22BH, PCGS# 2472

3866 1915-D MS65 Red PCGS. This peach-red cent has booming luster and a mark-free appearance. The strike is good despite blending on the O in ONE. Minute flecks are noted on the obverse field. A conditionally scarce early Denver Mint issue.
Ex: Long Beach Signature (Heritage, 2/2006), lot 298, which realized \$1,380. NGC ID# 22BL, PCGS# 2482

1916-D Lincoln Cent, MS65 Red Only Five Numerically Finer Coins at PCGS

3867 1916-D MS65 Red PCGS. The 1916-D Lincoln cent is readily available in lower grades, but examples in Gem condition, with original red surfaces are quite elusive. The present coin is a well-detailed Gem, with vibrant mint luster and red surfaces that are completely carbon-free. Population: 57 in 65 (3 in 65+) Red, 5 finer (5/13). NGC ID# 22BP, PCGS# 2491

3868 1916-S MS66 Brown NGC. Although from the San Francisco Mint, the present unabraded high grade cent resembles a Philadelphia matte proof from its year, because of its full strike, satin luster, mint-made granularity, and dramatic deep navy-blue and plum-red toning.
Ex: Columbus Central States Signature (Heritage, 4/2006), lot 623, which realized \$1,495. NGC ID# 22BR, PCGS# 2492

3869 1917 MS66 Red PCGS. CAC. This boldly defined Premium Gem has frosty luster with brilliant orange mint surfaces and excellent eye appeal. Minuscule carbon flecks fail to diminish the appearance or grade. PCGS has certified a mere 17 finer examples (6/13). NGC ID# 22BS, PCGS# 2497

1917-D Cent, MS65 Red First Generation Holder

3870 1917-D MS65 Red PCGS. CAC. A peach-red Gem of this conditionally challenging branch mint issue. Virtually devoid of marks or carbon spots. Minor and slender russet streaks appear on the right obverse and lower reverse. Certified in a first generation holder. Population: 44 in 65 Red, 5 finer (6/13). NGC ID# 22BT, PCGS# 2500

3871 1918 MS66 Red PCGS. CAC. A spectacular high grade cent that boasts a razor-sharp strike and nearly pristine preservation. The pumpkin-gold color is uniform save for a hint of green-gold along the reverse margin. Housed in a first generation holder. NGC ID# 22BV, PCGS# 2506

**1919-D Cent, MS65 Red
Scarce Branch Issue**

- 3872 1919-D MS65 Red PCGS. CAC.** Branch mint issues from the teens are known for their rarity in Gem Mint State, but here is a remarkable orange-gold and rose-red example. The strike is precise and the cartwheel luster is potent. Void of marks, the obverse has the look of a higher grade while the upper half of the reverse exhibits minor carbon. Encapsulated in a green label holder. Population: 57 in 65 Red, 12 finer (6/13). NGC ID# 22BZ, PCGS# 2518

- 3873 1920-S MS65 Brown PCGS. CAC.** An exquisite Gem with rich chocolate-brown surfaces, this sharply defined specimen will prove to be a fine choice for the Lincoln cent color collector. Population: 4 in 65 Brown, 0 finer (6/13). NGC ID# 22C5, PCGS# 2528

- 3874 1922 No D Strong Reverse XF40 ANACS. FS-401.** Die Pair 2. Even glossy brown patina covers each side of this missing mintmark variant. A few small to medium-sized marks are seen over each side. In a small-sized ANACS holder designated with the former FS-013.2 attribution. NGC ID# 22C9, PCGS# 3285

**1922 Strong Reverse, No D Cent, AU50
Famous Filled Mintmark**

- 3875 1922 No D Strong Reverse AU50 PCGS. FS-401.** Die Pair 2. A lightly circulated but minimally abraded chocolate-brown and olive-green representative of this key *Guide Book* variety. Due to a worn die, the mintmark is absent and the portrait is blurry, but the bold TRUST and the sharp wheat ears confirm the third party grade. NGC ID# 22C9, PCGS# 3285

- 3876 1923-S MS64 Red and Brown PCGS.** Dusky peach and violet-brown surfaces show glimmers of bright orange at parts of the margins. Though both sides show minor carbon and a larger spot appears to the right of the E in ONE on the reverse, the overall eye appeal is solid. NGC ID# 22CB, PCGS# 2547

**1925-S Lincoln Cent, MS66 Brown
The Only MS66**

- 3877 1925-S MS66 Brown NGC.** This beautifully toned Lincoln features a mixture of cherry-red and sky-blue colors over lustrous surfaces. The '25-S is often weakly struck. This representative offers a better-than-average strike, with the design elements on both sides displaying sharp definition. While this issue is quite common in lower grades, David Lange, in *The Complete Guide to Lincoln Cents*, says that "anything even approaching the Gem category is of the highest rarity." This is the only 1925-S Lincoln cent graded MS66 at NGC or PCGS, regardless of color designation (6/13). A rare opportunity for the Lincoln cent specialist. NGC ID# 22CH, PCGS# 2564

- 3878 1925-S MS64 Red and Brown PCGS. CAC.** The lustrous surfaces show a mix of original red and light brown patina, with well-detailed design elements and just a few minor contact marks. Housed in a green label holder. PCGS has graded seven numerically finer examples (5/13). NGC ID# 22CH, PCGS# 2565

- 3879 1926 MS67 Red PCGS. CAC.** An outstanding pumpkin-gold Superb Gem. Dynamic cartwheel luster sweeps boldly struck and nearly immaculate surfaces. Unavailable any finer at either major service. Population: 88 in 67 Red, none finer (6/13). NGC ID# 22CJ, PCGS# 2569

- 3880 1937-D MS67+ Red PCGS. CAC.** This high-end Superb Gem displays well-preserved original red surfaces with blazing mint luster and sharply detailed design elements throughout. PCGS has graded only two numerically finer examples (5/13). NGC ID# 22DJ, PCGS# 2662

- 3881 1941 Doubled Die Obverse MS65 Red PCGS. FS-101.** The spread is most obvious on the 4 in the date, LIBERTY, and IN GOD WE TRUST. The surfaces are bright red and unmellowed with a few small abrasions apparent when closely examined. PCGS# 37780

**1941 Doubled Die Obverse Cent
MS66 Red, FS-101**

- 3882 1941 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101.** The obverse is nicely die doubled, most notably on the B in LIBERTY and the crossbar of the 4 in the date. Two other DDO varieties are listed in *Cherrypickers'*, with FS-101 in between FS-102 and FS-103 in terms of strength and value. A beautiful peach-red Premium Gem with lustrous mark-free surfaces. The strike is incomplete only on the top of the O in ONE. Population: 4 in 66 Red, none finer (6/13). PCGS# 37780

3883 1943-D MS68 PCGS. A pristine representative of this single-year composition type. Fully struck with booming luster and no evidence of contact. One minute fleck near the stem of the left wheat ear. As of (6/13), none are certified finer at either service.
Ex: Long Beach Signature (Heritage, 2/2006), lot 340. NGC ID# 22000000, PCGS# 2714

3884 1954 MS66+ Red PCGS Secure. The 1954 cent issue is known for poor striking quality. Few survivors have achieved this grade level or higher, placing considerable pressure on the few upper-end examples. The surfaces of this piece are extraordinary with deep, even cherry-red color. Population: 5 in 66+ Red, 3 finer (5/13).
 NGC ID# 22FC, PCGS# 2815

3885 1955 Doubled Die Obverse XF45 NGC. FS-101. The remarkable clockwise obverse die doubling is obvious despite moderate wear on the jaw and cheekbone. This chocolate-brown cent has a smooth obverse field and a mildly granular reverse. One faded thin mark above the N in ONE. NGC ID# 22FG, PCGS# 2825

3886 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. AU. FS-101. The motto and date are boldly doubled on this lightly cleaned and lightly circulated example. The design elements are well-detailed and the surfaces show only a few minor abrasions. NGC ID# 22FG, PCGS# 2825

3887 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. AU. FS-101. The characteristic doubling is strong on the date and motto and the design elements are sharply detailed. The lightly abraded surfaces have an unnatural brown and amber sheen, indicative of a light cleaning in the past. NGC ID# 22FG, PCGS# 2825

3888 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. AU. FS-101. This briefly circulated key date doubled die cent has been recolored straw-gold to pass as Red Mint State. Some satin luster is present and the few faint field marks are of no importance. NGC ID# 22FG, PCGS# 2825

3889 1955 Doubled Die Obverse AU58 NGC. FS-101. The deep brown surfaces display lavender undertones. Slight friction on the cheekbone confirms momentary circulation, but this satiny near-Mint example is well struck and only lightly abraded. The best known of all doubled die varieties. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Cent, MS62 Brown Popular Collector Variety and Grade

3890 1955 Doubled Die Obverse MS62 Brown PCGS. CAC. FS-101 Certified in a PCGS green-label holder, this 1955 Doubled Die cent has medium milk-chocolate surfaces with a smidgen of pinkish patina remaining around the obverse rim and in parts of the reverse. A small carbon spot appears on the obverse rim at 7 o'clock, and a few small ticks account for the numeric grade. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Obverse Cent, MS63 Brown Variegated Color, Notably Clean Surfaces

3891 1955 Doubled Die Obverse MS63 Brown PCGS. FS-101. Golden-brown, olive, and mauve color embrace this sharply struck and unmarked representative. The most famous of all doubled die varieties, one that is easily noticed with the unaided eye. Housed in an older green label holder.

Ex: Long Beach Signature (Heritage, 6/2004), lot 5439; FUN Signature (Heritage, 1/2009), lot 511. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Cent, MS64 Brown Attractive Multicolor Toning

3892 1955 Doubled Die Obverse MS64 Brown NGC. FS-101. A boldly struck and unabraded near-Gem that has vibrant luster and rich multicolor toning. Plum-red, olive-green, and orange-red shades confirm the originality. One minor spot is right of the T in CENT. The strongest and most famous doubled die of the entire Lincoln cent series. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Obverse Cent MS63 Red and Brown

3893 1955 Doubled Die Obverse MS63 Red and Brown PCGS. CAC. FS-101. When this famous variety was first distributed, the remarkably strong obverse die doubling caused myriad hobbyists to ponder the cause, since few collectors of the day understood the Mint hubbing process. The present Select Uncirculated example offers ample orange-red within the legends though open areas are brown. A loupe reveals only minor contact. Encapsulated in an old green label holder. NGC ID# 22FG, PCGS# 2826

**1960-D Large Date Cent, MS67 Red
Condition Rarity**

3894 1960-D Large Date MS67 Red PCGS. In the early 1960s the “roll boom” in U.S. coins was exacerbated by speculation in 1950-D nickels (in particular), by the debut of *Coin World* in April 1960, and the sensation created that same year by the appearance of Small and Large Date variants of the 1960 Philadelphia and Denver Lincoln cents. After *Coin World* published the story, bank-wrapped \$50 bags of 1960 Philadelphia Small Date rolls soared to more than \$12,000. The Large Date coins were produced in much-larger numbers but are condition rarities in a grade such as the present Superb Gem Red example, one of only five at this top level at PCGS (5/13). Medium orange-red surfaces are free of all but the smallest contact marks mostly in out-of-the-way areas, and only two tiny flecks appear on the upper reverse. A great coin for a Registry Set. NGC ID# 22FY, PCGS# 2866

3895 1960-D Small Date MS67 Red PCGS. A magnificent Superb Gem representative of the famous Small Date variety, with pristine original red surfaces, vibrant mint luster, and sharply detailed design elements. Population: 17 in 67 Red, 0 finer (5/13). NGC ID# 22FX, PCGS# 2869

3896 1972 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101. Strong doubling is apparent on the date, LIBERTY, and the motto. This lustrous, well-detailed Choice example displays mixed original red and light brown patina. NGC ID# 22GU, PCGS# 2949

PROOF LINCOLN CENTS

3897 1913 PR65 Red and Brown NGC. CAC. This matte proof represents remarkably good value as each side retains so much original mint red. (Probably one of the reasons for the CAC sticker.) A crescent of blue is noted at the top of the reverse. Minimal traces of carbon as well. NGC ID# 22KW, PCGS# 3316

**1913 Cent, PR65 Red
Multicolor Accents**

3898 1913 PR65 Red PCGS. CAC. A razor-sharp Gem of this scarce matte proof date. Most examples have toned over the past century, but the present specimen has no indication of brown. However, it does display vibrant and attractive orange, rose, and lime accents. A lens reveals only pinpoint carbon. NGC ID# 22KW, PCGS# 3317

**1915 Gem Matte Proof Brown Lincoln Cent
Attractive Underlying Iridescence**

3899 1915 PR65 Brown NGC. CAC. The matte proof series of Lincoln cents is largely overlooked, and most dates are generally unavailable with full red color because of the sulphur-laden tissue paper the Mint wrapped them in. The 1915 had only 1,150 pieces struck. While labeled Brown, this example displays significant underlying red and green iridescence. The surfaces are virtually free from carbon spotting. Census: 14 in 65 Brown, 14 finer (5/13). NGC ID# 22KY, PCGS# 3321

3900 1936 Type Two—Brilliant Finish PR64+ Red PCGS. The original orange-red surfaces of this high-end Choice example are deeply reflective and the design elements are sharply detailed throughout. Eye appeal is outstanding. NGC ID# 22L3, PCGS# 3335

3901 1936 Type Two—Brilliant Finish PR65 Red PCGS. CAC. A stunning Gem proof representative of the brilliant finish Type Two proof Lincoln cent. This example has deeply mirrored fields around satin devices with wispy blue toning over bright orange surfaces. PCGS has only certified 35 finer examples (6/13). NGC ID# 22L3, PCGS# 3335

3902 1938 PR66 Red Cameo NGC. CAC. Although the 1936 to 1942 proof issues of all denominations are frequently seen in a wide range of grades, examples with any degree of contrast are rare. This Premium Gem Cameo proof has bright, even red luster with exceptional cameo contrast, featuring satin devices over fully and deeply mirrored fields. Census: 15 in 66 Cameo, 2 finer (6/13). NGC ID# 22L5, PCGS# 83341

3903 1950 PR65 Deep Cameo PCGS. An amazing first-year proof in the modern, post WWII era. This piece has extraordinary contrast with brilliant light orange surfaces and deeply mirrored fields that frame the bold and frosty devices. Population: 22 in 65 Deep Cameo, 13 finer (6/13). NGC ID# 22LA, PCGS# 93359

3904 1954 PR67 Red Ultra Cameo NGC. Liberal splashes and streaks of red and honey-gold color are present on both sides of this Superb Gem Ultra Cameo example, providing this piece with great eye appeal. Census: 13 in 67 Ultra Cameo, 3 finer (5/13). NGC ID# 22LE, PCGS# 93371

3905 1956 PR67 Deep Cameo PCGS. A needle-sharp honey-gold specimen with undeniable Deep Cameo contrast. A few nearly microscopic carbon flecks deny an even finer assessment. Population: 37 in 67 Deep Cameo, 6 finer (6/13). NGC ID# 22LG, PCGS# 93377

3906 1957 PR66 Deep Cameo PCGS. An outstanding apricot-gold Premium Gem. The strike reveals all potential detail, and carbon is limited to a couple of microscopic specks. Population: 10 in 66 Deep Cameo, 11 finer (6/13). NGC ID# 22LH, PCGS# 93380

3907 1958 PR67 Deep Cameo PCGS. An extraordinary Superb Gem Deep Cameo proof, this final Wheat cent issue has deeply mirrored fields around frosty bright orange devices. Both sides are exquisite and virtually flawless. Population: 26 in 67 Deep Cameo, 4 finer (6/13). NGC ID# 22LJ, PCGS# 93383

3908 1959 PR68 Deep Cameo PCGS. Profoundly reflective fields are exquisitely preserved, and thickly frosted devices emerge from the liquid mirrors. A stunning specimen of this first-year Memorial cent proof issue. Population: 34 in 68 Deep Cameo, 3 finer (6/13). NGC ID# 22LK, PCGS# 93386

3909 1971-S Doubled Die Obverse PR67 Red NGC. FS-101. Strong die doubling on LIBERTY and GOD confirms this desirable variety. Not to be confused with FS-102, another prominent doubled die for the proof issue that is considered even rarer than FS-101. A beautiful butter-gold Superb Gem. Pinpoint blue flecks are all that limit the grade. PCGS# 3533

SHIELD NICKELS

3910 1870 MS65 NGC. Green-gold and pale nickel-pearl are the primary hues of this Shield nickel Gem. Well-defined with a die crack passing through the word UNITED on the reverse. Census: 35 in 65, 6 finer (6/13). NGC ID# 22P4, PCGS# 3797

3911 1873 Open 3 MS65 NGC. Well-defined for this later-logotype setup, and struck from a later-state obverse die cracked at the top. Peach-gold patina influences lustrous surfaces, and a small patch of sage is noted to the right of the date. Census: 44 in 65 (1 in 65+), 8 finer (6/13). NGC ID# 276C, PCGS# 3800

3912 1875 MS65 NGC. The 1875 Shield nickel is an elusive issue in the series and is far easier to locate in proof format. This Gem business strike has brilliant light gray surfaces with frosty luster, sharp details, and delicate champagne toning. Census: 28 in 65, 6 finer (6/13). NGC ID# 22PA, PCGS# 3804

3913 1880 Good 6 PCGS. CAC. Both proofs and business strikes were produced from the same die pairing, but the heavy wear on this coin is the most convincing attribute of this coin's use as a circulation strike. The obverse shows heavy wear into the rims. Light gray overall with slightly contrasting medium gray around and within the devices. Only 16,000 business strikes were produced. A true collector coin. NGC ID# 276E, PCGS# 3810

PROOF SHIELD NICKELS

3914 1866 Rays PR62 NGC. Dusky straw-gold toning embraces this flashy and well struck Gem. Slender marks west of the upright of the large 5 deny a finer grade. A briefly issued proof subtype. *Ex: Long Beach Signature (Heritage, 9/2007), lot 561, which realized \$1,265.* NGC ID# 276G, PCGS# 3817

3915 1867 No Rays PR64 Cameo PCGS. The central reverse displays golden-brown toning though the remainder of this flashy Choice proof is nearly brilliant. Crisply struck and attractive despite a few small reverse flecks. PCGS# 83821

3916 1868 PR65 NGC. A delightful Gem from a small proof mintage of 600 pieces, this coin displays sharply detailed design elements and deeply mirrored fields, with outstanding eye appeal. Census: 63 in 65, 19 finer (6/13). NGC ID# 276J, PCGS# 3822

3917 1870 PR65 NGC. Subtle peach patina graces this prominently mirrored and well struck Gem. Free from hairlines, carbon, or contact marks, though mint-made strike-throughs are noted near the C in CENTS and the TE in UNITED. NGC ID# 276L, PCGS# 3824

3918 1870 PR66 PCGS. Delicate green-gold tints at the margins fade into pale blue on wide interiors. The reflectivity is watery and there is even a bit of a swirl to the luster in places, but the boldness of the reverse stars makes this coin's proof status unmistakable. Population: 7 in 66, 0 finer (6/13). NGC ID# 276L, PCGS# 3824

3919 1875 PR65 PCGS. A reflective Gem proof, devoid of noteworthy impairments. Well struck with a glittering, frosty haze over each side. Approximately 700 proofs were struck, and only a fraction of these have survived this well-preserved. Population: 62 in 65, 12 finer (6/13). NGC ID# 276S, PCGS# 3829

3920 1878 PR66 PCGS. The proof-only 1878 nickel is more available than its 1877 predecessor yet undeniably scarce. Fully struck and lustrous with pleasing olive-green and chestnut-gold toning. Neither side has any carbon or hairlines. NGC ID# 276V, PCGS# 3832

3921 1880 PR66 Cameo PCGS. CAC. This spectacular Premium Gem exhibits unusual depths of reflectivity on the well-preserved fields and richly frosted design elements that produce a startling cameo effect when the coin is tilted in the light. Population: 74 in 66 (2 in 66+) Cameo, 15 finer (6/13). PCGS# 83835

3922 1881 PR66 Cameo PCGS. CAC. A well-struck and nearly untuned Premium Gem of this popular proof date. Cameo frost is especially evident on the shield and the fields are deeply reflective. Population: 61 in 66 (3 in 66+) Cameo, 15 finer (6/13). PCGS# 83836

3923 1882 PR67 Cameo PCGS. Wisps of champagne toning appear on the delightful nickel-gray surfaces of this Superb Gem Cameo proof. Both sides feature excellent contrast and exceptional eye appeal. Population: 15 in 67 Cameo, 1 finer (6/13). PCGS# 83837

LIBERTY NICKELS

1884 Nickel, MS66 Full Ears of Corn on Reverse

3924 1884 MS66 PCGS. CAC. Although the 1885 and 1886 Liberty nickels are recognized as the key dates, the 1884 is an important issue as well, and the present Premium Gem is tied for the finest that PCGS has certified. This piece has a strong strike including full corn in both branches of the wreath. The surfaces are frosty light gray with brilliant luster and hints of champagne toning. Population: 25 in 66 (3 in 66+), 0 finer (6/13). NGC ID# 22PJ, PCGS# 3845

3925 1885 VF30 NGC. Middle grade circulated 1885 nickels are surprisingly hard to locate, as this key issue is generally found either in Mint State grades or well worn. The obverse of this example is largely free of abrasions while the reverse exhibits several hair thin lines. NGC ID# 2773, PCGS# 3846

3926 1886 MS62 NGC. The well-struck design elements of this MS62 example show a little softness on the stars and wreath and the lustrous surfaces show a few planchet flakes on the obverse. NGC ID# 22PK, PCGS# 3847

3927 1886 MS62 NGC. One of the key dates to the Liberty Head nickel series. The nickel-gray surfaces of this piece display occasional traces of deeper gray and tan. Generally well struck save for softness left of the bow knot. Moderate planchet laminations are visible on the left obverse rim, and verdigris is seen on the reverse edge at 9:00. NGC ID# 22PK, PCGS# 3847

**1886 Liberty Nickel, MS64
Reflective Fields**

3928 1886 MS64 PCGS. CAC. A sharp strike is noted on both sides of this Choice Mint State key Liberty nickel issue. This untoned specimen is highly attractive with full field reflectivity around the central design motifs. PCGS has certified 43 finer examples of this issue (6/13). NGC ID# 22PK, PCGS# 3847

**1889 Liberty Nickel, MS66
Subtle Pastel Toning**

3929 1889 MS66 PCGS. This attractive Premium Gem is among the finest examples certified at PCGS. The pristine surfaces are blanketed in pastel shades of lavender and gray, with occasional hints of pale gold toning. The design elements are well-detailed and strong but subtle mint luster shines through the patina. Population: 15 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 2775, PCGS# 3850

3930 1893 MS65 NGC. Both peach and steel-blue overtones grace a medium-gray Gem that is lightly frosted on the high points. Unevenly struck on the obverse stars but better-defined on the portrait and wreath, including the infamous left ear of corn. NGC ID# 2778, PCGS# 3854

**1893 Nickel, MS66
Vivid Iridescent Toning**

3931 1893 MS66 NGC. CAC. This impressive Premium Gem exhibits vivid lemon-yellow, lime-green, light gold, and pale blue toning on the obverse. The reverse has similar toning that is less vivid. Both sides have underlying frosty luster and minimal marks. The strike is average with some weakness in the left branch of the wreath. Census: 7 in 66, 2 finer (6/13). NGC ID# 2778, PCGS# 3854

**1894 Nickel, MS66
Conditionally Elusive**

3932 1894 MS66 PCGS. While the left ear of corn is typically weak, all other design elements are bold on this Premium Gem. Both sides are brilliant and highly lustrous with frosty mint surfaces. A splendid specimen and elusive so fine. Population: 28 in 66 (2 in 66+), 0 finer (6/13). NGC ID# 2779, PCGS# 3855

**1906 Nickel, MS66
Surprisingly Scarce in This Grade**

3933 1906 MS66 PCGS. One is tempted to say this would be a great coin for type purposes, but there are so few certified at this level it may transcend type-coin status. The surfaces are lightly toned with a strong underlying presence of soft mint frost. The only flaws we see are a solitary mark on Liberty's temple and a sprinkling of tiny carbon specks. Population: 14 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 277H, PCGS# 3867

**1906 Liberty Nickel, MS66
Pastel Toning, Vibrant Luster**

3934 1906 MS66 NGC. The 1906 Liberty nickel is an available date in lower grades, but Premium Gem specimens are rare, and the issue is unknown in higher numeric grades. This spectacular MS66 example is well-detailed, with just a touch of softness on the stars and wreath. Vibrant mint luster shines through shades of champagne-gold and lavender toning. Census: 6 in 66, 0 finer (6/13). NGC ID# 277H, PCGS# 3867

3935 1912-D MS65 PCGS. The sole Denver Liberty nickel issue, represented by a Gem with a pleasing green-gold overtone. Solid all-around preservation makes up for the softness of strike on certain stars and the bottom of the wreath. NGC ID# 277P, PCGS# 3874

3936 1912-D MS65 PCGS. An attractive Gem from the final official year of the Liberty design, this coin displays well-detailed design elements and frosty mint luster under shades of lavender and pale gold toning. NGC ID# 277P, PCGS# 3874

- 3937 1912-S MS64 PCGS. CAC.** An attractive Choice Mint State specimen from the last official date of the series, and the only year of branch Mint production, this coin is brightly lustrous with well-detailed design elements and only a few minor contact marks. There is no evidence of toning and only trivial carbon flecks. NGC ID# 277R, PCGS# 3875
- 3938 1912-S MS64 PCGS. CAC.** Although the San Francisco Mint would strike its first copper cents in 1908, the first Liberty nickel production would come in the last year of regular issues. The low-mintage 1912-S is always popular, particularly in grades approaching Gem. The present near-Gem boasts semiprooflike surfaces that feature pale pastel blue-green and golden color. The strike is fairly sharp, including the peripheral obverse stars and some detail on the lower-left ear of corn on the reverse. A single diagonal contact mark appears on the cheek. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3939 1883 No Cents PR66 PCGS.** Sharply detailed throughout, this delightful Premium Gem proof, from the first year of the design, would make an ideal type coin. The pristine surfaces are blanketed in shades of champagne-gold and pale green toning. Population: 86 in 66, 4 finer (5/13). NGC ID# 22PU, PCGS# 3878
- 3940 1884 PR67 Cameo NGC.** The sharply detailed design elements are richly frosted and contrast dramatically with the deeply mirrored fields to produce a stunning cameo effect. Census: 14 in 67 Cameo, 3 finer (5/13). PCGS# 83882
- 3941 1885 PR65 NGC. CAC.** Green-gold overtones of varying intensity grace this Gem proof with crisp all-around detail. Great eye appeal for an issue often collected as a substitute for the key-date business strike of the same year. NGC ID# 277T, PCGS# 3883
- 3942 1885 PR66 PCGS. CAC.** Exquisite peach-gold, powder-blue, rose-red, and lime-green toning endows both sides. Fully struck and exemplary. A low mintage date. Only 13 examples have received higher numeric grades from PCGS (6/13). NGC ID# 277T, PCGS# 3883
- 3943 1886 PR66 PCGS. CAC.** This impressive Premium Gem exhibits razor-sharp definition on all design elements and reflective fields with a few hints of pale gold toning. Population: 90 in 66 (3 in 66+), 19 finer (6/13). NGC ID# 277U, PCGS# 3884
- 3944 1886 PR66 PCGS. CAC.** Pastel rose-gold, powder-blue, and olive toning embraces this crisply struck and coruscating specimen. Both sides are pristine save for a few pinpoint flecks on the reverse. NGC ID# 277U, PCGS# 3884

1886 Nickel, PR67 None Certified Finer

- 3945 1886 PR67 PCGS. CAC.** In demand due to the elusive business strikes. Both sides of this Superb Gem exhibit reflective, satiny fields with lustrous devices, all beneath gentle champagne toning. The bold strike is sufficient to attribute this piece as a proof. Population: 19 in 67, 0 finer (6/13). NGC ID# 277U, PCGS# 3884

- 3946 1891 PR65 Deep Cameo PCGS.** A high degree of contrast is evident on the brilliant surfaces of this Gem Deep Cameo proof. Both sides exhibit light gray surfaces with delicate champagne toning. Population: 6 in 65 Deep Cameo, 6 finer (6/13). PCGS# 93889
- 3947 1897 PR66 Cameo PCGS.** Mottled pale gold iridescence overlays surfaces that are deeply mirrored in the fields and crisply detailed over the devices. Expectantly blemish-free for the assigned grade. Ex: *Central States Signature (Heritage, 5/2003)*, lot 5695. PCGS# 83895

1897 Nickel, PR67 Cameo Tied for Finest at PCGS

- 3948 1897 PR67 Cameo PCGS. CAC.** This exquisite Superb Gem Cameo proof is tied for the finest that PCGS has certified, and a more attractive example is hard to visualize. This piece has satiny luster on the sharply defined devices with deeply mirrored fields. Subtle ice-blue and pale yellow toning enhances the eye appeal. Population: 10 in 67 Cameo, 0 finer (6/13). PCGS# 83895
- 3949 1898 PR66 PCGS.** A high grade specimen that boasts razor-sharp motifs and smooth mirrored fields. Lightly toned in streaks of golden-gray. Cameo contrast is noticeable but undesignated due to the age of the green label holder. NGC ID# 2788, PCGS# 3896
- 3950 1899 PR67 NGC.** Boldly reflective and flashy. A hint of mint-green patina and flecks of gold accent the pale nickel-white surfaces of this carefully preserved turn-of-the-century coin. NGC ID# 2789, PCGS# 3897
- 3951 1902 PR67 PCGS.** A boldly detailed Superb Gem, this 1902 Liberty nickel exhibits a hint of contrast, although insufficient for a Cameo designation. Both sides have light gray surfaces with wispy iridescent toning. Population: 10 in 67, 0 finer (6/13). NGC ID# 278C, PCGS# 3900
- 3952 1904 PR66 PCGS. CAC.** Vivid shades of lime-green and grayish-blue toning enhance the well-preserved surfaces of this delightful Premium Gem. The design elements are sharply detailed and the fields are brightly reflective. Population: 40 in 66, 3 finer (6/13). NGC ID# 278E, PCGS# 3902
- 3953 1906 PR66 Cameo PCGS. CAC.** Both sides exhibit a pleasing mirrored finish with modest contrast under a hint of yellow-gold patina. A small, roundish lamination is visible between the 6 in the date and star 13. Population: 24 in 66 (2 in 66+) Cameo, 16 finer (6/13). PCGS# 83904
- 3954 1906 PR66+ Cameo PCGS. CAC.** Delicate honey-gold and ice-blue toning graces this fully struck and flashy high grade proof nickel. Devoid of all contact, and a lens reveals only a few minute flecks. Very scarce with consequential cameo contrast. Population: 24 in 66 (2 in 66+) Cameo, 16 finer (6/13). PCGS# 83904

**1906 Nickel, PR67 Cameo
Elusive Contrasted Proof**

3955 1906 PR67 Cameo PCGS. CAC. A stunning Superb Gem with obvious contrast on the brilliant gray surfaces, featuring satiny white devices and deeply mirrored fields. Contrast is a rare commodity on the early 20th century proof coins as the PCGS population data reveals. Less than 15% of 1906 proof nickels submitted to PCGS have the Cameo designation, and none have been graded Deep Cameo. Population: 14 in 67 Cameo, 2 finer (6/13). PCGS# 83904

3956 1912 PR66 Cameo PCGS. CAC. The design elements of this spectacular Premium Gem are sharply detailed and richly frosted, creating bold cameo contrast with reflective fields. Population: 23 in 66 (2 in 66+) Cameo, 4 finer (5/13). PCGS# 83910

BUFFALO NICKELS

3957 1913 Type One MS67 PCGS. An amazing Superb Gem and rarely seen finer, this boldly detailed Type One Buffalo nickel exhibits frosty light nickel-gray luster with pristine surfaces. PCGS has only certified 12 finer examples (6/13). NGC ID# 22PW, PCGS# 3915

3958 1913 Type One MS67 PCGS. CAC. This spectacular Superb Gem is sharply detailed throughout, with vibrant mint luster and hints of pale gold and ice-blue toning. PCGS has graded only 12 numerically finer examples (6/13). NGC ID# 22PW, PCGS# 3915

3959 1913-D Type Two MS65 PCGS. CAC. The design elements of this impressive Gem exhibit razor-sharp definition throughout and the well-preserved surfaces display vibrant mint luster with hints of pale gold toning. NGC ID# 22R2, PCGS# 3922

**1913-D Nickel, MS66
Type Two Reverse**

3960 1913-D Type Two MS66 PCGS. CAC. The Denver production of 1913 Type Two nickels was slightly less than Type One (4.2 million vs. 5.3 million), but the Type Two coins were not saved and are substantially scarcer today, especially in Mint State grades. This Premium Gem has delicate champagne toning over frosty light gray luster with sharp design motifs. An exceptional representative. Population: 56 in 66, 11 finer (6/13). NGC ID# 22R2, PCGS# 3922

3961 1913-S Type Two MS63 PCGS. Sea-green and wheat-gold toning alternates across unabraded and low mintage nickel. The curve of the tail and the hair above the braid are soft, but the remainder of the strike is crisp. NGC ID# 22R3, PCGS# 3923

1913-S Type Two Nickel, MS65

3962 1913-S Type Two MS65 NGC. This satiny Gem has impressive eye appeal with delicate champagne toning on its light nickel-gray surfaces. Slight peripheral weakness is noted on the obverse, especially at LIBERTY, with all other design elements nicely brought up. Census: 68 in 65, 19 finer (6/13). NGC ID# 22R3, PCGS# 3923

3963 1914-S MS65 NGC. Rich butter-gold toning dominates though the upper obverse periphery is plum-red and ocean-blue. Lustrous and pristine with a typical strike at the centers and on the tail. NGC ID# 22R6, PCGS# 3926

3964 1915 Two Feathers MS63 PCGS. FS-401. The feathertip behind the Indian's neck is lapped away, the obverse equivalent of the various 3 or 3 1/2 Legged varieties. The present satiny and smooth nickel displays light almond-gold and pearl-gray toning. PCGS# 38433

**1915-S Nickel, MS66
Tied for Finest at NGC**

3965 1915-S MS66 NGC. CAC. An extraordinary Premium Gem, and rarely found in this or higher grades. Tied for the finest that NGC has certified, with only three higher grade pieces at PCGS. This piece has brilliant light gray surfaces with a touch of gold and iridescent toning. Census: 25 in 66, 0 finer (6/13). NGC ID# 22R9, PCGS# 3929

3966 1916-S MS65 NGC. Warm tan and green-gold toning graces the subtly lustrous surfaces of this S-mint Gem. The overall detail is above-average, and the eye appeal is impressive. Census: 44 in 65, 15 finer (6/13). NGC ID# 22RC, PCGS# 3933

3967 1917 MS66 PCGS. A few hints of ice-blue toning enhance the pristine surfaces of this delightful premium Gem. The design elements are sharply detailed and the fields are brightly lustrous. PCGS has graded 15 numerically finer examples (5/13). NGC ID# 22RD, PCGS# 3934

3968 1918/7-D Good 6 NGC. FS-101. The broad downstroke of the underdigit 7 identifies the rare wartime overdate. The date is worn but all four digits are readable. The pearl-gray fields and motifs are smooth aside from a faint thin horizontal mark on the bison's flank. NGC ID# 22RJ, PCGS# 3939

- 3969 1918/7-D — Obverse Scratched, Reverse Cleaned — NGC Details. Fine. FS-101.** Careful rotation reveals fine parallel hairlines on the bison's body and the field between the legs. The obverse has a minor pincscratch within the hair and a lamination near the forehead. The thick shape of the underdigit 7 is unmistakable.

**1918/7-D Nickel, VF20
Wartime Hubbed Overdate**

- 3970 1918/7-D VF20 NGC. FS-101.** The corner and crossbar of the underdigit 7 are plain above the 8 in the date. The downstroke of the 7 confirms the key variety. Chestnut-tan and ice-blue toning grace unabraded surfaces. Minor laminations, mostly retained, are noted near the Indian's braid and feathertips. A small spot is above the head of the bison. NGC ID# 22RJ, PCGS# 3939

- 3971 1918-D MS64 PCGS.** This well-detailed Choice example shows a touch of softness on the Indian's hair and the bison's shoulder and the well-preserved surfaces show hints of gold and lavender patina. NGC ID# 22RH, PCGS# 3938

**1918-D Nickel, MS65
Softly Lustrous Surfaces**

- 3972 1918-D MS65 PCGS.** Save for a single small nick on the bison's midsection there are few mentionable marks on either side of this Gem Buffalo nickel, and soft luster radiates throughout the surfaces. The strike is as sharp as can be expected, given the moderate die erosion that is perceptible on each side. An attractive example of this challenging issue, one overshadowed by the more-difficult 1918-S. Population: 71 in 65 (2 in 65+), 23 finer (5/13). NGC ID# 22RH, PCGS# 3938

- 3973 1920-S MS64 ANACS.** A delightful Choice Mint State piece, this 1920-S Buffalo nickel exhibits some central weakness that is expected for the issue and grade. The surfaces have full satin luster beneath gray-gold and iridescent toning. A little stronger strike would have generated a higher grade, as the surfaces are nearly flawless. NGC ID# 22RS, PCGS# 3946

- 3974 1921 MS66 NGC.** A sharply detailed Premium Gem, with vibrant mint luster and a few hints of pale gold toning, this coin possesses tremendous eye appeal. Census: 57 in 66, 9 finer (5/13). NGC ID# 22RT, PCGS# 3947

- 3975 1923-S MS64 PCGS.** This well-detailed Choice example shows a touch of softness on the date and the bison's shoulder and traces of satiny mint luster shine through the silver-gray patina. NGC ID# 22RW, PCGS# 3950

- 3976 1925-D MS64 NGC.** Semireflective surfaces show a touch of quicksilver gloss. Color ranges from a pale gold to a rich orange. This near-Gem has above-average definition on the bison's horn and shoulder. NGC ID# 22S3, PCGS# 3955

**1926-D Buffalo Nickel, MS65
Seldom Encountered in Higher Grades**

- 3977 1926-D MS65 PCGS.** The 1926-D Buffalo nickel is an elusive issue in grades above the MS65 level. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The pleasing surfaces are blanketed in shades of golden-tan and ice-blue toning, with ample eye appeal. Population: 94 in 65 (1 in 65+), 25 finer (6/13). NGC ID# 22S6, PCGS# 3958

- 3978 1926-S AU53 NGC.** The low mintage 1926-S becomes the key to the series if the overdates and doubled or lapped dies are excluded. The present sea-green and dove-gray nickel has noticeable luster, a smooth appearance, and a typical strike. NGC ID# 22S7, PCGS# 3959

- 3979 1935 MS67 PCGS.** Toning is light green-to-gold and blue-gray elements with additional touches of pink. The underlying luster has a shimmer to it, while the detail is average or a touch better. PCGS has graded only one example as MS68 or better (5/13). NGC ID# 22SN, PCGS# 3974

- 3980 1936-D 3 1/2 Legs VF25 PCGS. FS-901.** Much rarer than the better known 1937-D Three-Legged nickel, the present *Guide Book* variety also displays attenuated detail on the leftmost leg of the bison, likely from overzealous die lapping at the Mint. This example has stone-gray highpoints with tan and charcoal shades in design recesses. The Indian's neck has faded marks. PCGS# 93978

- 3981 1937-D Three-Legged AU55 NGC. FS-901.** FS-901 was formerly designated as FS-020.2, as indicated on the holder. This Choice AU specimen is well-detailed, with satiny mint luster and shades of pale gold and bluish-gray toning. NGC ID# 22SX, PCGS# 3982

- 3982 1937-D Three-Legged AU55 NGC. FS-901.** A pearl-gray example of the famous lapped die mint error. The bison's hip and Indian's cheekbone have light wear but coruscating luster remains evident. A few trivial marks are scattered but the overall eye appeal is pleasing. NGC ID# 22SX, PCGS# 3982

- 3983 1937-D Three-Legged AU58 NGC. CAC. FS-901.** A coruscating caramel-gold and olive-gray representative of the coveted mint error. All diagnostics are present, such as the granular back leg of the bison. One horizontal mark noted above the Indian's mouth. Encased in a former generation holder. NGC ID# 22SX, PCGS# 3982

- 3984 1937-D Three-Legged MS61 NGC.** Golden-olive toning appears on the lustrous gray surfaces of this Mint State Three-Legged Buffalo nickel. This piece has a typical strike with minor marks that are mostly found on the reverse. NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

1915 Buffalo Nickel, PR66+ Lovely Gold Toning

- 3985 1915 PR66+ PCGS. CAC.** Every detail of this splendid Premium Gem matte proof nickel is boldly defined, and the satin luster shines through its light gold toning. Hints of pale blue add to the eye appeal of this lovely piece. PCGS has certified 57 finer examples, although few will exceed the eye appeal of this specimen. NGC ID# 278U, PCGS# 3992

- 3986 1937 PR66 NGC.** This impressive Premium Gem exhibits razor-sharp definition on all design elements, with deeply mirrored surfaces and light shades of champagne-gold and ice-blue toning. The 1937 issue was the last proof Buffalo nickel. NGC ID# 278Z, PCGS# 3996

- 3987 1937 PR66 NGC.** Attractive pastel gunmetal-blue and almond-gold patina invigorates this flashy high grade specimen. A few pinpoint flecks fail to deny the eye appeal. Struck from moderately rotated dies. NGC ID# 278Z, PCGS# 3996

- 3988 1937 PR67 NGC.** Sharply struck with a powerful gleam. This final-year Buffalo nickel proof has just a hint of golden color over otherwise white surfaces. NGC has graded just 40 pieces as PR68 or finer (6/13). NGC ID# 278Z, PCGS# 3996

1937 Five Cent, PR67+ Stunning Second-Year Proof Buffalo

- 3989 1937 PR67+ PCGS. CAC.** This fully struck proof displays blatant eye appeal, a combination of the great luster, untroubled surfaces, and lovely color comprising pinkish-gold centers accented with pale lilac-blue near the rims. A stunning example of this second-year proof issue. Population: 19 in 67+, 13 finer (6/13). NGC ID# 278Z, PCGS# 3996

1937 Buffalo Nickel, Subtly Toned PR67+

- 3990 1937 PR67+ PCGS. CAC.** The 1937 is the second and final year of issue for the later-date proof Buffalo nickels. This is year most often chosen for type purposes as the entire mintage was of the brilliant variety, whereas the 1936 is divided between Satin and Brilliant Finishes. The fields on this piece show the usual deep reflectivity and each side has a light accent of pale rose and lilac iridescence. The + designation suggests what in-person inspection confirms: The surfaces are carbon-free and essentially perfect. Ex: Long Beach Signature (Heritage, 9/2010), lot 3552. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3991 1939 Doubled MONTICELLO MS65 PCGS. CAC. FS-801.** This sharply detailed Gem shows broad doubling on the letters in MONTICELLO and FIVE CENTS, with vibrant mint luster and a few hints of gold and lavender toning. Population: 50 in 65, 37 finer (5/13). PCGS# 4004

- 3992 1943-P Doubled Die Obverse MS65 Full Steps PCGS. FS-106.** The obverse legends and Jefferson's eye are clearly die doubled on this popular *Guide Book* variety. A lightly toned and highly lustrous Gem with a sharp impression on the steps and only trivial field grazes. Population: 10 in 65 Full Steps, 16 finer (6/13). PCGS# 84174

1945 Doubled Die Reverse Nickel FS-801, MS66, *Guide Book* Variety

- 3993 1945-P Doubled Die Reverse MS66 PCGS. FS-801.** Strong die doubling is visible on CELLO and CENTS. A scarce and significant *Guide Book* variety whose value in the highest grades has soared in recent years due to competitive Registry collectors. The present nicely struck Premium Gem is void of post-strike marks and displays faint olive-green toning. Population: 22 in 66 (3 in 66+), 0 finer (6/13). PCGS# 4173

**1949-D Jefferson Nickel, MS67
Five Full Steps**

- 3994 1949-D MS67 Five Full Steps NGC.** This magnificent Superb Gem Jefferson nickel features well-detailed design elements, with five full steps visible on Monticello. Vibrant mint luster is evident on both sides, with a few wisps of pale gold toning. Census: 2 in 67 Full Steps, 0 finer (6/13). NGC ID# 22UC, PCGS# 84038

**1954-S Nickel, MS64 Full Steps
Series Strike Rarity**

- 3995 1954-S MS64 Full Steps PCGS.** A noted rarity within the Jefferson nickel series, the 1954-S with Full Steps designation is a coin more talked about than seen. This near-Gem is one of 14 in 64 Full Steps at PCGS with nine finer (5/13). Only the lowest step on Monticello appears to show some merging, leaving a clear five steps. The surfaces are a pretty pinkish-gray with a few stray marks below Monticello (the building and the legend) consistent with the MS64 grade level. NGC ID# 22UU, PCGS# 84054

**1955-D/S Nickel, MS66
FS-501 Guide Book Variety**

- 3996 1955-D/S MS66 PCGS. FS-501.** The San Francisco Mint ceased coinage in 1955. Leftover mintmarked nickel dies were overmintmarked and dispatched to Denver. FS-501 is the most prominent variety among those, since it shows the curve of the S within the D. It is the die variety listed in the Guide Book. Lustrous and essentially immaculate with light straw-gold toning and a typical strike. NGC ID# 22UX, PCGS# 4058

PROOF JEFFERSON NICKELS

- 3997 1954 PR67 Deep Cameo PCGS.** A brilliant Superb Gem Deep Cameo proof, this 1954 Jefferson has impressive contrast with lustrous nickel-gray devices and deeply mirrored fields. Faint champagne toning enhances the eye appeal. Population: 12 in 67 Deep Cameo, 7 finer (6/13). NGC ID# 27A7, PCGS# 94186
- 3998 1955 PR68 Deep Cameo PCGS.** The 1955 Jefferson nickel proofs seldom are seen with such strong contrast. Both sides are practically black-and-white with only tiny imperfections. Population: 25 in 68 Deep Cameo, 0 finer (6/13). NGC ID# 22YF, PCGS# 94187
- 3999 1971 No S PR68 Cameo NGC.** A moderately contrasted and minimally toned specimen of this famous "No S" nickel proof. Only minor imperfections are visible under magnification. NGC ID# 22YN, PCGS# 84204

**1971 No S Nickel, PR69 Cameo
None Finer at PCGS**

- 4000 1971 No S PR69 Cameo PCGS.** When proof production was transferred from Philadelphia to San Francisco in 1968, a new type of error was introduced. That was the proof issue without a mintmark. Similar errors could happen on business strike issues, but prior to the introduction of P mintmarks in Philadelphia, such errors would have been impossible to authenticate. This nearly perfect proof has faint peripheral gold toning on its brilliant black-and-white proof surfaces with extraordinary eye appeal. Population: 10 in 69, 0 finer (6/13). NGC ID# 22YN, PCGS# 84204
- 4001 1977-S PR70 Deep Cameo PCGS.** Gold-tinged overall with occasional peek-throughs of nickel-white. Contrast remains absolute and the surfaces are perfectly preserved. An all-around great coin. Population: 32 in 70 Deep Cameo (6/13). NGC ID# 27AR, PCGS# 94210
- 4002 1979-S Type Two PR70 Deep Cameo PCGS.** A delicate yellow tint settles over the fields, while the devices remain more resolutely frost-white. Well-defined and perfectly preserved with the mintmark as clear as could be desired on a Type Two coin. Population: 33 in 70 Deep Cameo (6/13). NGC ID# 22YR, PCGS# 94213

**1981-S Type Two Nickel, PR70 Deep Cameo
Elusive Variety in Top Grade**

4003 1981-S Type Two PR70 Deep Cameo PCGS. The two mintmark styles present in the 1981 proof sets created an instant variety for each denomination, the Type Two being considerably more elusive. The 1981-S nickel Type Two is seldom seen in our auctions, but when they appear in PR70 Deep Cameo they bring around \$3,000. This example is perfection in every way, untuned and thoroughly contrasted. Population: 13 in 70 Deep Cameo (6/13). NGC ID# 22YT, PCGS# 94216

4004 1982-S PR70 Deep Cameo PCGS. Excellent contrast with significant golden aspects yet appreciable black-and-white effects as well. Technically perfect and a great coin for the Registry collector. Population: 20 in 70 Deep Cameo (6/13). NGC ID# 27AW, PCGS# 94217

4005 1984-S PR70 Deep Cameo PCGS. Amazing contrast appears on both sides of this Superb light gray specimen. The fields have unlimited depth and the devices of brilliant frost. Population: 23 in 70 Deep Cameo (6/13). NGC ID# 27AY, PCGS# 94219

**1986-S Nickel, PR70 Deep Cameo
Few at This Grade Level**

4006 1986-S PR70 Deep Cameo PCGS. Notwithstanding the mintage of more than 3 million proof sets for 1986, the vast majority of survivors fall short of perfection and Deep Cameo designation, in particular. Not so this untuned and pristine example, a prize no doubt destined for a fine Registry Set. Stark contrast is set off by the mark-free surfaces. Population: 15 in 70 Deep Cameo (6/13). NGC ID# 27B2, PCGS# 94221

MERCURY DIMES

4007 1916-D VG8 NGC. An evenly worn example of this first-year key, with attractive champagne-gold and ice-blue patina. This coin retains all major design elements in outline and much interior detail is still intact. NGC ID# 23GY, PCGS# 4906

**1916-D Dime, VF20
Key Mercury Issue**

4008 1916-D VF20 PCGS. Medium golden-tan toning adheres to both sides of this key-date Mercury dime, each side displaying well defined design elements. A couple of obverse marks are consistent with a coin that has seen moderate circulation. This piece will fit comfortably in a medium-grade collection. NGC ID# 23GY, PCGS# 4906

4009 1921 MS63 Full Bands NGC. Unprecedented mintages of silver dollars in 1921 caused the Mint to neglect other silver denominations and created semikeys such as the 1921 dime. The present lustrous stone-gray example is unabraded and well struck. NGC ID# 23HE, PCGS# 4935

**1928 Mercury Dime, MS67 Full Bands
Only One Certified Finer**

4010 1928 MS67 Full Bands PCGS. CAC. Although considered a common date, experience dictates that the 1928 Mercury dime is quite scarce in higher grades. This Superb Gem has brilliant silver luster beneath intermingled violet, blue, green, champagne, and gold toning, especially vivid on the obverse. Population: 30 in 67 (2 in 67+) Full Bands, 1 finer (6/13). NGC ID# 23HX, PCGS# 4967

4011 1929-S MS66 Full Bands PCGS. CAC. Pale cream and blue overtones grace this Full Bands Premium Gem. Excellent detail and eye appeal. PCGS has graded only 34 finer Full Bands coins (6/13). NGC ID# 23J4, PCGS# 4977

4012 1931 MS66 Full Bands PCGS. CAC. A sharply detailed Mercury dime with Full Bands definition, this attractive Premium Gem displays vibrant mint luster and shades of golden-brown and violet toning. Population: 66 in 66 Full Bands, 13 finer (6/13). NGC ID# 23J7, PCGS# 4983

4013 1931-D MS66+ Full Bands PCGS. A stunning Premium Gem with bold design motifs, this piece has light champagne toning over highly lustrous and frosty silver surfaces. PCGS has only certified 49 finer examples (6/13). NGC ID# 23J8, PCGS# 4985

4014 1938-S MS67+ Full Bands PCGS. CAC. A stunning Superb Gem with a sharp strike showing full bands on the reverse. This brilliant and untuned silver dime has excellent eye appeal, and is rarely found better. PCGS has only certified six finer examples (6/13). NGC ID# 23JP, PCGS# 5015

- 4015 1942/1 AU53 ANACS. FS-101.** This partly lustrous key date dime displays lightly dappled golden-brown and aquamarine toning. The bands and other high points show slight wear and a loupe reveals minor hairlines. NGC ID# 23K4, PCGS# 5036
- 4016 1942-D MS68 Full Bands PCGS.** Beautiful cherry-red, forest-green, and orange-gold toning occupies much of the obverse. The reverse displays similar colors but they are chiefly confined to the right margin. Population: 23 in 68 Full Bands, none finer (6/13). NGC ID# 23K5, PCGS# 5039
- 4017 1944 MS67 Full Bands PCGS.** Delicate milky-tan toning in the periphery is barely noticeable on this virtually brilliant Superb Gem. Dazzling satiny luster highlights the razor-sharp design elements. NGC and PCGS combined have certified just two Full Bands examples finer. Population: 82 in 67 Full Bands, 1 finer (6/13). NGC ID# 23KB, PCGS# 5051
- 4018 1944 MS67 Full Bands PCGS. CAC.** A brilliant and sharply struck Superb Gem, this issue is a common date but rarely found so fine. Both sides are untuned with frosty silver luster. Population: 82 in 67 Full Bands, 1 finer (6/13). NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIMES

- 4019 1936 PR64 PCGS. CAC.** This Choice key date proof has a needle-sharp strike and dusky walnut-brown toning on the reverse. The obverse shows only a hint of straw-gold color, along with a few slight russet streaks. NGC ID# 27DG, PCGS# 5071
- 4020 1936 PR65 NGC.** This impressive Gem displays deeply mirrored fields and sharply detailed design elements throughout. Virtually pristine surfaces add to the intense visual appeal. NGC ID# 27DG, PCGS# 5071

1942 Mercury Dime, PR68 Last Proof Mercury Dime

- 4021 1942 PR68 PCGS.** Proof coinage was suspended after 1942 because of wartime economic demands. Accordingly, the 1942 issue represents the last proof Mercury dime. This virtually perfect example is sharply detailed and deeply mirrored, with just a hint of pale gold toning. Population: 44 in 68 (1 in 68+), 0 finer (6/13). NGC ID# 27DN, PCGS# 5077

PROOF ROOSEVELT DIMES

- 4022 1983 No S PR69 Deep Cameo PCGS.** The last of the No S proof dime issues, seen here as a near-perfect specimen with flawless contrast. A green-gold overtone lends color to each side, particularly at the margins. NGC ID# 27FJ, PCGS# 95265
- 4023 1983 No S PR69 Ultra Cameo NGC.** A near-perfect specimen of a variety popular for its famous imperfection, the missing "S" mintmark. Practically untuned with excellent contrast. NGC ID# 27FJ, PCGS# 95265
- 4024 1983 No S PR69 Deep Cameo PCGS.** This was the last time a mintmark was not added to a proof coin, and it is a relatively obtainable No-S striking. This is a splendid, deeply mirrored example with thick mint frost over the devices. Near-perfect quality. Brilliant throughout. NGC ID# 27FJ, PCGS# 95265

STANDING LIBERTY QUARTERS

1916 Quarter, Good 6 Standing Liberty Rarity

- 4025 1916 Good 6 PCGS.** Just enough of the date is still visible for positive identification, although this rarity can be identified even without a visible date. This piece is entirely natural with light to medium gray surfaces, exhibiting full obverse and reverse rims. An important opportunity for the budget-minded collector. NGC ID# 242Y, PCGS# 5704
- 4026 1917 Type One MS66 Full Head PCGS.** An excellent type coin for the collector who prefers a touch of toning. Primarily pearl-gray surfaces have gold, blue, and violet overtones that are deepest at the margins. NGC ID# 242Z, PCGS# 5707
- 4027 1917-D Type One MS66 PCGS.** This well-detailed Premium Gem displays vibrant mint luster and delicate shades of champagne-gold and lavender toning. Population: 20 in 66 (3 in 66+), 3 finer (5/13). NGC ID# 2432, PCGS# 5708
- 4028 1917-S Type One MS64 NGC.** Autumn-gold and jade-green embrace the lower obverse but a majority of this lustrous near-Gem is brilliant. Lustrous, well struck, and unabraded aside from a small mark on Liberty's jaw. NGC ID# 2433, PCGS# 5710
- 4029 1917-S Type One MS64 PCGS. CAC.** This lustrous and refreshingly unabraded San Francisco quarter has a nice strike, although the shield rivets and the center of the head show minor blending. Only faintly toned aside from a small reverse spot at 6 o'clock. NGC ID# 2433, PCGS# 5710

1917-S Type One Quarter, MS66 Full Head Short-Lived Design Type

- 4030 1917-S Type One MS66 Full Head PCGS.** This spectacular Premium Gem represents the final year of the short-lived Type One design. The design elements are sharply rendered, with Full Head definition and fine detail on the shield rivets. The well-preserved surfaces radiate vibrant mint luster under delicate shades of pale gold toning. Population: 73 in 66 (3 in 66+) Full Head, 10 finer (5/13). NGC ID# 2433, PCGS# 5711
- 4031 1917-S Type Two MS64 Full Head PCGS. CAC.** Rich golden-brown toning graces both sides, though the obverse is especially colorful. This lustrous near-Gem is unabraded save for a thin line beneath the front wing. NGC ID# 2436, PCGS# 5719
- 4032 1918 MS66 PCGS.** This well-detailed Premium Gem falls just short of Full Head definition but shows better-than-average detail on the shield rivets. The unmarked surfaces are brilliant and brightly lustrous. Population: 23 in 66 (1 in 66+), 1 finer (5/13). NGC ID# 2437, PCGS# 5720

**1918-D Quarter, MS65 Full Head
Strong Shield Details**

- 4033 1918-D MS65 Full Head PCGS.** In addition to the Full Head details, most of the shield rivets are also boldly defined, save for two or three weak rivets at about 7 o'clock on the shield border. This Gem has faint champagne toning on its brilliant and frosty silver surfaces. Population: 53 in 65 (1 in 65+) Full Head, 19 finer (6/13). NGC ID# 2438, PCGS# 5723

- 4034 1918-S MS66 NGC.** A radiant and brilliant Premium Gem, with minor striking softness noted on a few areas of the design. Well-preserved and nearly blemish-free, save for a tiny milling mark on the upper left reverse, just below N in UNITED. Census: 23 in 66, 6 finer (5/13). NGC ID# 2439, PCGS# 5724

- 4035 1918-S MS64 Full Head PCGS.** Medium butter-gold shades embrace this lightly abraded and lustrous branch mint quarter. Liberty's head is well struck though the top of the date shows softness. Boldly clashed above the eagle's wings. NGC ID# 2439, PCGS# 5725

**1918/7-S Quarter, VF Details
Clear Overdate**

- 4036 1918/7-S — Cleaning — PCGS Genuine. VF Details. FS-101.** All four date digits are distinct, and the downstroke of the 7 is blatant within the 8. This stone-gray key date quarter has been dipped and we note a thin vertical mark through the Y in LIBERTY. Much design detail remains, particularly on the top of the shield and the eagle's front wing. NGC ID# 243A, PCGS# 5726

- 4037 1920-D MS62 Full Head NGC.** A well-detailed example of this popular issue, with Full Head definition and just a touch of softness on the shield rivets. This coin displays vibrant mint luster and a few hints of pale gold toning. Census: 14 in 62 Full Head, 58 finer (5/13). NGC ID# 243E, PCGS# 5737

- 4038 1923 MS67 NGC.** A spectacular Superb Gem, with well-detailed design elements that fall just short of Full Head definition and especially vibrant brilliant surfaces. Census: 46 in 67 (1 in 67+), 0 finer (5/13). NGC ID# 243J, PCGS# 5742

- 4039 1923 MS67 PCGS. CAC.** Delicate gold and iridescent toning appears at the borders of this Superb Gem. Both sides have frosty silver luster and sharp design details. In fact, this example just missed the Full Head designation, and has every shield rivet visible. Population: 16 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 243J, PCGS# 5742

- 4040 1923-S AU58 PCGS. CAC.** Only the slightest trace of wear is evident on the well-detailed design elements of this near-Mint Standing Liberty quarter, and the lustrous surfaces show delicate shades of champagne-gold patina. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS63
'Sunrise' Toning Behind Liberty's Head**

- 4041 1923-S MS63 NGC.** A light green-to-gold overtone covers much of each side, while the obverse has an arc of peach on either side of Liberty's partially detailed head. This lightly abraded example comes from a mintage of only 1.36 million pieces, and MS63 is the last grade before the issue becomes conditionally scarce. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS64 Full Head
Elusive Full Head Specimen**

- 4042 1923-S MS64 Full Head NGC.** The 1923-S quarter is scarce in all grades, and Full Head examples are seldom encountered. Only a little over one-fourth of 1923-S submissions to NGC have the Full Head designation, compared to nearly 40% across the entire series. This brilliant and frosty silver specimen shows the usual weakness of the shield border. There is no toning on either side of this near-Gem. NGC ID# 243K, PCGS# 5745

- 4043 1924 MS65 Full Head PCGS. CAC.** This well-detailed Gem shows just a touch of softness on the central obverse but Liberty's head shows full definition. The lustrous surfaces display hints of pale gold toning. Population: 71 in 65 Full Head, 42 finer (5/13). NGC ID# 243L, PCGS# 5747

**1924 Quarter, MS66 Full Head
Peripheral Obverse Toning**

- 4044 1924 MS66 Full Head PCGS.** The obverse of this Premium Gem Full Head quarter exhibits frosty silver luster with central brilliance and peripheral iridescence including gold, russet, and gunmetal-blue. The reverse is essentially untuned with a faint trace of lilac at the border. Population: 33 in 66 (1 in 66+) Full Head, 9 finer (6/13). NGC ID# 243L, PCGS# 5747

**1926 Quarter, MS66 Full Head
Only Two Finer at PCGS**

- 4045 1926 MS66 Full Head PCGS. CAC.** Despite its common date status, the 1926 quarter is uncommon with full head details. This brilliant Premium Gem has bright silver surfaces with satin luster and trivial splashes of golden-brown toning. Population: 34 in 66 (3 in 66+) Full Head, 2 finer (6/13). NGC ID# 243R, PCGS# 5755

- 4046 1926-S MS63 PCGS.** A typical strike for this much more difficult S-mint quarter. Splashes of antique-gold and blue toning are seen on each side. NGC ID# 243T, PCGS# 5758

- 4047 1927-S XF45 ANACS.** A Choice XF example of this low-mintage key, with lightly worn design elements and traces of mint luster on the lightly abraded surfaces. From a mintage of just 396,000 pieces. NGC ID# 243W, PCGS# 5764

- 4048 1928 MS65 Full Head PCGS. CAC.** This delightful Gem exhibits Full Head definition but shows just a touch of softness on a few of the shield rivets. The well-preserved brilliant surfaces radiate vibrant mint luster. Population: 81 in 65 (1 in 65+) Full Head, 45 finer (5/13). NGC ID# 243X, PCGS# 5767

**1928 Quarter, MS66 Full Head
Lustrous and Well-Preserved**

- 4049 1928 MS66 Full Head PCGS. CAC.** This delightful Premium Gem displays Full Head definition and well-detailed design elements in other areas, with just a touch of incompleteness on the shield rivets. Vibrant mint luster is present on both sides, with areas of sea-green, violet, and amber toning. No mentionable distractions are noted and eye appeal is outstanding. Population: 40 in 66 (3 in 66+) Full Head, 5 finer (6/13). NGC ID# 243X, PCGS# 5767

- 4050 1929-S MS66+ PCGS. CAC.** This virtually brilliant high grade quarter displays potent luster. The obverse is pristine and the reverse exhibits only wispy marks. The head is well defined but lacks an earhole beneath the sprig. NGC ID# 2444, PCGS# 5776

- 4051 1930 MS66+ Full Head PCGS. CAC.** An impressive Premium Gem with full head details, this piece has ivory luster with peripheral gold toning. PCGS has only certified 32 finer examples (5/13). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

- 4052 1932-D MS62 PCGS.** This snow-white key date quarter possesses pleasing luster and a sharp strike. The obverse field and Washington's cheek display grazes but marks are minor overall for the MS62 level. NGC ID# 2448, PCGS# 5791

- 4053 1932-D MS64 PCGS.** Antique-gold, green, and blue hues enrich this near-Gem with softly swirling luster. A first-year Washington quarter key, the 1932-D is available for a price in MS64 but scarce any better. NGC ID# 2448, PCGS# 5791

- 4054 1932-S MS64 PCGS. CAC.** Shades of amber, gray, and pale gold toning visit the lightly marked surfaces of this impressive Choice Washington quarter, from the first year of the design. The 1932-S claims the lowest mintage of the series. NGC ID# 2449, PCGS# 5792

**1932-S Washington Quarter, MS65
Key, Low-Mintage Issue**

- 4055 1932-S MS65 PCGS.** Bright cartwheel surfaces show an occasional dash of light color when examined under a glass. Exceptionally bright, frosty mint luster saturates both sides of this lovely, problem-free Gem example of a low-mintage first-year issue. PCGS has only graded four coins in higher numeric grade (5/13).

Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6097. NGC ID# 2449, PCGS# 5792

**1934-D Quarter, MS66
Medium Motto**

- 4056 1934-D Medium Motto MS66 PCGS.** From a smallish mintage of 3.5 million pieces, the 1934-D Washington quarter is not readily available in high grade, and Premium Gem examples are very scarce. This well-detailed Premium Gem displays vibrant mint luster across smooth stone-gray, plum-mauve, and jade-green surfaces. Population: 89 in 66 (6 in 66+), 5 finer (6/13). NGC ID# 244C, PCGS# 5796

- 4057 1935-S MS66+ PCGS. CAC.** Areas of deep toning appear along large portions of the outer edges of this high-end Premium Gem. The hues include red-brown, cherry, bright orange, and lemon along with scattered gray freckles. The obverse is immaculate and the reverse displays only inconsequential imperfections. NGC ID# 244F, PCGS# 5799

- 4058 1935-S MS67 NGC.** Medium orange-gold and aquamarine toning visits lustrous and unabraded surfaces. The low-mintage 1935-S is collectible in Mint State but Superb Gems are undeniably rare. Census: 33 in 67, 0 finer (5/13). NGC ID# 244F, PCGS# 5799

- 4059 1936-D MS65 PCGS.** Quarter specialists may want to take a close look at the mintmark on this Gem. Both sides have frosty silver luster, the obverse showing light gold toning, the reverse is brilliant and untuned. NGC ID# 244H, PCGS# 5801
- 4060 1936-D MS66 PCGS.** This frosty Premium Gem exhibits a bold strike for the issue, with brilliant silver surfaces and wisps of champagne toning. PCGS has only certified 11 finer examples (6/13). NGC ID# 244H, PCGS# 5801
- 4061 1936-S MS67 NGC.** Rich peach and blue toning with a few dabs of claret makes for delightful viewing on this lustrous Superb Gem. Though the strike is a trifle soft, the overall eye appeal is intense. Conditionally rare this fine. NGC ID# 244J, PCGS# 5802
- 4062 1937 MS67 NGC.** One of the finest surviving examples of this early series issue, this spectacular Superb Gem displays vibrant mint luster and sharply detailed design elements with outstanding eye appeal. Census: 61 in 67, 0 finer (6/13). NGC ID# 244K, PCGS# 5803

**1937-D Quarter, MS67
Deep Pastel Toning**

- 4063 1937-D MS67 PCGS. CAC.** This deeply toned Superb Gem has frosty underlying luster visible beneath gray-gold surfaces. Both sides have peripheral gold toning with additional obverse iridescence. This piece is tied for the finest that PCGS or NGC have graded. Population: 37 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 244L, PCGS# 5804

**1937-D Washington Quarter, Superb Gem
Light Peripheral Toning**

- 4064 1937-D MS67 PCGS. CAC.** Toning encircles both sides of this Superb Gem, with the colors more pronounced on the obverse. Shades of aqua, red, and golden-apricot appear. The mint luster further enhances the visual appeal of this impressively preserved example. This coin is tied for numerically finest certified at both PCGS and NGC (5/13). NGC ID# 244L, PCGS# 5804
- 4065 1938-S MS67 PCGS.** Light wheat-gold toning adorns this highly lustrous and nearly pristine Superb Gem. Among the lowest mintage issues, and seldom encountered in the present quality. Population: 38 in 67 (2 in 67+), 0 finer (6/13). NGC ID# 244P, PCGS# 5807
- 4066 1938-S MS67 PCGS.** Substantial gold, orange, and rust elements appear at the margins of the obverse, while the reverse has a mere dusting of yellow over silver. Softly struck as usual but remarkably abrasion-free. Population: 38 in 67 (2 in 67+), 0 finer (5/13). NGC ID# 244P, PCGS# 5807

- 4067 1938-S MS67 PCGS.** A satiny Superb Gem, this 1938-S quarter has distinct blue-green, gold, and iridescent toning with sharp design details. Population: 38 in 67 (2 in 67+), 0 finer (6/13). NGC ID# 244P, PCGS# 5807

**1939-S Washington Quarter, MS67
Low-Mintage Better Date**

- 4068 1939-S MS67 PCGS.** A spectacular Superb Gem, from a small mintage of 2.6 million pieces, this delightful coin displays brilliant surfaces, with just a touch of champagne-gold on the obverse, and vibrant mint luster on both sides. The design elements are sharply detailed throughout and there are no visible signs of contact. Population: 32 in 67, 0 finer (5/13). NGC ID# 244T, PCGS# 5810

**1939-S Washington Quarter, MS67
None Certified Finer at PCGS**

- 4069 1939-S MS67 PCGS.** The 1939-S Washington quarter is seldom encountered at the MS67 level, and the issue is unknown in higher numeric grades. This spectacular Superb Gem displays sharply detailed design elements and vibrant mint luster on both sides. The pristine surfaces show a few hints of golden-tan toning. Population: 32 in 67, 0 finer (6/13). NGC ID# 244T, PCGS# 5810
- 4070 1940-D MS67 ★ NGC.** An early Star-designated piece with an asterisk in place of the more familiar five-pointed star. The multicolored obverse has dominant fields of bright yellow-to-orange, while the reverse is lightly toned blue. A real eye-catcher. NGC ID# 244V, PCGS# 5812
- 4071 1940-S MS67 PCGS. CAC.** Toning in a variety of attractive shades appears on both sides of this Superb Gem, primarily at the peripheries. The colors include lemon-yellow, golden-orange, cherry, violet, and sage-green. Population: 55 in 67 (3 in 67+), 1 finer (5/13). NGC ID# 244W, PCGS# 5813
- 4072 1941-D MS67 NGC. CAC.** The design elements of this impressive Superb Gem are sharply detailed and the brightly lustrous surfaces are patinated in shades of russet, gold, and amber, with most of the color on the obverse. NGC has graded no coins in numerically finer grades (5/13). NGC ID# 244Y, PCGS# 5815
- 4073 1941-S MS67 PCGS Secure.** Just over 16 million pieces were struck for the 1941-S quarter, which is scarce in Superb Gem and unavailable in MS68 and better grades (6/13). Powder-blue and tan-gold outer toning gives way to strongly lustrous silver centers. NGC ID# 244Z, PCGS# 5816

4074 1942 MS67 PCGS. While circulation strikes of the 1942 are plentiful, none have been certified finer than MS67. This is an impressive example that is draped in multicolored iridescence on the obverse, and contrasting brilliance on the reverse. The obverse toning does nothing to diminish the thick underlying mint luster. NGC ID# 2452, PCGS# 5817

4075 1944-D MS67 PCGS. CAC. Dusky peach and orange crescents appear at left on both sides of this Superb Gem from the World War II years. The strike shows softness on the obverse, but the reverse is better-defined than often seen. Population: 86 in 67 (5 in 67+), 1 finer (5/13). NGC ID# 2459, PCGS# 5825

4076 1944-D MS67+ PCGS. CAC. Dappled gold and jade-green patina covers this highly lustrous high-grade Superb Gem example. Minor die cracks appear on Washington's forehead and cheek. The coin displays only a couple of minuscule contact marks. Population: 86 in 67 (5 in 67+), 1 finer (5/13). NGC ID# 2459, PCGS# 5825

**1944-S Quarter, MS67+
Outstanding Preservation**

4077 1944-S MS67+ PCGS. CAC. Knob S. Dashes of ocean-blue visit the borders, particularly near the BER in LIBERTY, but this lustrous and pristine Superb Gem is lightly toned overall. Rolls of 1944-S quarters were saved but few survivors can match the quality of the present piece. Population: 99 in 67 (7 in 67+), 3 finer (6/13). NGC ID# 245A, PCGS# 5826

4078 1946-S MS67+ PCGS Secure. The 1946-S is a popular post-war issue with a relatively low mintage of only 4.2 million pieces struck. This example displays thick mint frost, and the rims are irregularly toned in shades of deep russet-golden with off-center areas of brilliance. NGC ID# 245G, PCGS# 5832

**1946-S/S Quarter, FS-501
MS67+, Single Finest at PCGS**

4079 1946-S/S MS67+ PCGS. CAC. FS-501. Jade-green and cherry-red toning fill both sides though the obverse is especially colorful. A spur from the left end of the upper curve of the S identifies this popular variety. A secondary mintmark is also evident within the upper loop. This lustrous Superb Gem undoubtedly ranks among the finest known examples. PCGS# 5973

**1947 Quarter, MS67+
Only Two at PCGS**

4080 1947 MS67+ PCGS. CAC. This pristine Superb Gem is tied for the finest that PCGS or NGC have certified. Only two MS67 examples at PCGS have earned the Plus (+) designation. This piece has delicate gold and iridescent toning over frosty silver luster. Population: 61 in 67 (2 in 67+), 0 finer (6/13). NGC ID# 245H, PCGS# 5833

4081 1948-D MS67 PCGS. CAC. Ex: Patrick Mullen Collection. Milky silver-gray patina yields to speckled coppery-gold and colorful rainbow iridescent toning here and there about the margins. This nearly unimprovable 1948-D was probably housed in an album for many years. Population: 32 in 67 (2 in 67+), 0 finer (5/13). Ex: FUN Signature (Heritage, 1/2004), lot 6437. NGC ID# 245M, PCGS# 5837

4082 1949 MS67 PCGS. The 1949 is a lower mintage P-mint quarter with only 9.3 million pieces produced. This is an exceptionally attractive example that irregular golden-brown and pale blue toning around part of the margins on each side. The mint luster is thick and frosted with no obvious marks (nor would any be expected on an MS67). Population: 45 in 67 (4 in 67+), 1 finer (5/13). NGC ID# 245P, PCGS# 5839

4083 1949 MS67 PCGS. CAC. An impressive Superb Gem Washington quarter, this satin specimen exhibits brilliant luster beneath splashes of deep gold and pale gray toning. Population: 45 in 67 (4 in 67+), 1 finer (6/13). NGC ID# 245P, PCGS# 5839

**1950-D/S Quarter, MS65+
Strong Undermintmark**

4084 1950-D/S MS65+ NGC. FS-601. Dies were shipped freely between Denver and San Francisco in 1950, resulting both D/S and S/D mintmarks. These overmintmarks were not discovered until years after minting, and higher grade examples can be difficult to locate. This is a brightly lustrous piece with just the faintest trace of color on each side. NGC ID# 245U, PCGS# 5843

**1950-S/D Quarter, MS67
FS-601, Key Overmintmark Variety**

- 4085 1950-S/D MS67 NGC. FS-601.** One of only two overmintmarks in the Washington quarter series. The other (a 1950-D/S variety) was made the same year, which suggests inexperience on the part of an unknown Philadelphia Mint worker in 1950. The highly lustrous surfaces are gently toned in honey and ice-blue hues. There are no abrasions worthy of mention on either side. Census: 6 in 67, 0 finer (5/13).
Ex: St. Louis Signature (Heritage, 5/2005), lot 7833; Orlando FUN (Heritage, 1/2007), lot 4283, which realized \$3,680. NGC ID# 245V, PCGS# 5845

- 4086 1952-D MS67 W NGC.** While NGC no longer certifies coins as W for "White," this broadly lustrous and essentially untoned example fills the bill. Great luster, though the usual slight mushiness on the portrait is in evidence. NGC ID# 2462, PCGS# 5850

- 4087 1954-D MS67 NGC.** Faintly frosty and essentially "white" with only a few small milky areas on shimmering surfaces. Softly struck but impressively preserved for an issue that is genuinely rare in Superb Gem condition and unknown in MS68 or better in the combined certified population (6/13). NGC ID# 2468, PCGS# 5856

- 4088 1954-S MS67+ ★ NGC. CAC.** Rich toning appears at portions of the periphery on both sides of this example, particularly on the reverse. The hues include golden-yellow, cherry, fuchsia, kelly-green, and teal. This is the sole example to have earned the MS67+★ grade from NGC, with only two pieces having achieved higher numeric grades (5/13). NGC ID# 22FU, PCGS# 5857

1959-D Quarter, Richly Toned MS67

- 4089 1959-D MS67 PCGS Secure.** *Ex: Stella Colbert.* Fully toned in jade-green, fire-red, and plum-mauve shades. Coruscating luster sweeps nearly pristine surfaces. Those in search of the finest quality patinated 1959-D quarter need look no further. Population: 8 in 67, 0 finer (5/13). NGC ID# 246J, PCGS# 5867

- 4090 1962-D MS67 NGC.** Lightly gold-toned with hints of tan at the rims. Interiors show windows to near-pure silver-white. This later-date silver Washington quarter is a surprise condition rarity at the Superb Gem level. NGC ID# 246R, PCGS# 5873

- 4091 1964-D MS67 ★ NGC.** An eye-popping and essentially untoned example from the last official date for Denver silver quarters. Semiprooflike fields surround devices that show a few planchet depressions but surprisingly few post-striking faults. NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

- 4092 1936 PR64 PCGS. CAC.** The first proof Washington quarters were struck in 1936, with a mintage of just 3,837 pieces. This attractive Choice example displays sharply detailed design elements and moderately reflective fields, with a few hints of pale gold toning. NGC ID# 27HN, PCGS# 5975

- 4093 1952 PR68 W Cameo NGC.** The W in the grade designation stands for White and signifies that this coin is completely untoned. The design elements are sharply detailed and the pristine fields are deeply reflective. Census: 19 in 68 Cameo, 0 finer (5/13). NGC ID# 248X, PCGS# 85984

**1954 Quarter, PR68 Deep Cameo
Top-Grade Example**

- 4094 1954 PR68 Deep Cameo PCGS.** Deep Cameo examples of the 1954 proof quarter issue in high proof grades are seldom seen. This is one of only 16 Deep Cameo examples in PR68 at PCGS, which has never certified a PR68 Deep Cameo (5/13). The untuned surfaces offer ultimate contrast between frosty devices and inky-black fields, a prize for Registry Set collectors and the increasing numbers of aficionados of "modern" coinage. NGC ID# 27HY, PCGS# 95986

- 4095 1955 PR68 Deep Cameo PCGS.** A stunning example, this Superb Gem Deep Cameo proof is fully brilliant with white-silver surfaces and incredible eye appeal. Population: 22 in 68 Deep Cameo, 0 finer (6/13). NGC ID# 27HZ, PCGS# 95987

- 4096 1968-S PR69 Deep Cameo PCGS.** A hint of delicate gold toning appears on the light gray surfaces of this impressive Superb Gem Deep Cameo proof. First of the San Francisco proofs, this amazing quarter dollar has white-on-black contrast with exceptional eye appeal. Population: 26 in 69 Deep Cameo, 0 finer (6/13). NGC ID# 2495, PCGS# 96000

- 4097 1970-S PR69 Deep Cameo PCGS.** A virtually perfect Deep Cameo proof quarter, this Superb Gem has extraordinary contrast with delicate champagne toning. Population: 46 in 69 Deep Cameo, 0 finer (6/13). NGC ID# 2497, PCGS# 96002

PROOF STATEHOOD QUARTER

- 4098 1999-S Delaware Silver PR70 Deep Cameo PCGS.** The First State meant that the Delaware quarter was the first state quarter issued by the Mint. This silver representative is a perfect proof example with brilliant surfaces showing incredible contrast. NGC ID# 27M8, PCGS# 96043

WALKING LIBERTY HALF DOLLARS

- 4099 1916-D AU58 NGC. CAC.** Darkly toned in shades of dusky gray, blue-steel, and amber, this well-detailed near-Mint specimen features lightly abraded surfaces with a few traces of mint luster. NGC ID# 24PM, PCGS# 6567

- 4100 1916-D MS64 NGC.** Faint golden glimmers visit otherwise silver surfaces on this first-year near-Gem Walker from Denver. Detail is good overall with separation visible on Liberty's branch hand. NGC ID# 24PM, PCGS# 6567

4101 1916-D MS64 PCGS. CAC. Vibrant satiny mint luster radiates from both sides of this attractive Choice example, and the strike is better-than-average for an early series date. A few hints of pale gold and lavender toning accent the pleasing surfaces. NGC ID# 24PM, PCGS# 6567

4102 1916-S AU55 NGC. Among the lowest mintage issues of the series, the 1916-S was little saved in better grades due to a paucity of West Coast collectors. This stone-white representative has cartwheel sheen and only a trace of wear on the high points. NGC ID# 24PN, PCGS# 6568

4103 1917 MS66 PCGS. Delicate chestnut-toning graces lustrous and well struck matte surfaces. The fields are immaculate and the eagle displays only trivial contact. Population: 90 in 66, 3 finer (6/13). NGC ID# 24PP, PCGS# 6569

4104 1918-S MS63 NGC. The design elements show better-than-average detail for an early series Walker and the lightly marked surfaces display vibrant mint luster on both sides. A few specks of golden-tan toning are evident on the obverse. NGC ID# 24PX, PCGS# 6576

**1918-S Walker, Lustrous MS64
Well-Defined and Brilliant**

4105 1918-S MS64 PCGS. Swirling luster characterizes this attractive Choice example, one that displays above-average detail for the issue with significant definition on Liberty's hand and the flag. Subtle silver-gray patina graces the well-preserved fields, and only a few faint abrasions on Liberty's gown preclude a finer grade. All in all, a lovely example of this early Walker issue.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 1066. NGC ID# 24PX, PCGS# 6576

4106 1920-D AU53 PCGS. Considerable luster shimmers across this minimally abraded stone-gray Walker. A dash of tan-gold toning is noted on the front wing. Light wear on the eagle's breast confirms a short stint in circulation. A conditionally scarce early branch mint issue. NGC ID# 24R4, PCGS# 6581

4107 1923-S AU53 PCGS. Light silver surfaces host minimal, grade-consistent marks of little consequence. Light wear is noted on the high points of this still lustrous half dollar. A complete set of Walkers matched to this piece will provide the collector with several years on the hunt. NGC ID# 24R9, PCGS# 6586

1929-S Half Dollar, MS65 ★

4108 1929-S MS65 ★ NGC. CAC. Bright luster radiates from the color-free surfaces of this lovely Gem to which NGC has awarded the Star designation. An exacting strike imparts strong definition to the design features, including the gown lines and branch hand. Both sides exhibit impeccably preserved surfaces. NGC ID# 24RD, PCGS# 6590

**1935 Walker, Fully Struck MS67
Among the Finest Certified**

4109 1935 MS67 PCGS. The 1935 is not known as a rarity in the Middle Series of Walkers. However, only a few dozen pieces have been certified at the Superb Gem level, and only one coin is numerically finer (6/13). This is a highly lustrous example that is fully struck in all areas. Each side displays an even layer of golden-green patina. Exceptionally attractive. Population: 35 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 24RJ, PCGS# 6595

**1935 Half Dollar, MS67
Only One Numerically Finer**

4110 1935 MS67 PCGS. CAC. A stunning Superb Gem with a bold strike, sharp design definition, and a complete absence of toning. This brilliant white specimen exhibits frosty mint luster and will enjoy considerable demand from connoisseurs of the series. Population: 35 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 24RJ, PCGS# 6595

**1935 Half Dollar, MS67
Brilliant and Untoned**

4111 1935 MS67 PCGS. CAC. Only about one in a hundred 1935 half dollar submissions to PCGS are certified MS67. With the emphasis on submitting higher grade coins, that is quite a low number of Superb Gems. This example is frosty with brilliant silver luster and no evidence of toning. Both sides of this beauty are sharply defined. Population: 35 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 24RJ, PCGS# 6595

4112 1937 MS67 PCGS. Lightly frosted with pale golden layers over part of a silver-white base. This Superb Gem is well-defined for the date and carefully preserved. PCGS has graded only three pieces as MS68 or better (6/13). NGC ID# 24RR, PCGS# 6601

4113 1937-D MS66+ PCGS. CAC. Frosty silver luster is bright and beautiful. All-around preservation is impressive on this Depression-era D-mint half dollar that falls just shy of Superb Gem status. PCGS has graded only 41 numerically finer pieces (6/13). NGC ID# 24RS, PCGS# 6602

**1937-D Walking Liberty Half, MS67
None Finer at PCGS**

4114 1937-D MS67 PCGS. Sharply detailed in most areas, this delightful Superb Gem shows just a touch of the typical softness on the central obverse, but there is still noticeable separation between Liberty's thumb and fingers. The pristine fields radiate vibrant mint luster and show just a hint of pale gold toning. Population: 41 in 67, 0 finer (6/13). NGC ID# 24RS, PCGS# 6602

4115 1938 MS67 PCGS. Rich olive-green and powder-blue shades encompass this lustrous and well struck half dollar. Tiny marks on the sun and right reverse rim deny perfection. Population: 70 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 24RU, PCGS# 6604

4116 1938 MS67 PCGS. Long overshadowed by its Denver mint counterpart, the 1938 from Philadelphia is an underrated issue in the Middle Series. This is among the finest. The surfaces are brilliant and radiate bright mint luster. Fully struck and nearly abrasion-free. Population: 70 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 24RU, PCGS# 6604

4117 1938-D MS66 PCGS. The 1938-D has the lowest mintage among late-date Walkers and is avidly sought by collectors. This Premium Gem displays rich luster, well struck design features, and pleasing surfaces. A few marks are present on Liberty's head. NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, MS66+
Low-Mintage Key Issue**

4118 1938-D MS66+ PCGS. CAC. A frosty and brilliant silver example of the low mintage key to the late date series of Walking Liberty half dollars, this example features a sharp strike and pristine surfaces showing no toning on either side. PCGS has only certified 33 finer examples of this issue (6/13). NGC ID# 24RV, PCGS# 6605

4119 1939-S MS67 PCGS. CAC. This magnificent Superb Gem is sharply detailed in most areas, with just a touch of the usual softness on Liberty's hand. The pristine surfaces radiate vibrant mint luster and eye appeal is tremendous. PCGS has graded no coins in higher numeric grades (5/13). NGC ID# 24RY, PCGS# 6608

4120 1939-S MS67 PCGS. CAC. This crisply struck Superb Gem exhibits medium caramel-gold toning. Immaculate and thoroughly lustrous. Remarkable quality for this end-of-depression issue. As of (6/13), only two pieces are certified finer, both as MS67+. NGC ID# 24RY, PCGS# 6608

4121 1939-S MS67 PCGS. CAC. CONECA DDO-001. IN GOD WE TRUST is nicely die doubled, as is Liberty's profile and the foliage near the R in LIBERTY. The rare variety is undesignated on the insert. Lustrous and beautifully preserved with medium butter-gold toning. NGC ID# 24RY, PCGS# 6608

4122 1940-S MS66 PCGS. CAC. Strike aside, the 1940-S is one of the best-produced of all Walking Liberty halves. The mint luster is always bright and thickly frosted, as seen here. This brilliant coin has just the slightest softness in the center of the obverse. NGC ID# 24S2, PCGS# 6610

4123 1941-D MS67 PCGS. CAC. This brightly lustrous Superb Gem displays well-detailed design elements and a few hints of pale gold toning, with spots of amber. PCGS has graded only one numerically finer example (6/13). NGC ID# 24S4, PCGS# 6612

4124 1941-D MS67 PCGS. CAC. The 1941-D is widely used for type purposes, and this piece shows why. The devices are fully struck, and the mint luster is thick across each side with a light layer of pastel toning. NGC ID# 24S4, PCGS# 6612

4125 1941-S MS66 PCGS. The most desirable issue within the 1941 to 1947 short set, the 1941-S is seldom acquired with such attractive toning as seen on the present Premium Gem. Bands of orange-gold and olive-green enrich the borders on both sides. Lustrous and pristine. NGC ID# 24S5, PCGS# 6613

4126 1941-S MS66 PCGS. A medium-gray base hosts dusky blue-to-green peripheral obverse hues that have a faint green-gold echo on the reverse. Softly struck through the centers but otherwise a pleasing short-set Premium Gem. PCGS has graded just seven examples as MS67 or better (6/13). NGC ID# 24S5, PCGS# 6613

4127 1942-S MS66 PCGS. CAC. Trumpet tail S. A virtually pristine Premium Gem with light sea-green and honey-gold toning near the borders. The strike is above average though the branch hand shows softness. NGC ID# 24S8, PCGS# 6617

4128 1944 MS67 PCGS. An exquisite Walking Liberty half dollar, this Superb Gem is sharply detailed with brilliant and frosty silver luster. No toning appears on either side. Population: 75 in 67 (3 in 67+), 1 finer (6/13). NGC ID# 24SC, PCGS# 6621

4129 1944 MS67 PCGS. An impressive Premium Gem, and rarely seen so fine, this Walking Liberty half dollar has subtle champagne toning on its brilliant silver surfaces. Population: 75 in 67 (3 in 67+), 1 finer (6/13). NGC ID# 24SC, PCGS# 6621

4130 1944 MS67 PCGS. CAC. A short-set Superb Gem with occasional hints of sky-blue against a light silver base. Delicately textured surfaces are close to mark-free, though the centers show a degree of the usual striking softness. NGC ID# 24SC, PCGS# 6621

4131 1944-D Hand-Engraved Initials MS67 PCGS. CAC. FS-901. This interesting variety was first reported by Heritage cataloger Brian Koller in the February 2, 2004 issue of *Coin World*. The designer's initials were lapped away during die preparation, then re-engraved on the reverse die by hand at the Mint. Untoned and lustrous with a bold strike and smooth surfaces. Population: 8 in 67, none finer (5/13). PCGS# 145790

4132 1944-S MS66 PCGS. CAC. Large S. Light wheat-gold toning adorns this highly lustrous and virtually immaculate half dollar. The strike is above average for the S-mint facility, especially on the skirt lines, though the cheek and branch hand show some softness. NGC ID# 24SE, PCGS# 6623

4133 1944-S MS66+ PCGS. CAC. Large S. An essentially pristine wartime Walker that provides potent luster and only a wisp of tan-gold toning. The branch hand is softly brought up but the strike is nonetheless above average for the San Francisco facility. NGC ID# 24SE, PCGS# 6623

4134 1945-D MS67+ PCGS. CAC. Cream and gold overtones are prominent on this carefully preserved short-set Denver half dollar. Decently detailed, though only a little of the thumb is visible on the branch hand. PCGS has graded five examples in MS67+ and none finer (6/13). NGC ID# 24SG, PCGS# 6625

4135 1946-S MS67 PCGS. Trumpet tail S. A virtually stone-white representative whose blazing luster and smooth surfaces confirm its lofty third party grade. Nicely struck given its S-mint origin, though the central skirt lines are incomplete. Population: 49 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 24SL, PCGS# 6629

**1946-S Half Dollar, Superb Gem
Crisp San Francisco Strike**

4136 1946-S MS67 PCGS. CAC. Knob S. Most San Francisco quarters from the 1940s are weakly struck on the high points of Liberty. However, the 1946-S was a better produced issue, and examples with good strikes are obtainable. The present Superb Gem has a sharp strike on the skirt lines and Liberty's head. The branch hand shows blending though the thumb is separated. The powder-blue and wheat-gold surfaces are lustrous and smooth. NGC ID# 24SL, PCGS# 6629

**1947 Half Dollar, MS67
Final Walking Liberty Half**

4137 1947 MS67 PCGS. A stunning Superb Gem, this 1947 Walking Liberty half dollar is tied for the finest certified by PCGS or NGC. Both sides have frosty silver luster with an ivory appearance. It is sharply struck with splashes of gold and russet on the obverse. The reverse is brilliant and untoned. Population: 40 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 24SM, PCGS# 6630

**PROOF WALKING LIBERTY
HALF DOLLARS**

1936 Half, Deeply Mirrored PR64

4138 1936 PR64 PCGS. Always popular as the first year of the resumption of proof coinage, and the lowest mintage in the series, this is an attractive example that shows remarkably bright reflectivity in the fields. The mirroring present on this piece is worthy of note because not all 1936 proof halves show pronounced reflectivity. Additionally, the coin displays light golden-brown patina, a bit deeper around the margins. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR64
Always Strong Demand**

4139 1936 PR64 PCGS. CAC. The obverse of this near-Gem proof has wispy champagne toning with fully and deeply mirrored fields visible through that toning. The reverse is virtually brilliant, showing a hint of dusky toning. Struck during the first year of Walking Liberty proof coinage, the 1936 is always in great demand. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR65
First Proof Walker**

4140 1936 PR65 NGC. The first proof issue of the Walking Liberty series, the 1936 claims a mintage of just 3,901 pieces. This attractive Gem exhibits razor-sharp definition on all design elements and deeply mirrored fields with outstanding eye appeal. Close inspection reveals no mentionable surface flaws. NGC ID# 27V4, PCGS# 6636

4141 1937 PR67+ PCGS. CAC. Medium caramel-gold and lime-green toning drapes this satiny and immaculate Superb Gem. Tiny russet freckles emerge when the piece is rotated at obscure angles. The second-lowest mintage of the proof series. As of (6/13), PCGS has certified just 10 pieces as PR68 or better. NGC ID# 27V5, PCGS# 6637

- 4142 1938 PR66 NGC. CAC.** A sharply detailed Premium Gem proof, with untoned surfaces and deeply mirrored fields, this coin possesses tremendous eye appeal. From a mintage of 8,152 pieces. NGC ID# 27V6, PCGS# 6638
- 4143 1938 PR67 PCGS. CAC.** This magnificent Walking Liberty half dollar is sharply detailed throughout, with deeply reflective surfaces that show no mentionable flaws. PCGS has graded four numerically finer examples (5/13). NGC ID# 27V6, PCGS# 6638
- 4144 1938 PR67 PCGS. CAC.** A fully brilliant and deeply mirrored Superb Gem that has slight white on-black obverse contrast, although a Cameo designation is not forthcoming. Splendidly preserved and a better date as well, since the mintage of 8,152 pieces is less than half that of the 1942. PCGS has seen only 12 submissions at finer grade levels (6/13).
Ex: *Dallas Signature* (12/2005), lot 2219. NGC ID# 27V6, PCGS# 6638
- 4145 1939 PR67 NGC.** The design elements of this impressive Superb Gem exhibit razor-sharp definition throughout and the deeply mirrored brilliant fields show no mentionable signs of contact. NGC ID# 27V7, PCGS# 6639
- 4146 1939 PR67 NGC.** Interiors are near-silver with just a trace of the golden overtone that deepens at the margins and turns to umber in places. This Superb Gem specimen has mild contrast on the obverse. NGC ID# 27V7, PCGS# 6639
- 4147 1939 PR67 PCGS. CAC.** This hazy white Superb Gem proof has faint champagne toning with bold design motifs and deeply mirrored fields. PCGS has only certified 28 finer examples (6/13). NGC ID# 27V7, PCGS# 6639

**1939 Half Dollar, PR68 ★
Substantial Cameo Frost**

- 4148 1939 PR68 ★ NGC.** A stone-white specimen that boasts a sharp strike and flawless preservation. Moderate frost on the motifs contributes further to the eye appeal. A retained lamination (as made) is near the T in LIBERTY. The designer's monogram was engraved by hand on the working die, similar to the 1944-D FS-901. Census: 20 in 68 ★, none finer with a Star designation (6/13). NGC ID# 27V7, PCGS# 6639
- 4149 1940 PR67+ PCGS. CAC.** Rich lime-green toning dominates though glimpses of peach and lilac are also present. Fully struck and flawless. The designer's monogram appears to be hand engraved on the reverse die. NGC ID# 27V8, PCGS# 6640
- 4150 1941 PR67 PCGS. CAC.** No AW. A majority of proofs for this later date are missing the designer's initials, lapped from the working reverse die during its preparation. This virtually brilliant and precisely struck Superb Gem is essentially immaculate. NGC ID# 24SP, PCGS# 6641
- 4151 1941 PR67+ PCGS. CAC.** The designer's monogram is faint but detectable beneath a loupe. This fully struck specimen is beautifully patinated in apple-green, cherry-red, and peach-gold shades. Pristine save for one minute tick at the obverse center. NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

- 4152 1952-D MS66 Full Bell Lines PCGS.** Frosty luster is present on this lightly toned Premium Gem example. The colors are more prominent on the obverse and include intermingled shades of gold, orange, and green. A few small ticks appear. Population: 71 in 66 Cameo Full Bell Lines, 2 finer (5/13). NGC ID# 24T4, PCGS# 86662
- 4153 1957-D MS67 NGC.** Exquisite cherry-red, jade-green, peach-gold, and stone-gray invigorate this lustrous and virtually pristine Superb Gem. The 1957-D is commonplace in typical Uncirculated grades but emerges as a significant conditional rarity in the present quality. NGC ID# 24TF, PCGS# 6673
- 4154 1958-D MS67 Full Bell Lines PCGS. CAC.** Although speckled patina appears on both sides of this Superb Gem, with larger concentrations at the peripheries, the coin retains a satin silver appearance. The colors include green, red, orange, yellow, and brown. Population: 33 in 67 Cameo Full Bell Lines, 0 finer (5/13). NGC ID# 24TH, PCGS# 86675
- 4155 1958-D MS67 Full Bell Lines PCGS. CAC.** This well-struck Superb Gem displays attractive toning on both sides. The colors include lemon-yellow, lime-green, kelly-green, fuchsia, fiery-orange, and grape, with a swath of color near the right rim of the obverse further adding to the eye appeal. Population: 33 in 67 Cameo Full Bell Lines, 0 finer (5/13). NGC ID# 24TH, PCGS# 86675
- 4156 1960 MS66 Full Bell Lines PCGS.** Though not one of the early Franklin issues notorious for weak strikes, Full Bell Lines examples for the 1960 half are in short supply, particularly in Gem and better grades. This untuned Premium Gem example displays subtle iridescence. Population: 42 in 66 Cameo Full Bell Lines, 0 finer (5/13). NGC ID# 24TL, PCGS# 86678
- 4157 1961-D MS66 PCGS. CAC.** A deeply toned Premium Gem with predominant lavender-gray color, accented by peripheral hints of sea-green. A splendid Premium Gem example despite a few tiny surface ticks. No finer examples have been certified. Population: 17 in 66, 0 finer (6/13). NGC ID# 24TP, PCGS# 6681
- 4158 1962 MS65 Full Bell Lines PCGS.** This impressive Franklin half dollar has a bold strike and brilliant silver surfaces with no toning on either side. Most important are the unusual prooflike surfaces on this highly appealing Gem. PCGS has only certified four finer Full Bell Lines specimens (6/13). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

**1950 Franklin Half, PR66 Cameo
First Proof Franklin**

- 4159 1950 PR66 Cameo PCGS.** The Philadelphia Mint produced proof coinage in 1950 for the first time since 1942, with a mintage of 51,386 Franklin half dollars. This remarkable Premium Gem exhibits sharply detailed design elements throughout, and the richly frosted devices contrast boldly with the reflective brilliant fields. Population: 27 in 66 Cameo, 8 finer (6/13). NGC ID# 27VA, PCGS# 86691

- 4160 1951 PR67 PCGS.** This lightly mirrored Superb Gem has brilliant and untuned silver surfaces with satin devices and excellent eye appeal. PCGS has only certified one finer example (6/13). NGC ID# 27VB, PCGS# 6692
- 4161 1953 PR68 NGC. CAC.** Lovely golden-brown, powder-blue, and rose-red toning invigorates the margins of this well struck and high grade half dollar. Seldom encountered above the PR67 level. Certified in a former generation holder. Census: 62 in 68, 1 finer (6/13). Ex: *Palm Beach Signature (Heritage, 11/2004)*, lot 7251, which realized \$603.75. NGC ID# 27VD, PCGS# 6694
- 4162 1954 PR67 Ultra Cameo NGC.** Although now NGC certified, this lovely Superb Gem Ultra Cameo proof Franklin half dollar was previously graded PR67 Deep Cameo PCGS. Both sides have satiny, lustrous devices over fully mirrored fields with brilliant and untuned silver surfaces. Census: 24 in 67 Ultra Cameo, 10 finer (6/13). PCGS# 96695
- 4163 1954 PR67 Ultra Cameo NGC.** Richly frosted devices provide excellent contrast to the deep mirrors on this remarkable proof. The eye appeal is immense. Census: 23 in 67 Ultra Cameo, 10 finer (5/13). Ex: *Dallas Signature (Heritage, 11/2006)*, lot 1039. PCGS# 96695

1956 Type Two Half Dollar, PR69 Deep Cameo Among the Finest Certified

- 4164 1956 Type Two PR69 Deep Cameo PCGS.** A virtually perfect coin, with dramatic black-on-white cameo flash. The pristine fields show mirrors of unfathomable depth and the devices are boldly frosted. This specimen represents the Type Two reverse, with the detailed feathers in the eagle's neck. Population: 39 in 69 Deep Cameo, 0 finer (5/13). Ex: *Long Beach Signature (Heritage, 9/2010)*, lot 4283. NGC ID# 24TW, PCGS# 96697
- 4165 1957 PR68 Deep Cameo PCGS. CAC.** A magnificent PR68 Franklin proof, with Deep Cameo contrast between the sharply detailed frosty design elements and the deeply mirrored fields. Population: 63 in 68 Deep Cameo, 2 finer (6/13). NGC ID# 24TX, PCGS# 96698

PROOF KENNEDY HALF DOLLARS

- 4166 1964 PR69 Deep Cameo PCGS.** Type Two Reverse. Icy devices provide desirable contrast with the glassy fields. The strike is needle-sharp, and the surfaces are as made aside from glimpses of chestnut-gold toning. The only Philadelphia Mint proof issue from the regular series. Population: 78 in 69 Deep Cameo, 0 finer (6/13). Ex: *FUN Signature (Heritage, 1/2009)*, lot 6077. NGC ID# 24WF, PCGS# 96800
- 4167 1971-S PR69 Deep Cameo PCGS.** Rich gold toning appears on the brilliant and deeply mirrored surfaces of this impressive Superb Gem Deep Cameo proof. Population: 65 in 69 Deep Cameo, 0 finer (6/13). NGC ID# 24WM, PCGS# 96807
- 4168 1974-S PR70 Deep Cameo PCGS.** Impressively contrasted with no post-striking flaws that PCGS found. A faint golden overtone grows stronger at the margins, most visibly at the upper obverse. Population: 19 in 70 Deep Cameo (6/13). NGC ID# 27WN, PCGS# 96810

- 4169 1976-S Clad PR70 Deep Cameo PCGS.** Millions of collectors celebrated the Bicentennial by purchasing a proof set with new designs on the quarter, half, and dollar. But nearly all such pieces possess slight flaws that prevent assignment to the ultimate grade. Here is a fully struck and pristine specimen with profound white-on-black contrast. Population: 32 in 70 Deep Cameo (6/13). NGC ID# 27WP, PCGS# 96811
- 4170 1976-S Silver PR70 Deep Cameo PCGS.** An amazing, perfect Superb Gem Deep Cameo proof, the surfaces showing deeply mirrored fields with impressive eye appeal. The sharply defined devices are frosty and fully brilliant. Population: 54 in 70 Deep Cameo (6/13). NGC ID# 27WR, PCGS# 96812
- 4171 1981-S Type Two PR70 Ultra Cameo NGC.** The scarcer Type Two mintmark on a technically perfect Ultra Cameo half dollar of 1981. Just a hint of golden color is visible in the gleaming margin-fields. NGC ID# 24WS, PCGS# 96822
- 4172 1981-S Type Two PR70 Ultra Cameo NGC.** A technically flawless specimen of this largest-diameter Type Two 1981-S proof coin. Utterly untuned, a vision of black-and-white perfection. NGC ID# 24WS, PCGS# 96822
- 4173 1981-S Type Two PR70 Ultra Cameo NGC.** The rare and desirable Type Two variety has an open S mintmark with a flat top surface, unlike the wire-like top surface of the Type One mintmark. This perfect proof is untuned light gray with incredible contrast. Census: 25 in 70 Ultra Cameo (6/13). NGC ID# 24WS, PCGS# 96822
- 4174 1981-S Type Two PR70 Deep Cameo PCGS.** A champagne overtone washes across much of each side on this perfect Deep Cameo half dollar with Type Two mintmark. An excellent Registry-worthy example of the challenging variant. Population: 33 in 70 Deep Cameo (6/13). NGC ID# 24WS, PCGS# 96822

MORGAN DOLLARS

- 4175 1878 8TF MS65 NGC. VAM-14.2.** Potent luster sweeps magnificently smooth surfaces. Sharply struck and brilliant. An outstanding representative of this ephemeral introductory design subtype. A hair-thin die scratch through the top of the I in LIBERTY identifies this collectible eight tailfeather VAM. NGC ID# 253H, PCGS# 7072
- 4176 1878 8TF MS65 PCGS. VAM-21.** A magnificent multicolor arc of ruby-red, lemon-gold, and powder-blue endows the upper reverse margin. The remainder of the borders are golden-brown though the fields and devices remain brilliant. Crisply struck and highly lustrous. NGC ID# 253H, PCGS# 7072
- 4177 1878 8TF MS65 PCGS. CAC.** A delightful Gem from the first year of the Morgan dollar design, this piece exhibits sharply detailed design elements throughout, with vibrant mint luster and a hint of lime-green toning at the border. NGC ID# 253H, PCGS# 7072

1878 Eight Tailfeather Dollar MS64 Prooflike, VAM-2

- 4178 1878 8TF MS64 Prooflike NGC. VAM-2.** This First Reverse near-Gem exhibits noticeable cameo contrast between the frosty motifs and the glassy fields. Brilliant aside from a blush of orange-gold and peach-red toning on the lower reverse margin. The fields are smooth though the portrait displays grazes. A briefly coined design subtype. NGC ID# 253H, PCGS# 7073

4179 1878 7/8TF Strong MS65 PCGS. VAM-38. Five tailfeather fragments appear beneath the prominent seven tailfeathers. LIBERTY and other obverse legends are strongly die doubled. This coruscating and well preserved Gem is richly patinated gunmetal-gray, olive-green, and golden-brown. NGC ID# 2TXZ, PCGS# 7078

4180 1878 7/8F Tripled Blossoms VF30 PCGS. VAM-44. A Top 100 Variety. Per VAMworld.com, VAM-44 "is considered the King of VAMs by many collectors." Both sides are strongly die doubled. The reverse has doubled legs on the eagle, but it is the obverse, and its prominent doubling on the blossoms, that commands attention. A cream-gray midgrade example with infrequent slight rim nicks and a small obverse spot at 4 o'clock. PCGS# 133829

4181 1878 7TF Reverse of 1878 MS65 NGC. Gorgeous orange-gold and rose-red toning consumes the obverse and shares the upper left reverse with an arc of navy-blue. Fully struck with potent luster and splendidly smooth fields.
Ex: Chicago Central States (Heritage, 4/2011), lot 5593. NGC ID# 253K, PCGS# 7074

4182 1878 7TF Reverse of 1878 MS65 PCGS. CAC. Traces of cerulean-blue and sea-green toning enhance the pleasing surfaces of this sharply detailed Gem, with vibrant mint luster throughout. The parallel arrow feather identifies the Reverse of 1878. NGC ID# 253K, PCGS# 7074

4183 1878 7TF Reverse of 1879 MS65 PCGS. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster under vivid shades of bluish-gray and greenish-gold toning. The slanting top arrow feather identifies the Reverse of 1879. PCGS has graded 13 numerically finer examples (6/13). NGC ID# 253L, PCGS# 7076

4184 1878 7TF Reverse of 1879 MS64 Prooflike PCGS. The slanting top arrow feather identifies the Reverse of 1879. This lightly marked Choice example exhibits well-detailed design elements and reflective prooflike surfaces. NGC ID# 253L, PCGS# 7077

4185 1878-CC MS65 PCGS. A stone-white Carson City Gem that boasts vibrant luster and only minor marks. The strike is crisp except on the claws, which were improperly annealed on the reverse die. NGC ID# 253M, PCGS# 7080

4186 1878-CC MS65 NGC. A well-detailed Gem from the first year of the Morgan design, this lustrous Carson City example displays vivid shades of violet, gray, and golden-brown toning, with few signs of contact. NGC ID# 253M, PCGS# 7080

4187 1879 MS65 PCGS. This impressive Gem offers well-detailed design elements and vibrant mint luster on both sides, with just a trace of champagne-gold toning and exceptional eye appeal. NGC ID# 253S, PCGS# 7084

1879 Morgan Dollar, MS66 Frosty, Untoned Surfaces

4188 1879 MS66 PCGS. High grade examples of the 1879 Morgan dollar are scarce, and PCGS has only certified one finer than this example (6/13). Both sides are fully brilliant and untoned with frosty silver luster and pristine surfaces showing only minuscule, grade-consistent marks. NGC ID# 253S, PCGS# 7084

1879 Silver Dollar, MS66 Fully Struck, Lightly Toned

4189 1879 MS66 PCGS. Ex: Gold River. The high mintage 1879 is surprisingly rare at the MS66 level relative to the 1879-S. The present lightly toned Philadelphia Morgan possesses blazing luster and a full strike. A faint fingerprint is noted near Liberty's throat. Minimally abraded and virtually unobtainable any finer. NGC ID# 253S, PCGS# 7084

4190 1879-CC XF45 NGC. A pleasing Choice XF specimen of this low-mintage Carson City issue, with attractive shades of pale gold, lavender, and silver-gray patina. Traces of original mint luster remain on both sides. NGC ID# 253T, PCGS# 7086

4191 1879-CC AU53 NGC. This well-detailed Carson City issue shows just a touch of wear on the devices and retains much of its original mint luster. The lightly abraded surfaces show a few traces of pale gold toning. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, AU55 Crescent-Toned Obverse

4192 1879-CC AU55 PCGS. Normal Mintmark. Most of the luster resides on the surfaces of this Choice AU key-date Morgan dollar, largely silver-white save for a thin crescent of deep amber-gold around part of the obverse. A few contact marks and some minor thinning of the luster in the fields are consistent with a short spate in circulation. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS60 Popular VAM-3, Capped CC Variety

4193 1879-CC Capped Die MS60 NGC. VAM-3. A Top 100 Variety. Many years passed before collectors looked beyond the die chipping in the mintmark area and discovered that the "CC" was not merely defective, but punched over a smaller version of the same mintmark. This example shows no traces of wear, though the gold-kissed surfaces exhibit rim nicks, slide marks, and the odd abrasion and scrape. More attractive than the MS60 designation might suggest. NGC ID# 253T, PCGS# 7088

**1879-O Morgan Dollar, MS65
Spectacular Multicolor Toning**

- 4194 1879-O MS65 PCGS.** The 1879-O Morgan dollar can be obtained without too much difficulty in lower Mint State grades, but the issue is rare above the Gem level. The well-preserved surfaces of this attractive Gem are blanketed in shades of champagne-gold, lavender-gray, and violet toning. Well-detailed design elements and vibrant mint luster complete the appealing package. PCGS has graded 14 numerically finer examples (6/13). NGC ID# 253V, PCGS# 7090

**1879-O Dollar, Gem Specimen
Rare Any Finer**

- 4195 1879-O MS65 PCGS.** Almond-gold toning is consistent across this lustrous and well struck Gem. The fields are exceptionally smooth and the portrait has only inconsequential contact. The New Orleans Mint was shuttered in 1861 due to the Civil War but reopened in 1879 to help the other branches coin silver dollars to fulfill the Bland-Allison Act. NGC ID# 253V, PCGS# 7090

**1879-O Dollar, MS65
Formidable Condition Rarity**

- 4196 1879-O MS65 NGC.** From a mintage of nearly 3 million pieces, the 1879-O Morgan dollar is an available date in lower Mint State grades, but the issue becomes scarce in MS65 condition. The 1879-O is a formidable condition rarity above the Gem level, as NGC and PCGS combined have graded only 21 coins in higher numeric grades (6/13). The present coin displays booming mint luster, with a sharp strike and outstanding eye appeal. NGC ID# 253V, PCGS# 7090
- 4197 1879-S MS67+ PCGS.** Hints of golden color appear in a light patina over a pale silver base that offers grand cartwheeling luster. Excellent detail on the high points with a few glimmers of frost. NGC ID# 253X, PCGS# 7092

- 4198 1879-S MS67 PCGS. CAC.** A magnificent Superb Gem from the second year of the Morgan design, this coin displays sharply detailed design elements and vibrant mint luster with just a trace of golden-tan toning. NGC ID# 253X, PCGS# 7092

- 4199 1879-S MS67+ PCGS. CAC.** All the early S-mint Morgans are known for outstanding mint luster, and this 1879-S is a perfect example of that generalization. Each side is completely brilliant and shows thick mint frost with a faint glimmer of semiprooflikeness in the fields. The strike is complete and there each side is devoid of any noticeable marks. NGC ID# 253X, PCGS# 7092

- 4200 1879-S MS67+ PCGS. CAC.** This high-end Superb Gem exhibits especially vibrant mint luster and the design elements are sharply detailed throughout. The virtually pristine surfaces add to the outstanding eye appeal. NGC ID# 253X, PCGS# 7092

- 4201 1880-CC MS65 NGC.** This popular Carson City issue exhibits sharply detailed design elements and vibrant mint luster throughout, with well-preserved surfaces that show shades of pale gold and lavender patina. NGC ID# 2542, PCGS# 7100

- 4202 1880-CC MS65 PCGS.** This impressive Gem exhibits well-detailed design elements and vibrant cartwheel mint luster. The well-preserved surfaces show a few hints of golden-tan and lavender toning. NGC ID# 2542, PCGS# 7100

- 4203 1880-CC MS65 PCGS. GSA.** Vivid shades of burnt-orange and bluish-gray toning dominate the obverse, while the reverse shows only subtle shades of lavender-gray. The design elements are well-detailed and the surfaces are lightly marked and lustrous. NGC ID# 2542, PCGS# 7100

- 4204 1880-CC MS66 NGC.** An impressive Premium Gem from the Carson City Mint, with well-detailed design elements and vibrant mint luster, this coin displays smooth surfaces and hints of pink and pale gold toning. NGC ID# 2542, PCGS# 7100

- 4205 1880-CC MS66 PCGS.** Striking green-gold overtones are confined to the left obverse margin on an otherwise medium-silver piece. A great Carson City dollar for the type collector who likes a touch of patina. NGC ID# 2542, PCGS# 7100

- 4206 1880-CC MS66 PCGS. CAC.** An amazing Carson City dollar, this Third Reverse specimen has the typical small bar under the second 8. Both sides are brilliant with frosty mint luster and hints of tan patina on the high points. PCGS has only certified 28 finer examples (6/13). NGC ID# 2542, PCGS# 7100

**1880-CC VAM-6 Dollar, MS66 Prooflike
8 Over Low 7**

- 4207 1880-CC 8 Over Low 7 MS66 Prooflike NGC. VAM-6.** A Top 100 Variety. This brilliant Premium Gem has frosty devices and prominently mirrored fields. The central strike is above average for the issue. The 1880-CC is the source of the three most obvious overdates in the Morgan dollar series, VAMs 4, 5, and 6. Census: 0 in 66 Prooflike, 0 finer (6/13).
Ex: Charlotte National Money Show Signature (Heritage, 3/2007), lot 1224. PCGS# 7105

**1880-CC Overdate Silver Dollar, MS65
Reverse of 1878**

4208 1880-CC 8/7 Reverse of 1878 MS65 PCGS. CAC. Not a Top 100 variety, but the tip of the 7 is clear under the second 8 in the date. A lustrous Gem, lightly toned silver with a few cloudy patches at the peripheral reverse. A small abrasion is noted on the eagle's breast. Housed in a green label holder. PCGS# 7110

4209 1880-O MS64+ PCGS. Micro O. Light caramel-gold toning adorns this lustrous, nicely struck, and beautifully preserved New Orleans dollar. Given the five-figure value of full-fledged Gems, the services are reluctant to assign such a lofty grade, but the present smooth example comes tantalizingly close. NGC ID# 2543, PCGS# 7114

4210 1880/79-O MS64 PCGS. CAC. VAM-4. A Top 100 Variety. Micro O. The crossbar of the underdigit 7 is apparent within the upper loop of the second 8 in the date. Brilliant and lustrous with a good strike and pleasing preservation. PCGS# 7116

4211 1880-S MS67 PCGS. CAC. Medium S. Iridescent lemon, peach, cherry, and ice-blue toning illuminates the obverse. The reverse remains brilliant. A flashy and well struck Superb Gem that is void of relevant marks. NGC ID# 2544, PCGS# 7118

4212 1880-S MS67+ PCGS. CAC. This high-end Superb Gem exhibits sharply detailed design elements, with vibrant mint luster throughout. The reverse is darkly toned in shades of burnt-orange and violet, while the obverse remains essentially brilliant. NGC ID# 2544, PCGS# 7118

4213 1880-S MS67+ PCGS. CAC. Large S. A dazzling and brilliant Superb Gem that boasts a needle-sharp strike and essentially immaculate preservation. Though the '80-S emerged in bag quantity, examples of the present quality are scarce relative to type demand. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68
VAM-96, Die Break on Cap**

4214 1880-S MS68 PCGS. VAM-96. Large S. The 1880-S is sometimes encountered in amazing quality for a 19th century business issue. The present virtually pristine example has a mere trace of toning across its highly lustrous and fully struck surfaces. The die variety is also of interest. VAM-96 has a die break on the back of Liberty's cap beneath the ribbon. NGC ID# 2544, PCGS# 7118

4215 1881-CC MS65 PCGS. CAC. Housed in a green label holder, this attractive Carson City Gem displays well-preserved brilliant surfaces with vibrant mint luster and well-detailed design elements. NGC ID# 2547, PCGS# 7126

4216 1881-CC MS66 PCGS. CAC. A delightful Premium Gem, this 1881-CC Morgan dollar has brilliant silver surfaces and a complete absence of toning on its reflective fields and lustrous devices. Although undesignated, this is a borderline prooflike example with excellent eye appeal. NGC ID# 2547, PCGS# 7126

4217 1881-S MS67 PCGS. CAC. This spectacular Superb Gem features sharply detailed design elements and vibrant mint luster, under vivid shades of golden-brown, magenta, and cobalt-blue toning. NGC ID# 2549, PCGS# 7130

4218 1881-S MS67 PCGS. CAC. Vibrant cartwheel mint luster graces the unblemished surfaces of this spectacular Superb Gem. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS68
Reflective Fields**

4219 1881-S MS68 NGC. This amazing San Francisco dollar is tied for the finest that NGC has graded. PCGS has graded two finer MS69 examples for the collector with an unlimited budget (6/13). This piece has brilliant silver luster with satin surfaces and a splash of gold and blue toning at the lower left obverse border. NGC ID# 2549, PCGS# 7130

4220 1882 MS66 PCGS. CAC. This delightful Premium Gem exhibits well-detailed design elements with just a touch of softness on the hair above Liberty's ear. The creamy surfaces display vibrant mint luster with exceptional eye appeal. PCGS has graded six numerically finer examples (5/13). NGC ID# 254A, PCGS# 7132

4221 1882-CC MS66 PCGS. A spectacular Premium Gem from the charismatic Carson City Mint, this coin exhibits sharply detailed design elements and vibrant mint luster, with no mentionable distractions. NGC ID# 254B, PCGS# 7134

4222 1882-CC MS66 NGC. Frosted at the high points with silver interiors and gold-orange and steel-blue hues at the margins, the color most visible at the bottom of the reverse. A touch softly struck at the centers but carefully preserved, a pleasing Carson City coin. NGC ID# 254B, PCGS# 7134

4223 1882-CC MS66 NGC. An amazing Premium Gem, this Carson City Mint Morgan dollar has brilliant silver surfaces with no toning on either side. The strike is excellent and the surfaces are pristine. NGC has only certified 48 finer examples (6/13). NGC ID# 254B, PCGS# 7134

4224 1882-CC MS66 PCGS. Silver luster offers moderate cartwheels. The 1882-CC dollar, blessed with a seven-figure mintage and a high savings rate in government holdings, is an accessible and popular issue even as a Premium Gem. NGC ID# 254B, PCGS# 7134

4225 1882-CC MS66+ PCGS. CAC. Attractive shades of champagne-gold and turquoise toning visit the pristine surfaces of this high-end Premium Gem, with most of the color on the reverse. The design elements are sharply detailed and vibrant mint luster adds to the exceptional visual appeal. NGC ID# 254B, PCGS# 7134

4226 1882-O/S Strong MS64 PCGS. CAC. VAM-4. A Top 100 Variety. Beautiful aquamarine and golden-brown toning occupies the reverse. The obverse is close to brilliant. This lustrous near-Gem gives the initial impression of an even higher grade due to the smooth obverse, though the reverse has minor field marks beneath the left (facing) wing. NGC ID# 254D, PCGS# 7138

**1882-S Morgan Dollar, MS68
Excellent Type Candidate**

4227 1882-S MS68 NGC. A stunning specimen that is tied for the finest certified at NGC or PCGS, this piece has virtually perfect silver surfaces with brilliant, satin luster and no evidence of toning on either side. An impressive piece for the advanced specialist or type collector. Census: 92 in 68, 0 finer (6/13). NGC ID# 254F, PCGS# 7140

4228 1883 MS66+ PCGS. CAC. Brilliant surfaces and cartwheel luster provide this high-end Premium Gem with a bold degree of eye appeal. A few wispy die cracks and minor clash marks are present. Hints of almond-gold toning appear at portions of the dentils. NGC ID# 254G, PCGS# 7142

**1883 Silver Dollar, MS67
Frosty and Virtually Unimprovable**

4229 1883 MS67 PCGS. This frosty, untuned silver-white Superb Gem 1883 Morgan dollar is just about unimprovable, as PCGS has seen precisely two submissions numerically finer. The cheek of Liberty is almost unmarked, and copious luster flows throughout both sides. The strike is remarkably sharp, if just short of full. Population: 93 in 67 (6 in 67+), 2 finer (5/13). NGC ID# 254G, PCGS# 7142

4230 1883 MS67 PCGS. Lightly frosted silver surfaces have the faintest of blue overtones adding color to each side. This Superb Gem shows only slight striking softness on the interiors and few marks of any significance. Population: 93 in 67 (6 in 67+), 2 finer (6/13). NGC ID# 254G, PCGS# 7142

4231 1883-CC MS66 PCGS. A spectacular crescent of burnt-orange, greenish-gray, and violet toning covers half the obverse, while the rest of the coin remains mostly brilliant. The design elements are well-detailed and vibrant mint luster radiates from both sides. NGC ID# 254H, PCGS# 7144

4232 1883-CC MS66 NGC. Bright and minimally toned with semireflective cartwheels in the fields. This well-defined Premium Gem example is a Carson City classic. NGC ID# 254H, PCGS# 7144

4233 1883-CC MS66 PCGS. A few tiny toning spots appear on each side of this brilliant Premium Gem. The surfaces exhibits satiny silver luster with sharp design motifs and mildly reflective fields. NGC ID# 254H, PCGS# 7144

4234 1883-CC MS66 PCGS. CAC. An extremely popular Carson City Morgan dollar, housed in an old green-label PCGS holder, this Premium Gem exhibits frosty silver luster with full untuned brilliance and bold design motifs. NGC ID# 254H, PCGS# 7144

4235 1883-CC MS66+ PCGS. CAC. The brilliant surfaces of this high-end Premium Gem display vibrant mint luster on both sides and no mentionable distractions are evident. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 254H, PCGS# 7144

4236 1883-CC MS66+ PCGS. CAC. A sensational Premium Gem, and a borderline Superb specimen, this Carson City dollar exhibits brilliant silver surfaces with reflective fields and an absence of toning. NGC ID# 254H, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Only Four Finer at PCGS**

4237 1883-CC MS67 PCGS. A virtually perfect Superb Gem with pristine silver surfaces, this Carson City Morgan dollar has only four finer coins according to PCGS (6/13). This brilliant specimen is highly lustrous and boldly defined with no evidence of toning on either side. An absolute beauty. NGC ID# 254H, PCGS# 7144

**1883-CC Dollar, MS66+ Deep Mirror Prooflike
Impeccable Surface Preservation**

4238 1883-CC MS66+ Deep Mirror Prooflike PCGS. A perennial collector favorite, the 1883-CC was preserved to a large extent in the Treasury hoard dispersed many years after the coins were produced. Even Deep Mirror Prooflike pieces are not uncommon, although this example in MS66+ is the sole such currently at PCGS, and two are numerically finer (5/13). Untoned, well-struck silver surfaces show splendid, thoroughgoing contrast with virtually impeccable preservation. NGC ID# 254H, PCGS# 97145

**1883-O Morgan Dollar, MS67
Nearly Unobtainable in Finer Grades**

4239 1883-O MS67 PCGS. The 1883-O Morgan dollar is rare in MS67 condition and virtually unobtainable in finer grades. This spectacular Superb Gem is sharply detailed in most areas, with just a touch of the typical softness on the hair above the ear. Vibrant mint luster enhances the outstanding eye appeal. Population: 36 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 254J, PCGS# 7146

4240 1884 MS66 PCGS. CAC. The obverse of this shimmering Gem is coated in a lovely mixture of pale orange, rose-violet, and turquoise-blue toning. The reverse has a thin, even coating of pastel-gold. Any quality conscious collector of toned Morgan dollars should find this high quality '84-P virtually irresistible.
Ex: Central States Signature (Heritage, 5/2003), lot 6492; Long Beach Signature (Heritage, 6/2006), lot 2335. NGC ID# 254L, PCGS# 7150

4241 1884 MS66+ PCGS. CAC. This delightful Morgan dollar is a high-end Premium Gem, with vibrant cartwheel mint luster and sharply detailed design elements throughout. Eye appeal is terrific. PCGS has graded 40 numerically finer examples (6/13). NGC ID# 254L, PCGS# 7150

4242 1884-CC MS66+ NGC. The obverse of this high-end Premium Gem displays rich waves of gold and orange patina with blue borders, providing this piece with tremendous eye appeal. The reverse exhibits faint echoes of the warm colors at the margins. Bold cartwheel luster and strong central details are additional attributes of this lovely coin.
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4234. NGC ID# 254M, PCGS# 7152

4243 1884-CC MS66 NGC. CAC. Softly frosted silver interiors with narrow bands of gold-orange and blue-violet at the margins, wider on the reverse. Though the hair over Liberty's ear is soft, detail elsewhere is by-and-large solid. NGC ID# 254M, PCGS# 7152

4244 1884-CC MS66+ PCGS. CAC. A frosty and highly lustrous Premium Gem, this Carson City Mint dollar is void of toning on either side. Sharply detailed with pristine surfaces. PCGS has certified just 76 finer examples (6/13). NGC ID# 254M, PCGS# 7152

4245 1884-CC MS66+ PCGS. CAC. A lovely Premium Gem, this Carson City dollar has brilliant and frosty silver luster with no trace of toning on either side. PCGS has only certified 76 finer examples of this popular issue (6/13). NGC ID# 254M, PCGS# 7152

1884-CC Dollar, MS67 Stone-White and Superb

4246 1884-CC MS67 PCGS. This brilliant and well struck Carson City type coin provides outstanding luster and immaculate fields. Even Liberty's cheek shows only light grazes. Uncirculated 1884-CC dollars emerged in quantity from the GSA sales, but the typical example is somewhat bagmarked and grades MS63 to MS64. Population: 73 in 67, 3 finer (6/13). NGC ID# 254M, PCGS# 7152

4247 1884-CC MS66 Prooflike PCGS. Light frost appears on the devices of this moderately reflective silver dollar. Liberty's hair has pleasing detail and eye appeal is quite strong. Population: 90 in 66 (1 in 66+) Prooflike, 1 finer (5/13).
Ex: Dallas Signature (Heritage, 11/2006), lot 1267. NGC ID# 254M, PCGS# 7153

1884-CC Morgan Dollar MS66 Deep Mirror Prooflike Only Three Finer at PCGS

4248 1884-CC MS66 Deep Mirror Prooflike PCGS. This is an impressive example of Carson City coinage technology, with a bold strike showing detail over Liberty's ear, and with exceptional eye appeal resulting from the contrast between the frosty and lustrous devices and the deeply mirrored fields. PCGS has certified a mere three finer pieces (6/13). NGC ID# 254M, PCGS# 97153

1884-O Morgan Dollar, MS67 Only One Finer at Each Service

4249 1884-O MS67 PCGS. An amazing Superb Gem specimen. The 1884-O is a common date, but this is an uncommon grade, and only one piece has received a higher grade at PCGS. Both sides of this frosty white specimen are brilliant and untuned with an above average strike. Population: 69 in 67, 1 finer (6/13). NGC ID# 254N, PCGS# 7154

4250 1884-S AU58 PCGS. The lightly abraded surfaces of this near-Mint Morgan dollar show a mix of vibrant mint luster and prooflike reflectivity on both sides. The design elements exhibit only the slightest trace of wear. NGC ID# 254P, PCGS# 7156

4251 1884-S AU58 NGC. Distinctly reflective, if not fully prooflike, though gold-accented fields with near-untouched luster. The silver devices are well-defined with just a touch of rub. NGC ID# 254P, PCGS# 7156

4252 1884-S AU58 PCGS. Just the slightest trace of wear shows on the sharply detailed design elements of this near-Mint Morgan dollar. The surfaces are brightly lustrous, with prooflike reflectivity in some areas, and a scattering of minor abrasions on both sides. NGC ID# 254P, PCGS# 7156

4253 1885 MS65 Deep Mirror Prooflike PCGS. CAC. This deceptive Morgan dollar looks like a proof at first glance. Only after careful examination does the Deep Mirror Prooflike designation reveal itself. The obverse has gorgeous iridescent toning while the reverse is brilliant and untuned. An impressive, highly appealing dollar. NGC ID# 254R, PCGS# 97159

4254 1885-CC MS65 PCGS. Delicate shades of golden-tan toning visit the lustrous surfaces of this well-detailed Gem. Only a few insignificant contact marks are present on both sides. NGC ID# 254S, PCGS# 7160

4255 1885-CC MS65 PCGS. This attractive Gem presents with well-detailed design elements and vibrant cartwheel mint luster. The mostly brilliant surfaces show a few hints of lavender toning and only minor signs of contact. NGC ID# 254S, PCGS# 7160

- 4256 1885-CC MS66 PCGS.** Elegantly frosted at the high points with smoothly shimmering cartwheel luster through blue-inflected medium-silver fields. A great Premium Gem example of this longtime collector favorite. NGC ID# 254S, PCGS# 7160
- 4257 1885-CC MS66 NGC.** Frosted on the high points of the devices with strong cartwheel luster around. Though the interrupted striking schedule caused the 1885-CC dollar mintage to be small as the facility went on a four-year hiatus, most examples were saved and high-grade examples such as this are accessible to collectors. NGC ID# 254S, PCGS# 7160
- 4258 1885-CC MS66 PCGS.** This well-detailed Premium Gem displays vibrant mint luster mixed with prooflike reflectivity in selected areas. A few hints of pale gold toning accent the well-preserved surfaces. NGC ID# 254S, PCGS# 7160
- 4259 1885-CC MS66 NGC.** A sharply detailed Premium Gem representative of this Carson City issue that is always in demand. Frosty mint luster is evident on both sides and the surfaces show hints of gray, gold, and blue toning. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66+
Brilliant and Untoned**

- 4260 1885-CC MS66+ PCGS. CAC.** A lovely Premium Gem, this brilliant Morgan dollar has frosty silver luster and a complete absence of toning. A few trivial marks present no concern to the connoisseur. Slight weakness over Liberty's ear is typical. PCGS has certified just 54 finer examples (6/13). NGC ID# 254S, PCGS# 7160
- 4261 1885-CC MS64 Deep Mirror Prooflike PCGS.** The reflective prooflike fields of this remarkable Morgan dollar contrast boldly with the sharply detailed frosty design elements when this coin is tilted in the light. The bright surfaces show the expected number of minor contact marks. NGC ID# 254S, PCGS# 97161
- 4262 1885-O MS67 PCGS.** A beautiful New Orleans silver dollar that boasts potent luster and a precise strike. The obverse displays light golden-gray toning but the reverse is essentially brilliant. Only minor contact on the left obverse field determines the grade. NGC ID# 254T, PCGS# 7162
- 4263 1885-O MS67 PCGS. CAC.** Frosted across the high points of both central devices and on lower parts of the portrait as well. Powerful cartwheel luster with minimal color and only one rim flaw below the A in DOLLAR attracting individual notice. NGC ID# 254T, PCGS# 7162
- 4264 1886 MS67 NGC.** Gold-orange and blue-violet toning graces the margins, the former hue in narrow bands and the latter in crescents. Silver interiors are generally well-struck and carefully preserved. NGC ID# 254V, PCGS# 7166
- 4265 1886 MS67 PCGS. CAC.** A tinge of lemon-yellow toning clings to the borders of this impressive Superb Gem Morgan dollar. Both sides have frosty mint luster and full brilliance. PCGS has certified just three finer examples (6/13). NGC ID# 254V, PCGS# 7166

**1886 Silver Dollar, MS68
Among the Finest Certified**

- 4266 1886 MS68 NGC.** The 1886 Philadelphia is one of only a handful of Morgan dollar issues that is available in MS68, though said "availability" is restricted to just 23 coins in the combined certified population (6/13). This well-defined and shining survivor is exquisitely preserved with a hint of lemon-orange peripheral toning on each side that enhances the brilliance elsewhere. NGC ID# 254V, PCGS# 7166
- 4267 1886-O MS61 PCGS.** Although the surfaces are somewhat marred on this brilliant and untuned Mint State specimen, the prooflike fields add demand to this undesignated example. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63
Scarce in Mint State**

- 4268 1886-O MS63 NGC.** This crisply struck silver dollar is untuned and lustrous. The reverse is well preserved, though delicate obverse grazes decide the grade. The 1886-O is regarded as the single rarest Morgan issue at the MS65 level, where none have been certified by NGC. MS63 examples are scarce but collectible. NGC ID# 254W, PCGS# 7168

**1886-S Dollar, MS63 Deep Mirror Prooflike
Blatant Field-Device Contrast**

- 4269 1886-S MS63 Deep Mirror Prooflike PCGS.** Generous field-device contrast occurs between the inky-black, reflective fields and well-frosted devices on this 1886-S Morgan, one seldom seen in this designation. Glints of gold is evenly distributed over each side, but it is the blatant contrast this is this coin's foremost hallmark. Population: 18 in 63 Deep Mirror Prooflike, 20 finer (5/13). NGC ID# 254X, PCGS# 97171

- 4270 1887/6 MS65 Prooflike NGC. VAM-2.** A Top 100 Variety. Brilliant except for a rich arc of orange-gold and cherry-red between 12:30 and 2 o'clock on the obverse border. Nicely struck and well preserved with good field reflectivity. Census: 18 in 65 Prooflike, 1 finer (6/13).
Ex: *Phoenix ANA Signature (Heritage, 3/2008)*, lot 1026, which realized \$4,312.50. NGC ID# 254Z, PCGS# 7175
- 4271 1887-O MS64 Deep Mirror Prooflike PCGS. CAC.** The portrait, eagle, and wreath are luminous and exhibit pleasing contrast with the flashy fields. Marks are minimal for the near-Gem level, and the strike is crisp by New Orleans standards aside from minor weakness at the centers. Population: 98 in 64 (3 in 64+) Deep Mirror Prooflike, 7 finer (6/13). NGC ID# 2552, PCGS# 97177
- 4272 1887-S MS65 PCGS.** The design elements of this delightful Gem Morgan dollar exhibit pinpoint definition throughout and both sides radiate vibrant mint luster. PCGS has graded 23 numerically finer examples (6/13). NGC ID# 2554, PCGS# 7180
- 4273 1888 MS66+ PCGS. CAC.** This high-end Premium Gem exhibits pinpoint definition on all design elements, with vibrant mint luster and mostly brilliant surfaces that show a few hints of pink toning. PCGS has graded 18 numerically finer examples (6/13). NGC ID# 2555, PCGS# 7182
- 4274 1888-O MS66 PCGS.** The creamy surfaces of this impressive Premium Gem radiate vibrant mint luster and the design elements are sharply detailed throughout. A few hints of golden-tan toning visit the well-preserved surfaces. PCGS has graded no numerically finer examples (5/13). NGC ID# 2556, PCGS# 7184
- 4275 1888-S MS64+ PCGS.** Light silver overall with a milky spot to the left of Liberty's forehead. The distinctly reflective reverse shows few marks of any significance. NGC ID# 2557, PCGS# 7186
- 4276 1889 MS66 PCGS.** An impressive Premium Gem, with well-detailed design elements and well-preserved lustrous surfaces that show a few wisps of golden-tan toning. PCGS has graded five numerically finer examples (6/13). NGC ID# 2558, PCGS# 7188
- 4277 1889-CC VF20 NGC.** The 1889-CC Morgan dollar is the key to the Carson City series. This pleasing VF example retains much of its original design detail, with only the highest points worn smooth, and shows hints of pink and pale gold toning. NGC ID# 2559, PCGS# 7190
- 4278 1889-CC VF25 NGC.** This moderately worn Carson City issue should find a home in an otherwise high-grade collection of Morgan dollars. The surfaces are lightly abraded for the grade, with pleasing lavender-gray patina. NGC ID# 2559, PCGS# 7190
- 4279 1889-CC VF30 NGC.** This important key date shows moderate wear on the design elements and a few minor abrasions on the pleasing gray surfaces. Minor rim bruises are evident at 12 o'clock on the obverse. NGC ID# 2559, PCGS# 7190
- 4280 1889-CC VF30 ANACS.** A midrange example with peach and violet overtones across a medium-gray base. Though a rim bump is noted just to the left of the date, the all-around eye appeal is solid for the grade. Housed in a small-format holder. NGC ID# 2559, PCGS# 7190
- 4281 1889-CC — Improperly Cleaned — NGC Details. XF.** Streaky olive-green and walnut-brown toning blankets this glossy key date dollar. Marks are minimal aside from a single thin horizontal line on the cheek. The rarest Carson City Morgan dollar issue. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45 The Carson City Key

- 4282 1889-CC XF45 ANACS.** A pleasing Choice XF specimen, this key-date Morgan dollar has light silver-gray surfaces with hints of champagne toning about the periphery. Both sides exhibit the usual minor circulation marks that are consistent with the grade. An excellent opportunity to acquire the key Carson City Mint dollar. NGC ID# 2559, PCGS# 7190
- 4283 1889-O MS64 PCGS.** This attractive Choice Morgan dollar exhibits well-detailed design elements with just a touch of softness on the hair above the ear and the eagle's breast. The creamy surfaces display vibrant mint luster and show only minor signs of contact. NGC ID# 255A, PCGS# 7192
- 4284 1889-O MS64 PCGS.** An attractive Choice example with vibrant mint luster and well-detailed design elements that show just a touch of softness on the hair above Liberty's ear. A few minor contact marks on the cheek explain the grade. NGC ID# 255A, PCGS# 7192
- 4285 1889-O MS64+ PCGS. CAC.** This high-end Choice Morgan dollar exhibits well-detailed design elements and vibrant cartwheel mint luster, with a few hints of pale gold and lavender toning. Eye appeal is outstanding. NGC ID# 255A, PCGS# 7192
- 4286 1889-S MS63 Deep Mirror Prooflike ANACS.** Strongly reflective and lightly contrasted with sparkling frost across the softly struck central devices. Silver interiors yield to gold and blue on the margins. Housed in a small-format ANACS holder. NGC ID# 255B, PCGS# 97195
- 4287 1890 MS65 PCGS.** Well struck with vibrant luster beneath rich patina. The obverse has a melange of green-gold, sky-blue, sage, and silver-gray toning, while the reverse has similar colors in a ring around a minimally toned center. PCGS has graded one numerically finer example (6/13). NGC ID# 255C, PCGS# 7196
- 4288 1890-CC MS64 PCGS. CAC. VAM-5.** The mintmark is sharply repunched and both sides have many interesting die cracks. A lustrous and nicely struck Choice Carson City dollar with light tan and stone-gray toning. NGC ID# 255D, PCGS# 7198
- 4289 1890-CC MS64 NGC. CAC. VAM-3.** The 90 in the date is clearly repunched south. Iridescently toned with golden-brown centers bounded by navy-blue and ruby-red borders. Lustrous and lightly abraded with minor incompleteness of strike at the centers.
Ex: *San Francisco ANA Signature (Heritage, 7/2005)*, lot 6874, which realized \$1,840. NGC ID# 255D, PCGS# 7198
- 4290 1890-S MS65 PCGS. CAC.** Attractive shades of violet, gray, and sea-green patina blanket the surfaces of this delightful Gem, with well-detailed design elements and vibrant mint luster under the toning. NGC ID# 255F, PCGS# 7202
- 4291 1891 MS64 PCGS. CAC.** Darkly toned in shades of gray, golden-brown, and violet-blue, this attractive Choice specimen displays well-detailed design elements and vibrant mint luster under the patina. NGC ID# 255G, PCGS# 7204
- 4292 1891 MS64+ PCGS. CAC.** The 1891 Morgan dollar becomes scarce in MS65 condition, making this high-end Choice specimen a good balance of value and quality. This coin is well-detailed and brightly lustrous, with strong visual appeal. NGC ID# 255G, PCGS# 7204

4293 1891 MS64+ PCGS. CAC. This high-end Choice Morgan dollar exhibits detailed design elements throughout and vibrant cartwheel mint luster. The creamy surfaces show only minor signs of contact. NGC ID# 255G, PCGS# 7204

4294 1891 MS64+ PCGS. CAC. Multicolored toning heavy on oranges and greens prevails on the obverse, while the reverse has a flashy silver appearance with only a smidgen of border toning. Solid all-around eye appeal. NGC ID# 255G, PCGS# 7204

**1891 Dollar, Doubled Ear, VAM-2
MS63 Deep Mirror Prooflike**

4295 1891 Doubled Ear MS63 Deep Mirror Prooflike PCGS. VAM-2. A Top 100 Variety. Any Deep Mirror Prooflike 1891 dollar is a rarity, but here is the second best VAM for the issue, trailing only the VAM-2A "Mustache" variety. The central obverse is die doubled south, evident on the earlobe and the hair above the ear. The present lightly toned example has flashy fields and an unmarked appearance. The strike is good though inexact at the centers. PCGS# 43480

**1891-CC Dollar, MS65
Mottled Patina, High-Grade Example**

4296 1891-CC MS65 NGC. Mottled patina appears heavier on the obverse, comprising pink, gold, amber, and smoky gray, while the reverse shows a considerable silver-white effect on the devices, including the eagle and wreath. Gem examples of this late-series Morgan dollar are about as fine as most collections will ever encounter; Premium Gems appear only occasionally at public auction. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65

4297 1891-CC MS65 PCGS. A brilliant Gem, this Carson City Morgan dollar is an elusive issue at this grade level, and rare in finer grades. The strike is typical with slight weakness over Liberty's ears. The surfaces have trivial marks that are consistent with the grade. PCGS has only certified 29 finer examples (6/13). NGC ID# 255H, PCGS# 7206

4298 1891-CC MS63 Deep Mirror Prooflike NGC. CAC. The deeply mirrored fields of this impressive Select Morgan dollar show the expected number of minor contact marks for the grade and the well-detailed design elements are richly frosted. Census: 64 in 63 Deep Mirror Prooflike, 24 finer (5/13). NGC ID# 255H, PCGS# 97207

4299 1891-S MS65 PCGS. Slight central weakness limits the grade of this highly lustrous and frosty Gem. Both sides are brilliant and untoned. PCGS has only certified 72 finer examples (6/13). NGC ID# 255K, PCGS# 7210

**1891-S Morgan Dollar, MS65 Prooflike
Boldly Contrasted and Beautifully Toned**

4300 1891-S MS65 Prooflike NGC. CAC. This Gem Prooflike 1891-S Morgan is certified in a "no-line fatty" NGC holder, popular with collectors. The surfaces are thoroughly contrasted with beautiful color ranging from deep rose-purple near the rims to frosty silver in the centers. The bold strike complements the excellent eye appeal and the CAC approval. Census: 15 in 65 Prooflike, 1 finer (5/13). NGC ID# 255K, PCGS# 7211

4301 1892 MS64 NGC. This impressive Choice Morgan dollar displays sharply detailed design elements and vibrant mint luster on both sides. The brilliant surfaces show only minor signs of contact. NGC ID# 255L, PCGS# 7212

4302 1892-CC MS62 NGC. Flashy cartwheel luster provides this Carson City example with strong eye appeal. A few tiny toning spots are present along with a few areas of light toning, primarily at the extreme outer edges. NGC ID# 255M, PCGS# 7214

4303 1892-CC MS62 PCGS. An essentially brilliant example of this better Carson City emission. Sharply struck and lustrous with a smooth reverse and moderate portrait grazes. The reverse displays overlapping sets of clash marks. NGC ID# 255M, PCGS# 7214

4304 1892-CC MS62 PCGS. This pleasing Mint State specimen has frosty luster with brilliant mint surfaces that are entirely void of toning on the obverse with only wispy champagne and violet on the reverse. NGC ID# 255M, PCGS# 7214

4305 1892-CC MS63 NGC. This attractive Select Morgan dollar exhibits well-detailed design elements and pleasing surfaces that show a mixture of vibrant mint luster and semiprooflike reflectivity. NGC ID# 255M, PCGS# 7214

4306 1892-CC MS63 PCGS. CAC. Shades of sea-green and lavender toning visit the surfaces of this pleasing Select example, with sharply detailed design elements and vibrant mint luster. A few minor contact marks are evident on both sides. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
Eye-Appealing Silver-White Example**

- 4307 1892-CC MS64 PCGS.** Silver-white surfaces on each side of this near-Gem show no trace of color, but they reveal excellent preservation that imparts splendid eye appeal. There is considerable contrast between reflective fields and frosted devices. A great example of this Carson City issue, one surprisingly elusive in nice condition with minimal bagmarks. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64
Slight Field Reflectivity**

- 4308 1892-CC MS64 PCGS. CAC.** The 1892-CC is a scarce issue in higher grades, from a mintage of just over 1.35 million coins. This Choice Mint State specimen has brilliant satin luster beneath rich gold and iridescent toning with bright blue and russet along the border. The obverse is more deeply toned than the reverse. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64+
Stone-White Surfaces**

- 4309 1892-CC MS64+ PCGS. CAC.** A better Carson City issue that was notably absent from the GSA auctions. The present untoned and thoroughly lustrous Choice dollar has smooth fields and moderate facial grazes. The strike is good and the eye appeal is considerable. Ex: *Long Beach Signature (Heritage, 6/2011), lot 4040, which realized \$2,990.* NGC ID# 255M, PCGS# 7214

- 4310 1892-O MS64 PCGS.** Like most New Orleans issues of this period, this well-detailed Morgan dollar shows a touch of softness on the hair above the ear and the eagle's breast. Vibrant mint luster radiates from both sides and the only mentionable flaw is a small mark in the right reverse field near the wreath. NGC ID# 255N, PCGS# 7216

- 4311 1892-O MS64 PCGS.** Housed in an old green-label PCGS holder, this Choice Mint State 1892-O Morgan dollar has frosty silver luster and minimal surface marks. Both sides have delicate peripheral iridescent toning. NGC ID# 255N, PCGS# 7216

- 4312 1892-O MS64+ PCGS. CAC.** A high-end Choice representative with vibrant mint luster and sharply detailed design elements throughout. The brilliant surfaces show few signs of contact and outstanding eye appeal. NGC ID# 255N, PCGS# 7216

- 4313 1892-O MS64+ PCGS. CAC.** This high-end Choice Morgan dollar displays vibrant satiny mint luster and sharply detailed design elements under delicate shades of pale gold toning. Strong eye appeal for a New Orleans issue. NGC ID# 255N, PCGS# 7216

- 4314 1892-S AU50 NGC.** Just a touch of wear shows on the high points of this well-detailed Morgan dollar and the lightly abraded surfaces show prooflike reflectivity in sheltered areas, with a few hints of golden-tan toning. NGC ID# 255P, PCGS# 7218

- 4315 1893 MS62 NGC.** The brilliant surfaces of this well-detailed Morgan dollar show the minimum number of minor contact marks for the grade and vibrant mint luster adds to the considerable visual appeal. NGC ID# 255R, PCGS# 7220

- 4316 1893 MS62 NGC.** A brilliant and beautiful Morgan dollar with white-silver surfaces and no toning on either side. A nicely struck example despite typical weakness over Liberty's ear. NGC ID# 255R, PCGS# 7220

- 4317 1893 MS63 NGC.** The 1893 Morgan dollar is a low-mintage issue. This attractive Select example displays well-detailed design elements and vibrant mint luster, with a scattering of minor contact marks that explain the grade. NGC ID# 255R, PCGS# 7220

- 4318 1893-CC XF45 NGC.** This Choice XF Morgan dollar represents the final issue from the Carson City Mint. This coin retains much of its original design detail and the surfaces are lightly abraded. NGC ID# 255S, PCGS# 7222

- 4319 1893-CC AU55 NGC.** This attractive Choice AU Morgan dollar shows just a trace of wear on the well-detailed design elements and the brilliant surfaces are lightly abraded. Vibrant luster mixes with prooflike reflectivity in sheltered areas. NGC ID# 255S, PCGS# 7222

- 4320 1893-O AU58 PCGS.** Lightly worn and minimally abraded, this near-Mint Morgan dollar retains much of its original mint luster. An interesting die break shows through ERIC and a few clash marks are evident on the reverse. NGC ID# 255T, PCGS# 7224

1893-O Morgan Dollar, MS61

- 4321 1893-O MS61 NGC.** A finer than usual example of the scarce New Orleans issue that is normally found with light wear, this piece is weakly defined over Liberty's ear and exhibits dusky silver surfaces over brilliant luster. The surfaces have trivial marks and each side has a splash of coppery-gold toning. NGC ID# 255T, PCGS# 7224

- 4322 1893-S Fair 2 ANACS.** Heavily worn into the rims on the reverse with perhaps half the obverse showing the same degree of peripheral wear. Original, uncleaned surfaces. The only mark of note is a vertical scratch on the neck of Liberty. NGC ID# 255U, PCGS# 7226

- 4323 1893-S Good 4 NGC.** The rims are worn smooth in places, but the major design elements remain intact in outline and the date, mintmark, and lettering remain legible. Collectors prize the 1893-S in all grades and conditions. NGC ID# 255U, PCGS# 7226
- 4324 1893-S — Bent, Rim Repair — NGC Details. VG.** This cream-gray key date Morgan dollar has moderately irregular rims and is cloudy from cleaning. The forehead curl has a faint thin diagonal mark but no other abrasions merit mention. NGC ID# 255U, PCGS# 7226
- 4325 1893-S — Rim Damage — NGC Details. VG.** Although both sides exhibit a number of rim bumps, the light gray surfaces are otherwise pleasing with only a few scattered circulation marks. NGC ID# 255U, PCGS# 7226
- 4326 1893-S VG8 PCGS.** Entirely natural light, medium, and dark gray toning blends together on this well-worn but attractive key Morgan dollar. NGC ID# 255U, PCGS# 7226
- 4327 1893-S — Improperly Cleaned — NGC Details. Fine.** Light gray surfaces clearly indicate that this piece has been cleaned as NGC notes. However, it is an attractive representative of the Morgan dollar key with trivial handling marks. NGC ID# 255U, PCGS# 7226
- 4328 1894 — Improperly Cleaned — NGC Details. VF.** This low mintage silver dollar has been dipped but has surprisingly few marks given its stint in 19th century commerce. The eagle's breast lacks feathers but much wing plumage and hair detail remain. NGC ID# 255V, PCGS# 7228
- 4329 1894 VF35 NGC.** The 1894 Morgan dollar claims one of the lowest mintages of the series at 110,000 pieces. This Choice VF example retains much of its original design detail and the surfaces are minimally abraded for the grade. NGC ID# 255V, PCGS# 7228
- 4330 1894 XF45 NGC.** Small splashes of golden-brown color appear on portions of this example. This is a representative of the lowest mintage Philadelphia issue of the type, excluding the proof-only 1895, with only 110,000 pieces produced in 1894. NGC ID# 255V, PCGS# 7228
- 4331 1894 XF45 ANACS.** Silver with touches of blue in the centers and more prominent cerulean and gold shadings at the margins. This still-luminous Choice XF key-date coin is housed in a small-format ANACS holder. NGC ID# 255V, PCGS# 7228
- 4332 1894 AU58 NGC.** An attractive near-Mint example of this low-mintage Philadelphia issue, with sharply detailed design elements and cartwheel mint luster. The surfaces are lightly abraded, with a few hints of golden-tan toning. NGC ID# 255V, PCGS# 7228
- 4333 1894 — Reverse Rim Damage — NGC Details. Unc.** Aside from the proof-only 1895, the 1894 is the rarest Philadelphia issue of the series. The present piece has good luster and only a hint of tan toning. The fields are smooth and the cheek has small marks. The rims are abraded near 3 o'clock on the obverse and 9 o'clock on the reverse. NGC ID# 255V, PCGS# 7228
- 4334 1894-O MS62+ PCGS.** This high-end MS62 specimen exhibits well-detailed design elements, with a touch of softness on the hair above the ear. The brilliant surfaces radiate vibrant mint luster and show a scattering of grade-consistent minor contact marks. NGC ID# 255W, PCGS# 7230
- 4335 1894-S MS63 PCGS.** Golden-brown and ice-blue toning endows this lustrous better date silver dollar. The strike is good and the reverse is well preserved. The left obverse has light marks. Encapsulated in an old green label holder. NGC ID# 255X, PCGS# 7232
- 4336 1895-O — Cleaned — ANACS. AU58 Details.** The well-detailed design elements of this low-mintage Morgan dollar show just a trace of high-point wear, but the lightly toned surfaces exhibit slightly subdued mint luster, due to a light cleaning. NGC ID# 255Y, PCGS# 7236

- 4337 1897-S MS66 PCGS.** Cartwheel luster adds to the eye appeal of this Premium Gem. The sharply struck coin has a brilliant appearance overall, with scattered splashes of light toning present. A few tiny marks in the field above the eagle pose minimal distraction, if any. NGC ID# 2567, PCGS# 7250

**1897-S Morgan Dollar, MS66+
Brilliant and Untoned**

- 4338 1897-S MS66+ PCGS. CAC.** The 1897-S covers a wide middle-ground, scarcer than the common issues, but too plentiful to be called a rare date. However, few can match the quality of this piece, and finer examples are elusive. Both sides are frosty and highly lustrous with brilliant, untoned silver surfaces. A stunning specimen. Population: 241 in 66 (7 in 66+), 22 finer (6/13). NGC ID# 2567, PCGS# 7250
- 4339 1897-S MS66 Prooflike NGC. CAC.** The design elements of this attractive Premium Gem are sharply detailed and moderately frosted while the well-preserved surfaces are brilliant and brightly reflective. Census: 22 in 66 Prooflike, 2 finer (5/13). NGC ID# 2567, PCGS# 7251
- 4340 1897-S MS66 Prooflike NGC. CAC.** Pale yellow overtones are more prominent to the right on this otherwise silver-white Prooflike Premium Gem. A touch of striking softness on the hair over the ear is typical for this San Francisco issue. NGC ID# 2567, PCGS# 7251
- 4341 1898 MS66+ PCGS. CAC.** Rich toning appears on both sides of this high-end Premium Gem, creating strong visual appeal. Each side stands out in its own way. The central device on the obverse remains primarily brilliant, with accents in shades of golden-orange, red-brown, teal, bright blue, plum, and violet in the fields. The reverse displays copper, red, and pink color overall and is almost entirely ringed by teal and plum. NGC ID# 2568, PCGS# 7252
- 4342 1898 MS66 Prooflike PCGS. CAC.** Flashy and near-brilliant. With sharp details and clean surfaces, this untoned example is highly impressive for the assigned grade level, its Prooflike status well-deserved. Population: 11 in 66 (1 in 66+) Prooflike, 0 finer (6/13). Ex: *Long Beach Signature* (Heritage, 9/2005), lot 6102. NGC ID# 2568, PCGS# 7253
- 4343 1898 MS65 Deep Prooflike NGC.** Powerfully reflective with more contrast than sometimes seen on Deep Prooflike examples of this Philadelphia issue. A light scattering of blue-white patina over parts of the fields lends only a touch of color and does little to dim the gleam of the fields. NGC ID# 2568, PCGS# 97253
- 4344 1899 MS66 PCGS. CAC.** This delightful Premium Gem displays sharply detailed design elements and especially vibrant mint luster on both sides. The virtually pristine surfaces show just a hint of golden-tan toning. NGC ID# 256B, PCGS# 7258
- 4345 1899-O MS67 PCGS.** This brilliant and lustrous silver dollar has a sharp strike and a beautifully preserved obverse. Minor grazes on the eagle's breast and right reverse field are of little import. The 1899-O is easily secured in Choice Mint State but Superb Gems are comparatively rare. NGC ID# 256C, PCGS# 7260

1899-S Morgan Dollar, MS66

4346 1899-S MS66 PCGS. CAC. An outstanding Premium Gem and rarely seen at this grade level. This specimen has brilliant and frosty silver luster with no toning on either side. The surfaces are exceptional and the strike only shows slight weakness over the ear. PCGS has only certified eight finer examples (6/13). NGC ID# 256D, PCGS# 7262

4347 1899-S MS65 Prooflike PCGS. Any Gem 1899-S dollar is desirable, but prooflike pieces are especially scarce. Autumn-gold toning graces the obverse periphery, but the remainder of this lustrous and well preserved piece is brilliant. Housed in an old green label holder. NGC ID# 256D, PCGS# 7263

4348 1900-O/CC MS65 NGC. VAM-11. A Top 100 Variety. A delightful Gem example of this popular variety, with the primary mintmark centered and the remains of the undertype CC high and shifted to the left. The design elements are sharply detailed and the surfaces radiate vibrant mint luster. NGC ID# 256G, PCGS# 7268

4349 1900-O/CC MS65+ PCGS. CAC. VAM-11. A Top 100 Variety. An essentially brilliant Gem whose vibrant luster, sharp strike, and smooth surfaces ensure outstanding eye appeal. As nice as can be found without paying three times the price. NGC ID# 256G, PCGS# 7268

4350 1900-S MS65 PCGS. Freckles of light tan visit the lustrous surfaces of this Gem. Generally well-impressed design features show just a touch of softness in the centers. NGC ID# 256H, PCGS# 7270

4351 1901 AU58 PCGS. Lustrous and well-detailed, this lightly circulated Morgan dollar shows just a trace of wear on the high points of the design. A few hints of pale gold toning enhance the lightly abraded surfaces. NGC ID# 256J, PCGS# 7272

4352 1901 AU58 NGC. CAC. This well-detailed near-Mint specimen displays much original mint luster under dappled shades of champagne-gold, lavender-gray, and amber toning. Only the slightest trace of wear is evident on the high points of the design. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS62

4353 1901 MS62 PCGS. An important date in the Morgan dollar series from a substantial mintage of almost 7 million coins. While many lower mintage issues are common in high grades, the 1901 is a condition rarity as it was never preserved in Treasury holdings like most issues. The typical 1901 is found in circulated grades. This Select Mint State specimen is fully brilliant and untuned with frosty silver luster and trivial marks. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, Doubled Tailfeathers VAM-3, Top 100, Choice AU

4354 1901 Doubled Die Reverse AU55 NGC. VAM-3. A Top 100 Variety. The famous "Shifted Eagle" variety with strong die doubling south on the tailfeathers and other design elements. Cartwheel luster is prominent but the hair above the ear has a whisper of wear. Lightly abraded though the lower cheek displays minor marks. An important variety in above average quality, since VAM-3 is typically encountered in XF grades. Census: 12 in 55, 12 finer (6/13). PCGS# 7302

1901 Morgan Dollar, AU55 Doubled Die Reverse, VAM-3

4355 1901 Doubled Die Reverse AU55 ANACS. VAM-3. A Top 100 Variety. Reminiscent of the strongest 1878 7 over 8 tailfeather variety, the VAM-3 1901 displays a broad shift of all tailfeathers directly south. The arrows, branch, and beak are also nicely die doubled on this *Guide Book* entry. Light sun-gold toning graces peripheral elements. Luster dominates protected regions but is diminished on the cheek and fields. PCGS# 7302

4356 1901-O MS66 PCGS. CAC. The 1901-O Morgan dollar is not too difficult to locate in MS66, but finer specimens are very rare. This spectacular Premium Gem displays well-detailed design elements and well-preserved brightly lustrous surfaces. PCGS has graded only three numerically finer examples (5/13). NGC ID# 256K, PCGS# 7274

4357 1901-S MS64 NGC. The untuned surfaces of this near-Gem display pleasing luster and well struck devices, though the centers reveal some of the typical incompleteness of strike. NGC ID# 256L, PCGS# 7276

1901-S Morgan Dollar, MS65
Conditionally Rare

- 4358 1901-S MS65 NGC.** This satiny Gem is an important Morgan dollar that is rarely encountered so fine. Both sides have brilliant silver luster and bold design motifs with no trace of toning on either side. Only trivial marks appear on each side of this pristine specimen. Census: 92 in 65, 7 finer (6/13). NGC ID# 256L, PCGS# 7276

1901-S Dollar, MS65
Older Holder CAC Gem

- 4359 1901-S MS65 PCGS. CAC.** San Francisco dollars from the early 20th century are elusive in Mint State, especially when compared with their New Orleans cousins. This is a nicely struck, faintly toned, and beautifully preserved Gem. Light parallel roller marks above Liberty's jaw are of mint origin. Certified in an old green label holder. NGC ID# 256L, PCGS# 7276
- 4360 1902 MS66 PCGS. CAC.** This attractive Premium Gem Morgan dollar exhibits sharply detailed design elements and cartwheel mint luster, with dusky hints of golden-tan toning. PCGS has graded 25 numerically finer examples (6/13). NGC ID# 256M, PCGS# 7278
- 4361 1902-S MS65 PCGS. CAC. VAM-3.** The 02 in the date is repunched. This lustrous Gem exhibits splendidly smooth fields and dusky chestnut-gold toning. The centers show minor inexactness of strike. Certified in an old green label holder. NGC ID# 256P, PCGS# 7282
- 4362 1903-S AU50 PCGS. CAC.** Traces of original mint luster shine through shades of dusky gray patina on this better-date Morgan dollar. The well-detailed design elements show just a touch of high-point wear. NGC ID# 256T, PCGS# 7288

1903-S Morgan Dollar, XF45
Elusive VAM-2, Small S Variety

- 4363 1903-S Small S XF45 NGC. VAM-2.** A Top 100 Variety. This lightly worn Morgan dollar displays the Micro S mintmark, first discovered by Melvin Carmichael in 1951. The VAM-2 is always in demand and the variety is especially difficult to locate in grades above the VF level. This Choice XF example is lightly abraded and retains traces of original mint luster. PCGS# 7306

- 4364 1904-O MS65 Deep Mirror Prooflike PCGS.** The final New Orleans issue, the 1904-O is plentiful in typical Mint State but DMPL Gems are very scarce. This sharply struck and untoned example offers reflective fields and lightly frosted devices. Housed in an old green label holder. NGC ID# 256V, PCGS# 97293

1904-S Morgan Dollar, MS63
Vivid Toning, Vibrant Luster

- 4365 1904-S MS63 PCGS Secure.** Vivid shades of champagne-gold, crimson, and lime-green toning enhance the lightly marked surfaces of this impressive Select Morgan dollar. The design elements are well-detailed and vibrant mint luster shines beneath the patina. Coinage of silver dollars was suspended for 16 years after 1904, and the 1904-S is one of the better dates in the late series. NGC ID# 256W, PCGS# 7294
- 4366 1921 MS66 PCGS. CAC.** Vibrant mint luster and sharply detailed design elements are the calling cards of this delightful Premium Gem from the last year of the Morgan design. The well-preserved surfaces show a few hints of golden-tan and lavender toning. PCGS has graded only seven numerically finer examples (5/13). NGC ID# 256X, PCGS# 7296
- 4367 1921 MS66+ PCGS. CAC.** Shimmering silver luster is more lively than usual for this last-gasp Morgan dollar issue. Occasional hints of patina suggest olive-gold against the broad expanses of the fields. NGC ID# 256X, PCGS# 7296
- 4368 1921-D MS66 PCGS.** Rich autumn-gold and gunmetal-gray toning encompasses this coruscating and exquisitely preserved Denver Mint Morgan dollar. Boldly struck on the eagle and portrait though select portions of the wreath are incomplete. NGC ID# 256Y, PCGS# 7298
- 4369 1921-D MS66 PCGS. CAC.** The mint luster is bright and frosted, appearing more like a '21-S than a D-mint. The brilliance is interrupted by speckled golden and rose color, mostly seen around the margins. Remarkably clean for a 1921-D. NGC ID# 256Y, PCGS# 7298

- 4370 1921-D MS66 PCGS. CAC.** This well-detailed Premium Gem displays well-preserved brilliant surfaces with vibrant mint luster on both sides. Both obverse and reverse show an interesting network of peripheral die cracks. PCGS has graded only six numerically finer examples (5/13). NGC ID# 256Y, PCGS# 7298

**1921-D Dollar, MS66+
Only Denver Mint Morgan**

- 4371 1921-D MS66+ PCGS. CAC.** A condition rarity with only six finer examples certified by PCGS and seven by NGC (6/13). This frosty and fully lustrous example is an impressive representative of the only Denver Mint Morgan dollar. Both sides have light ivory blended with vivid gold and iridescent toning. NGC ID# 256Y, PCGS# 7298

- 4372 1921-S MS65 NGC. Ex:** Great Falls Collection. Light green-gold toning visits the obverse, while the reverse is near-silver. Softly struck with the wavering luster common to the issue, though the surfaces are largely mark-free aside from flaws on the eagle's breast. NGC ID# 256Z, PCGS# 7300

- 4373 1921-S MS65 PCGS.** A misunderstood and often overlooked Morgan dollar issue, the '21-S is relatively scarce in such an outstanding grade, considering the original mintage of well over 21 million pieces. This piece is essentially brilliant and displays superior luster, but also exhibits extensive chatter over the obverse, and a noticeable milling mark on the eagle's breast. A small bit of dark-green verdigris rests on the upper reverse. NGC ID# 256Z, PCGS# 7300

- 4374 1921-S MS65 PCGS.** Although Gem examples are fairly plentiful, finer grade pieces are extremely rare. Therefore, MS65 is the ideal combination of quality and price for this issue. This highly lustrous specimen has brilliant silver surfaces with sharp design details. An exceptional opportunity. NGC ID# 256Z, PCGS# 7300

- 4375 1921-S MS65+ NGC.** Subtly frosted with a semireflective yet swirling texture to the pale silver fields. Though softly struck in the centers as usually seen, this coin is far better-preserved from the norm and deserving of notice. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1885 Morgan Dollar, PR64 Cameo
Delicate Gold Toning**

- 4376 1885 PR64 Cameo PCGS. CAC.** An extraordinary near-Gem, this Cameo proof has exquisite surfaces with deep mirrored fields around satiny silver devices. Both sides exhibit lovely light to medium gold toning with a small splash of bluish-violet on the obverse. Population: 23 in 64 (2 in 64+) Cameo, 28 finer (6/13). PCGS# 87320

- 4377 1891 PR62 PCGS. CAC.** The mirrored reflectivity in the fields is abundantly evident even through the multiple layers of blue, green, and rose toning on each side. The central strike is a bit weak, as usual on this date, and the light hairlines are barely noticeable through the toning. NGC ID# 27ZL, PCGS# 7326

- 4378 1897 — Improperly Cleaned — NGC Details. Proof.** Razor-sharp detail is evident on all design elements and the fields are deeply reflective. The surfaces display unnaturally bright shades of pale gold patina accented by hints of violet and jade. NGC ID# 27ZV, PCGS# 7332

**1897 Morgan Dollar, PR63
Deeply Toned Select Example**

- 4379 1897 PR63 PCGS.** This deeply toned Select proof provides a nice entry-level representative of the proof Morgan series at a much smaller price than a Gem proof. Under a light the patina resolves into a palette of pale violet and golden-smoke tones, deeper in a crescent at the lower reverse. A few thin slide marks on the cheek are barely visible under the toning. Population: 47 in 63, 93 finer (6/13). NGC ID# 27ZV, PCGS# 7332

- 4380 1898 — Stained — NGC Details. Proof.** The well-detailed design elements show some elements of contrast with the hazily reflective fields when this coin is tilted in the light, but the unnatural pinkish-gray patina gives the coin a flat aspect when viewed head on. NGC ID# 27ZW, PCGS# 7333

- 4381 1904 PR63 PCGS.** The last of the official proof Morgan dollar issues, offered here as a Select coin from the brilliant format. Light hairlines show under a moderate layer of patina, dappled green and gold with considerable bluish-gray elements intermixed. This specimen is housed in a green label holder. NGC ID# 2824, PCGS# 7339

**1904 Silver Dollar, PR63
Even Golden-Brown Toning**

- 4382 1904 PR63 PCGS. CAC.** Dappled caramel-gold and navy-blue toning adorns this impressively mirrored and undisturbed Select proof Morgan. The strike is slightly incomplete on the eagle's breast and the hair above Liberty's ear, but the remainder of the design is intricate. A meager 650 proofs were produced. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 4383 1922-D MS66 NGC.** The slightly granular, well-preserved surfaces of this spectacular Premium Gem are awash with vibrant mint luster. The design elements are sharply detailed throughout and eye appeal is tremendous. NGC has graded 14 numerically finer examples (6/13). NGC ID# 257D, PCGS# 7358
- 4384 1922-D MS66+ NGC.** A spectacular high-end Premium Gem with sharply detailed design elements throughout and vibrant mint luster on both sides. The well-preserved surfaces are accented by vivid shades of lime-green and violet toning. NGC has graded 14 numerically finer examples (5/13). NGC ID# 257D, PCGS# 7358
- 4385 1922-D MS66 PCGS. CAC.** This spectacular Premium Gem displays sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show specks of sea-green and amber patina. PCGS has graded three numerically finer examples (6/13). NGC ID# 257D, PCGS# 7358
- 4386 1922-S MS65 NGC.** Subtly frosted devices with semireflective silver margins that show only faint touches of blue. Luster grazes to the left of Liberty's profile contribute to the grade, but the all-around eye appeal is strong. NGC ID# 257E, PCGS# 7359
- 4387 1922-S MS65 PCGS.** Rich caramel-gold toning adorns the obverse, but the reverse has only a hint of tan patina. A splendidly preserved and lustrous Gem with minor inexactness of strike at the centers. A "spike" clash mark (as made) is present above the eagle's right (facing) shoulder. NGC ID# 257E, PCGS# 7359
- 4388 1923 MS66+ PCGS. CAC.** This high-end Premium Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved brilliant surfaces that show a few wisps of golden-tan toning. NGC ID# 257F, PCGS# 7360
- 4389 1923 MS66+ PCGS. CAC.** A pristine Premium Gem, this Peace dollar exhibits brilliant silver luster with frosty mint surfaces and no evidence of toning on either side. PCGS has only certified 46 finer examples (6/13). NGC ID# 257F, PCGS# 7360
- 4390 1923-D MS65 PCGS.** This lustrous Gem looks like it has been left to tone naturally over the decades. As a result, each side shows several layers of toning, with more patina gravitating around the margins. Well struck and showing the usual strong peripheral die cracks on the obverse. NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar, MS65 Extremely Elusive in Finer Grades

- 4391 1923-S MS65 PCGS.** The 1923-S Peace dollar is scarce in MS65 condition and extremely rare in finer grades. This well-detailed Gem displays vibrant mint luster under shades of sea-green, golden-brown, and lavender-gray toning. Only a few minor contact marks are present. PCGS has graded three numerically finer examples (6/13). NGC ID# 257H, PCGS# 7362
- 4392 1924-S MS64 PCGS.** The brilliant surfaces of this spectacular Choice specimen radiate vibrant mint luster and show only minor signs of contact. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 257K, PCGS# 7364
- 4393 1925 MS66+ PCGS. CAC.** An impressive example with frosty mint luster and bright silver surfaces that show no toning. Only 85 finer examples have been graded by PCGS (6/13). NGC ID# 257L, PCGS# 7365

- 4394 1925-S MS64 PCGS.** Pale silver luster shimmers on each side. The obverse offers hints of yellow to the left, though any such color on the reverse is a faint echo at best. Chatter on Liberty's neck contributes to the grade. NGC ID# 257M, PCGS# 7366
- 4395 1925-S MS64 PCGS.** A frosty Choice Mint State piece, this brilliant silver dollar has a sharp strike and full luster. A few scattered marks are mostly confined to the reverse. NGC ID# 257M, PCGS# 7366
- 4396 1925-S MS64 PCGS. CAC.** The PCGS population of just 39 finer examples (6/13) illustrates the condition rarity of this Peace dollar. Both sides of this near-Gem are brilliant with frosty silver luster. NGC ID# 257M, PCGS# 7366
- 4397 1925-S MS64+ PCGS. CAC.** Though softly struck, this piece has all the luster a collector could want. Deep, dappled blue-gray and green hues enrich each side, though a few small marks and scrapes preclude Gem status. NGC ID# 257M, PCGS# 7366
- 4398 1926-S MS65 PCGS.** Attractive shades of lavender-gray and sea-green toning blanket the well-preserved surfaces of this well-detailed Gem. Frosty mint luster is evident under the patina. NGC ID# 257R, PCGS# 7369
- 4399 1928 MS64 PCGS. CAC.** The 1928 Peace dollar is a low-mintage key date, from a mintage of 360,649 pieces. This impressive Choice example is sharply detailed, with vibrant mint luster and outstanding eye appeal. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65 Lowest Mintage in the Series

- 4400 1928 MS65 PCGS.** Except for the 1922 High Relief, the 1928 has the lowest mintage in the Peace dollar series (360,649 pieces). The current MS65 specimen exhibits sharply struck design features, along with radiantly lustrous, color-free surfaces. A few minuscule marks preclude this dazzling coin from attaining an even higher grade. PCGS has only certified 12 finer examples (6/13). NGC ID# 257V, PCGS# 7373
- 4401 1928-S MS64 PCGS.** This Choice Mint State specimen has extraordinary eye appeal with brilliant silver surfaces and no toning on either side. A rarity in higher grades, with only 49 numerically finer examples certified by PCGS (6/13). NGC ID# 257W, PCGS# 7374
- 4402 1928-S MS64 PCGS. CAC.** The 1928-S Peace dollar is not too difficult to locate in MS64 condition, but finer examples are quite elusive. This well-detailed Choice specimen displays vibrant mint luster and traces of pale gold toning. NGC ID# 257W, PCGS# 7374
- 4403 1928-S MS64+ PCGS. CAC.** The 1928-S Peace dollar is an elusive issue at the Gem level, making this high-end Choice example a good blend of quality and value. This well-detailed piece displays vibrant mint luster and hints of pale gold toning. NGC ID# 257W, PCGS# 7374
- 4404 1934-D MS65 PCGS. CAC.** Wisps of champagne toning appear on both sides of this sharply detailed and highly lustrous Gem 1934-D Peace dollar. Only 63 finer examples (6/13) have been examined at PCGS during the last 26 years. NGC ID# 257Y, PCGS# 7376

EISENHOWER DOLLAR

1972 Type Three Ike Dollar, MS66
Tied for Finest at PCGS

- 4405** 1972 Type Three MS66 PCGS. The Type Three Ike dollar subtype shows the tip of Florida pointing toward the middle part of Cuba. The 1972 Type Three is a condition rarity in the Premium Gem grade. This piece is tied for finest with 18 other submissions at PCGS (5/13). The surfaces are relatively unmarked with soft luster and a light wash of gold patina. NGC ID# 2587, PCGS# 7409

PROOF EISENHOWER DOLLAR

1977-S Clad Ike Dollar, PR70 Deep Cameo

- 4406** 1977-S PR70 Deep Cameo PCGS. Following the Bicentennial coinage of 1975 and 1976, the Eisenhower dollar reverted to its original design of 1971 through 1974, the reverse showing an eagle landing on the moon, with the earth in the background. This technically perfect proof exhibits delicate champagne toning over pleasing nickel-gray surfaces. The devices are frosty with brilliant mint luster, and the fields are deeply mirrored. Population: 13 in 70 Deep Cameo (5/13). NGC ID# 282C, PCGS# 97437

COMMEMORATIVE SILVER

- 4407** 1893 Isabella Quarter MS65 PCGS. Pink, violet, and blue overtones are light but insistent on this Gem, joined by occasional traces of green-gold. Well-defined overall with only a few shallow grazes visible in the fields. NGC ID# 28HR, PCGS# 9220
- 4408** 1893 Isabella Quarter MS65 PCGS. CAC. This well-detailed Gem displays cartwheel mint luster under shades of dark gray and champagne-gold toning.
Ex: Henry Chapman; purchased from Chapman's inventory (after his death) on 6/10/1935, flip accompanies the lot. NGC ID# 28HR, PCGS# 9220
- 4409** 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B. Rich golden-brown and olive-green toning dominates this satiny and intricately struck Select silver dollar. Thorough inspection beneath a loupe reveals an occasional slender mark. NGC ID# 28N8, PCGS# 9222

1921 Alabama Half, MS66
Only Two Finer at PCGS

- 4410** 1921 Alabama MS66 PCGS. CAC. An outstanding Premium Gem, this important Alabama half dollar has frosty white luster with splashes of steel toning, mostly on the obverse. The strike is bold and the surfaces are exceptional with only trivial surface marks. PCGS has only certified two finer examples (6/13). NGC ID# 28HT, PCGS# 9224

1936 Albany Half Dollar, MS67
Deeply Toned Silver Commemorative

- 4411** 1936 Albany MS67 NGC. Dark shades of lavender-gray, sea-green, and amber toning blanket the well-preserved surfaces of this spectacular Superb Gem. Well-detailed design elements and vibrant mint luster are evident beneath the toning. NGC has graded only five numerically finer examples (6/13). NGC ID# 28HU, PCGS# 9227
- 4412** 1936 Arkansas MS66 PCGS. CAC. Orange-bronze patina forms a crescent at right on both sides with rim-bands elsewhere. Interiors are lustrous and largely silver with aspects of blue and green. NGC ID# 28HZ, PCGS# 9237
- 4413** 1936-D Arkansas MS67 PCGS. This fully brilliant Superb Gem has a sharp strike with silver luster that shows only a touch of gold toning near the borders. Sharply struck and highly attractive. Population: 25 in 67, 1 finer (6/13). NGC ID# 28J2, PCGS# 9238
- 4414** 1936-S Arkansas MS66 PCGS. CAC. Splashes of mint-green and deep golden-violet toning appear near the obverse border of this Premium Gem. A highly attractive example with a sharp strike. PCGS has certified just 14 finer examples (6/13). NGC ID# 28J3, PCGS# 9239
- 4415** 1936 Arkansas PDS Set PCGS. CAC. The set is housed in separate holders that have consecutive serial numbers. The set includes: 1936 MS66 PCGS, CAC, apple-green, rose-red, and orange border toning; 1936-D MS66 PCGS, CAC, mostly olive-gray with sun-gold near the rims; and a 1936-S MS65+ PCGS, CAC, medium gunmetal-gray, forest-green, and plum-red toning, minor facial marks. (Total: 3 coins) PCGS# 9240
- 4416** 1934 Boone MS67+ PCGS. This amazing Superb Gem has intense greenish-yellow and iridescent toning over satin luster with full underlying mint brilliance. Population: 36 in 67 (2 in 67+), 1 finer (6/13). NGC ID# 28JE, PCGS# 9257

- 4417 1937-S Boone MS67 PCGS.** Golden overtones are strongest at the margins and more overt on the reverse with the deepest orange-tan hues on the upper rim above the two figures' heads. Impressive luster is a match for the all-around preservation. Population: 37 in 67 (1 in 67+) Cameo, 2 finer (5/13). NGC ID# 28JT, PCGS# 9272
- 4418 1937 Boone PDS Set MS65 PCGS.** All three coins are housed in green label holders, two of which have consecutive serial numbers. The matched grade set includes: **1937**, lustrous and unmarked with dappled tan-gray toning; **1937-D**, fully struck and pristine with orange and lemon obverse peripheral toning; and a **1937-S**, lustrous and nearly immaculate with rich fire-red and lemon patina across much of the obverse margin. (Total: 3 coins) PCGS# 9273
- 4419 1938 Boone PDS Set PCGS. CAC.** Separately housed in holders with consecutive serial numbers. This low mintage (2,100 pieces) set includes: **1938 MS66 PCGS, CAC**, splendid peripheral orange-gold toning frames pearl-gray centers; **1938-D MS65 PCGS, CAC**, similarly toned, minor contact on the cheekbone; and a **1938-S MS65 PCGS**, rich green-gold and peach-red toning. (Total: 3 coins) PCGS# 9277
- 4420 1925-S California MS67 NGC.** Especially vibrant mint luster and sharply detailed design elements are the calling cards of this delightful Superb Gem. A few hints of lime-green and ice-blue toning add to the terrific eye appeal. NGC ID# 28JY, PCGS# 9281
- 4421 1936 Delaware MS67 PCGS.** Specks of green-gray toning appear primarily on the obverse. More concentrated areas of patina, in shades of deep russet and olive-green, are visible at the outer bottom edges of the obverse. This lustrous Superb Gem also displays hints of light pink and sage. Minor contact marks are visible, primarily on the reverse. Population: 92 in 67 (8 in 67+) Cameo, 2 finer (5/13). NGC ID# 28K9, PCGS# 9301
- 4422 1936 Delaware MS67 PCGS. CAC.** A tab-toned obverse draws attention to this lustrous and sharply struck Superb Gem. Light caramel-gold toning is interrupted only by the familiar bull's-eye pattern where the coin was sheltered for many years by an original holder. Virtually unobtainable finer. NGC ID# 28K9, PCGS# 9301
- 4423 1936 Elgin MS67 PCGS.** The obverse of this Superb Gem exhibits tab toning, with the color consisting of shades of golden-brown. Similar colors appear on the reverse along with hints of green and violet. The reverse displays the lightly struck, grainy surfaces that are often encountered. Only four examples have received higher numeric grades from PCGS (5/13). NGC ID# 28KA, PCGS# 9303
- 4424 1936 Elgin MS67 PCGS.** The thick mint frost the Elgin is so well known for is abundantly evident on this piece, but it is covered with a light layer of gray patina that turns to russet around the margins. NGC ID# 28KA, PCGS# 9303
- 4425 1936 Gettysburg MS66 PCGS.** This well-detailed Premium Gem displays bright satiny mint luster and subtle shades of lavender and champagne-gold toning. Overall eye appeal is quite strong. NGC ID# 28KB, PCGS# 9305
- 4426 1936 Gettysburg MS66+ PCGS. CAC.** The pastel aquamarine and honey-gold toning is especially noticeable on the reverse. Pristine save for minor contact on the motifs. The two soldiers are often assumed to be field generals during the Civil War, but instead are elderly veterans attending a Blue and Gray reunion. NGC ID# 28KB, PCGS# 9305
- 4427 1922 Grant No Star MS66 NGC.** This attractive Premium Gem exhibits well-detailed design elements and satiny mint luster with a few hints of pale gold and lavender toning. NGC has graded 24 numerically finer examples (5/13). NGC ID# 28KD, PCGS# 9306
- 4428 1928 Hawaiian PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that has been cleaned. The coruscating ice-blue and almond-gold key type commemorative displays delicate hairlines but most collectors will recognize its merit. NGC ID# 28KE, PCGS# 9309
- 4429 1928 Hawaiian — Environmental Damage — ANACS. Unc Details, Net AU50.** This commem is not usually seen with high-point friction, and this example disguises the wear with medium-density toning. Two dark areas on the obverse are of unknown origin, but explain the ED designation. NGC ID# 28KE, PCGS# 9309
- 4430 1928 Hawaiian — Improperly Cleaned — NGC Details. AU.** This almond-gold key type commemorative is delicately hairlined and shows minor rub on the cheek but retains much of its initial satin luster. The legends credit Captain Cook with the discovery of Hawaii, though the islands were already populated. NGC ID# 28KE, PCGS# 9309
- 4431 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** This pearl-white half dollar is subdued from dipping but retains glimmers of satin luster. No marks are visible though a loupe reveals unimportant hairlines. Scarcest among the 50 classic silver commemorative types. NGC ID# 28KE, PCGS# 9309
- 4432 1935 Hudson MS66 PCGS. CAC.** The gray-toned surfaces display gold and amber at the edges on this luminous Premium Gem example and the piece is remarkably smooth. The typical soft strike is noted. A solid example of an issue seldom seen finer; PCGS has graded just 10 pieces as MS67 or better (5/13). NGC ID# 28KE, PCGS# 9312
- 4433 1935 Hudson MS66 PCGS. CAC.** A lovely ivory Premium Gem, and an important condition rarity that is elusive in finer grades, this Hudson half dollar exhibits faint champagne toning with peripheral gold splashes. PCGS has only certified 10 finer examples (5/13). NGC ID# 28KE, PCGS# 9312

**1935 Hudson Half Dollar, MS67
Vivid Multicolor Toning**

- 4434 1935 Hudson MS67 NGC.** Rich peach toning is brightest on the obverse. Glimpses of lime and pearl-gray are also evident. Lustrous and remarkably smooth, since the only contact found is on the highpoints, and represents abrasions on the planchet prior to the strike. Census: 29 in 67, 0 finer (6/13).
Ex: *FUN Signature (Heritage, 1/2007)*, lot 7761. NGC ID# 28KE, PCGS# 9312
- 4435 1924 Huguenot MS67 NGC.** Attractive shades of champagne-gold and lavender toning visit the well-preserved surfaces of this delightful Superb Gem. Satiny mint luster and sharply detailed design elements add to the outstanding eye appeal. Census: 41 in 67, 0 finer (5/13). NGC ID# 28KG, PCGS# 9314
- 4436 1936 Long Island MS67 NGC.** A lovely Superb Gem example, this piece exhibits the satiny luster these coins are known for. The tab-toned obverse displays orange-brown patina at the periphery and the central bull's-eye. The remainder of the obverse is brilliant where it rested against its issued cardboard holder for presumably many years. Rich lavender-red, peach-gold, and olive-green hues cover the majority of the reverse. Census: 56 in 67 (1 in 67+), 3 finer (5/13). NGC ID# 28KL, PCGS# 9322

- 4437 1936 Long Island MS67 NGC.** Deep cherry-red and orange peripheral toning surrounds the cream-gray devices. The design elements are well-struck and unmarked with remarkable mint frost over each side. An exquisite representative of this tercentenary type. Only a few pieces have been certified above the MS67 level. Census: 56 in 67 (1 in 67+), 3 finer (5/13). NGC ID# 28KL, PCGS# 9322
- 4438 1934 Maryland MS67 PCGS. CAC.** A splendid Superb Gem Maryland half dollar, with sharply detailed design elements and pristine surfaces. Vibrant mint luster shines through attractive shades of gold and lavender patina. Population: 52 in 67 (2 in 67+), 0 finer (5/13). NGC ID# 28KP, PCGS# 9328
- 4439 1921 Missouri MS64 PCGS. CAC.** Dappled blue-green and walnut-brown toning adorns this lustrous and well preserved near-Gem. The strike is intricate except on the shoulder strap. A much better commemorative type. NGC ID# 28KS, PCGS# 9330

**1921 Missouri Half Dollar, MS66
Attractively Toned and Lustrous**

- 4440 1921 Missouri MS66 NGC.** An outstanding strike for this early issue and a solid Gem representative awash in frosty originality. Speckled reddish-brown toning coats the obverse while the reverse is highlighted in gray and subtle yellow-gold patina. A cut on the pioneer's neck is the lone objectionable feature. Census: 37 in 66, 2 finer (6/13).
Ex: Long Beach Signature (Heritage, 2/2005), lot 8526. NGC ID# 28KS, PCGS# 9330
- 4441 1921 Missouri 2x4 MS64 NGC.** A well-detailed Choice example of the popular 2x4 variant, this coin displays lustrous surfaces with only minor signs of contact. From a small distribution of 5,000 pieces. NGC ID# 28KR, PCGS# 9331
- 4442 1921 Missouri 2x4 MS65 PCGS. CAC.** Dusky shades of amber and golden-tan toning blanket the well-preserved surfaces of this attractive Gem, and the design elements are sharply detailed throughout. NGC ID# 28KR, PCGS# 9331
- 4443 1923-S Monroe MS64+ PCGS.** Champagne toning appears on each side of this near-Gem Monroe half dollar, with iridescent splashes, especially at the lower obverse. NGC ID# 28KT, PCGS# 9333
- 4444 1923-S Monroe MS65 PCGS.** A sensational Gem Monroe half dollar with excellent design definition for the issue. This lovely piece has frosty silver luster and brilliant, untuned surfaces. Only 73 finer examples have been certified by PCGS (6/13). NGC ID# 28KT, PCGS# 9333
- 4445 1923-S Monroe MS65 PCGS.** Vibrant mint luster shines through shades of silver-gray, pale gold, and amber toning on this well-detailed Gem. The right obverse field displays unobtrusive marks. The mintage for this issue proved overly ambitious and many unsold specimens were released into circulation. NGC ID# 28KT, PCGS# 9333

- 4446 1923-S Monroe MS65 PCGS.** This lovely Gem has wisps of pale gold toning at the borders and over much of the reverse. The strike is sharp (in the context of this issue) and the luster is frosty and brilliant. PCGS has only certified 73 finer examples (6/13). NGC ID# 28KT, PCGS# 9333
- 4447 1923-S Monroe MS65 PCGS. CAC.** This impressive silver commemorative exhibits well-detailed design elements and vibrant mint luster, under shades of pale gold, lavender, and amber toning. Close inspection reveals few signs of contact. NGC ID# 28KT, PCGS# 9333
- 4448 1923-S Monroe MS65 PCGS. CAC.** Along with the Panama-Pacific, Vancouver, and California Diamond Jubilee issues, the Monroe is one of several commemorative issues with a West Coast connection. Frosty luster with aspects of gold and even umber enriches parts of otherwise silver surfaces. A delightful Gem example of an issue that is famously elusive so fine. NGC ID# 28KT, PCGS# 9333
- 4449 1938 New Rochelle MS67 PCGS. CAC.** Light cream-gray toning visits this highly lustrous commemorative. Glimpses of autumn-gold toning are relegated to the reverse periphery. Only delicate field grazes limit the grade. NGC ID# 28KU, PCGS# 9335
- 4450 1938 New Rochelle MS67 PCGS. CAC.** Faint golden-gray toning adorns lustrous and pristine surfaces. A minor retained lamination near LIBERTY is of mint origin. A lofty grade for this lower mintage commemorative type. NGC ID# 28KU, PCGS# 9335
- 4451 1926-S Oregon MS67 PCGS. CAC.** Vibrant mint luster shines through vivid shades of champagne-gold, lavender, and violet toning to produce terrific eye appeal on this magnificent Superb Gem. PCGS has graded five numerically finer examples (5/13). NGC ID# 28KX, PCGS# 9341
- 4452 1926-S Oregon MS67 NGC. CAC.** Razor-sharp definition is apparent on all design elements of this spectacular Superb Gem, with vibrant mint luster and attractive hints of pale gold and amber toning. NGC has graded seven numerically finer examples (5/13). NGC ID# 28KX, PCGS# 9341
- 4453 1928 Oregon MS67 PCGS.** Dusky grayish toning appears on the lustrous silver surfaces of this Superb Gem Oregon half dollar. Both sides have underlying mint frost and bold design motifs. Population: 70 in 67 (5 in 67+), 2 finer (6/13). NGC ID# 28KY, PCGS# 9342
- 4454 1934-D Oregon MS67 PCGS.** Rich satin luster provides both sides of this Superb Gem with strong eye appeal. Attractive toning is present, primarily on the obverse, with the colors including shades of lemon, bright cherry, sea-green, and lilac. The Oregon Trail series is the longest-running of the commemorative coin issues. NGC ID# 28L2, PCGS# 9344
- 4455 1937-D Oregon MS68 PCGS. CAC.** An amazing Superb Gem, this sharply defined Oregon Trail half dollar has pristine surfaces with brilliant and frosty silver luster. Both sides exhibit splashes of gold and iridescent toning. Population: 42 in 68 (1 in 68+), 1 finer (6/13). NGC ID# 28L5, PCGS# 9347
- 4456 1938-D Oregon MS67+ PCGS. CAC.** Steel-gray overall with russet-brown and autumn-gold toning confined to the margins. The coruscating surfaces are pristine. Inexactness of strike is confined to the back of the wagon and the opposite legends. NGC ID# 28L7, PCGS# 9349

**1938-S Oregon Trail, MS68
Tied for Finest Known**

4457 1938-S Oregon MS68 NGC. In 1926 Ezra Meeker (1830-1928), Oregon Trail pioneer and promoter, appeared before a Senate committee at age 95 to endorse the idea of an Oregon Trail half dollar, to support fundraising activities for the Oregon Trail Memorial Association. Meeker and his young wife first traversed the 2,000-mile-long trail in 1852, and for the rest of his long life he spent much of it traveling and publicizing the trail. The Congressional approval was forthcoming, and the Oregon Trail half dollars became one of the longest-running commemorative coin series. This 1938-S in MS68 shows light iridescent patina over virtually unmarked surfaces with bold eye appeal and an excellent strike. Census: 16 in 68, 0 finer (5/13). NGC ID# 28L8, PCGS# 9350

4458 1939-D Oregon MS67 PCGS. CAC. Dramatic tab toning accompanies the obverse, which is stone-white where protected by the cardboard holder, and deep apple-green and tobacco-brown where it was exposed during its presumed decades of repose. The reverse displays dappled tan, aqua, and lilac shades. NGC ID# 28LA, PCGS# 9353

4459 1915-S Panama-Pacific MS64 NGC. This delightful Choice specimen displays sharply detailed design elements and vibrant mint luster, with a few hints of pale gold and amber toning. Eye appeal is outstanding. NGC ID# 26H7, PCGS# 9357

4460 1915-S Panama-Pacific MS65 PCGS. CAC. As always, the mint luster is the prominent surface feature on this Pan-Pac. Original gray-blue patina covers most of each side, but the luster still shines through. Magnification is required to locate the few tiny abrasions present. NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half Dollar
MS66, Repunched Mintmark**

4461 1915-S Panama-Pacific MS66 PCGS. FS-502. The mintmark is repunched north. A brilliant and precisely struck Premium Gem with uncommonly clean surfaces. Many Panama-Pacific halves were purchased on a whim by non-collector exposition attendees, and as a result, the type is scarce in better Uncirculated grades. NGC ID# 26H7, PCGS# 9357

**1921 Pilgrim Half, MS67+
NGC's Sole Finest**

4462 1921 Pilgrim MS67+ NGC. CAC. Reddish-orange at the borders with swirling silver interiors that show elements of pale blue. Carefully preserved even by Superb Gem standards and delightfully appealing, this second-year Pilgrim half is part of a larger trend in the early 1920s of extra commemorative varieties made to extort more money from collectors. The only MS67+ example certified by NGC with none numerically finer at that service (5/13). NGC ID# 28LD, PCGS# 9360

4463 1936 Rhode Island MS67 PCGS. Silver centers with touches of green-gold and burnt-orange close to the rims. A smooth and subtly frosted Superb Gem example of the Philadelphia issue. Population: 26 in 67, 0 finer (6/13). NGC ID# 28LE, PCGS# 9363

4464 1937 Roanoke MS67 PCGS. CAC. Light to medium orange-red and aquamarine toning invigorates the borders of this fully struck, lustrous, and essentially pristine Superb Gem. Encapsulated in a green label holder. NGC ID# 28LH, PCGS# 9367

4465 1926 Sesquicentennial MS65 PCGS. CAC. Variegated golden-brown and steel-gray toning dominates aside from deeper russet toning on the reverse border. A highly lustrous and nicely preserved Gem with the usual flan texture evident on Washington's cheek. NGC ID# 28LM, PCGS# 9374

4466 1935 Spanish Trail MS64 NGC. A sharply detailed Choice example of this key silver commemorative, this coin displays vibrant mint luster and pleasing champagne-gold surfaces with ample eye appeal. NGC ID# 28LN, PCGS# 9376

4467 1935 Spanish Trail MS64 NGC. A sharply detailed Choice representative of this popular silver commemorative, with vibrant mint luster and faint hints of pale gold toning. Visual appeal is quite strong. NGC ID# 28LN, PCGS# 9376

4468 1925 Stone Mountain MS67 PCGS. CAC. Deep golden-brown toning is only evident along the borders of this brilliant and highly lustrous Superb Gem. An impressive and appealing piece. PCGS has only certified six finer examples (6/13). NGC ID# 26H8, PCGS# 9378

4469 1935 Texas PDS Set MS67 NGC. The set includes: 1935 Texas MS67 NGC, brilliant throughout with dazzling mint luster; 1935-D Texas MS67 NGC, likewise brilliant and equally lustrous; and a 1935-S Texas MS67 NGC, more oyster-gray than absolutely brilliant, excellent mint luster. Successive NGC numbers. (Total: 3 coins) PCGS# 9385

4470 1938-D Texas MS67 NGC. A richly toned Superb Gem edged in green-gold with violet-to-gray centers. The hues are more pronounced on the obverse, while the reverse lets more shining luster through. NGC ID# 28M3, PCGS# 9395

4471 1925 Vancouver MS66 PCGS. CAC. A satiny Premium Gem with full mint luster, this Vancouver half dollar has violet-gray patina with splashes of gold and iridescent toning. NGC ID# 28M5, PCGS# 9399

- 4472 1927 Vermont MS66+ PCGS. CAC.** Hints of color that include pale yellow, gold, and light gray are scattered throughout on this lovely high-end Premium Gem example. The well-struck piece displays shimmering satin luster. Only a few minor abrasions appear. PCGS has graded 24 numerically finer examples (5/13). NGC ID# 28M6, PCGS# 9401
- 4473 1951-D Booker T. Washington MS67 PCGS. CAC.** Attractive shades of champagne-gold and lavender toning visit the well-preserved surfaces of this spectacular Superb Gem. Sharply detailed design elements contribute to the outstanding eye appeal. NGC ID# 28MP, PCGS# 9425
- 4474 1951-S Booker T. Washington MS67 PCGS. CAC.** A sharply detailed Superb Gem, this brilliant example has a hint of champagne toning on each side with exceptional eye appeal. This piece is tied for the finest at PCGS or NGC. Population: 34 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 28MR, PCGS# 9426
- 4475 1953 Washington-Carver MS66+ PCGS.** Green-gold and bluish-gray patina has a dappled pattern over much of the obverse, while the reverse separates into clearer high and low "fields," respectively. A mark just to the left of Carver's nose is the sole significant obstacle to Superb Gem status. NGC ID# 28MY, PCGS# 9438

COMMEMORATIVE GOLD

- 4476 1903 Louisiana Purchase/Jefferson MS65 PCGS. CAC.** The pristine lemon-yellow surfaces of this delightful Gem show prooflike reflectivity throughout and the design elements are sharply detailed in all areas. Overall eye appeal is terrific. NGC ID# 26HA, PCGS# 7443
- 4477 1903 Louisiana Purchase/McKinley MS66 PCGS. CAC.** This McKinley Louisiana Purchase gold dollar is deep yellow-gold with hints of honey overtones in the swirls of luster. The profile is strongly struck and shows few marks, though a handful of shallow yet grade-defining flaws appear in the fields. NGC ID# 26HB, PCGS# 7444
- 4478 1903 Louisiana Purchase/McKinley MS66 NGC. CAC.** A sharply defined Premium Gem, this 1903 McKinley portrait gold dollar issued for the Louisiana Purchase Exposition exhibits brilliant and lustrous yellow-gold with trivial marks. NGC ID# 26HB, PCGS# 7444
- 4479 1903 Louisiana Purchase/McKinley MS66 PCGS. CAC.** A lustrous and magnificently preserved olive-gold representative of this early commemorative issue. The strike is crisp at the centers though the dentils show minor blending. NGC ID# 26HB, PCGS# 7444
- 4480 1905 Lewis and Clark MS62 NGC.** Vibrant color that includes hints of lime-green and lemon adds to the eye appeal of this lustrous piece. Although 55,000 pieces of the 1905 Lewis and Clark were produced, sales flopped at \$2.50-\$3 per coin, and only approximately 10,000 examples escaped being melted. This example exhibits some of the frequently seen orange-peel effect, due to die wear, on each side. NGC ID# 26HD, PCGS# 7448
- 4481 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** An immaculate peach-gold and lime-green Premium Gem. Lustrous and sharply struck save for the usual incompleteness on the lower dolphin's jaw. Commemorative gold dollars in better Mint State grades have plunged in price in recent years, and provide much greater value than seven years ago. NGC ID# 26HE, PCGS# 7449
- 4482 1916 McKinley MS66 NGC.** Subtle, swirling peach-gold and amber colors enliven the subtly lustrous surfaces of this solidly struck Premium Gem. This is a carefully preserved example exhibiting only a few minuscule marks. NGC ID# 26HF, PCGS# 7454

- 4483 1916 McKinley MS66 PCGS.** A brilliant and satiny Premium Gem, both sides of this McKinley gold dollar have bright yellow-gold luster. An impressive example for the connoisseur. NGC ID# 26HF, PCGS# 7454
- 4484 1916 McKinley MS66+ PCGS. CAC.** This high-end Premium Gem displays well-detailed design elements, with vibrant mint luster and pleasing yellow-gold surfaces that show few signs of contact. Eye appeal is outstanding. NGC ID# 26HF, PCGS# 7454
- 4485 1917 McKinley MS65 PCGS.** A lustrous orange-red Gem. The strike is precise aside from slight blending on each side near 9 o'clock. A couple of tiny spots are noted on the McKinley Memorial. McKinley's final appearance on a U.S. coin until the Presidential dollar of the present year NGC ID# 26HG, PCGS# 7455

1917 McKinley Gold Dollar, MS67 The Only 1917 U.S. Gold Coin

- 4486 1917 McKinley MS67 PCGS.** An impressive Superb Gem specimen from a distribution of 10,000 pieces, this example has satin luster with light gold surfaces. Both sides are nicely struck and pristine. PCGS and NGC have combined to certify just over 100 at this grade level, but none finer. Population: 57 in 67, 0 finer (6/13). NGC ID# 26HG, PCGS# 7455
- 4487 1922 Grant No Star MS63 PCGS.** Excellent detail through Grant's hair with lively lemon-yellow luster that shows hints of orange. Fine abrasions and a small scrape behind Grant's head contribute to the grade. NGC ID# 26HJ, PCGS# 7458
- 4488 1922 Grant No Star MS64 PCGS.** A beautiful lemon-gold near-Gem of this birth centennial issue. No marks are visible and only the tree trunk near the window lacks a full impression. Star and No Star varieties were struck in similar quantity merely to provide an additional variety for collectors. NGC ID# 26HJ, PCGS# 7458

1922 Grant Gold Dollar, MS67 No Star Variant

- 4489 1922 Grant No Star MS67 PCGS.** A stunning Superb Gem with exceptional eye appeal, this brilliant yellow-gold specimen has a bold strike and pristine surfaces. Although PCGS has certified 130 submissions at this grade level, that service has never examined a finer piece (6/13). NGC ID# 26HJ, PCGS# 7458
- 4490 1926 Sesquicentennial MS65 PCGS.** An impressive Gem, this Sesquicentennial quarter eagle has frosty yellow luster with wisps of pinkish-orange and mint-green toning. A few trivial copper toning spots are evident on each side. NGC ID# 26HL, PCGS# 7466

- 4491 1926 Sesquicentennial MS65 PCGS.** An attractive Gem representative of this popular gold commemorative, with vibrant mint luster and well-detailed design elements throughout. Eye appeal is outstanding. NGC ID# 26HL, PCGS# 7466

**1926 Quarter Eagle, MS65+
Sesquicentennial Commemorative**

- 4492 1926 Sesquicentennial MS65+ PCGS. CAC.** A faint trace of light green patina appears near the borders of this fully lustrous and brilliant yellow-gold Gem. The strike is bold and the surfaces show only scattered marks. An exceptional example of the popular Sesquicentennial quarter eagle. NGC ID# 26HL, PCGS# 7466

MODERN ISSUES

- 4493 1984-P Olympic Gold Ten Dollar PR70 Deep Cameo PCGS.** From Philadelphia and the actual year of the most recent Los Angeles Olympics comes this perfect proof ten dollar coin. Walter Breen, who seemingly had a nickname for every modern commemorative he saw, called this design "Dick and Jane" for the male and female runners. NGC ID# 28PD, PCGS# 9614
- 4494 1995-W Olympic/Stadium Gold Five Dollar MS69 PCGS.** Ex: US Vault Collection. Pale golden surfaces have just a hint of orange at the right obverse. A near-perfect piece from an issue with a net mintage of just 10,579 pieces. NGC ID# 28TK, PCGS# 9734
- 4495 1995-W Olympic/Stadium Gold Five Dollar MS70 PCGS.** Label signed by John M. Mercanti, 12th Chief Engraver of the U.S. Mint. Light yellow-gold surfaces are technically perfect. A few holder imperfections should not be interpreted as being on the coin itself. NGC ID# 28TK, PCGS# 9734
- 4496 1996-W Olympic/Flag Bearer Gold Five Dollar MS69 PCGS.** Ex: US Vault Collection. A near-perfect example of this modern gold commemorative. Medium orange-gold color overall with slight reflectivity evident in the obverse fields. NGC ID# 28U2, PCGS# 9736
- 4497 1996-W Olympic/Flag Bearer Gold Five Dollar MS70 PCGS.** Label signed by John M. Mercanti, 12th Chief Engraver of the U.S. Mint. At 9,174 pieces the Flag Bearer five dollar gold, Uncirculated finish, has the lowest mintage of any Atlanta Olympic commemorative. NGC ID# 28U2, PCGS# 9736
- 4498 1996-W Olympic/Cauldron Gold Five Dollar MS69 PCGS.** Ex: US Vault Collection. Both sides have swirling luster, light yellow-gold with satiny texture. The strike and preservation are impressive. PCGS has graded 67 numerically finer examples (5/13). NGC ID# 28U4, PCGS# 9738
- 4499 1996-W Olympic/Cauldron Gold Five Dollar MS69 PCGS.** With just 9,210 pieces struck, the Mint State Cauldron five is the second-rarest of the Atlanta Olympics commemoratives, behind only the Flag Bearer half eagle of the same year. This near-perfect example is lustrous pale yellow with near-uniform color. NGC ID# 28U4, PCGS# 9738

- 4500 1996-W Olympic/Cauldron Gold Five Dollar MS70 PCGS.** Signature of John M. Mercanti, 12th Chief Engraver of the U.S. Mint. A pale and perfect representative of an issue with a net mintage of just 9,210 business strikes. Population: 67 in 70 (6/13). NGC ID# 28U4, PCGS# 9738

- 4501 Four-Piece Uncertified 1997 Jackie Robinson Commemorative Set.** The complete set featuring business strike and proof formats of both the San Francisco silver dollar and the gold five dollar struck at West Point. Most valuable of the four coins is the Uncirculated finish 1997-W five dollar, which has a net mintage of just 5,174 pieces. The original box, case, and certificate of authenticity are included. (Total: 4 coins)

- 4502 1997-W Jackie Robinson Gold Five Dollar MS69 PCGS.** The 1997-W Jackie Robinson five is a low-mintage key to the modern commemorative gold series. This piece is one tick away from perfection, with fully struck design elements and vibrant mint luster throughout. NGC ID# 28UG, PCGS# 9759

- 4503 1997-W Jackie Robinson Gold Five Dollar MS69 PCGS.** The business strike Jackie Robinson fives had a tiny mintage of just 5,174 pieces. This stunning MS69 example displays virtually unimprovable brass-gold surfaces with exquisitely struck design elements. One of the most challenging modern commemoratives. NGC ID# 28UG, PCGS# 9759

- 4504 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** A few very subtle hints of color appear on this numerically perfect example possessing pleasing satin luster and boldly detailed design elements. NGC ID# 28V5, PCGS# 9784

- 4505 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** Although the authorized mintage limit for these ten dollar bimetallic coins was 200,000, far fewer were produced. The reference books vary on the count, with the *Guide Book* listing a distribution of 7,261 and other sources listing several hundred fewer. This unimprovable example displays exquisite surfaces, beautifully struck design elements, and fantastic eye appeal. NGC ID# 28V5, PCGS# 9784

- 4506 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** The 2000-W Library of Congress ten dollar commemorative is the first gold/platinum bimetallic coin ever issued by the United States, with a mintage of just 6,683 pieces. Prolific coin and medal designer John Mercanti is responsible for the richly detailed obverse design. This specimen is technically perfect, with sharply detailed design elements, satiny mint luster, and flawless surfaces. NGC ID# 28V5, PCGS# 9784

MODERN BULLION COINS

- 4507 1987 Silver Eagle MS70 NGC.** Not surprisingly, this numerically perfect 1987 Silver Eagle displays exceptional quality, with no observable surface flaws, sharply detailed design elements, and incredibly vibrant mint luster. NGC ID# 26J6, PCGS# 9808
- 4508 1988 Silver Eagle MS70 NGC.** The full potential of Weinman's beautiful Walking Liberty design is realized on these larger and popular modern issues. The design elements are fully struck up, a feat that was impossible on the early half dollars of this design. This numerically perfect example has all of the attributes one would expect. NGC ID# 26J8, PCGS# 9816
- 4509 1990 Silver Eagle MS70 NGC.** Rich luster and fully struck design elements provide this piece with exceptional eye appeal. A hint of golden toning is present. NGC ID# 26JC, PCGS# 9836

**1991 Silver Eagle, MS70
Tied for Finest Known**

- 4510 1991 Silver Eagle MS70 NGC.** The American Eagle silver and gold bullion coins were first issued in 1986, and early issues such as this 1991 silver Eagle are seldom seen in the finest grade. This brilliant and highly lustrous example has satin surfaces and bold design motifs. It is a perfect Mint State specimen with exemplary eye appeal. NGC ID# 26JE, PCGS# 9846
- 4511 1991-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A coin with tremendous eye appeal, this piece displays marked contrast between the richly frosted devices and the mirrored fields. NGC ID# 28Z2, PCGS# 9855
- 4512 1992 Silver Eagle MS70 NGC.** A technically unimprovable example as the grade indicates, this piece exhibits rich luster and a bold strike. NGC ID# 26JG, PCGS# 9856
- 4513 1992-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** The year 1992 was the first one in which the Mint reverted to Arabic numerals from Roman, making this a first-year subvariety. This beautiful example received a perfect score from the grading service. NGC ID# 28Z3, PCGS# 9865
- 4514 1993 Silver Eagle MS70 NGC.** Attractive luster and boldly detailed design elements add to the appeal of this numerically perfect example. A tiny, as-made strike-through appears on the shield. A few milk spots are present at the periphery on both sides. NGC ID# 26JJ, PCGS# 9866
- 4515 1994 Silver Eagle MS70 NGC.** Flashy lustrous surfaces and bold design definition provide this numerically perfect example with a strong degree of eye appeal. Glimpses of wheat-gold patina are present. NGC ID# 26JL, PCGS# 9876
- 4516 1994-P Silver Eagle PR70 Deep Cameo PCGS.** A powerfully reflective specimen of technical perfection. Milk-spotting is minimal with only a small area to the left of the eagle of any concern. NGC ID# 26JM, PCGS# 9877

**1995-W Silver Eagle, PR69 Ultra Cameo
With Presentation Case**

- 4517 1995-W Silver Eagle PR69 Ultra Cameo NGC.** A pristine specimen of the key issue of the proof silver eagle series. Unimprovable contrast and a full strike contribute further to the eye appeal. Accompanying the lot is an original box, case, and certificate of authenticity from the five-piece set, though no gold coins are included. NGC ID# 28WZ, PCGS# 9887

**1996 Silver American Eagle, MS70
No Perfect Examples at PCGS**

- 4518 1996 Silver Eagle MS70 NGC.** This technically flawless one-ounce silver American Eagle has a faint partial olive overtone across surfaces with a few tiny as-made luster breaks. Post-striking flaws are nil, even under standard triplet magnification. All MS70 examples in the combined certified population have been graded by NGC (6/13). NGC ID# 26JR, PCGS# 9900
- 4519 1998 Silver Eagle MS70 NGC.** A technically perfect specimen, with fully struck design elements and vibrant mint luster throughout. Close inspection with a loupe reveals no surface flaws and eye appeal is tremendous. NGC ID# 26JV, PCGS# 9929
- 4520 1998 Silver Eagle MS70 NGC.** Technically perfect business-strikes are always in demand. This magnificent example is fully struck, with brilliant lustrous surfaces that show no signs of contact. NGC ID# 26JV, PCGS# 9929
- 4521 1998 Silver Eagle MS70 NGC.** A few tiny splashes of toning appear on this lovely example displaying rich luster and bold design definition. NGC ID# 26JV, PCGS# 9929
- 4522 1998-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Shimmering surfaces, rich color, and a bold degree of contrast between the fields and devices provide this piece with exceptional eye appeal. NGC ID# 28ZA, PCGS# 9938
- 4523 1999-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** A gorgeous, beautifully struck example exhibiting a bold level of contrast, this piece is numerically perfect. NGC ID# 28ZB, PCGS# 9946
- 4524 1999-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** This technically perfect 1999-W one-ounce gold coin offers stunning contrast between the lustrous devices and fully mirrored fields. The aesthetic appeal of this piece is impressive. NGC ID# 28ZB, PCGS# 9946
- 4525 2003-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Marked contrast, boldly impressed design elements, and flawless surfaces combine for exceptional visual appeal on this lovely piece. NGC ID# 26PU, PCGS# 99968
- 4526 2004-W Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** The bold level of contrast between the richly frosted devices and the deeply mirrored fields provides this piece with tremendous visual appeal. The facial close-up design is impressive. NGC ID# 293J, PCGS# 921106
- 4527 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** Gleaming devices and frosty fields define this topsy-turvy but technically perfect "Reverse Proof" one-ounce gold American Eagle. A few small areas of discoloration are visible in the obverse fields. NGC ID# 28ZH, PCGS# 89994
- 4528 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 NGC.** Gorgeous honey-gold color and shimmering luster are among the attributes of this well struck example. NGC ID# 26S4, PCGS# 407404

- 4529 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS.** Brilliant shimmering surfaces provide this lovely, beautifully struck example with a tremendous degree of eye appeal. NGC ID# 26S4, PCGS# 407404
- 4530 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** The 21st century execution of the Saint-Gaudens 20th century masterpiece, offered here as a deep-relief vision of technical perfection. NGC ID# 26S4, PCGS# 407404
- 4531 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** Struck in 2009 as a reprise of the 1907 variant of the double-thick twenty dollar designed by Augustus Saint-Gaudens, these coins were an immediate hit with collectors and remain so today. This technically perfect example has all of the attributes expected at this grade level. NGC ID# 26S4, PCGS# 407404
- 4532 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** The distinctive Saint-Gaudens High Relief design appears in miniature on this series, much as it appeared on the original small diameter, double thickness pieces that now reside at the Smithsonian. This amazing example is technically perfect and aesthetically unsurpassable. NGC ID# 26S4, PCGS# 407404
- 4533 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A technically perfect uncirculated-finish example of the 20th-meets-21st masterpiece that was more than a century in the making. Deep, curved fields have a semireflective gleam. NGC ID# 26S4, PCGS# 407404

COINS OF HAWAII

- 4534 1883 Hawaii Half Dollar MS63 NGC.** A subtly shimmering example of the Kingdom of Hawaii's sole half dollar issue from 1883. Great intricate detail on Kalakaua's portrait with only hints of gold and blue on otherwise silver surfaces. The grade comes from wispy or shallow flaws more than any deep abrasions. PCGS# 10991

1883 Hawaiian Half Dollar, MS64 Struck at San Francisco

- 4535 1883 Hawaii Half Dollar MS64 PCGS Secure.** The 1883 Hawaiian silver coins, dime, quarter, half dollar, and dollar, were struck at the San Francisco Mint using standard silver planchets for those denominations. This Choice Mint State half dollar is fully lustrous with brilliant ivory surfaces and peripheral gold and green toning. Population: 60 in 64 (3 in 64+), 16 finer (6/13). PCGS# 10991
- 4536 1883 Hawaii Dollar AU58 NGC.** Luster brightens the legends and motifs of this briefly circulated Hawaiian silver dollar. Medium chestnut-gold and pearl-gray toning aids the eye appeal. Distributed moderate abrasions are consistent with the grade. PCGS# 10995

ERRORS

Multiple-Strike 1893 Cent, MS63 Brown Dramatic and Eye-Appealing

- 4537 1893 Indian Cent — Multiple Strikes in Collar, Another Off-Center — MS63 Brown NGC.** The 1893 cent stubbornly stayed in the collar after its initial striking, receiving at least one more centered impression, before partially exiting the dies and getting another strike about 70% off-center toward 11 o'clock. The 1893 date remains clear and the surfaces are unworn, making for a clean and pleasing error.

Centered Broadstrike on an 1855 Arrows Seated Dime, XF45

- 4538 1855 Seated Dime, Arrows — Broadstruck — XF45 NGC.** A well centered broadstrike, this Seated dime has uncommonly wide rims as it was coined without a collar die. The rim is widest near 12 o'clock. The stone-gray surfaces exhibit moderate wear and a concealed abrasion on the lower right portion of the wreath.

Off-Center 1889-O Dollar, Choice VF Rare Morgan Dollar Error

- 4539 1889-O Morgan Dollar — Struck 7% Off-Center — VF35 PCGS.** Errors become far less common the higher the denomination goes, such that even a minor off-center strike becomes a major rarity. This example, struck off-center just to the right of 12 o'clock by obverse reckoning, likely was kept as a pocket-piece due to the plain gray worn areas on the high points of otherwise blue-gray and olive surfaces. The date and mintmark are clear.

- 4540 1902 Liberty Quarter Eagle — Minor Planchet Flaw Obverse — MS64 PCGS.** This lovely late date Liberty quarter eagle would likely attain classification as a Gem, were it not for a diagonal mint-made planchet flaw on Liberty's cheek. Sea-green margins frame pumpkin-gold centers.
Ex: Columbus Central States Signature (Heritage, 4/2006), lot 5386, which realized \$1,265.

- 4541 1909-D Indian Half Eagle — Obverse Struck Thru — MS63 NGC.** A nearly square-shaped strike-through rests on the top feather of the headdress, directly beneath the T in LIBERTY. This is a sharply struck and coruscating sun-gold example with claims to an even finer technical grade.

U.S. PRESIDENTS & STATESMEN

- 4542 Bronze Abraham Lincoln Plaque MS62 NGC.** Uniface, rectangular, 89 mm x 67 mm. A bearded Lincoln with shoulders and waist faces right. Legends at the bottom of the plaque are ABRAHAM LINCOLN / * * 1809 * 1865 * *. Monogram of designer, Victor D. Brenner, in lower right corner. A few small spots.

ASSAY MEDALS

- 4543 1902 U.S. Assay Medal, Bronze MS64 NGC. JK-AC-46.** The 1902 medal commemorates the advent of the Third Philadelphia Mint. A fully struck and unblemished specimen with olive and rose undertones. Included with the lot is the original dark red box, which has a working hinge and moderate edge wear.
- 4544 1907 U.S. Assay Commission, Bronze MS64 NGC. JK-AC-51.** Obverse: head and shoulders bust of President Theodore Roosevelt facing left. Reverse: defiant eagle faces left, atop Treasury Seal. A dusky olive-gray example with undisturbed matte surfaces. Included with the lot is the original mahogany-red box with working hinge and minor wear.

COUNTERSTAMP

- 4545 1834 Large Date, Small Letters VF20 NGC. O-102, HT-141. Houck's Panacea, Baltimore.** This counterstamped half dollar is an example with the extremely popular Houck's Panacea counterstamp. Well worn, but with attractive pewter-gray and steel surfaces. Jacob Houck arrived in Baltimore in 1828 and operated a dry goods business. He received a patent for Houck's Panacea on May 9, 1833. The substance included Rye whiskey, Gum quac, Sugar, Oil of Juniper, and Oil of Lemon. Yum.

INGOT

Undated San Francisco Mint Silver Ingot 5.70 Ounces

- 4546 San Francisco 5.7 Ounce Silver Ingot.** This undated ingot has the oval imprint of the San Francisco Mint at the top with the ingot number 875 stamped near the bottom of the mint imprint, followed by 999.75, with FINE below. The back displays the weight: 5.70 with OZS seen below. The surfaces are bright and silvery throughout, with a few accents of pale gold and amber toning. The ingot measures 31 x 50 mm.

ROLL

- 4547 1949-S Half Dollar Roll.** An original \$20 face-value, bank-wrapped roll of 1949-S half dollars. The coins grade MS62-64, one piece has Unc Details and is scratched. Quite an unusual item.

REDFIELD DOLLAR

- 4548 1883-S MS65 Paramount (MS61 NGC).** This better date Redfield dollar displays pleasing autumn-gold, jade-green, and rose-red peripheral patina. Boldly struck and lustrous with a clean reverse and moderate obverse marks. NGC ID# 254K, PCGS# 7148

COLONIALS

4549 1652 Oak Tree Shilling PCGS Genuine. Noe-9, W-500, Salmon 7-E, R.5. 36.4 gn. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been heavily clipped and has obverse scratches. A typical Noe-9 in Fine weighs 70 gn. The scratches are fairly light. The gunmetal-gray surfaces are moderately wavy. Listed on page 39 of the 2014 *Guide Book*. PCGS# 20

4550 (1670-75) St. Patrick Farthing Fine 12 PCGS. CAC. Breen-208. Toned medium brown aside from the oversized brass splasher on the upper obverse. A small edge flaw, as made, is at 12 o'clock but the surfaces are smooth except for two small obverse spots at 10:30. Listed on page 41 of the 2014 *Guide Book*. PCGS# 42

St. Patrick Farthing, VF35 Breen-218, Martlet Below King

4551 (1670-75) St. Patrick Farthing VF35 PCGS. CAC. Breen-218. The "martlet below king" variety. A martlet is a legless heraldic bird. The brass splasher largely overlaps the crown. Most St. Patrick farthings are well worn or corroded, but this chocolate-brown example has pleasing detail and generally attractive surfaces despite minor porosity on the lower right obverse. Listed on page 41 of the 2014 *Guide Book*. PCGS# 42

4552 1723 Hibernia Halfpenny MS64 Red and Brown PCGS. M. 4.57-Gc.13, W-13120, R.3. No pellet before H, Small 3, 11 harpstrings. Medium-brown surfaces show glimpses of blue and faded orange at the margins. Softly defined through the central reverse but pleasing otherwise. Housed in a green label holder. Listed on page 45 of the 2014 *Guide Book*. PCGS# 181

4553 1724 Hibernia Halfpenny AU53 PCGS. CAC. M. 4.51-K.4, W-13690, R.2. A late die state with the bust tip attached to the rim by a small die break. A problem-free chocolate-brown Hibernia type coin with smooth surfaces that retain glimpses of satiny luster. Listed on page 45 of the 2014 *Guide Book*. PCGS# 190

1773 Virginia Halfpenny No Period, Newman 7-D MS65+ Brown

4554 1773 Virginia Halfpenny, No Period MS65+ Brown PCGS. CAC. N. 7-D, W-1480, R.2. A magnificent Gem that boasts smooth prooflike fields and an intricate strike. Olive-green and orange-gold hues emerge when the tan-brown surfaces are contrasted with light. Scarcer than its Period halfpenny counterpart. Listed on page 45 of the 2014 *Guide Book*. PCGS# 243

4555 1760 Hibernia-Voce Populi Halfpenny, P Below Bust AU55 PCGS. CAC. N. 13, Z. 14-M, W-13960, R.2. A glossy and unblemished chocolate-brown example that exhibits considerable hints of luster. An early die state without the lengthy reverse cracks sometimes seen. Listed on page 49 of the 2014 *Guide Book*. Population: 6 in 55, 6 finer (5/13). PCGS# 268

4556 1787 Massachusetts Cent, Arrows in Left Talon AU55 NGC. Ryder 3-G, W-6090, R.3. This medium brown representative is relatively free from marks and shows no sign of verdigris or planchet deficiencies. An appealing example of this two-year state copper type. Listed on page 59 of the 2014 *Guide Book*. Census: 5 in 55, 8 finer (5/13). PCGS# 302

4557 1787 ETLIB INDE Small Head Right Connecticut Copper VF35 PCGS. M. 1.1-A, W-2700, R.3. This *Guide Book* variety is much scarcer than the usually encountered Draped Bust Left design. This medium brown and steel-blue example has a small mint-made curved clip at 5:30 and is struck slightly off center toward 12 o'clock. Moderately granular with faint thin marks at the centers. Listed on page 61 of the 2014 *Guide Book*. Population: 2 in 35, 3 finer (5/13). PCGS# 346

4558 1787 Nova Eborac Copper, Seated Left AU58 PCGS. Breen-986, W-5755, R.3. Nova Eborac is the Latin translation of New York, and coppers with this legend are associated with the Machin's Mills coiners from that state. This deep golden-brown example is moderately off center toward 9 o'clock but has a full date. Faded thin marks are noted near EBORAC and LIB. Listed on page 68 of the 2014 *Guide Book*. PCGS# 478

4559 1786 New Jersey Copper, Narrow Shield, Straight Beam XF45 NGC. Maris 14-J, W-4810, R.1. A lovely tan-brown state copper. Nicely centered and free from visible marks. Two small flan flaws bookend the reverse star at 1 o'clock. Listed on page 69 of the 2014 *Guide Book*.
Ex: West Palm Beach FUN (Heritage, 7/2009), lot 7022, which realized \$632.50. PCGS# 496

4560 1787 New Jersey Copper, Large Planchet, Plain Shield — Corroded — NCS. AU Details. Maris 6-D, W-5050, R.2. No sprig above plow. An unusually sharp example of this large-eyed, curved plow beam variety. The darkened surfaces are evenly and moderately granular. A rim mark is noted at 10:30 on the reverse. Listed on page 66 of the 2014 *Guide Book*. PCGS# 509

4561 1783 Nova Constellatio Copper, Blunt Rays XF45 PCGS. Crosby 3-C, W-1875, R.3. Traces of golden-brown outline design elements, though the open fields are steel-gray. Evenly struck and attractive with scattered hair-thin marks at the margins and near the S in US. Listed on page 54 of the 2014 *Guide Book*. PCGS# 807

4562 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU50 NGC. Crosby 4-D, W-1910, High R.4. A smooth and charming chocolate-brown example of this scarce die marriage. Crosby 3-B is the usual Large US, Large Date variety. Late dies with peripheral swelling and clash marks within the rays above NOVA. Listed on page 54 of the 2014 *Guide Book*.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 9042, which realized \$1,035. PCGS# 813

4563 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF25 PCGS. N. 17-S, W-6935, R.3. Light brown color covers the reverse and about half of the obverse, with ebony toning present on the left side and center of the obverse. An edge planchet flaw at 2 o'clock on the reverse is strictly of mint origin. Generally sharp for the assigned grade. Slightly off center toward 2 o'clock. Listed on page 87 of the 2014 *Guide Book*.
Ex: Long Beach Signature (Heritage, 9/2003), lot 5224; Long Beach Signature (Heritage, 6/2005), lot 5052. PCGS# 883

4564 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 NGC. N. 13-X, W-6855, R.2. An unabraded olive-brown Fugio copper with an even strike and good eye appeal. The surfaces display the many dark mint-made flan striations typical for the type. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

4565 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. N. 8-X, W-6750, R.3. The advanced die break at the center of the lower obverse is familiar to the Fugio specialist, though seen on a minority from the Newman 8-X marriage. An unabraded olive-brown representative with minor spots on the uppermost reverse ring. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**1787 STATES UNITED Fugio Cent, Choice XF
Pointed Rays, 4 Cinquefoils, Newman 18-U**

4566 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. CAC. N. 18-U, W-6960, R.4. A scarcer Newman variety, known for its clash marks and a die scratch near the first cinquefoil, all as made. A minimally abraded deep golden-brown Fugio copper with moderate peripheral granularity. Housed in a green label holder, and listed on page 87 of the 2014 *Guide Book*. PCGS# 883

4567 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU58 PCGS. Newman 13-X, W-6855, R.2. This Bank of New York Hoard variety has a trace of high point rub on its glossy dark brown surfaces with a few minor scratches and trivial handling marks. An attractive example with considerable luster. Some pre-strike planchet roughness is visible along the left obverse border. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**1787 Fugio Cent, Cinquefoils
UNITED STATES, N. 8-B
MS62 Brown**

4568 1787 Fugio Cent, UNITED STATES, Cinquefoils MS62 Brown PCGS. CAC. N. 8-B, W-6740, R.3. This golden-brown cent displays iridescent ice-blue and rose-gold undertones. The reverse border is clashed but there are no abrasions. The sole flan flaw is minor and located at 3 o'clock on the obverse. Struck slightly off center toward 10:30 though only the rims are affected. Listed on page 87 of the 2014 *Guide Book*. PCGS# 889

4569 1778-1779 Rhode Island Ship Token, Wreath Below, Brass — Damaged — NGC Details. Unc. Breen-1141, W-1740, R.4. This evenly struck olive-brown specimen is devoid of abrasions and has good eye appeal. Mildly granular at the margins, and the fields are moderately subdued, but no damage is readily apparent. An impressive example of the popular Revolutionary War British propaganda medal. Listed on page 50 of the 2014 *Guide Book*. PCGS# 587

4570 1789 Mott Token, Thick Planchet, Plain Edge MS62 Brown PCGS. Breen-1020. The late die state with a huge die break from the clock corner and indistinct detail on the eagle's shield. This token is in much better shape than its dies, since the generally golden-brown surfaces are pleasing. Listed on page 74 of the 2014 *Guide Book*. Population: 12 in 62 Brown, 19 finer (6/13).
Ex: Long Beach Signature (Heritage, 5/2008), lot 2194, which realized \$1,092.50. PCGS# 603

**Kentucky Token, MS65 Brown
LANCASTER Edge, W-8810**

4571 (1792-94) Kentucky Token, LANCASTER Edge MS65 Brown PCGS. CAC. Breen-1156, W-8810, R-5. The Kentucky tokens were produced in England as part of the Conder token series and widely collected there. It seems unlikely that they ever circulated in this country. This coin represents the elusive W-8810 variety, with the LANCASTER edge. The glossy brown surfaces show few signs of contact and the design elements are sharply rendered. Listed on page 75 of the 2014 *Guide Book*. Population: 2 in 65 Brown, 1 finer (5/13). PCGS# 623

4572 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR65 Brown PCGS. CAC. Baker-3A, W-10380, R.6. This Gem proof has bronzed copper surfaces with olive-brown patina and traces of original orange mint color. Hints of pale blue toning appear on both sides with a few trivial carbon spots. PCGS# 685

4573 1791 Washington Small Eagle Cent MS62 Brown NGC. Baker-16, W-10630, R.3. A prooflike representative that boasts a sharp strike and attractive eye appeal. The reverse is unabraded while the obverse has only distributed minute marks. The reflective fields offer lilac-red, steel-blue, and orange-gold undertones. Listed on page 81 of the 2014 *Guide Book*. PCGS# 705

**Washington Liberty & Security Penny, MS64 Brown
Asylum Edge, Baker-30, W-11050**

4574 Undated Washington Liberty & Security Penny MS64 Brown PCGS. CAC. Baker-30, W-11050, R.2. The Washington Liberty and Security pennies were produced in large quantities and circulated widely in England. This impressive Choice example is sharply detailed, with smooth chocolate-brown surfaces that show few signs of contact. Listed on page 84 of the 2014 *Guide Book*. Population: 22 in 64 (1 in 64+) Brown, 5 finer (5/13). PCGS# 767

**Washington Liberty & Security Penny
Bust Left, Plain Rims, Baker-30, MS64 Brown**

4575 Undated Washington Liberty & Security Penny MS64 Brown PCGS. CAC. Baker-30, W-11050, R.2. The Plain Rims variety, characterized by a lumpy appearance on the left-side obverse rim. This is a prooflike near-Gem whose glossy deep tan-brown surfaces display powder-blue undertones. Well struck and essentially pristine but perhaps limited in grade by a curly lintmark (as coined) on Washington's jaw. Listed on page 84 of the 2014 *Guide Book*. PCGS# 767

4576 Undated Washington Success Medal, Large Size, Plain Edge XF45 PCGS. Baker-265A, W-10905, R.5. A die break from Washington's nose identifies the Original large planchet variety. This moderately circulated walnut-brown representative has minor verdigris and the usual incompleteness of strike on the all-seeing eye. Listed on page 84 of the 2014 *Guide Book*. PCGS# 779

HALF CENTS

4577 1793 — Environmental Damage — PCGS Genuine. Fine Details. C-2, B-2, R.3. A single year type, the 1793 half cent was struck during the first year of operation at the First Philadelphia Mint. This dark lavender-brown representative has considerable design detail, especially on the reverse, but the surfaces are rough from long-term exposure to the elements. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 1000

4578 1795 Lettered Edge VF20 PCGS. C-2a, B-2a, R.3. Manley Die State 3.0. The usual die state with obverse and reverse bulges, a die crack through the tops of RIC, and a clash mark from the base of the F to the leaf below. Light tan and olive surfaces show splashes of darker steel patina. Faint hairlines and scattered surface marks are present with planchet rifts at the central reverse. Our EAC grade Fine 12. NGC ID# 2224, PCGS# 1009

4579 1795 Plain Edge, No Pole — Damaged — NGC Details. Fine. C-5b, B-5b, R.4. As usual for Cohen-5, HALF CENT is obscured by the prominent diagonal die break on the central reverse. Otherwise, all legends are bold on this lavender-brown example. The fields are moderately granular and the portrait has a couple of noticeable abrasions. Our EAC grade VG8.

4580 1795 Plain Edge, No Pole Fine 15 PCGS. C-5a, B-5a, R.3. 78.55 gn. Iridescent golden-brown, olive, and lilac shades visit this scarce Liberty Cap half cent. The heavy die crack within the wreath causes HALF CENT to be illegible but the remainder of the legends are clear except for the ICA in AMERICA. Abraded near the 17 in the date and the TY in LIBERTY. Our EAC grade VG8. NGC ID# 2225, PCGS# 1018

4581 1797 1 Above 1, Plain Edge — Struck On a Cut-Down Talbot, Allum & Lee Cent — Fine 15 ANACS. C-1, B-1, R.2. Manley Die State 1.0, "rare," without a bulge left of the L in LIBERTY. The undertype is a cut-down Fuld-2 Large Ampersand 1794 Talbot, Allum & Lee cent token. YORK can be discerned on the obverse near 8 o'clock. Toned golden-brown and sea-green with minimal marks and good eye appeal. Our EAC grade Good 6. PCGS# 1042

4582 1797 1 Above 1, Plain Edge VF25 PCGS. C-1, B-1, R.2. Manley Die State 5.0. The scarce late die state with extensive obverse die cracks and bulges, and with ICA extremely weak. Faint hairlines and minor handling marks are evident on the dull, matte-like maroon and olive-brown surfaces. Our EAC grade Fine 12. PCGS# 1042

4583 1797 1 Above 1, Plain Edge — Burnished — NGC Details. XF. C-1, B-1, R.2. Manley Die State 4.0. An intermediate die state with a shattered obverse die, but with RTY and Liberty's nose complete. A nearly complete 1 is visible between the primary 1 and the bust on this blundered obverse die. Deep steel surfaces show traces of pale reddish patina on this lightly cleaned and burnished half cent. Our EAC grade Fine 12.

**1800 Half Cent, Glossy MS63 Brown
Sole Variety of the Year**

- 4584 1800 MS63 Brown NGC. C-1, B-1, R.1.** Manley Die State 4.0. The only 1800-dated die variety. The left foot of the T in LIBERTY is missing, the hair curl near the 1 in the date is open at its base, and a die break (as made) nearly joins the E in UNITED to the wreath. A faint die crack (as struck) connects the tops of NITE in UNITED. A nicely struck, lightly abraded, and satiny piece with luminous tan and aqua colors. Our EAC grade MS60.
Ex: *Portland Signature* (Heritage, 3/2004), lot 5015. NGC ID# 222B, PCGS# 1051

**1804 C-13, B-10 Half Cent, MS62 Brown
Plain 4, No Stems**

- 4585 1804 Plain 4, No Stems MS62 Brown NGC. C-13, B-10, R.1.** A frosty Mint State specimen with full cartwheel luster, the obverse shows olive and bluish-brown color with splashes of lighter tan. The reverse combines tan and chestnut-brown with hints of pale blue. An attractive coin for a type or date collector, or a variety specialist. Our EAC grade MS60. NGC ID# 222F, PCGS# 1063
- 4586 1804 Crosslet 4, Stems AU55 NGC. C-9, B-8, R.2.** Manley Die State 1.0. A charming golden-brown Choice AU example with smooth surfaces and considerable design definition, particularly on Liberty's curls. Our EAC grade XF40. NGC ID# 222F, PCGS# 1069

**1804 C-10, B-9 Half Cent, MS63 Brown
Crosslet 4, With Stems**

- 4587 1804 Crosslet 4, Stems MS63 Brown NGC. C-10, B-9, R.1.** Manley Die State 3.0. This is the usual die state with a heavy crack through the upright of the R in AMERICA. The dies have been ground and repolished, lacking border dentils on either side. This Select Mint State specimen has good cartwheel luster with mottled steel-brown obverse patina and chestnut reverse toning. Our EAC grade AU55. NGC ID# 222F, PCGS# 1069

- 4588 1804 Spiked Chin AU50 PCGS. C-8, B-7, R.1.** Manley Die State 3.0. The usual state with most obverse dentilation absent. Faint hairlines and trivial circulation marks appear on this example, with a few low areas inside the reverse. Pleasing olive-brown and tan surfaces. Our EAC grade XF40. NGC ID# 222G, PCGS# 1075

1804 Spiked Chin Half Cent, MS63 Brown

- 4589 1804 Spiked Chin MS63 Brown PCGS. C-8, B-7, R.1.** Manley Die State 3.0. Lightly cracked through the top of LIBERTY. Pleasing golden-tan patina covers nicely preserved surfaces, and the design elements are well-centered and sharply impressed, with nice definition apparent in Liberty's hair and on her drapery. The ribbing is visible in most of the reverse leaves. All in all, a nice Spiked Chin representative. Our EAC grade AU50.
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 83; *Dallas Signature* (Heritage, 11/2006), lot 50. NGC ID# 222G, PCGS# 1075

- 4590 1805 Small 5, No Stems MS62 Brown NGC. C-1, B-1, R.1.** Manley Die State 1.0. Described as a common die state although this variety is usually found in the later die state. A narrow rim break affects four dentils below the right ribbon. Traces of tan appear on the steel-brown surfaces of this lustrous specimen. Our EAC grade AU50. NGC ID# 222H, PCGS# 1081

- 4591 1805 Large 5, Stems AU58 NGC. C-4, B-4, R.2.** Manley Die State 1.0. The usual early die state with a delicate crack through LIBERTY. Intermingled steel and olive-brown surfaces show hints of reddish-tan. A pleasing representative of the type, date, and variety. Our EAC grade XF40. NGC ID# 222H, PCGS# 1090

- 4592 1806 Small 6, No Stems AU58 NGC. C-1, B-3, R.1.** A sharply struck and satiny ebony-brown No Stems half cent. The obverse field displays clash marks near the chin and ribbon but post-strike contact is minor and chiefly confined to Liberty's face. Our EAC grade XF45. NGC ID# 222J, PCGS# 1093

- 4593 1806 Small 6, No Stems AU58 NGC. C-1, B-3, R.1.** The only die state, with obverse clash marks and a reverse rim break below the right ribbon. A line of planchet lamination is noted at the lower right obverse. Both sides are sharply defined with slight surface roughness. The obverse is dark steel-brown and the reverse is lighter chocolate-brown. Our EAC grade XF40. NGC ID# 222J, PCGS# 1093

- 4594 1806 Small 6, No Stems MS62 Brown PCGS. C-1, B-3, R.1.** This sharply struck and coruscating Draped Bust type coin offers chestnut-gold and gunmetal-gray toning. Devoid of marks and exemplary for the grade despite an inconsequential spot in front of the nose. Our EAC grade MS60. NGC ID# 222J, PCGS# 1093

- 4595 1806 Small 6, No Stems MS62 Brown NGC. C-1, B-3, R.1.** Light golden-tan toning graces this well struck and satiny piece, with glimpses of charcoal-gray mostly limited to the upper left obverse border. Wispy field marks limit the grade. Our EAC grade AU50. NGC ID# 222J, PCGS# 1093

**1806 Large 6, Stems Half Cent, MS63 Brown
C-4, Pleasing Light Color**

- 4596** 1806 Large 6, Stems MS63 Brown PCGS. C-4, B-4, R.1. The peak of the large 6 in the date is firmly affixed to the bust, the upright of the R in LIBERTY is missing its right foot, each wreath branch has five berries, and an engraver's scratch at the right end of the fraction bar extends almost to the right ribbon. Pleasing light tan surfaces reveal hints of underlying mint orange, especially on the reverse. The design features exhibit nice definition, save for minor softness in some of the venation of the reverse leaves. There are no significant abrasions or unsightly spots to report. Our EAC grade AU50. Population: 19 in 63 Brown, 2 finer (5/13).
Ex: FUN Signature (Heritage, 1/2007), lot 308. NGC ID# 222J, PCGS# 1099

- 4597** 1807 AU58 PCGS. C-1, B-1, R.1. Manley Die State 3.0. The usual die state with nearly all obverse and reverse border dentilation absent. This attractive example has reddish-tan surfaces with nearly full frosty mint luster. Our EAC grade AU50. NGC ID# 222K, PCGS# 1104

- 4598** 1808/7 VF25 PCGS. C-2, B-2, R.3. A medium brown Draped Bust half cent with evenly struck legends and only minutely granular surfaces. A cluster of wispy marks is seen near the profile when viewed beneath a loupe. Our EAC grade VG10. Population: 11 in 25, 17 finer (5/13).
Ex: Long Beach Signature (Heritage, 2/2006), lot 79; Long Beach Signature (Heritage, 9/2006), lot 89. NGC ID# 222L, PCGS# 1110

- 4599** 1809 MS63 Brown NGC. C-3, B-4, R.1. A satiny and well struck golden-brown Classic half cent. Smooth save for an inconspicuous edge bruise at 6 o'clock on the reverse. Our EAC grade AU50. NGC ID# 222P, PCGS# 1123

- 4600** 1809 MS64 Brown NGC. C-6, B-6, R.1. Manley Die State 3.0. The fields are golden-brown and the high points are medium brown. A sharply struck near-Gem that boasts smooth, satiny surfaces. One small lamination near the obverse rim at 6 o'clock. Our EAC grade AU55. NGC ID# 222P, PCGS# 1123

**1809/6 Half Cent, MS64 Brown
C-5, B-5, Attractive Light Color**

- 4601** 1809/6 MS64 Brown NGC. C-5, B-5, R.1 The inverted digit is clear to the unaided eye. This red-tinged medium brown piece is an unusually fine example of a Classic half cent. Most Classic half cents and cents are dark, and only rarely are lighter hues found. Our EAC grade MS60. Census: 4 in 64 Brown, 1 finer (5/13).
Ex: Dallas Signature (Heritage, 10/2006), lot 52. NGC ID# 222N, PCGS# 1126

**1810 Classic Half Cent, Select Brown
C-1 Variety, Sharply Defined, Some Mint Red**

- 4602** 1810 MS63 Brown PCGS. C-1, B-1, R.2. Most 1810 half cents were struck utilizing poorly aligned dies, but this example is an outstanding exception. A little minor softness is noted on the right obverse stars, but all of the peripheral details on the reverse are sharply defined. Mostly medium olive-brown in color, some golden accents remain in the protected areas. A well-preserved example that is rarely seen this fine. Our EAC grade AU55. Population: 10 in 63 Brown, 10 finer (5/13).
Ex: Denver Signature (Heritage, 8/2006), lot 119. NGC ID# 222R, PCGS# 1132

**1825 C-2, B-2 Half Cent, MS64 Brown
Late Die State**

- 4603** 1825 MS64 Brown PCGS. C-2, B-2, R.1. Manley Die State 3.0, considered a scarce die state, but more plentiful than earlier die states. This piece has faint clash marks inside the top of the wreath. Both sides of this Choice Mint State piece have full cartwheel luster with excellent eye appeal. The obverse is mahogany and the reverse is chestnut-brown. Our EAC grade AU55. NGC ID# 222T, PCGS# 1141

- 4604** 1826 MS64 Brown PCGS. C-1, B-1, R.1. Manley Die State 4.0, "scarce." A pleasing golden-brown and powder-blue near-Gem. Well struck except on the uppermost stars. No marks or spots are remotely consequential. Our EAC grade MS60. NGC ID# 222U, PCGS# 1144

**1828 12 Stars Half Cent, MS64 Brown
C-2, Popular Blundered Stars Variety**

- 4605 1828 12 Stars MS64 Brown NGC. C-2, B-3, R.2.** Collectors have prized this obviously blundered die variety for many years. This lustrous, medium brown, well-struck example is smooth and glossy, with good eye appeal. The left-side stars are typically weak, but the strike is bold, and the piece has been carefully preserved. A few trivial carbon spots are seen with a loupe above AMERICA and STATES on the reverse. Our EAC grade AU50.
Ex: *Portland Bullet Sale (Heritage, 3/2004)*, lot 30; *Long Beach Signature (Heritage, 6/2006)*, lot 106. NGC ID# 222W, PCGS# 1150

**1829 C-1, B-1 Half Cent, MS66 ★ Brown
Scarce Early Die State**

- 4606 1829 MS66 ★ Brown NGC. C-1, B-1, R.1.** Manley Die State 1.0. The scarce early die state with a perfect obverse die and fragments of a die line through the H in HALF and the C in CENT. Both sides have narrow but complete border dentilation. An attractive olive-brown specimen showing considerable mint red, especially on the reverse. Our EAC grade MS63. NGC ID# 222X, PCGS# 1153

- 4607 1833 MS64 Brown NGC. C-1, B-1, R.1.** Both sides of this lovely chocolate-brown Choice Mint State half cent exhibit sharp details with satin mint luster. Tiny splashes of deep steel toning appear at the upper left obverse. Our EAC grade MS60. NGC ID# 222Z, PCGS# 1162

**1855 C-1, B-1 Half Cent
MS66 Brown**

- 4608 1855 MS66 Brown PCGS. CAC. C-1, B-1, R.1.** Despite the presence of a few minute ticks on each side, this is a lovely Premium Gem with frosty dark brown surfaces and traces of orange mint luster in the protected areas. This lovely half cent is tied for the finest certified as Brown. Our EAC grade AU55. Population: 3 in 66 Brown, 0 finer (6/13). NGC ID# 26YZ, PCGS# 1233

- 4609 1855 MS65 Red and Brown NGC. C-1, B-1, R.1.** This is an attractive Mint State example with considerable orange mint color on each side. The obverse has splashes of deep steel and the reverse has evidence of lighter green. Our EAC grade MS60+. NGC ID# 26YZ, PCGS# 1234

- 4610 1857 MS65 Brown NGC. C-1, B-1, R.2.** Abundant glimpses of gold color frequent protected areas. Medium brown patina fills the fields and devices. A well struck and shimmering Gem. A minor spot on the nose, and a faint graze near star 11. From the final, low mintage date of the denomination. Our EAC grade MS60. NGC ID# 26Z3, PCGS# 1239

- 4611 1857 MS64 Red and Brown PCGS. C-1, B-1, R.2.** The pleasing surfaces are mostly light brown, with accents of original red and lilac patina. The design elements are well-detailed and the only mark of note is a thin scratch in the right obverse field. Our EAC grade MS63. PCGS has graded no finer coins with the Red and Brown designation (5/13). NGC ID# 26Z3, PCGS# 1240

- 4612 1857 MS64 Red and Brown NGC. C-1, B-1, R.2.** Subdued orange mint luster appears over smooth brown surfaces on both sides of this adequately struck final year half cent. The surfaces have a few scattered marks of no consequence. Our EAC grade MS60. NGC ID# 26Z3, PCGS# 1240

LARGE CENTS

- 4613 1793 Chain AMERICA — Damaged — NGC Details. AG. S-3, B-4, Low R.3.** A dark reddish-brown collector coin. The chain and ONE CENT are evident. The portrait is faint but unmistakable. The remaining legends are generally unreadable due to wear and corrosion. Our EAC grade Basal State 1.

**1793 S-3, B-4 Chain Cent
Fine Details**

- 4614 1793 Chain AMERICA — Corroded, Tooled — ANACS. S-3, B-4, Low R.3. Fine Details, Net Good 4.** The date and all the lettering are visible, with a complete chain and some evidence of the hair detail. The dark brown surfaces are heavily corroded over the left half of the obverse and all of the reverse. Our EAC grade AG3. NGC ID# 223F, PCGS# 1341

- 4615 1793 Chain Periods — Environmental Damage — NGC Details. AG. S-4, B-5, R.3.** The legends are faint but readable. The chain is bold and the profile of Liberty is clear. Darkly toned and evenly corroded. An affordable representative of the coveted introductory cent type. Our EAC grade Basal State 1.

- 4616 1793 Wreath Cent, Vine and Bars Fair 2 PCGS. S-8, B-13, R.3.** LIBERTY and UNITED are clear. The date and other legends are very faint. The portrait is well outlined and much of the wreath is apparent. The walnut-brown surfaces are only lightly marked and free from corrosion, though each side has a minor edge bump or two. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 1347

**1793 Wreath Cent, VG8
Lettered Edge, S-11b**

4617 1793 Wreath Cent, Lettered Edge VG8 ANACS. S-11b, B-16b, R.4. All legends are readable and the types are clear on this granular first-year cent. Lavender high points contrast with deep brown fields. A few faint hair-thin marks cross Liberty's hair. S-11b with two leaves after DOLLAR is scarcer than the S-11c lettered edge variety with a single leaf after DOLLAR. Our EAC grade Good 4. NGC ID# 223J, PCGS# 1350

4618 1794 Head of 1793 — Environmental Damage — NGC Details. VG. S-18b, B-2b, R.4. All legends are clear on this deep brown Head of '93 cent. The fields are evenly granular and small to moderate marks are distributed. Our EAC grade Good 4.

4619 1794 Head of 1794 VF25 NGC. S-44, B-33, R.1. The prominent radial die crack at 1 o'clock on the reverse helps attribute the Sheldon variety. An evenly and attractively detailed second-year cent with mildly granular lilac-gray surfaces and a subtle spot on Liberty's neck. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 901374

**1794 S-29 Cent, VF30
Head of 1794**

4620 1794 Head of 1794 VF30 PCGS. S-29, B-11, R.2. A splendid early copper type coin with golden-brown to medium brown toning. Die sinking on the upper leaves is characteristic of the die pairing. Evenly defined and attractive despite a small pit on the field near the chin, a minor rim knock on the reverse at 6 o'clock, and a hint of granularity on the reverse field. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374

**1794 S-55, B-47 Cent, XF40
Intermediate Die State**

4621 1794 Head of 1794 XF40 PCGS. S-55, B-47, R.2. Breen Die State II. A die crack in the left obverse field first appeared on S-54, and is always present on S-55 and S-56. The dies have been repolished to remove clash marks on this intermediate state piece. The A in STATES is high and leans to the left on the reverse of this variety, and that feature is diagnostic. Numerous handling and circulation marks appear on both sides of this moderately worn olive and chestnut example, and the surfaces are attractive although not perfectly smooth. Our EAC grade VF25. NGC ID# 223P, PCGS# 901374

**1794 Cent, VF30, S-72
Head of 1795**

4622 1794 Head of 1795 VF30 PCGS. S-72, B-65, R.2. The lowest lock of hair ends in a short stub that points downward, a die crack extends between TY of LIBERTY, and there is a triple leaf under the O of OF. Relatively smooth medium to dark brown surfaces exhibit nicely defined motifs that are well-centered on the planchet. The dentilation is strong on both sides, except on the upper right reverse. Overall, a rather pleasing early large cent. Our EAC grade Fine 15.

Ex: FUN Signature (Heritage, 1/2007), lot 357; Central States Signature (Heritage, 4-5/2010), lot 50. NGC ID# 223R, PCGS# 1365

4623 1795 Plain Edge VF35 NGC. S-77, B-6, R.3. This pleasing olive-brown specimen retains much of its original design detail, but some letters in the reverse legend are worn flat. The surfaces show just a few areas of minor porosity. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 1380

4624 1796 Draped Bust, Reverse of 1794 VG8 ANACS. S-108, B-12, R.4. This early Draped Bust cent has fully readable legends and a surprising level of hair detail. The lavender and cobalt-blue surfaces are unabraded though lightly granular. Our EAC grade Good 5. NGC ID# 223W, PCGS# 1404

1797 S-140 Cent, AU55
Reverse of 1797, With Stems

- 4625** 1797 Reverse of 1797, Stems AU55 NGC. S-140, B-22, R.1. Although it is a common die marriage, the S-140 has a surprisingly low census, with only one or two Mint State pieces and three AU coins. Originally purchased as a VF for \$30. The obverse has numerous tiny abrasions on the deep steel surfaces, while the reverse is much cleaner. This desirable early cent will serve the specialist or type collector. Our EAC grade VF35.
Ex: Collection of a Dallas Gentleman (Heritage, 5/2009), lot 59. NGC ID# 2242, PCGS# 1422

1797 Cent, Mint State Sharpness
Reverse of 1797, S-140

- 4626** 1797 Reverse of 1797, Stems — Improperly Cleaned — NCS. Unc. Details. S-140, B-22, R.1. This well struck and satiny cent is unabraded but moderately granular, evident mostly near the bust tip and the obverse border between 7 and 8 o'clock. The medium brown surfaces exhibit mahogany-red and steel-blue undertones. Our EAC grade VF20. NGC ID# 2242, PCGS# 1422

1797 Reverse of 1797 Cent, VF35
No Stems, S-131

- 4627** 1797 Reverse of 1797, No Stems VF35 PCGS. S-131, B-27, R.2. The slender but heavy vertical obverse die break near 9 o'clock is characteristic of this collectible Sheldon variety. The present dark brown Choice VF cent exhibits substantial hair definition. There are a few moderate marks on the right obverse, and the reverse letters display minor build-up. Our EAC grade VF25. NGC ID# 2243, PCGS# 1425

- 4628** 1798/7 — Corrosion — NGC Details. XF. S-152, B-13, R.2. A "horn" from the left top of the 8 confirms the overdate. A richly detailed representative with a somewhat granular portrait and a few faint thin marks on the central reverse. The obverse is minimally abraded except for a curved field line between the chin and bust tip. Our EAC grade Fine 12.

1798 Cent, S-148, XF45
Style One Hair, Horned 9

- 4629** 1798 First Hair Style XF45 PCGS. S-148, B-11, R.2. The Horned 9 variety with a spur from the back of the 9 in the date. This Style One Hair cent has olive-brown fields and deeper lavender toning on the motifs. A lens reveals distributed small marks with the most evident at 9:30 on the reverse. Our EAC grade VF30. Population: 12 in 45, 24 finer (6/13). NGC ID# 2244, PCGS# 1431

- 4630** 1798 Second Hair Style XF40 NGC. S-179, B-37, R.2. Ex: Jules Reiver Collection. Deep rose-brown color with gold and pewter accents. Well-defined at the centers, if a trifle soft along the margins, with glossy and beautiful surfaces. Our EAC grade VF25. NGC ID# 2244, PCGS# 1434

- 4631** 1799 — Environmental Damage — PCGS Genuine. VG Details. S-189, B-3, R.2. Though the dark surfaces are extensively granular, all legends are clear, including all portions of the date. The most available of the three 1799 varieties, yet rare relative to the strong demand from those who collect by date. Our EAC grade AG3. NGC ID# 2246, PCGS# 1443

1800/1798 Cent, VF35
First Hair Style, S-191

- 4632** 1800/1798 First Hair Style VF35 PCGS. S-191, B-2, R.3. The First Hair Style 1800/1798 obverse was paired with four different reverses. Two of those varieties (NC-5 and NC-6) are very rare, but S-190 and S-191 are merely scarce. S-191 is distinguished by die sinking near the fraction and bold cracks near the final A in AMERICA. A medium brown overdate cent with attractive details and occasional unimportant marks. Our EAC grade Fine 15. Population: 4 in 35, 3 finer (6/13). NGC ID# 2U59, PCGS# 1452

**1800/79 Large Cent, VF30
S-196, Second Hair Style**

4633 1800/79 Second Hair Style VF30 PCGS. S-196, B-10, R.1. The 79 underdigits are obvious, and the high second 0 confirms the die marriage. Rich olive-brown toning blankets this attractively detailed and moderately abraded Draped Bust cent. Our EAC grade VF20.
Ex: Houston Signature (Heritage, 12/2010), lot 3168. NGC ID# 2U57, PCGS# 1455

4634 1800/79 Second Hair Style — Environmental Damage — NGC Details. XF. S-193, B-7, R.4. A blatant overdate variety with two serif “horns” atop the 8 and a curve and knob within the first 0 in the date. The dark brown surfaces are moderately but evenly granular aside from light obverse pitting near 8 o’clock. Our EAC grade VF20.

**1800 Cent, AU53, S-197
Distinctive ‘Q’ Variety**

4635 1800 AU53 NGC. S-197, B-12, R.1. The “Q” variety, named for the die chips near the first 0 in the date. A tornado-shaped die break between the IB in LIBERTY is also both distinctive and diagnostic. A golden-brown representative with pleasing sharpness and scattered minor obverse marks. The smooth reverse has a mildly granular walnut-brown area near the fraction numerator. Our EAC grade VF35. NGC ID# 2248, PCGS# 1449

4636 1801 VF35 PCGS. S-216, B-6, R.1. Blunt first 1 in date. Medium brown color and appropriately defined. Light circulation marks do not detract. Our EAC grade VF20. NGC ID# 224B, PCGS# 1458

**1801 1/000 Cent, XF40
Popular Blundered Fraction Variety, S-223**

4637 1801 1/000 XF40 PCGS. S-223, B-17, R.1. There are five different 1801 1/000 die marriages, excluding the corrected S-221, but S-223 is distinguished by a pointed left wreath stem. This is a charming medium brown example of this blundered fraction variety. Liberty’s hair has only slight wear, and no marks are evident on either side. Minor mint-made obverse planchet imperfections are noted at 1 and 3 o’clock. Our EAC grade VF25.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3140, which realized \$2,530. NGC ID# 224D, PCGS# 1464

4638 1802 XF40 PCGS. S-230, B-8, R.1. As a still-glossy Draped Bust cent from a more common die pair, this reddish-violet example is well suited to a similarly graded type collection. Aside from a mark at the back of Liberty’s jaw, there are few significant abrasions. Our EAC Grade VF25. NGC ID# 224E, PCGS# 1470

4639 1802 No Stems XF40 NGC. S-241, B-20, R.1. A dark brown example of this popular blundered die variety, reminiscent of the Three Errors S-218 and S-219 reverse. Glimmers of luster fill the hair and the few small field marks are of little import. Our EAC grade VF30. NGC ID# 224F, PCGS# 1476

**1802 No Stems Cent, AU55
S-241, Blundered Reverse Die**

4640 1802 No Stems AU55 PCGS. S-241, B-20, R.1. A clumsily engraved reverse die with absent stems, a double fraction bar, and a widely repunched second S in STATES. This chocolate-brown example has only minimal contact, though clash marks are evident near the chin and hair ribbon. Minor verdigris is noted near the date and the I in UNITED. Our EAC grade XF40. Population: 2 in 55, 3 finer (5/13). NGC ID# 224F, PCGS# 1476

4641 1803 Small Date, Small Fraction XF40 PCGS. S-251, B-8, R.2. The repunched second S in STATES allows prompt attribution. A medium brown representative with unmarked fields and considerable hair detail. No spots are noted though the portrait has a few trivial slide marks. Our EAC grade VF25. NGC ID# 224G, PCGS# 1482

4642 1803 Small Date, Small Fraction AU50 PCGS. S-251, B-8, R.2. Heavy reverse die cracks and a clearly repunched second S in STATES identify this distinctive and collectible Sheldon variety. Toned walnut-brown with steel-gray high points. Unabraded aside from a trio of small marks on the portrait. Our EAC grade VF35. NGC ID# 224G, PCGS# 1482

4643 1803 Small Date, Large Fraction — Damaged — NGC Details. XF. S-258, B-17, R.1. A richly detailed chocolate-brown cent. A loupe reveals a few minor spots near the right-side borders and several small marks that are less distracting than the NGC designation suggests. Our EAC grade Fine 15.

4644 1803 Small Date, Large Fraction — Burnished — NGC Details. AU. S-260, B-19, R.1. This darkened cent has only minimal wear and displays luster across design elements. Mildly granular near 5 o'clock on the reverse and on portions of the obverse margin. Lightly tooled to remove verdigris above the bust tip, above the E in LIBERTY, and on the upper hair curls. Our EAC grade Fine 12.

4645 1803 Small Date, Large Fraction AU53 NGC. S-258, B-17, R.1. The arc-shaped die crack on the left obverse field and an "accent" die break above the D in UNITED are characteristic of this popular Sheldon marriage. This ebony-brown representative displays ample mint sheen though the leaves show minor friction. Marks are absent save for thin lines left of the shoulder curls and beneath Liberty's eye. Our EAC grade XF40. NGC ID# 224G, PCGS# 1485

4646 1804 AG3 NGC. S-266a, B-1, R.2. The early die state without a break above the RTY in LIBERTY. STATES is indistinct but the date is fully readable. This dark brown key date cent displays occasional pitting, mostly confined to the reverse periphery. Our EAC grade AG3. NGC ID# 224H, PCGS# 1504

4647 1804 Restrike MS66 Brown PCGS. CAC. This privately produced piece combines two original U.S. Mint large cent dies that were never used together inside the Mint. The obverse was originally used for 1803 S-261 and the reverse was originally used for 1820 N-12. A gorgeous Premium Gem with lustrous tan-brown surfaces and traces of aqua peripheral toning. Our EAC grade MS60. Population: 7 in 66 Brown, none finer (5/13).
Ex: *Fort Worth Signature* (Heritage, 3/2010), lot 120, which realized \$1,840. PCGS# 45344

**1806 Cent, AU50
Well-Preserved S-270, B-1 Example**

4648 1806 AU50 PCGS. S-270, B-1, R.1. The only variety for the date. With a large reported mintage of 348,000 pieces, it seems likely that some 1805-dated coins were included in the production total. The present coin is a lightly circulated example, with much original detail remaining on the devices, and pleasing, medium brown surfaces. Visual appeal is quite strong. Our EAC grade XF40. Population: 7 in 50, 15 finer (5/13).
Ex: *Houston Signature* (Heritage, 12/2010), lot 3171. NGC ID# 224L, PCGS# 1513

**1807/6 Cent, AU53
Large 7, S-273**

4649 1807/6 Large 7 AU53 PCGS. S-273, B-3, R.1. One other Sheldon marriage, the very scarce S-272, is also an 1807/6 overdate, but each variety receives separate *Guide Book* listing due to different-sized 7 punches within the date. An unmarked and problem-free walnut-brown example with sharper definition on the left-side peripheries than on the right-side borders, due to slightly misaligned dies. Our EAC grade VF30. NGC ID# 224N, PCGS# 1528

**1807/6 Cent, Large 7, AU55
S-273, Obvious Overdate**

4650 1807/6 Large 7 AU55 NGC. S-273, B-3, R.1. The Large 7 variant of this prominent overdate. The deep brown surfaces display clash marks near the profile but the obverse is unabraded. The reverse has a slender strike-through beneath the left ribbon end and moderate granularity on the lower right reverse periphery. A cluster of thin marks is noted above the I in AMERICA. Our EAC grade VF30. Census: 3 in 55, 7 finer (5/13). NGC ID# 224N, PCGS# 1528

4651 1807 Large Fraction XF40 PCGS. S-276, B-6, R.1. A charming medium brown cent that displays traces of luster within the hair and legends. Study beneath a lens locates only faint pinscratches near the profile and the E in STATES, and a small reverse spot at 7 o'clock. Struck from widely rotated dies. Our EAC grade VF25. NGC ID# 224M, PCGS# 1516

**1807 Large Fraction Cent, AU50
90 Degree Reverse Rotation, S-276**

- 4652 1807 Large Fraction AU50 PCGS. S-276, B-6, R.1.** A common 1807 variety, one of the notable features of this variety are the various positions of rotation of the reverse die. The subject was covered in a 1992 issue of *Penny-Wise*. This particular coin is rotated approximately 90 degrees clockwise. This is a glossy reddish-brown example that is especially well-defined on the obverse, less so on the reverse. Marred only by a faint diagonal pinscratch across Liberty's face. Our EAC grade VF30.
Ex: Central States Signature (Heritage, 5/2005), lot 5095. PCGS# 1517

- 4653 1807 Comet VF35 NGC. S-271, B-1, R.1.** A pleasing deep brown example of this popular *Guide Book* variety. The spot-free fields display only minor abrasions, and noticeable curl definition remains. Our EAC grade VF20.
Ex: McCawley-Grellman (9/1997), lot 114; Jack Stickel Collection (Heritage, 4/2011), lot 4084, which realized \$1,840. NGC ID# 224M, PCGS# 1531

- 4654 1808 — Reverse Corrosion — NGC Details. AU. S-279, B-3, R.1.** A sharp example with deep olive-brown toning. The obverse is spot-free though the reverse has several areas of moderate granularity. A few faint pinscratches are noted on the wreath near the N in UNITED. Our EAC grade XF40.

- 4655 1809 — Corrosion — NGC Details. AU. S-280, B-1, R.2.** The only die marriage for this conditionally rare Classic date. This gunmetal-gray cent is unabraded and displays crisp definition but has pitting on the reverse border near 3 and 9 o'clock along with a few scattered small pits. Our EAC grade VF25.

- 4656 1810/09 XF40 PCGS. S-281, B-1, R.1.** A deep brown example of this obvious overdate. The types show wear but Liberty's ear is bold and none of the distributed minor marks are individually consequential. Our EAC grade VF25. Population: 8 in 40, 22 finer (5/13). NGC ID# 224T, PCGS# 1552

**1810/09 Cent, XF40, S-281
Conditionally Rare Classic Type**

- 4657 1810/09 XF40 PCGS. CAC. S-281, B-1, R.1.** The sole overdate variety for the date. Mostly medium brown with hints of faded golden-brown on the reverse field. Only lightly abraded, though the left obverse has a few unimportant marks. Classic Head cents are typically encountered well worn or corroded. Just five 1810/09 cents have been confirmed by CAC in all grades. Our EAC grade VF25. Population: 8 in 40, 22 finer (5/13). NGC ID# 224T, PCGS# 1552

1810 S-285 Classic Cent, AU53

- 4658 1810 AU53 NGC. S-285, B-2, R.2.** The obverse is mahogany-brown while the reverse is medium to deep brown. Satin luster emerges across design elements. Both fields are free from abrasions though sets of clash marks appear within the wreath. The portrait displays faint faint lines. Moderately granular left of the denomination. Classic Head cents are plentiful in typical circulated grades but are rarely encountered with sharp, smooth surfaces. Our EAC grade VF30. NGC ID# 224S, PCGS# 1549

- 4659 1811/0 — Corroded — ANACS. XF40 Details. S-286, R.3.** A granular medium brown representative of this scarce *Guide Book* overdate. Liberty's profile is moderately pitted and an obverse spot is noted at 3 o'clock. Our EAC grade Fine 15.
Ex: Long Beach Signature (Heritage, 2/2006), lot 128, which realized \$862.50. NGC ID# 224V, PCGS# 1558

- 4660 1812 Small Date AU50 ANACS. S-290, B-2, R.1.** This walnut-brown Classic cent retains noticeable luster though the leaves and curls display light wear. No marks are consequential and the eye appeal is superior for this condition-challenged type. Our EAC grade VF30. NGC ID# 224W, PCGS# 1561

- 4661 1814 Crosslet 4 XF40 PCGS. S-294, B-1, R.1.** Just two die pairs were used to coin 1814 cents, and the varieties are readily distinguished by the style of 4 in the date. The present dark brown cent was coined a few degrees off center toward 4 o'clock but only the dentils are affected. The curls and leaves show moderate wear and the surfaces are smooth save for a small reverse rim nick at 2 o'clock. Our EAC grade VF30.
Ex: Boston Signature (Heritage, 8/2010), lot 8079, which realized \$1,092.50. NGC ID# 224Y, PCGS# 1573

**1814 Cent, AU53
Plain 4, S-295
'Mump' Die State**

- 4662 1814 Plain 4 AU53 PCGS. S-295, B-2, R.1.** A small die break or "mump" is noted at the top of Liberty's throat. Examples of the *Guide Book* variety are also found without this break, or in a more advanced state with a "beard" on Liberty's jaw. This pleasing ebony-brown cent has impressive sharpness and partial luster. There are no consequential abrasions. Our EAC grade VF35. NGC ID# 224Y, PCGS# 1576

**1814 Plain 4 Cent, AU55
S-295, Smooth Surfaces**

4663 1814 Plain 4 AU55 PCGS. S-295, B-2, R.1. S-295 is the final Sheldon variety and the only Plain 4 marriage. The present briefly circulated olive-brown representative has excellent eye appeal since there are no noticeable marks or spots. Struck slightly off center toward 1 o'clock. Our EAC grade VF35. Population: 13 in 55, 28 finer (5/13). NGC ID# 224Y, PCGS# 1576

4664 1816 MS64 Brown NGC. N-2, R.1. Extensive die breaks on the upper right obverse rim and repunching on the N in ONE identify this popular Randall Hoard variety. Substantial mint red clings to design recesses though the fields and high points are dark brown. Our EAC grade AU55.
Ex: Orlando FUN Signature (Heritage, 1/2006), lot 588, which realized \$1,035. NGC ID# 224Z, PCGS# 1591

4665 1816 MS64 Brown NGC. N-2, R.1. The most accessible 1816 cent die pair, from an earlier die state. Glossy with suggestions of violet and caramel-gold against a deep brown base. Our EAC grade AU55. NGC ID# 224Z, PCGS# 1591

4666 1817 13 Stars AU58 PCGS. CAC. N-8, R.2. A Borderline Uncirculated ebony-brown example that exhibits coruscating luster and a precise strike. Refreshingly mark-free, though clashes are prominent near the denomination. Our EAC grade XF40. NGC ID# 2252, PCGS# 1594

4667 1817 13 Stars MS64 Red and Brown PCGS. CAC. N-9, R.2. Noyes Die State C with a well-developed "mouse" atop Liberty's head. Glimpses of fire-red emerge from the unmarked medium brown surfaces. A high grade example of this popular die state. Our EAC grade MS62.
Ex: Jules Reiver, 1969; C. Douglas Smith; Herman Halpern Collection of U.S. Large Cents (Stack's, 3/1988), lot 329; Boston ANA Signature (Heritage, 8/2010), lot 3844, which realized \$1,725. NGC ID# 2252, PCGS# 1595

4668 1817 15 Stars AU50 PCGS. N-16, R.1. Dark olive surfaces show considerable cartwheel luster with a few splashes of lighter tan and darker brown. Minor obverse planchet lamination is evident. Our EAC grade XF40. NGC ID# 2252, PCGS# 1597

**1817 15 Stars Cent, MS60 Brown
N-16, Second Finest at PCGS**

4669 1817 15 Stars MS60 Brown PCGS. N-16, High R.1. A medium die state with a small reverse cud at 2 o'clock. This medium brown representative displays coruscating luster and is generally nicely struck, though the upper curls exhibit softness of impression. The reverse is virtually devoid of abrasion while the left obverse has occasional slender marks. As of (6/13), the penultimate finest at PCGS. Imagine what a double eagle of similar conditional rarity would command. Our EAC grade XF40.
Ex: Rarities Sale (Bowers and Merena, 9/2002), lot 24. NGC ID# 2252, PCGS# 1597

4670 1818 MS64 Red and Brown PCGS. N-10, R.1. Olive-brown is extensive but crimson-red outlines stars and letters. A tick near the E in ONE but otherwise unabraded. The few faint gray spots are usual for this Randall Hoard variety. Our EAC grade AU55.
Ex: Orlando FUN Signature (Heritage, 1/2007), lot 60238, which realized \$1,265. NGC ID# 2253, PCGS# 1601

4671 1819 Large Date MS62 Brown PCGS. N-2, R.1. N-2 is the sole Large Normal Date variety but in better grades can be attributed by a triple dentil beneath the U in UNITED. This satiny cent has golden-brown fields and olive-green high points. A few small marks are noted on the portrait. Our EAC grade AU55. Population: 19 in 62 Brown, 32 finer (6/13). NGC ID# 2255, PCGS# 1603

4672 1819 Small Date MS64 Brown PCGS. N-9, R.1. A recut R in AMERICA and die lines between IB in LIBERTY aid attribution. A shimmering chocolate-brown near-Gem with virtually contact-free surfaces. A retained lamination (as made) west of the date and a trace of a fingerprint fragment below the E in CENT do not challenge the assigned grade. Our EAC grade AU50.
Ex: Santa Clara Signature (Heritage, 11/2000), lot 6659; Robert Bowling Collection (Heritage, 5/2004), lot 5167. NGC ID# 2254, PCGS# 1606

4673 1820/19 AU58 PCGS. N-1, R.1. A medium to deep brown example that has satin luster and only unimportant contact. A loupe and a strong light reveals hints of granularity. Much rarer in better grades than the prevalent 1820 N-13. Our EAC grade AU50. Population: 7 in 58, 8 finer (5/13). NGC ID# 2257, PCGS# 1618

4674 1820 Large Date MS64 Brown PCGS. N-13, R.1. A lovely chestnut-gold near-Gem whose satiny fields and devices are uncommonly free from contact. The strike is bold except on the stars. One small bright area is noted on the wreath border above the N in ONE. Our EAC grade AU55. NGC ID# 2256, PCGS# 1615

4675 1820 Large Date MS65 Brown PCGS. N-13, R.1. A Randall Hoard variety readily attributed by its prominent obverse die cracks. This lustrous and lightly marked Gem is designated as Brown but retains abundant hints of the initial peach-gold at the borders. Open areas are toned gunmetal-blue. Our EAC grade MS63.
Ex: Columbus Central States Signature (Heritage, 4/2006), lot 270, which realized \$1,265. NGC ID# 2256, PCGS# 1615

4676 1820 Small Date MS64 Brown NGC. N-15, R.1. The later die state with lapping evident. Much rarer in Mint State than the Large Date N-13. A coruscating chocolate-brown Choice cent with hints of brick-red in protected areas. The dies exhibit minor rust but the surfaces are well preserved. Our EAC grade AU55. NGC ID# 2256, PCGS# 91615

- 4677 1821 AU50 NGC. N-2, R.1.** Only two die pairs were used to coin this better date Matron Head issue. None participated in the Randall Hoard, the reason for its conditional rarity. This dark brown example shows moderate wear on the forehead and Liberty's curls. Magnification reveals only minor marks, mostly located above ONE and the date. Our EAC grade VF30. NGC ID# 2258, PCGS# 1621

**1822 N-2 Cent, MS64 Brown
From the Naftzger Collection**

- 4678 1822 MS64 Brown PCGS. N-2, Low R.3.** Ex: Naftzger Collection. An obverse die crack connects stars 7 to 9 and another joins stars 9 through 12. The reverse has a short crack from the ribbon to the border at 6 o'clock. This stunning Choice Mint State specimen has reflective fields with full satin luster and deep greenish steel-brown surfaces showing splashes of tan. Each star has been carefully strengthened as Bob Grellman pointed out in the Naftzger catalog. He writes: "Someone very carefully strengthened one radial line in most of the stars" and continued to state that the "improvement is easily missed ... the grades assigned by Noyes, Bland, and PCGS attest to this." Noyes and Bland call this piece MS60 and tied for fourth finest known. Grellman called it AU55 although it is extremely difficult to call this lovely piece less than MS60. Our EAC grade AU55.

Ex: B.G. Johnson Estate; Hans M.F. Schulman (4/1951), lot 1125; Dr. Kenneth J. Sartoris; Del Bland; C. Douglas Smith (4/1976); R.E. Naftzger, Jr. (Goldberg Coins, 2/2009), lot 121. NGC ID# 2259, PCGS# 1624

- 4679 1823/2 VF35 PCGS. N-1, Low R.2.** Blended chocolate-brown and steel-blue toning encompasses well defined surfaces. The left obverse displays minor marks. The rim die break beneath the 8 in the date is usual for this conditionally rare overdate. Our EAC grade VF20. NGC ID# 225B, PCGS# 1630

- 4680 1823 VF25 NGC. N-2, R.2.** A middle die state with two separated rim cuds on the upper left obverse. The present medium brown cent is surprisingly devoid of marks. The 1823 is a much better date absent from the Randall Hoard and thus virtually unobtainable in Mint State. Our EAC grade Fine 15. NGC ID# 225A, PCGS# 1627

**1823 Restrike Cent, MS66 Brown
N-3, Ex: Naftzger**

- 4681 1823 Restrike MS66 Brown PCGS. N-3, R.2.** The late die state with a bold vertical crack between the TE in STATES. Privately struck during the 19th century from muled Mint dies sold as scrap steel; the reverse die previously coined 1813 S-293. Powder-blue undertones grace pristine surfaces. Sharply struck and prooflike with hints of Red at the obverse margin. Our EAC grade MS60.
Ex: Jerry A. Bobbe, 12/1983; Naftzger Collection (Ira & Larry Goldberg, 2/2009), lot 147, which realized \$1,898. PCGS# 81627

- 4682 1824/2 XF40 PCGS. N-1, High R.1.** This overdated cent is chocolate-brown with sea-green undertones. Evenly struck and impressively free from marks. The upper curls display wear commensurate with the grade. Our EAC grade VF25. NGC ID# 225E, PCGS# 1639

**1824/2 Cent, AU58
N-1, Bold Overdate**

- 4683 1824/2 AU58 NGC. N-1, High R.1.** The more available of the two Newcomb varieties for this obvious overdate. Mostly medium brown with faded golden-brown in protected areas. The forehead curls display light wear but marks are inconsequential and there is no hint of spotting. Our EAC grade XF40. Census: 6 in 58, 5 finer (5/13). NGC ID# 225E, PCGS# 1639

- 4684 1824 AU55 PCGS. N-2, R.1.** A lightly circulated olive-brown example of this better Matron Head date. The forehead curls show minor wear but the surfaces are unmarked and attractive. Housed in a green label holder. Our EAC grade XF40. NGC ID# 225D, PCGS# 1636

**1825 Cent, MS63 Brown
Scarce N-3 Variety**

- 4685 1825 MS63 Brown NGC. N-3, Low R.4.** The E in CENT is high, and the B in LIBERTY is repunched, as is the E in ONE. Among the scarcest varieties of this better Matron Head date. A lovely olive-brown example with unabraded surfaces and only a single spot, located beneath the CE in CENT. The stars are lightly brought up but the major devices are crisp. Our EAC grade AU55. NGC ID# 225F, PCGS# 1642

- 4686 1826/5 XF40 PCGS. N-8, R.2.** Star 6 points left of the coronet tip on the N-8 overdate, and that is diagnostic for the variety among all 1826 cents. This pleasing olive example has average surfaces with only a few minor marks on each side. Our EAC grade VF25. NGC ID# 225G, PCGS# 1648

1826/5 Cent, AU55, N-8
Scarce Guide Book Overdate

4687 1826/5 AU55 PCGS. N-8, R.2. The crossbar of the underdigit 5 is evident left of the knob of the 6. Rich brown toning cedes to lighter tan toning surrounding design elements. A few marks near star 2 and the jaw but substantial luster remains. Conditionally rare with only a handful of Mint State examples known. Our EAC grade XF45. Population: 3 in 55, 4 finer (5/13). NGC ID# 225G, PCGS# 1648

4688 1826 MS62 Brown NGC. N-6, R.2. A repunched first A in AMERICA identifies the Newcomb marriage. This unabraded ebony-brown cent displays pleasing mint gloss and is well struck except for the uppermost stars. Our EAC grade AU55.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 9176, which realized \$948.75. NGC ID# 225G, PCGS# 1645

4689 1826 MS63 Brown NGC. N-7, R.1. The R in LIBERTY and the N in CENT are strongly repunched. Satiny and minimally abraded with rich powder-blue, rose-gold, and olive-brown toning. Struck from boldly clashed dies. Our EAC grade MS60.
Ex: Jerry Kochel Collection (Heritage, 7/2008), lot 1049, which realized \$1,840. NGC ID# 225G, PCGS# 1645

1828 Cent, MS64 Brown
Large Narrow Date, N-1

4690 1828 Large Narrow Date MS64 Brown PCGS. N-1, R.1. Noyes Die State A/F. A late die state with cracks through most of UNITED and AMERICA. A beautiful deep golden-brown near-Gem with good luster and the expected minor incompleteness of strike. The surfaces are well preserved despite faint marks above ONE. Our EAC grade AU50. Population: 10 in 64 Brown, 1 finer as Brown, 2 finer as 64 Red and Brown (5/13). NGC ID# 225J, PCGS# 1654

4691 1828 Small Wide Date AU53 NGC. N-10, R.1. N-10 is the only 1828 Newcomb variety with undersized 8s in the date, due to an incorrectly selected numeral punch during die preparation. It is plentiful in scudgy condition but nice AU examples are rare. An unmarked and pleasing medium brown cent. Our EAC grade XF40. Census: 2 in 53, 7 finer (6/13). PCGS# 1657

4692 1829 Large Letters MS61 Brown NGC. N-2, Low R.2. The later die state with two cracks through the lower stars. Mostly chocolate-brown with medium brown high points. This attractive representative has satin luster, a good strike, and few marks for the designated grade. Our EAC grade AU55. NGC ID# 225K, PCGS# 1663

4693 1830 Large Letters MS62 Brown PCGS. N-4, Low R.3. A better Newcomb variety distinguished by multiple peripheral die cracks. Toned chocolate-brown aside from slightly deeper shades on the portrait. Coruscating and minimally abraded. Well struck at the centers with the usual incompleteness on the stars. Our EAC grade AU50. NGC ID# 225L, PCGS# 1672

1831 N-3 Cent, MS64 Red and Brown
Glimmers of Original Red Remain

4694 1831 Medium Letters MS64 Red and Brown NGC. N-3, R.1. Shimmering luster bathes this attractive cent, which has smooth fields and a generous quotient of orange-red, particularly across the reverse. The portrait and obverse field are medium brown, yielding to orange-red in the recessed areas. The obverse has a few small carbon spots, and a faded thin mark behind the eye. Census: 1 in 64 Red and Brown, 3 finer (5/13). Our EAC grade MS60.
Ex: ANA Signature (Heritage, 8/2007), lot 92; Central States Signature (Heritage, 4/2008), lot 86. PCGS# 1682

4695 1832 Large Letters MS64 Brown PCGS. N-3, R.1. The T in CENT is clearly repunched. An olive-brown and mahogany near-Gem whose coruscating surfaces are free from relevant contact. A slender curved streak near the profile provides an identifier. Our EAC grade AU55. NGC ID# 225N, PCGS# 1687

4696 1833 MS64 Brown PCGS. N-5, R.1. Heavy border cracks and a defect on the base of the T in CENT attribute this unabraded and lustrous near-Gem. The strike is typical but the orange-gold and cobalt-blue surfaces are highly appealing. Our EAC grade AU50.
Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 7065, which realized \$690. NGC ID# 225P, PCGS# 1696

4697 1834 Large 8, Small Stars, Medium Letters MS64 Brown PCGS. CAC. N-4, R.2. An intermediate die state with a perfect obverse and a reverse crack between 1 and 3 o'clock. Sharply struck and satiny with splendidly smooth chocolate-brown surfaces. Our EAC grade AU55. Population: 8 in 64 Brown, 1 finer (5/13). NGC ID# 225R, PCGS# 1699

1834 Cent, VF35, N-5
Large 8, Large Stars, Medium Letters
Rare Guide Book Variety

4698 1834 Large 8, Large Stars, Medium Letters VF35 NGC. N-5, R.5. The rare N-5 variety merits a separate Guide Book listing, as it is the sole 1834 Large 8, Large Stars obverse paired with a Medium Letters reverse. The present chocolate-brown representative has attractive surfaces with the slight peripheral softness of impression customary for N-5. Our EAC grade VF25.
Ex: Jack Stickel Collection (Heritage, 4/2011), lot 4116, which realized \$2,185. NGC ID# 225R, PCGS# 1702

4699 1834 Small 8, Large Stars, Medium Letters MS63 Brown PCGS. N-1, R.1. Prominent die cracks at both peripheries allow ready attribution. A coruscating golden-brown Select representative with uncommonly smooth fields and a hint of gunmetal toning on the portrait high points. Our EAC grade AU55. PCGS# 1708

4700 1837 Plain Cords, Small Letters MS64 Brown PCGS. N-5, R.2. A splendid chocolate-brown Choice cent. Nicely struck, satiny, and essentially free from contact. Minor to moderate carbon includes a small spot above the 7 in the date. Our EAC grade AU55. Population: 7 in 64 Brown, 2 finer as 65 Brown, 1 finer as 64 Red and Brown (6/13). PCGS# 1732

4701 1837 Head of 1836, Plain Cords, Small Letters MS65 Brown NGC. N-5, R.2. This lustrous golden-brown Gem exhibits smooth surfaces and a crisp strike. A slender flan flaw beneath star 11 provides an identifier. N-5 is the only Newcomb variety that combines a Plain Cords bust with a Small Letters reverse. Our EAC grade MS60. PCGS# 1732

**1837 N-8 Cent, MS66 Brown
Plain Cords, Medium Letters**

4702 1837 Plain Cords, Medium Letters MS66 Brown PCGS. CAC. N-8, R.1. Newcomb 7 and 8 were struck from the same die pair and are distinguished by the die state. N-8 features die lines near AMERICA that were lapped from the reverse die prior to coining N-7. The present magnificent Premium Gem is virtually free from contact. The toning consists of shades of chocolate, mahogany, and olive-brown. Well struck save for the left-side stars. A couple of minor spots determine the grade. Our EAC grade MS60. PCGS# 1735

**1837 N-8 Cent, Gem Red and Brown
Medium Letters, Plain Hair Cords**

4703 1837 Plain Cords, Medium Letters MS65 Red and Brown PCGS. CAC. N-8, R.1. Bold obverse dentils and die scratches above the RI in AMERICA separate N-8 from N-7, which was struck from the same dies but in a later state. This is a pleasing Gem that boasts significant fire-red in design recesses. The open fields and portrait are toned brown. Sharply struck except for the left-side stars. Our EAC grade MS63.
Ex: Rosemont Central States (Heritage, 4/2011), lot 4117, which realized \$3,220. PCGS# 1736

4704 1838 MS66 Brown NGC. N-1, R.1. The I in UNITED and the E in AMERICA are recut and identify the Newcomb marriage. The satiny ebony-brown surfaces are close to pristine. The major devices are well struck, although stars 4 through 9 are not completely brought up by the dies. A late die state with slender breaks (as made) on the obverse rim. Our EAC grade MS60.
Ex: Long Beach Signature (Heritage, 2/2005), lot 5144, which realized \$1,300. NGC ID# 225V, PCGS# 1741

**1839/6 Cent, Fine 15
Plain Cords, N-1**

4705 1839/6 Fine 15 PCGS. N-1, High R.3. The late die state with a bold, bisecting, and horizontal obverse crack. Five different Liberty Head subtypes bear 1839 dates, with the scarce N-1 as the sole Plain Cords variety as well as the only overdate. This chocolate-brown example is refreshingly unabraded. Minor spots are above the E in ONE and near the I and second A in AMERICA. Our EAC grade Fine 12. NGC ID# 225W, PCGS# 1756

4706 1839 Head of 1838 MS64 Brown PCGS. N-2, R.2. A beautiful golden-brown near-Gem appears unabraded and possesses only trivial carbon. Minor die misalignment causes selected softness on the right-side borders, though the remainder of the design is well impressed. Our EAC grade AU55. NGC ID# 225X, PCGS# 1744

4707 1839 Silly Head MS62 Brown PCGS. N-9, R.2. A late die state with obverse rim breaks. N-9 is best attributed by the bisecting die crack across the portrait. This medium brown example has smooth surfaces and good luster. A retained lamination (as made) at the forehead. Our EAC grade AU55. NGC ID# 225Y, PCGS# 1748

**1839 Silly Head Large Cent, N-4
Glossy Gem Brown Example**

4708 1839 Silly Head MS65 Brown PCGS. N-4, R.1. Sharply struck throughout with even, glossy brown color. A lovely, high-grade example of this important type coin. The surfaces appear to be completely free from carbon spotting. Our EAC grade AU55. Population: 11 in 65 Brown, 4 finer (5/13).
Ex: FUN Signature (Heritage, 1/2003), lot 5220. NGC ID# 225Y, PCGS# 1748

4709 1839 Booby Head MS61 Brown NGC. N-10, R.3. NGC has designated this as N-5, but it appears to be N-10 with the crude berry and die-worn obverse dentils. For many years N-10 was considered a die state of N-5, although it is now known that the reverse dies of those varieties are different. A pleasing golden-brown piece with a few faint marks near the T in CENT. Our EAC grade AU55. NGC ID# 225Z, PCGS# 1751

4710 1839 Booby Head MS63 Brown NGC. N-6, R.2. This golden-brown Booby Head cent displays shimmering luster and exhibits only minor contact. The shoulder curls and upper leaves show slight blending but the overall strike is good. Our EAC grade AU55. NGC ID# 225Z, PCGS# 1751

4711 1839 Type of 1840 MS62 Brown NGC. N-8, R.1. The Head of 1840 or Petite Head was the last of five portrait styles coined in 1839. Chief Engraver Gobrecht must have been fairly satisfied with the design since four years passed before its replacement by the Mature Head. This smooth and coruscating medium brown cent has a crisp strike and imposing eye appeal. Our EAC grade AU55. Ex: *Tampa FUN Signature* (Heritage, 1/2011), lot 9211, which realized \$1,063.75. NGC ID# 2265, PCGS# 1817

4712 1840 Large Date MS64 Brown NGC. N-8, R.1. Grellman Die State d with a rim cud over star 9. This coruscating near-Gem is well struck and free from relevant marks. The obverse is sea-green and wheat-gold while the reverse displays apricot toning. The bust truncation has an orange-peel texture due to a late-in-life obverse die. Our EAC grade MS60. NGC ID# 2266, PCGS# 1820

4713 1841 MS64 Brown PCGS. N-2, R.2. Grellman Die State a. Intermingled olive and steel-brown with lilac overtones and traces of original mint color close to the devices on both sides. A slender and inconspicuous lamination journeys through the N in ONE. Our EAC grade AU55. Ex: *Columbus Central States Signature* (Heritage, 4/2006), lot 296, which realized \$1,840. NGC ID# 2267, PCGS# 1832

4714 1842 Large Date MS65 Brown NGC. N-6, R.1. Grellman Die State d. Golden-brown and powder-blue toning enriches this lustrous and blemish-free Gem. The centers are crisply impressed though the left-side stars show selected softness. Our EAC grade MS60. NGC ID# 2268, PCGS# 1835

4715 1843 Petite Head, Small Letters MS64 Brown PCGS. N-11, Low R.2. Grellman Die State a. The date is lightly repunched. Primarily mahogany-brown though the left obverse field has a blush of lavender toning. Satiny and well preserved with a good strike. Our EAC grade AU55. PCGS# 1844

1844 Cent, MS64 Brown, N-1 Olive-Tan Coloration

4716 1844 MS64 Brown PCGS. N-1, R.1. Die State d. There is no evidence of any rim breaks on the obverse, although this is due to poor centering. The reverse has faint die cracks through UNITED. Attractive olive and tan color with traces of blue highlights. Pleasing surfaces for the grade. Our EAC grade AU55. Ex: *Central States Signature* (Heritage, 4/2006), lot 305; *ANA Signature* (Heritage, 7-8/2008), lot 1067. NGC ID# 226A, PCGS# 1856

4717 1844/81 AU55 PCGS. N-2, R.2. The popular inverted date variety, similar to that seen on the 1865-S eagle. A satiny chocolate-brown cent with light wear on the shoulder curl but only minor contact. Very scarce this close to Mint State. Our EAC grade XF45. Population: 3 in 55, 8 finer (5/13). NGC ID# 226A, PCGS# 1859

4718 1845 MS64 Red and Brown NGC. N-4, R.1. Grellman Die State a. Repunching on the flag of the 5 in the date determines this readily attributed Newcomb pairing. A well struck Choice cent that is smooth save for minor contact on the lower portion of the cheek. Faded mint red fills the peripheries though most of the obverse is deep brown. Our EAC grade MS60. NGC ID# 226B, PCGS# 1863

4719 1846 Tall Date MS62 Brown NGC. N-12, R.1. Grellman Die State b with no visible repunching at the 4, and without die lines along the lower left reverse border. This is the usual die state for N-12. This lustrous light brown example has splashes of pale blue and iridescent toning. Our EAC grade AU55. PCGS# 1871

1846 Tall Date Cent, MS64 Brown Very Rare N-16 Late Die State

4720 1846 Tall Date MS64 Brown NGC. N-16, R.5. Grellman Die State d, "very rare," with rim cud "above star 9 down to star 11." A lovely golden-brown near-Gem of this desirable marriage and die state. No marks are consequential, and the strike is sharp except on the upper stars and LIBERTY, which is always weak on N-16. Our EAC grade MS60. Ex: *Ed Lepordo Collection, Part One* (Heritage, 2/2009), lot 7220, which realized \$2,300. PCGS# 1871

4721 1847 MS65 Brown NGC. N-14, High R.4. Grellman Die State d. The reverse field is mostly Red, and hints of crimson-red also appear on the obverse border. The high points and obverse field are deep steel-blue. This coruscating Gem is pristine aside from unimportant contact on Liberty's jaw. Our EAC grade MS60. NGC ID# 226D, PCGS# 1877

4722 1847 MS66 Brown NGC. N-29, R.3. Grellman die state b, as evidenced by the die crack through the top of AMERIC, but there are also the beginnings of a crack through UNITED, which is indicative of die state c. This variety is identified by a point above the right upright of the N in CENT, as well as several die lines through the E in ONE. Numerous other die lines can be used to aid in attribution. Although mostly mahogany colored, significant amounts of mint red are visible throughout the protected areas. The surfaces are nearly pristine and there is just a trace of weakness on a couple of stars. Our EAC grade MS60+. Ex: *Long Beach Signature* (Heritage, 9/2008), lot 187. NGC ID# 226D, PCGS# 1877

4723 1847/47 Large Over Small 47 AU53 NGC. N-31, R.5. Grellman Die State b with a crack through the top of MER. This example has dark olive surfaces with splashes of chestnut and mahogany. Light reverse corrosion prevents an exact die state determination. Our EAC grade VF25. NGC ID# 226D, PCGS# 1880

4724 1847/47 Large Over Small 47 AU55 PCGS. N-2, R.3. Grellman Die State a. The top of a small 7 is obvious above the large, high relief 7. This briefly circulated medium brown and steel-blue cent displays light contact on the portrait. The central reverse is mildly granular. Our EAC grade XF40. NGC ID# 226D, PCGS# 1880

4725 1847/47 Large Over Small 47 AU58 PCGS. N-2, R.3. An olive-gold and tan-brown Borderline Uncirculated example of this popular *Guide Book* variety. A few minor grazes near star 1 but otherwise smooth. Nicely struck despite some softness on the star centers. Our EAC grade XF45. NGC ID# 226D, PCGS# 1880

**1848 Cent, MS66 Brown
N-35, Middle Die State**

- 4726 1848 MS66 Brown NGC. N-35, R.2.** Grellman Die State b. Grellman identifies the Newcomb variety by “a long, heavy point to left from hair” near star 6. Protected areas display hints of faded red, but gunmetal toning dominates the portrait and obverse field. This lustrous high grade cent is nicely struck and shows unobtrusive marks near star 2 and Liberty’s jaw. Our EAC grade MS60. NGC ID# 226E, PCGS# 1883

- 4727 1849 MS65 Brown NGC. N-20, R.1.** Grellman Die State c. A boldly struck medium brown Gem with vibrant luster and imposing preservation. An available die variety, but rarely found so fine. A late die stage with tiny die breaks on the rim near the second and third stars. Our EAC grade AU55.
Ex: New York Signature (Heritage, 7/2004), lot 5091. NGC ID# 226F, PCGS# 1886

- 4728 1849 MS65 Brown NGC. CAC. N-2, R.2.** Grellman meticulously lists the myriad stages of the reverse die crumbling for N-2, which is well advanced (though not yet terminal) on the present chocolate-brown Gem. The reverse die was apparently poorly annealed prior to use. Lustrous and nearly pristine with glimpses of mint red in design recesses. Our EAC grade AU55. NGC ID# 226F, PCGS# 1886

- 4729 1850 MS65 Red and Brown PCGS. N-21, 10, R.2.** Grellman Die State c, equivalent to N-10, with two reverse rim cud. Grellman reports that hundreds of Mint State examples of the late die state survive from a hoard. Housed in a green-label PCGS holder, this Gem has traces of faded red with light brown and bluish overtones. A small spot covers the berry below AM in AMERICA. Our EAC grade MS62. NGC ID# 226G, PCGS# 1890

- 4730 1851 MS64 Red and Brown PCGS. CAC. N-24, Low R.3.** Transitional between Grellman die states a and b, with lines to the left of the date and a faint die crack through star 8. Luminous surfaces offer a mix of faded pumpkin-orange and violet shadings. Our EAC grade MS62. NGC ID# 226H, PCGS# 1893

- 4731 1851 MS66 Red and Brown NGC. N-10, R.1.** Grellman Die State b. Both sides show plentiful peach-red though the high points are cobalt-blue, as are portions of the fields. Booming luster and mark-free surfaces confirm the lofty third party grade. Our EAC grade MS63. NGC ID# 226H, PCGS# 1893

- 4732 1851/81 MS63 Brown PCGS. N-3, R.1.** An inverted date variety also interesting for prominent die polish lines near AMERICA and across much of the obverse field. Refreshingly void of marks but we note an unimportant spot above the E in ONE. Our EAC grade AU55. NGC ID# 226H, PCGS# 1895

- 4733 1851/81 MS64 Brown NGC. N-3, R.1.** The date was initially entered inverted, although perhaps a two-digit logotype was used since only the 51 digits reveal the prior logotype. Heavy die lines (as made) are noted behind Liberty’s head. A lovely near-Gem with an especially undisturbed reverse. Our EAC grade AU55.
Ex: Baltimore Bullet Sale (Heritage, 7/2003), lot 76; Long Beach Signature (Heritage, 2/2009), lot 7241; Baltimore Signature (Heritage, 3/2009), lot 163. NGC ID# 226H, PCGS# 1895

- 4734 1852 MS66 Brown PCGS. N-16, R.1.** Grellman Die State a. Numerous die lumps on the denomination allow prompt attribution. A coruscating Premium Gem with predominantly golden-brown toning. The surfaces are a few flyspecks short of perfection. Our EAC grade MS60.

Ex: Craig A. Stevens Registry Collection of Large Cents (Heritage, 4/2006), lot 324, which realized \$1,035. NGC ID# 226J, PCGS# 1898

- 4735 1853 MS66 Brown PCGS. N-3, R.1.** Grellman Die State c. Rose-red, powder-blue, and steel-gray endow this lustrous and unabraded Mature Head type coin. A few faint spots on the wreath and the 1 in the date are all that limit the grade. Our EAC grade MS63. NGC ID# 226K, PCGS# 1901

- 4736 1855 Slanting 5s MS64 Red PCGS. N-10, R.1.** Grellman Die State e. A lustrous fire-red near-Gem that boasts an intricate strike and an unmarked appearance. Minor carbon determines the grade. N-10 and the Knob Ear N-9 are the sole business strike Slanted 5s varieties. Our EAC grade MS63. PCGS# 1912

**1855 ‘Knob on Ear’ Cent
N-9, MS64 Red and Brown**

- 4737 1855 Knob on Ear MS64 Red and Brown PCGS. N-9, R.1.** Grellman Die State f. Undesignated as the “Knob on Ear” variety on its older green label insert, but the large die break above the ear is obvious to the unaided eye. A fairly late die state with a second break beneath the Y in LIBERTY. The orange-gold and steel-gray surfaces are lustrous and essentially mark-free. One spot noted southwest of Liberty’s eye. Our EAC grade MS62. PCGS# 1914

TWO CENT PIECES

- 4738 1864 Large Motto MS65 Red PCGS. CAC.** Although the surfaces exhibit a few trivial spots and inconsequential marks, this is an impressive Gem with frosty orange mint luster and sharp design elements. An outstanding specimen. PCGS has only certified 49 finer Red examples of this issue (6/13). NGC ID# 22N9, PCGS# 3578

- 4739 1868 MS65 Red and Brown PCGS. CAC.** Pumpkin-orange margins surround brown centers with rich violet and blue overtones. A luminous Gem with minimal carbon and maximum eye appeal. NGC ID# 22NC, PCGS# 3598

**1872 Two Cent Piece, MS64 Brown
Doubled Die Obverse, FS-101**

- 4740 1872 MS64 Brown NGC. FS-101.** TRUST is die doubled north. The variety is undesignated on the insert. Mintages of two cent pieces declined each year of the denomination, as commerce gradually recovered from the ravages of the Civil War. By 1872, only 64,000 business strikes were issued. This fully struck and satiny near-Gem exhibits deep powder-blue and plum-mauve toning. Inconspicuous strike-throughs (as made) cross the shield borders. NGC ID# 22NG, PCGS# 3612

**1871 Two Cent, PR66 ★ Red and Brown
The Only Piece With Star Designation**

- 4744 1871 PR66 ★ Red and Brown NGC.** Lovely cherry-red, jade-green, orange-gold, and lemon toning graces both sides and is especially attractive on the reverse. Intricately struck and flashy. Moderate carbon near the large 2 limits the grade. TRUST and the right arrow are die doubled, as always on this scarce proof date. The sole Red and Brown specimen at NGC with a Star designation, though a PR67 ★ Red Cameo is also certified (6/13). NGC ID# 22NH, PCGS# 3646

PROOF TWO CENT PIECES

- 4741 1864 Large Motto PR65 Brown PCGS.** Spectacular shades of violet and pale jade toning dominate the well-preserved deeply reflective surfaces of this impressive Gem. The design elements are sharply detailed and eye appeal is tremendous. Population: 5 in 65 Brown, 7 finer (6/13). NGC ID# 274T, PCGS# 3621

**1864 Large Motto Two Cent Piece
Gem Red and Brown Proof**

- 4742 1864 Large Motto PR65 Red and Brown PCGS.** Although Large Motto 1864 two cent business strikes are commonplace, proofs are scarce. PCGS has certified just 153 pieces in all grades. This fully struck Gem is devoid of contact and has only inconsequential carbon. Apricot and fire-red undertones emerge from tan-brown surfaces. A retained lamination, as coined, is noted on the lower portion of the shield. Housed in an old green label holder. NGC ID# 274T, PCGS# 3622

- 4743 1867 PR65 Red and Brown PCGS.** The obverse is almost fully Red, though the reverse has medium brown in the wreath and red at the periphery. Nicely detailed with a few flecks of carbon. Population: 52 in 65 Red and Brown, 7 finer (6/13). NGC ID# 274W, PCGS# 3634

**1871 Two Cent Piece, PR65
Original Red Surfaces**

- 4745 1871 PR65 Red PCGS.** Only 960 proof two cent pieces were struck in 1871. This delightful Gem exhibits sharply detailed design elements throughout and deeply mirrored fields. The well-preserved original red surfaces show few signs of contact. Population: 40 in 65 (1 in 65+) Red, 13 finer (6/13). NGC ID# 22NH, PCGS# 3647

**1871 Two Cent Piece, PR65+ Red
Sharply Detailed Proof**

- 4746 1871 PR65+ Red NGC.** The original orange-red surfaces of this high-end Gem display a few spots of light brown patina, with few signs of contact. The design elements are sharply detailed throughout and the fields are deeply reflective. Census: 30 in 65 (1 in 65+) Red, 8 finer (6/13). NGC ID# 22NH, PCGS# 3647

**1871 Two Cent Piece, PR65+ Red
Only 960 Pieces Struck**

4747 1871 PR65+ Red PCGS. CAC. Only 960 proof two cent pieces were struck in 1871 and the date is quite rare in grades above the Gem level. This high-end Gem displays sharply detailed design elements and moderately reflective original red surfaces that show minimal signs of contact or carbon. Population: 40 in 65 (1 in 65+) Red, 13 finer (5/13). NGC ID# 22NH, PCGS# 3647

4748 1872 PR64 Red and Brown NGC. CAC. An attractive example of the last proof two cent issue to have accompanying business strikes. The copper-orange of the obverse gives way to nutmeg and mahogany on the boldly impressed, modestly hairlined reverse. NGC ID# 2752, PCGS# 3649

THREE CENT SILVER

4749 1851 MS65+ PCGS. CAC. The first year of issue for the three-cent denomination. This example has brilliant and frosty silver luster with hints of delicate gold toning. An impressive Gem for a type set or specialized collection. NGC ID# 22YX, PCGS# 3664

4750 1851 MS66 PCGS. CAC. A sharply struck Premium Gem with brilliant, frosty luster on the obverse and dusky gold toning on the reverse. PCGS has only certified 13 finer examples (6/13). NGC ID# 22YX, PCGS# 3664

4751 1862/1 MS66 PCGS. FS-301. Dappled apple-green and rose-red toning blankets both sides. A fully struck Premium Gem of this popular Civil War overdate. Lustrous and pristine with prominent clash marks on each side. NGC ID# 22ZC, PCGS# 3681

4752 1862 MS66 PCGS. Intermingled iridescence appears on both sides of this frosty and fully lustrous Premium Gem. PCGS has only graded 11 finer examples of this Civil War issue. NGC ID# 22ZB, PCGS# 3680

4753 1862 MS66 PCGS. CAC. Each side of this Premium Gem has a circle of pinkish-silver luster within intense sea-green and cobalt-blue toning. PCGS has certified just 11 finer examples (6/13). NGC ID# 22ZB, PCGS# 3680

PROOF THREE CENT SILVER

4754 1860 PR64 PCGS. CAC. Lightly toned green-gold on the obverse with a near-silver reverse. Pleasingly reflective, if a trifle blunt on the reverse stars, and all-around appealing. Population: 43 in 64, 11 finer (6/13). NGC ID# 27C7, PCGS# 3709

**1863 Trime, PR66
Only 460 Examples Struck**

4755 1863 PR66 PCGS. CAC. From a low Civil War proof mintage of just 460 pieces, this delightful Premium Gem exhibits sharply detailed design elements and deeply mirrored fields under attractive shades of champagne-gold and lavender toning. Eye appeal is outstanding. Population: 9 in 66, 0 finer (6/13). NGC ID# 22ZP, PCGS# 3712

4756 1865 PR64 PCGS. A deeply toned Civil War era three cent silver issue from a transitional year that saw the introduction of the three cent nickel coins. This example has deep gray-gold surfaces and iridescent toning. NGC ID# 27CB, PCGS# 3715

4757 1873 PR63 NGC. Shades of pale gold and powder-blue toning visit both sides of this well-detailed Select specimen, with occasional spots of amber. The fields are brightly reflective and show only minor signs of contact. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKEL

4758 1879 MS66+ NGC. An impressive Premium Gem, this three cent issue is normally found in proof, and Mint State survivors seldom encountered. This piece has reflective light gray fields with lustrous devices and delicate champagne toning. Census: 21 in 66 (1 in 66+), 4 finer (6/13). NGC ID# 275B, PCGS# 3747

PROOF THREE CENT NICKELS

4759 1866 PR65 NGC. CAC. Attractive shades of champagne-gold and lavender toning blanket the lustrous surfaces of this sharply detailed Gem. From a mintage of 725 pieces. Census: 61 in 65, 18 finer (5/13). NGC ID# 275L, PCGS# 3762

4760 1867 PR66+ Cameo PCGS. CAC. A sensational early three cent nickel, this Premium Gem Cameo proof has brilliant light gray surfaces. Deeply mirrored fields frame the satiny white devices. Population: 28 in 66+ Cameo, 0 finer (6/13). PCGS# 83763

**1870 Three Cent Nickel, PR66
Rare Cameo Specimen**

4761 1870 PR66 Cameo PCGS. CAC. Razor-sharp definition is evident on all design elements of this delightful Premium Gem and the richly frosted devices contrast boldly with the deeply mirrored fields. The virtually pristine surfaces show just a trace of pale gold toning. Population: 8 in 66 Cameo, 1 finer (6/13). PCGS# 83766

4762 1873 Closed 3 PR66 Cameo PCGS. CAC. The Closed 3 of proof coins struck early in the year resembled an 8, and met with public criticism, pressuring the Mint to create a new logotype with a more open appeared 3. This Premium Gem Cameo proof has deeply mirrored fields behind its sharply defined design motifs. Population: 13 in 66 (1 in 66+) Cameo, 1 finer (6/13). PCGS# 83769

4763 1874 PR66 PCGS. CAC. Ex: Teich Family Collection. Lightly mirrored surfaces and a hint of contrast with the boldly defined devices hide beneath wisps of gold and iridescent toning. Population: 21 in 66, 2 finer (6/13). NGC ID# 275V, PCGS# 3770

4764 1874 PR66 Cameo PCGS. CAC. A boldly contrasted Premium Gem with sharply detailed design elements and pristine reflective surfaces. A few highlights of pale gold toning add to the ample eye appeal. Population: 16 in 66 (1 in 66+) Cameo, 0 finer (5/13). PCGS# 83770

4765 1875 PR66 NGC. A brilliant Premium Gem with light gray surfaces and no toning on either side. Satin luster appears on the boldly defined devices of this beauty. Census: 15 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 22NV, PCGS# 3771

4766 1876 PR65 NGC. CAC. This razor-sharp Gem is devoid of contact and displays caramel-gold and sky-blue toning. Scattered flecks are noted on the reverse field. Housed in a prior generation holder. NGC ID# 275W, PCGS# 3772

4767 1878 PR65 NGC. Few of the surviving proof 1878 three cent pieces look like proofs, with satin luster and reflective fields being typical, but 1878 was a proof-only issue. This piece has lightly mirrored fields with light nickel-gray surfaces. A lovely Gem with only minimal carbon spots. NGC ID# 275Y, PCGS# 3774

4768 1884 PR67 Cameo NGC. A boldly defined brilliant Superb Gem Cameo proof, this piece has lovely light gray surfaces with exceptional contrast. Census: 17 in 67 (1 in 67+) Cameo, 4 finer (6/13). PCGS# 83780

4769 1884 PR66 Ultra Cameo NGC. A generous proof mintage of 3,942 three cent nickels was struck in 1884, to accompany an extremely low business-strike total of 1,700 examples. This well-detailed Premium Gem shows the effects of die polishing in some areas, like the ribbon bow, but the devices are richly frosted, providing profound contrast with the reflective fields. Census: 2 in 66 Ultra Cameo, 1 finer (6/13). PCGS# 93780

4770 1886 PR67 PCGS. CAC. A delightful Superb Gem, this 1886 three cent nickel displays lustrous devices and satin fields. Subtle hints of color, including shades of pink, are present on the obverse. Population: 47 in 67, 3 finer (5/13). NGC ID# 2768, PCGS# 3782

4771 1888 PR67 PCGS Secure. The next to last three cent nickel issue, this Superb Gem proof is an exceptional representative with sharp details and fully brilliant light gray surfaces. The fields are satiny and lustrous rather than the usual mirrored appearance, and the strike is sufficient to prove its proof status. Population: 24 in 67 (2 in 67+), 1 finer (6/13). NGC ID# 276B, PCGS# 3785

EARLY HALF DIMES

4772 1795 Good 6 PCGS. V-5, LM-8, R.3. All legends are clear on this Flowing Hair type coin. The portrait, eagle, and wreath are well outlined. The right-side stars are bold, though the left-side stars are mostly faint. The portrait displays a few parallel thin marks. Struck from rotated dies. NGC ID# 22ZV, PCGS# 4251

1795 V-5, LM-8 Half Dime, XF40 Excellent Type Candidate

4773 1795 XF40 ANACS. V-5, LM-8, R.3. A faint die crack joins the nose and the Y in LIBERTY on this silver-gray half dime. Both sides have splashes of delicate blue toning with hints of gold on the reverse. A few typical handling marks and fine scratches are evident and expected at this grade level. NGC ID# 22ZV, PCGS# 4251

1795 V-4, LM-10 Half Dime AU Details

4774 1795 — Damage — PCGS Genuine. AU Details. V-4, LM-10, R.3. The damage is not readily apparent on this pleasing half dime. Both sides have considerable luster with delightful rainbow toning that gradually changes from deep bluish-green, to gold and russet, all in concentric rings. NGC ID# 22ZV, PCGS# 4251

BUST HALF DIMES

1832 Half Dime, MS66 ★ V-1, LM-3, Multicolor Borders

4775 1832 MS66 ★ NGC. V-1, LM-3, R.1. Vibrant navy-blue, plum-red, and golden-brown borders frame the brilliant centers. This coruscating high grade example is well preserved and shows only minor incompleteness of strike on the upper left shield border. Census: 6 in 66 ★, 1 finer with a Star designation (6/13). NGC ID# 232E, PCGS# 4279

4776 1833 MS64 PCGS. V-7, LM-1, R.3. A delightful Choice specimen with much original mint luster shining through shades of golden-brown, ice-blue, and amber toning. Housed in an old green label holder. Population: 64 in 64, 64 finer (5/13). NGC ID# 232F, PCGS# 4280

SEATED HALF DIMES

- 4777 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS. CAC.** Attractive cherry-red, straw-gold, and ocean-blue toning encompasses this moderately prooflike No Stars type coin. Nicely struck and lightly abraded. Inaccurately designated Large 5C by PCGS. NGC ID# 232M, PCGS# 4312
- 4778 1838 Large Stars, No Drapery MS65 PCGS.** Faint green-gold overtones supplement the faint silver-gray surfaces of this Large Stars, No Drapery half dime. A die crack and buckling are visible at the right reverse. NGC ID# 2TXX, PCGS# 4317
- 4779 1841 MS65 PCGS. CAC.** A frosty and lustrous example with attractive greenish-gold toning on both sides. This Gem has a bold strike and his highly appealing. Population: 11 in 65, 16 finer (6/13). NGC ID# 232Y, PCGS# 4328
- 4780 1850 MS66 NGC.** An extraordinary Premium Gem from the pre-Arrows period of Seated Liberty coinage. Despite a mintage approaching 1 million coins, few have survived in top grades. This sharply defined specimen has brilliant and frosty silver luster with outstanding eye appeal. Census: 15 in 66, 6 finer (6/13). NGC ID# 233F, PCGS# 4345

1851 Seated Half Dime, MS67+ None Finer at PCGS

- 4781 1851 MS67+ PCGS. CAC.** From a mintage of 781,000 pieces, this spectacular high-end Superb Gem is one of the finest survivors seen at PCGS. The design elements are sharply detailed and many die striations are evident in the fields, which appear partially prooflike in many areas. Population: 6 in 67 (1 in 67+), 0 finer (6/13). NGC ID# 233H, PCGS# 4347
- 4782 1856 MS66 NGC.** The typical strike of 1856 half dimes lacks border details as seen here. This lustrous Premium Gem exhibits splashes of blue and iridescent toning on its frosty silver surfaces. Census: 42 in 66, 7 finer (6/13). NGC ID# 233P, PCGS# 4363

1857-O Seated Half Dime, MS66 Very Rare in Finer Grades

- 4783 1857-O MS66 PCGS.** The 1857-O Seated Liberty half dime claims a nominal mintage of 1.3 million pieces, but few high-grade examples were saved by contemporary collectors. This sharply detailed MS66 specimen exhibits vibrant mint luster under attractive shades of gold, gray, and amber toning. Population: 11 in 66 (1 in 66+), 4 finer (6/13). NGC ID# 233T, PCGS# 4366
- 4784 1861 MS66 PCGS. CAC.** Considerable silver brilliance appears alongside vivid cobalt-blue, violet, and gold toning on this frosty and lustrous Premium Gem. Population: 23 in 66 (1 in 66+), 2 finer (6/13). NGC ID# 2349, PCGS# 4379

1866 Half Dime, MS65 Prooflike One of Two Graded Prooflike

- 4785 1866 MS65 Prooflike NGC.** One of only two examples certified as Prooflike by NGC, the present Gem exhibits frosty motifs and glassy fields. Fully struck and essentially brilliant with mint-made clash marks evident on both sides. Just 10,000 business strikes (and 725 proofs) were struck.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5434, which realized \$1,955. PCGS# 74388

- 4786 1868 MS65 PCGS.** This satiny Gem exhibits full luster beneath a blend of sky-blue and yellowish-gold toning with mostly bold design motifs. Population: 12 in 65, 11 finer (6/13). NGC ID# 234N, PCGS# 4392
- 4787 1872 MS66 PCGS.** A delightful Premium Gem, this 1872 half dime has frosty silver luster with splashes of gold and iridescent toning on each side. The strike is slightly weak at the upper left branch of the wreath but stronger elsewhere. Population: 13 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 234X, PCGS# 4400

PROOF SEATED HALF DIMES

- 4788 1859 PR64 PCGS.** This Choice proof 1859 half dime has excellent contrast despite the absence of a Cameo designation. Both sides have fully mirrored fields with satiny devices and intermingled gold and iridescent toning. NGC ID# 235P, PCGS# 4438
- 4789 1866 PR66 PCGS.** The 1866 half dime is scarce in business strike and in proof, with only 725 of the latter minted. This Premium Gem combines gold, lilac, and blue toning on the obverse with gold and violet on the reverse. A splendid specimen. Population: 9 in 66, 2 finer (6/13). NGC ID# 2363, PCGS# 4449
- 4790 1866 PR65 Cameo NGC. CAC.** This early date in the Legend Obverse series had only 725 proofs produced. The fields display deep reflectivity and the center of each side is pale in color with slightly deeper peripheral toning present. The contrast is strongly evident even through the toning. Census: 5 in 65 Cameo, 6 finer (5/13). PCGS# 84449
- 4791 1867 PR66 PCGS.** An exquisite Premium Gem from a low proof mintage of only 625 coins, this half dime has deep blue and amber toning over fully mirrored fields. Light contrast is visible beneath the toning. Population: 11 in 66, 5 finer (6/13). NGC ID# 2364, PCGS# 4450
- 4792 1873 PR65 Cameo NGC.** The half dime denomination was rendered obsolete after passage of "The Crime of '73." This proof example of this final-year issue is brilliant and shows sharp contrast between the fields and devices. PCGS# 84456

BUST DIMES

- 4793 1814 STATESOF VF35 NGC. JR-5, R.3.** The popular *Guide Book* variety with blundered spacing on the reverse legend. Deeply toned blue-green and lavender with pleasing sharpness and lightly granular surfaces. A small planchet void is near star 3. PCGS# 4490
- 4794 1832 AU58 PCGS. CAC. JR-1, R.2.** A repunched C in AMERICA determines the die variety of this richly patinated near-Mint dime. Olive-green, walnut-brown, and gunmetal-gray shades envelop smooth and satiny surfaces. NGC ID# 237C, PCGS# 4521

1837 Capped Bust Dime, MS65 JR-4, Bisecting Die Crack

- 4795 1837 MS65 NGC. CAC. JR-4, R.1.** The bisecting obverse crack between 12 and 5 o'clock attributes this final year Capped Bust dime. A crisply struck and coruscating Gem draped in dove-gray, forest-green, and tan-gold toning. Magnificently preserved and desirable. Census: 11 in 65 (1 in 65+), 5 finer (6/13). NGC ID# 237H, PCGS# 4529

SEATED DIMES

- 4796 1843-O VF20 PCGS. CAC. Fortin-101.** The 1843-O has a mintage of just 150,000 pieces. Most of the production was melted long ago, and survivors are scarce in any grade. The present problem-free Very Fine example has stone-gray high points and fields with charcoal toning in design recesses. NGC ID# 2389, PCGS# 4584
- 4797 1845 MS65 NGC.** This pleasing Gem exhibits lustrous surfaces and areas of light toning. A few tiny die cracks appear near 12 o'clock on the reverse. Census: 10 in 65, 7 finer (5/13). NGC ID# 238B, PCGS# 4586
- 4798 1854-O Arrows MS63 NGC.** A well-detailed and brightly lustrous specimen of the popular Arrows design from the New Orleans Mint. The brilliant surfaces show only minor signs of contact. Census: 13 in 63, 39 finer (5/13). NGC ID# 239B, PCGS# 4606
- 4799 1858-S XF40 PCGS.** A lightly worn example of this scarce, low-mintage date, surviving from a production of just 60,000 coins. Small change was in short supply on the West coast at the time, and the entire production run entered circulation. This survivor has deep gray patina with traces of luster. Population: 7 in 40, 24 finer (6/13). NGC ID# 2393, PCGS# 4618
- 4800 1863-S AU55 PCGS. CAC.** The 1863-S is a rare issue in high grade. This attractive Choice AU specimen is minimally abraded and well-detailed, with satiny mint luster and hints of pale gold and lavender-gray toning. Population: 3 in 55, 15 finer (5/13). NGC ID# 239L, PCGS# 4638
- 4801 1868 MS64 PCGS.** Lightly toned in shades of champagne-gold, the reflective prooflike surfaces of this impressive Choice example show only minor signs of contact. Population: 7 in 64, 5 finer (5/13). NGC ID# 239W, PCGS# 4647

- 4802 1873-S Arrows MS62 NGC.** A well-detailed representative of the popular Arrows design, with vibrant mint luster and brilliant surfaces that show a minimum number of surface marks for the grade. Census: 6 in 62, 49 finer (5/13). NGC ID# 23BJ, PCGS# 4667

1874 Arrows Dime, MS65 Briefly Issued Type

- 4803 1874 Arrows MS65 PCGS.** A satiny representative of this two-year type. The obverse is medium silver-gray while the reverse offers deep forest-green and gunmetal toning. Marks are confined to faint lines on the left obverse field. The strike is crisp aside from a small portion of the upper left wreath. Population: 28 in 65, 28 finer (6/13). NGC ID# 23BK, PCGS# 4668

1874-CC Arrows Dime, VF Details Carson City Key

- 4804 1874-CC Arrows — Obverse Scratched — NGC Details. VF.** From a mintage of 10,817 pieces, the 1874-CC Arrows dime is the undisputed key to the Seated dime series (discounting the unique 1873-CC No Arrows). The issue is prized by collectors in all grades and conditions. The present Carson City dime has stone-gray surfaces and even wear with a few thin marks on each side of Liberty's head.

1882 Seated Dime, MS67 None Finer at PCGS

- 4805 1882 MS67 PCGS. CAC.** Attractive shades of bluish-gray and champagne-gold patina blanket the well-preserved surfaces of this impressive Superb Gem. The design elements are sharply detailed and vibrant mint luster shines through the toning. Eye appeal is terrific. Population: 19 in 67, 0 finer (6/13). NGC ID# 23AV, PCGS# 4690
- 4806 1883 MS66 NGC.** A fully brilliant Premium Gem, this 1883 dime has frosty silver luster and sharp design motifs. No toning is evident on either side. Census: 40 in 66 (1 in 66+), 22 finer (6/13). NGC ID# 23AW, PCGS# 4691

4807 1883 MS66 PCGS. CAC. This delightful Premium Gem displays well-detailed design elements and vibrant mint luster, with attractive shades of ice-blue and champagne-gold toning. Population: 59 in 66 (1 in 66+), 12 finer (5/13). NGC ID# 23AW, PCGS# 4691

4808 1884 MS66 NGC. CAC. This pristine Premium Gem is draped in dusky aquamarine, apricot-gold, and lilac-red toning. The strike is crisp though incomplete on Liberty's hair. Certified in a former generation holder. Census: 35 in 66 (1 in 66+), 28 finer (6/13). NGC ID# 23AX, PCGS# 4692

PROOF SEATED DIMES

4809 1860 PR64 Cameo PCGS. Type collectors will appreciate this first year coin design with the legend on the obverse. A delightful Choice Cameo proof, this example has brilliant, untuned silver surfaces with bold design definition. Deeply mirrored fields provide a lovely frame for the central motifs. Population: 9 in 64 (1 in 64+) Cameo, 17 finer (6/13). PCGS# 84753

4810 1863 PR64+ Cameo PCGS. CAC. The sharply detailed frosty design elements of this high-end Choice example contrast boldly with the deeply mirrored fields and the surfaces show few signs of contact. Population: 15 in 64 (1 in 64+) Cameo, 12 finer (5/13). PCGS# 84756

4811 1869 PR66+ NGC. An incredible Premium Gem proof, this Seated dime has fully mirrored fields and lustrous devices, all visible through the deep blue and violet toning. The toning prevents a well-deserved Cameo designation. Census: 7 in 66 (1 in 66+), 4 finer (6/13). NGC ID# 23CT, PCGS# 4762

4812 1873 No Arrows, Closed 3 PR66 PCGS. CAC. Medium cream-gray centers are bounded by peripheral bands of autumn-brown and navy-blue. Crisply struck and flashy with superior preservation. Breen's mintage figure of 600 pieces may be more accurate than the *Guide Book* production of 1,100 proofs. Breen (1988) states "some proofs melted July 10, 1873." NGC ID# 23CX, PCGS# 4766

4813 1873 Arrows PR64 NGC. The motifs are lightly frosted and show moderate contrast with the glassy honey-gold fields. Formerly in a B. Max Mehl auction of unknown date (1950s or earlier) as lot 1352, where it sold for \$7. Census: 32 in 64, 27 finer (6/13). NGC ID# 23DH, PCGS# 4769

4814 1874 Arrows PR64 PCGS. The bright proof fields are somewhat subdued by light hairlines and moderate gray and blue toning seen in varying amounts on each side. Second of only two years of the Arrows type. NGC ID# 23DJ, PCGS# 4770

4815 1877 PR65 NGC. CAC. Fortin-101. Type Two Reverse. The E in DIME is prominently die doubled. Dusky golden-brown and fields and slate-gray devices are framed by iridescent aquamarine and rose-red margins. Just 510 proofs were issued. NGC ID# 23D2, PCGS# 4774

4816 1877 PR65 Cameo PCGS. CAC. Both sides of this delightful Gem Cameo proof exhibit iridescent toning over lustrous devices and mirrored fields with bright gold and vivid blue predominant. Population: 4 in 65 Cameo, 3 finer (6/13). PCGS# 84774

1882 Dime, PR66+ Cameo Substantial Toning, Yet Obviously Contrasted

4817 1882 PR66+ Cameo PCGS. CAC. The 1882 dime had one of the larger proof mintages with 1,100 pieces struck. A couple of dozen high-grade proofs are known. This is one of the more visually interesting ones. Blue-green patina is scattered irregularly over each side, and the cameo contrast is strongly evident even through the substantial toning. The strike is pinpoint-sharp and there are no obvious contact marks on either side. Population: 14 in 66 (1 in 66+) Cameo, 4 finer (6/13). PCGS# 84779

4818 1884 PR66 NGC. Deeply reflective proof mirrors are evident on each side when examined with a magnifier or when held at just the right angle. The obverse has layers of rich red and blue, while the reverse is mostly blue. Only 875 proofs struck. NGC ID# 23D9, PCGS# 4781

1885 Seated Dime, PR67 Colorful High-Grade Survivor

4819 1885 PR67 PCGS Secure. CAC. Deep patina under a lamp resolves into pinkish-lilac centers with paler peripheral hues in amber and saffron. The 1885 dime saw a proof production of 930 pieces, but few survivors attain the Superb Gem grade today, and fewer still surpass it. Both sides are mark-free and quite well-struck. Population: 9 in 67 (2 in 67+), 2 finer (6/13). NGC ID# 23DA, PCGS# 4782

4820 1886 PR65 NGC. Green-gold toning overall with dots of blue-green at the obverse margins and greater coverage of that hue on the reverse. A pleasing Gem proof from later in the Seated dime series. NGC ID# 23DB, PCGS# 4783

4821 1889 PR65 Cameo NGC. A gleaming Gem that is strongly contrasted through rich green-gold toning with patches of deeper color at the borders. A single small contact mark is noted in the right obverse field. Census: 5 in 65 Cameo, 11 finer (5/13). PCGS# 84786

4822 1890 PR66 NGC. Vivid shades of lavender and lime-green toning enhance the pristine surfaces of this attractive Premium Gem. The design elements are sharply detailed throughout and the fields are brightly reflective. Census: 24 in 66, 11 finer (6/13). NGC ID# 23DE, PCGS# 4787

4823 1891 PR64 PCGS. CAC. Green-gold border toning is strongest at the right obverse. Glimmering silver interiors are a touch watery but supply a modicum of contrast.
Ex: ANA Signature (Heritage, 3/2010), lot 7835. NGC ID# 23DG, PCGS# 4788

BARBER DIMES

1892-O Dime, MS66 Effaced Repunching

- 4824 1892-O MS66 NGC.** Although this is not the FS-301 Repunched Date variety, some die roughness just left of the date elements suggests the possibility of a repunched date that has been effaced. This Premium Gem is boldly defined with brilliant and frosty silver luster. It represents nearly the finest available quality, as NGC and PCGS have only certified three finer pieces. Census: 7 in 66, 2 finer (6/13). NGC ID# 23DL, PCGS# 4797

1892-S Barber Dime, MS65 Only Three Finer Coins at PCGS

- 4825 1892-S MS65 PCGS.** An impressive Gem representative from the first year of the Barber design, this coin displays well-detailed design elements and frosty mint luster, under shades of bluish-gray and pale gold patina. No mentionable distractions are evident. Population: 12 in 65, 3 finer (6/13). NGC ID# 23DM, PCGS# 4798

1893-S Barber Dime, MS65 Very Rare in Higher Grades

- 4826 1893-S MS65 PCGS. CAC.** Delicate shades of ice-blue and champagne-gold toning enhance the well-preserved surfaces of this impressive Gem. The design elements are well-detailed and vibrant mint luster shines through the toning. Eye appeal is outstanding. Population: 23 in 65 (1 in 65+), 6 finer (5/13). NGC ID# 23DS, PCGS# 4802

- 4827 1894 MS66 NGC.** A splendid Premium Gem, this 1894 Barber dime has frosty luster beneath intense iridescent toning. Both sides combine steel-blue, violet, and green-gold, covering all of the surfaces. Census: 12 in 66 (3 in 66+), 2 finer (6/13). NGC ID# 23DT, PCGS# 4803

- 4828 1894-O AU55 PCGS.** Pleasingly detailed with virtually intact luster and just a touch of highpoint wear. Rich rose-orange and blue-green patina graces the margins on each side. Population: 11 in 55, 36 finer (6/13). NGC ID# 23DU, PCGS# 4804

- 4829 1895-S MS63 PCGS.** A lovely example of this scarce issue, this Select Mint State dime has frosty luster beneath delightful iridescent toning. Population: 24 in 63, 38 finer (6/13). NGC ID# 23DX, PCGS# 4808

1897-O Barber Dime, MS64 Low-Mintage New Orleans Issue

- 4830 1897-O MS64 PCGS Secure.** The 1897-O Barber dime claims a smallish mintage of 666,000 pieces and the issue is seldom encountered in high grade. This attractive Choice specimen displays satiny mint luster and well-detailed design elements, under delicate shades of lavender-gray toning. Population: 22 in 64, 21 finer (5/13). NGC ID# 230000, PCGS# 4813

- 4831 1898-S MS64 PCGS.** Splashes of silver brilliance appear alongside subdued golden toning on both sides of this Choice Mint State specimen. Population: 24 in 64, 11 finer (6/13). PCGS# 4817

1902-O Barber Dime, MS65 Sharply Detailed O-Mint Specimen

- 4832 1902-O MS65 PCGS.** The design elements of this attractive Gem representative display pinpoint definition throughout and the well-preserved surfaces exhibit vibrant mint luster on both sides. The surfaces are essentially brilliant and eye appeal is terrific. Population: 5 in 65, 2 finer (6/13). NGC ID# 23EK, PCGS# 4828

- 4833 1903-S MS62 PCGS.** A splendid specimen from a mintage of 613,300 coins, this 1903-S Barber dime is fully brilliant with frosty mint luster and exceptional eye appeal. Minuscule surface marks are inconsequential. Population: 8 in 62, 45 finer (6/13). NGC ID# 23EP, PCGS# 4832

- 4834 1904-S MS63 PCGS.** This pleasing Select Barber dime displays well-detailed design elements and vibrant mint luster under shades of pale gold and lavender toning. Population: 15 in 63, 30 finer (5/13). NGC ID# 23ES, PCGS# 4834

- 4835 1905-O MS65 PCGS. CAC.** An impressive representative with lustrous surfaces. Brilliant mint frost shines through muted gold toning. Population: 23 in 65, 24 finer (6/13). NGC ID# 23EU, PCGS# 4836

- 4836 1907-D MS65 PCGS.** A pleasing Gem with satin luster and light gray surfaces showing accents of peripheral gold and blue toning. This is a conditionally rare early Denver Mint issue. Population: 8 in 65 (1 in 65+), 8 finer (6/13). NGC ID# 23F4, PCGS# 4843

- 4837 1907-S MS64 PCGS.** The obverse of this Choice Mint State Barber dime combines ivory luster with deep steel patina. The reverse is mostly light gold with splashes of dark green. Sharply struck and attractive. Population: 22 in 64, 10 finer (6/13). NGC ID# 23F6, PCGS# 4845
- 4838 1908-S MS64 PCGS.** Aquamarine and apricot-gold toning blankets this lustrous and intricately struck near-Gem. No marks are readily evident and the eye appeal is superior for the grade. Population: 22 in 64 (1 in 64+), 40 finer (6/13). NGC ID# 23FA, PCGS# 4849
- 4839 1908-S MS65 PCGS. CAC.** The obverse has light gold toning at the center within a wide ring of turquoise. The reverse is mostly gold with a crescent of turquoise to the right. An above average strike enhances the importance of this Barber dime. Population: 24 in 65, 16 finer (6/13). NGC ID# 23FA, PCGS# 4849
- 4840 1913 MS66 PCGS.** Wisps of pale gold toning appear on the frosty luster of this brilliant Premium Gem Barber dime. A lovely example that is elusive in this or higher grades. Population: 36 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 23FR, PCGS# 4863
- 4841 1913-S MS65 PCGS. CAC.** A wonderful example of this scarce, low-mintage 1913-S Barber dime. This Gem exhibits satin luster with brilliant silver surfaces and delicate champagne toning. Population: 23 in 65 (1 in 65+), 23 finer (6/13). NGC ID# 23FS, PCGS# 4864
- 4842 1914 MS66 PCGS.** An impressive Premium Gem, this 1914 Barber dime has frosty silver luster with intermingled amber, gold, and sea-green toning. Population: 52 in 66, 5 finer (6/13). NGC ID# 23FT, PCGS# 4865
- 4843 1915 MS66 NGC.** Shimmering mint frost covers each side of this mostly white Premium Gem, which also reveals a few hints of pale gold color on each side. Superficial luster grazes on the obverse are too faint to limit the grade. Census: 8 in 66, 0 finer (5/13). NGC ID# 23FW, PCGS# 4868
- 4844 1915 MS66 PCGS.** This Premium Gem exhibits splashes of light silver luster with deep violet and blue toning on the obverse. The reverse is brilliant and untuned. Both sides display sharp design definition. Population: 12 in 66 (1 in 66+), 0 finer (6/13). NGC ID# 23FW, PCGS# 4868

PROOF BARBER DIMES

- 4845 1893 PR65 Cameo PCGS.** Pale blue and champagne-gold toning highlight the reflective surfaces of this well-preserved Gem. The frosty sharply detailed design elements provide startling cameo contrast. Population: 17 in 65 Cameo, 27 finer (5/13). PCGS# 84877
- 4846 1894 PR65 PCGS.** Gorgeous deep charcoal-gray and electric-blue coloration adorns each side of this crisply struck, well preserved Gem proof. Only the faintest of hairlines can be discerned on either side, and only with the aid of a magnifier. NGC ID# 23G6, PCGS# 4878
- 4847 1897 PR66 PCGS.** A stunning Premium Gem proof, this Barber diem has deep gold, green, and iridescent toning on both sides. Full contrast is evident through the toning, although PCGS elected not to assign the Cameo designation. Population: 34 in 66, 20 finer (6/13). NGC ID# 23GA, PCGS# 4881

1899 Barber Dime, PR67 Cameo Unusually Frosty Devices

- 4848 1899 PR67 Cameo PCGS.** Elements of champagne-gold and lavender toning enhance the well-preserved surfaces of this spectacular Superb Gem, and the richly frosted devices contrast boldly with the deeply reflective fields. The design elements are sharply rendered and eye appeal is extraordinary. Population: 9 in 67 (1 in 67+) Cameo, 0 finer (6/13). PCGS# 84883
- 4849 1900 PR66 PCGS. CAC.** An impressive Premium Gem proof from a mintage of 912 pieces, this well-detailed specimen displays reflective pristine surfaces under shades of violet-gray and lime-green toning. Population: 26 in 66 (1 in 66+), 10 finer (5/13). NGC ID# 23GD, PCGS# 4884
- 4850 1904 PR65 NGC.** The design elements of this delightful Gem Barber dime exhibit razor-sharp definition throughout. The deeply reflective fields show no mentionable signs of contact and eye appeal is terrific. Census: 42 in 65, 38 finer (6/13). NGC ID# 23GH, PCGS# 4888
- 4851 1905 PR65 PCGS.** The mirror-like fields are partially subdued by the depth of the blue, green, and rose toning seen both sides. A scattering of carbon is seen on the left side of the obverse. NGC ID# 23GJ, PCGS# 4889

1906 Barber Dime, PR67 Only One Numerically Finer Coin at PCGS

- 4852 1906 PR67 PCGS.** From a tiny proof mintage of just 675 pieces, this spectacular Superb Gem exhibits razor-sharp definition on all design elements and deeply mirrored fields, under attractive shades of champagne-gold and cerulean-blue toning. Population: 11 in 67 (1 in 67+), 1 finer (6/13). NGC ID# 23GK, PCGS# 4890
- 4853 1906 PR65 Cameo NGC.** Lightly but distinctly contrasted with green, blue, and violet border toning that is more readily apparent on the reverse. Pleasingly preserved and a great coin for the Barber dime enthusiast who wants "something extra" for the date. PCGS# 84890
- 4854 1907 PR66 NGC.** This spectacular Premium Gem is patinated in attractive shades of champagne-gold and lavender on the obverse, while the reverse shows vivid violet and lime-green hues. Sharply detailed, with deeply reflective fields. Census: 27 in 66, 20 finer (5/13). NGC ID# 23GM, PCGS# 4891
- 4855 1912 PR65 PCGS.** Golden centers and blue margins dapple into one another at their borders. A mildly contrasted Gem proof from an issue of 700 pieces. Population: 29 in 65, 30 finer (5/13). NGC ID# 23GT, PCGS# 4896

TWENTY CENT PIECES

- 4856 1875 MS62 NGC.** Deep gray and iridescent toning appears on both sides of this lustrous Mint State twenty cent piece. This Philadelphia Mint issue is much scarcer than the usual S-Mint piece. NGC ID# 23R5, PCGS# 5296
- 4857 1875-CC MS61 NGC.** Pleasing shades of lavender-gray and golden-brown toning blanket the surfaces of this well-detailed Mint State twenty cent piece. From a small mintage of 133,290 pieces. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Piece, MS63 Attractive Multicolor Toning

- 4858 1875-CC MS63 NGC.** The 1875-CC twenty cent piece is the only readily collectible issue of this odd denomination from the Carson City Mint. This attractive Select example displays vibrant mint luster under shades of gold, gray, and violet toning. The design elements are well-detailed, with a little softness on the eagle's left (facing) wing. NGC ID# 23R6, PCGS# 5297
- 4859 1875-S MS64 PCGS.** Well-detailed and brightly lustrous, this delightful Choice example displays attractive shades of powder-blue and champagne-gold toning, with a few spots of amber. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, MS65 Originally Toned and Unabraded

- 4860 1875-S MS65 PCGS. FS-301.** Undesignated as such by PCGS, but the top of a misplaced date is obvious beneath the 8 in the date. Medium to deep walnut-brown and russet toning blankets this coruscating and beautifully preserved Gem type coin. A good strike, though several right-side stars are soft. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent Piece, PR64 Odd-Denomination Type Issue

- 4861 1876 PR64 PCGS.** The design elements of this Choice proof representative are sharply detailed throughout, but the reflectivity of the mirrored fields has been somewhat reduced by layers of lavender-gray, amber, and golden-brown toning. A few minor hairlines and contact marks explain the grade. Population: 88 in 64, 34 finer (6/13). NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

1804 B-1 Quarter, Good 4 Key Large Eagle Issue

- 4862 1804 Good 4 NGC. B-1, R.3.** Cream and gunmetal toning encompasses this key date Large Eagle quarter. No marks are noticeable, though portions of the right sides show subtle granularity. LIBERTY, the date, and STATES OF are sharp while the lower letters in AMERICA and UNITED are well worn. The shield lines are mostly separated. NGC ID# 23RB, PCGS# 5312

1804 Quarter, B-1, Fine Details Heraldic Eagle Key Date

- 4863 1804 — Repaired, Whizzed — NGC Details. Fine. B-1, R.3.** Tompkins Die State 3/2. The reverse field is lightly smoothed near the arrowheads and the obverse is faintly whizzed near Liberty's chin and ribbon. The centers are stone-white while the borders are chestnut-tan. Approximately as rare as the 1796, the 1804 is more affordable since the former is a single-year type while the Heraldic Eagle design was struck three additional years. NGC ID# 23RB, PCGS# 5312

- 4864 1805 Fine 12 NGC. B-4, Low R.4.** B-3 and B-2 are the usually encountered 1805 varieties. But here is an example of the scarce B-4, distinguished by the C in the denomination overlapping the tail. Pearl-white motifs contrast with dove-gray fields. A few faded thin marks noted near obverse stars 11 to 13. NGC ID# 23RC, PCGS# 5313

**1805 B-3 Quarter, VF35
Traces of Luster**

- 4865 1805 VF35 PCGS. B-3, R.1.** This late die state example has the E of LIBERTY weak, along with cracks and clash marks on both sides. The surfaces are medium gray with splashes of almond-gold toning. Minimally abraded save for delicate obverse hairlines. An attractive piece, retaining traces of mint luster on each side. NGC ID# 23RC, PCGS# 5313

- 4866 1806/5 VF25 NGC. B-1, R.2.** Sea-green, pearl-gray, and lilac colors endow this relatively unabraded example. Most of E PLURIBUS UNUM is bold. Problem-free and clearly original. Ex: *Long Beach Signature* (Heritage, 9/2003), lot 6625; *FUN Signature* (Heritage, 1/2007), lot 2867. NGC ID# 23RD, PCGS# 5315

- 4867 1806 Fine 15 PCGS. B-4, R.4.** Tompkins Die State 3/2. A better Browning variety interesting for its irregular left-side vertical shield stripes, caused by damage to the reverse die midway during its life. The obverse has prominent vertical cracks at 5:30 and 12 o'clock. This cream-gray quarter is smooth except for a mark on the final A in AMERICA. NGC ID# 23RD, PCGS# 5314

BUST QUARTERS

- 4868 1815 VF30 NGC. B-1, R.1.** A cream-gray midgrade example with minimal marks and good eye appeal. First year of a design type introduced on the half dollar eight years earlier, an indication that Mint bullion depositors preferred payments in the larger denomination. NGC ID# 23RG, PCGS# 5321

- 4869 1821 — Questionable Color — PCGS Genuine. Unc Details. B-3, R.2.** The reverse die has prominent rust pits left of the 2 in the denomination. There is no trace of the late die state crack through Star 12. Although there may be a question about the source of the delicate champagne and pale blue toning, there is no question about the wonderful eye appeal of the early quarter dollar. NGC ID# 23RM, PCGS# 5331

- 4870 1824/2 Fine 15 PCGS. B-1, R.3.** The only 1824-dated dies. Powder-blue, straw-gold, and pearl-gray toning embraces this rare date quarter. We note a minor reverse rim ding at 12 o'clock and a few faded marks between the wing and UNITED. NGC ID# 23RR, PCGS# 5335

SEATED QUARTERS

- 4871 1840-O No Drapery AU53 NGC.** Large O. Iridescent orange-gold, powder-blue, and lilac toning dominates this typically struck but lightly worn first-year New Orleans quarter. Scarcer than its 1840-O Drapery successor despite a suspiciously higher mintage. NGC ID# 23SG, PCGS# 5393

- 4872 1845 MS64 PCGS.** Light silver brilliance appears at the centers of this Choice Mint State Seated quarter, with blue, sea-green, and gold toning closer to the borders. Both sides have an excellent strike with satin luster. Population: 12 in 64 (1 in 64+), 4 finer (6/13). NGC ID# 23SV, PCGS# 5408

- 4873 1854 Arrows MS64 NGC.** This near-Gem is well struck, with speckled russet, gold, and forest-green patina over most of the obverse. The reverse only shows slight tan toning, mostly near the peripheries. Well preserved with just one or two tiny contact marks on each side. Census: 72 in 64, 24 finer (5/13). Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1030. NGC ID# 23U6, PCGS# 5432

**1854-O Huge O Quarter, VF20
Mellow, Original Surfaces**

- 4874 1854-O Huge O VF20 NGC. Briggs 1-A, FS-501.** The Huge O mintmark quarter is appropriately named as the O is indeed oversized, most likely from being hand cut in the die. This piece shows even wear over each side and the fields are gray with contrasting pinkish-rose accents over the higher points. The only mentionable mark is in the field just along the right side of the eagle's neck. Census: 2 in 20, 21 finer (5/13). NGC ID# 23U7, PCGS# 5434

- 4875 1856 MS64 PCGS. CAC.** A remarkably sharp strike is evident on both sides of this lovely near-Gem. The surfaces have frosty luster beneath gold and iridescent toning. Population: 48 in 64 (1 in 64+), 21 finer (6/13). NGC ID# 23TB, PCGS# 5438

- 4876 1858 MS64 PCGS.** This sharply detailed Choice example displays an extensive network of interesting die cracks and clash marks on the reverse. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 23TH, PCGS# 5445

- 4877 1860 MS64 PCGS.** Both sides of this Choice Mint State piece have heavy die polishing lines in the fields, imparting a reflective background to the sharply defined devices. Both sides are mostly silver-white with hints of iridescent toning. Population: 20 in 64, 11 finer (6/13). NGC ID# 23TP, PCGS# 5451

- 4878 1860-O MS63 PCGS. CAC.** Silver-gray surfaces are imbued with traces of gold or tan and display subdued luster. Well struck except for weakness in some of the stars at the top and right border. Devoid of significant marks. Mint State pieces are difficult to locate. Population: 14 in 63, 10 finer (6/13). NGC ID# 23TR, PCGS# 5452

- 4879 1862 MS64 ANACS.** Scarcer than its mintage would indicate, this is a sharply struck near-Gem example. The fields show brightness beneath the speckled multicolored toning that is seen over each side. NGC ID# 23TV, PCGS# 5456

- 4880 1869-S XF40 PCGS.** Moderately worn with light gray surfaces and darker gray patina near the borders and outlining the devices. An attractive Seated quarter from a mintage of 76,000 coins. Population: 4 in 40, 22 finer (6/13). NGC ID# 23UJ, PCGS# 5475

- 4881 1869-S AU50 NGC.** Dusky shades of lavender-gray, sea-green, and amber patina blanket the surfaces of this lightly circulated Seated quarter. Traces of mint luster shine through the toning. Census: 5 in 50, 7 finer (6/13). NGC ID# 23UJ, PCGS# 5475

4882 1872-S — Improperly Cleaned — NGC Details. Fine. The 1872-S Seated Liberty quarter is a low-mintage date prized by collectors in all grades and conditions. This evenly worn specimen displays pleasing blue-steel and gray patina. NGC ID# 23UT, PCGS# 5483

4883 1874 Arrows MS64 PCGS. Both sides of this Choice Mint State Arrows quarter have prooflike fields beneath mottled gold, blue, and lilac toning that generates excellent eye appeal. Population: 28 in 64 (1 in 64+), 14 finer (6/13). NGC ID# 23VX, PCGS# 5494

1874-S Arrows Quarter, MS65 Well-Struck and Lustrous

4884 1874-S Arrows MS65 NGC. Only star 8 lacks a full strike on this lustrous and lightly abraded Gem Arrows type coin. Light to medium tan-gold toning graces both fields. Arrows were placed on the 1873 and 1874 Seated coins to denote a slight increase in weight to correspond with metric standards. Census: 34 in 65, 29 finer (6/13).

Ex: Perry Creek Collection (Heritage, 8/2010), lot 4719, which realized \$2,300. NGC ID# 23VY, PCGS# 5495

4885 1876 MS65 NGC. CAC. Type Two Reverse. Peach-gold, sea-green, ruby-red, and powder-blue toning endows this lustrous and intricately struck Gem. Smooth save for a single thin line above the eagle's right (facing) shoulder. Census: 45 in 65 (1 in 65+), 27 finer (6/13). NGC ID# 23V2, PCGS# 5501

1876 Quarter, MS66+ Golden Obverse Toning

4886 1876 MS66+ PCGS. CAC. Type Two Reverse. Autumn-gold toning invigorates the reverse along with peripheral accents of sea-green. The reverse displays only a hint of tan patina. Lustrous and boldly struck with minimal marks. The Centennial year saw peak production for Seated quarter coinage. Population: 25 in 66 (2 in 66+), 7 finer (6/13). NGC ID# 23V2, PCGS# 5501

4887 1877 MS65 PCGS. This lovely Gem has frosty silver luster with a splash of gold on the obverse. Both sides have wispy champagne toning. Housed in a green-label PCGS holder. NGC ID# 23V5, PCGS# 5504

4888 1877 MS65 NGC. A stunning Gem, this 1877 Seated Liberty quarter has frosty light gray surfaces with turquoise and blue toning along the obverse border and over most of the reverse. This piece is sharply defined with excellent eye appeal. NGC ID# 23V5, PCGS# 5504

4889 1877-S MS65 NGC. Delicate gold toning appears on both sides of this sharply detailed satiny Gem. The surfaces exhibit brilliant mint luster. Census: 34 in 65, 12 finer (6/13). NGC ID# 23V7, PCGS# 5506

4890 1881 MS64 PCGS. Vibrant mint luster shines through shades of golden-brown and silver-gray toning on the well-preserved surfaces of this well-detailed Choice specimen. Population: 35 in 64, 36 finer (5/13). NGC ID# 23VD, PCGS# 5513

1891 Seated Liberty Quarter, MS66 Final-Year Type Coin

4891 1891 MS66 PCGS. CAC. A pleasing Premium Gem representative from the last year of the Seated Liberty design, this coin exhibits well-detailed design elements, with a touch of softness on the stars and head. The well-preserved surfaces display cartwheel mint luster under shades of gold, gray, and amber toning. Population: 26 in 66 (1 in 66+), 3 finer (6/13). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

1858 Seated Quarter, PR63 Cameo Only Five Finer Coins at PCGS

4892 1858 PR63 Cameo PCGS. CAC. The sharply detailed design elements of this delightful Select example display intense mint frost, creating dramatic cameo contrast with the deeply mirrored fields. The brilliant surfaces show a few minor hairlines and contact marks, with exceptional eye appeal. Population: 1 in 63 Cameo, 5 finer (6/13). PCGS# 85554

1860 Seated Liberty Quarter, PR65 Reflective Fields With Vivid Toning

4893 1860 PR65 PCGS. From a generous proof mintage of 1,000 pieces, this delightful Gem displays well-detailed design elements, with a touch of softness on the stars. The devices display rich mint frost and the fields are deeply reflective, under vivid shades of cobalt-blue and golden-brown toning. Population: 14 in 65, 6 finer (6/13). NGC ID# 23WM, PCGS# 5556

**1862 Seated Liberty Quarter, PR66
Bright Multicolor Toning**

4894 1862 PR66 PCGS. Razor-sharp definition is apparent on all design elements and the fields are deeply mirrored under vivid shades of golden-brown and cobalt-blue toning. The devices are richly frosted, but the dark toning reduces what would otherwise be a dramatic cameo effect. Population: 6 in 66, 0 finer (6/13). NGC ID# 23WP, PCGS# 5558

4895 1863 PR64 PCGS. Deeply mirrored fields accompany the sharply defined design motifs on this lovely Civil War era proof Seated quarter. Both sides have deep golden-brown toning and excellent eye appeal. Population: 57 in 64, 18 finer (6/13). NGC ID# 23WR, PCGS# 5559

4896 1869 PR64 PCGS. Light gold toning appears on both sides of this Choice proof, with a splash of bluish-lilac on the reverse. The design elements are bold and the eye appeal is exceptional. Population: 42 in 64, 12 finer (6/13). NGC ID# 23X2, PCGS# 5568

4897 1871 PR64 PCGS. A sharply detailed Choice proof, with deeply mirrored fields and attractive shades of cerulean-blue and champagne-gold patina. Eye appeal is terrific. Population: 30 in 64, 12 finer (5/13). NGC ID# 23X4, PCGS# 5570

4898 1879 PR64 PCGS. A low mintage issue, this is a deeply reflective proof with shimmering mirrors in the fields and just a touch of pale golden toning on each side. Housed in a green label holder. Population: 76 in 64, 46 finer (5/13). NGC ID# 23XB, PCGS# 5580

4899 1879 PR65 PCGS. The proof mintage of 1879 Seated Liberty quarter consisted of 1,100 pieces. This Gem displays vivid colors, including dark blue-green, orange-pink, and champagne. A couple of as-made lintmarks appear in the left obverse field. Population: 29 in 65, 17 finer (6/13). NGC ID# 23XB, PCGS# 5580

**1879 Quarter, PR66 Cameo
Brilliant and Starkly Contrasted**

4900 1879 PR66 Cameo NGC. This is a lovely representative of this low mintage P-mint delivery. The untoned surfaces are deeply reflective in the fields with a bold cameo contrast on the reverse. Sharply struck, and one of only 14,700 quarters produced this year, of which 1,100 were proofs. There is a small area of porosity in the planchet on the obverse around star 6.
Ex: FUN Signature (Heritage, 1/2002), lot 6787. PCGS# 85580

**1879 Seated Quarter, PR67 Cameo
None Finer at NGC**

4901 1879 PR67 Cameo NGC. This well-contrasted Superb Gem Cameo proof 1879 quarter is a tale of two sides, the reverse showing pastel rose patina, the obverse an untuned silver-white. The strike is impeccable on all star centrils, although the bodice of Liberty is not absolute. A small lint mark near the 1 in the date will provide a pedigree marker. The eye appeal is top-notch. Census: 6 in 67 Cameo, 0 finer (6/13). PCGS# 85580

**1886 Seated Quarter, PR66 Cameo
Startling Obverse Contrast**

4902 1886 PR66 Cameo PCGS. This beautiful Premium Gem proof is untuned on portion of the central Liberty figure, although she is draped in ocean-blue at her outside portions, and the rest of the obverse and all of the reverse displays a panoply of variegated colors. Pink and amber prevail against jade on the reverse, and both sides retain excellent reflectivity beneath the moderate patina. No mentionable marks appear. Population: 6 in 66 Cameo, 6 finer (6/13). PCGS# 85587

**1886 Seated Quarter, PR66 Cameo
886 Pieces Struck**

4903 1886 PR66 Cameo NGC. The well-detailed and richly frosted design elements of this impressive Premium Gem stand out in bold cameo contrast to the deeply reflective fields. The well-preserved surfaces show a few hints of gold and blue toning with outstanding eye appeal. Census: 16 in 66 (1 in 66+) Cameo, 18 finer (6/13). PCGS# 85587

4904 1890 PR64 PCGS. The design elements of this delightful Choice proof are well-detailed and richly frosted and the brilliant fields are deeply mirrored. Eye appeal is outstanding. Population: 48 in 64, 59 finer (5/13). NGC ID# 23XN, PCGS# 5591

- 4905 1891 PR64 PCGS. CAC.** This well-detailed Choice proof displays reflective fields under shades of cerulean-blue and lavender-gray toning. Housed in a green label holder. Population: 42 in 64, 54 finer (5/13). NGC ID# 23XP, PCGS# 5592

BARBER QUARTERS

- 4906 1892 MS65 PCGS. CAC.** Type One Reverse. A fully struck Gem whose coruscating surfaces exhibit creamy silver-blue and autumn-gold toning. The fields appear immaculate and the portrait displays only delicate contact. NGC ID# 23XT, PCGS# 5601
- 4907 1892 MS66 PCGS.** Type Two Reverse. This fully struck and high grade silver type coin displays medium to deep cream-gray, fire-red, and cobalt-blue toning, with the deepest shades relegated to the margins. Lustrous and beautifully preserved. NGC ID# 23XT, PCGS# 5601
- 4908 1892 MS66 NGC.** Type Two Reverse. Jade-green peripheries surround the apricot-gold centers of this lustrous high grade first year type coin. The strike is full and the preservation is outstanding. NGC ID# 23XT, PCGS# 5601

1892 Quarter, MS66+ Die Tripled Reverse, FS-801

- 4909 1892 MS66+ PCGS. CAC. FS-801.** Type Two Reverse. The reverse peripheral legends are die tripled. The variety is undesignated on the insert. The magnificently preserved surfaces display medium autumn-gold, pearl-gray, lilac-red, and navy-blue toning. Well struck, since only the eagle's right claw lacks a full impression. An exceptional first-year type coin. NGC ID# 23XT, PCGS# 5601

1893 Barber Quarter, MS66 Only One Numerically Finer Coin at PCGS

- 4910 1893 MS66 PCGS.** Few survivors have achieved the grade level of this lovely piece. Intermingled shades of green, blue, orange, and red appear on both sides of this lustrous, well-struck Premium Gem example. A few minor surface marks appear on Liberty's cheek. Population: 12 in 66 (3 in 66+), 1 finer (6/13). NGC ID# 23XW, PCGS# 5604
- 4911 1896-O AU58 PCGS.** Slight high-point wear prevents a Mint State grade to this important Barber key. Both sides have nearly full satin luster and hints of champagne toning, resulting in exceptional eye appeal. Population: 12 in 58, 37 finer (6/13). NGC ID# 23Y8, PCGS# 5614

- 4912 1898 MS66 PCGS.** The design elements of this delightful Premium Gem show razor-sharp definition throughout and vibrant mint luster shines through layers of lavender-gray and cerulean-blue toning. Population: 24 in 66 (6 in 66+), 5 finer (6/13). NGC ID# 23YD, PCGS# 5619

- 4913 1898-O AU58 PCGS. CAC.** This is a difficult issue for collectors despite a mintage of more than 1.8 million coins. This piece has a trace of high-point wear with nearly full luster beneath light gold and iridescent toning. Population: 22 in 58, 48 finer (6/13). NGC ID# 23YE, PCGS# 5620

- 4914 1900 MS65 PCGS. CAC.** A "cool rainbow" of sea-green, blue, and near-violet shadings passes over the obverse, while the reverse offers more subdued versions of the same hues. This Gem is well-defined save for isolated softness on certain stars around Liberty. Population: 40 in 65, 16 finer (6/13).
Ex: Houston Signature (Heritage, 11/2007), lot 60539. NGC ID# 23YK, PCGS# 5625

- 4915 1901-S AG3 NGC.** As the key issue in the Barber quarter series, the 1901-S is avidly collected, even in well-worn condition. The rims and peripheral design elements are worn smooth in many places on this AG3 example, however the date, mintmark, and motto remain easily legible. This coin displays attractive dove-gray color. NGC ID# 23YR, PCGS# 5630

1901-S Quarter, VG Details Key Issue to the Barber Quarter Series

- 4916 1901-S — Scratched — NCS. VG Details.** Some lucky collector is going to put this coin in their Barber quarter collection and be very pleased with it. The scratches mentioned on the insert run diagonally across the center of the obverse, and are so light they are virtually undetectable without a magnifier. Otherwise the surfaces are original with charcoal-gray patina around the margins and devices, contrasting sharply against the pale gray fields. NGC ID# 23YR, PCGS# 5630

1907 Barber Quarter, MS66+ Lightly Toned and Lustrous

- 4917 1907 MS66+ PCGS. CAC.** This high-end Premium Gem exhibits well-detailed design elements, with just a touch of softness on the central reverse. Vibrant mint luster radiates from the well-preserved surfaces, under delicate shades of lavender, gray, and pale gold patina. Population: 15 in 66+, 2 finer (6/13). NGC ID# 23Z8, PCGS# 5645
- 4918 1908 MS66 PCGS.** This attractive Premium Gem displays well-detailed design elements and vibrant mint luster, with shades of sea-green and pinkish-gray toning. Population: 19 in 66, 2 finer (6/13). NGC ID# 23ZC, PCGS# 5649

**1908-S Quarter, MS65
First Generation Holder**

- 4919 1908-S MS65 PCGS. CAC.** Like many San Francisco quarter issues, the 1908-S is common well worn but very scarce in Mint State. The present nicely struck Gem is magnificently free from marks. The lustrous surfaces are richly toned russet-brown, sea-green, and dove-gray. Housed in a first generation holder. Population: 11 in 65 (1 in 65+), 7 finer (6/13). NGC ID# 23ZF, PCGS# 5652

**1909-D Quarter, MS66
Multicolor Toning**

- 4920 1909-D MS66 PCGS. CAC.** Autumn-gold, apple-green, and steel-gray consume the obverse. The reverse displays similar shades but they are confined to the margin. Lustrous and nicely struck with well preserved fields and one thin mark at the base of the shield. Despite a bountiful mintage, the 1909-D is nearly unobtainable above the MS66 level. Population: 17 in 66 (1 in 66+), 3 finer (6/13). NGC ID# 23ZH, PCGS# 5654

- 4921 1910 MS65 PCGS.** An extraordinary Gem, this Barber quarter exhibits a bold strike, frosty silver luster, and brilliant untuned surfaces. Population: 39 in 65 (1 in 65+), 22 finer (6/13). NGC ID# 23ZL, PCGS# 5657

- 4922 1911 MS65 PCGS. CAC.** This lovely Gem Barber quarter has a bold strike with frosty silver luster that shines through its mottled gold and reddish-brown toning. Population: 41 in 65, 11 finer (6/13). NGC ID# 23ZN, PCGS# 5659

- 4923 1911-D MS63 NGC.** A frosty and lustrous Choice Mint State specimen, this 1911-D has mottled gold and ebony toning. Census: 14 in 63, 20 finer (6/13). NGC ID# 23ZP, PCGS# 5660

- 4924 1913-S AG3 PCGS.** The primary design elements are nearly complete with the rims partially worn into the designs of this example that shows extensive wear throughout. Deep violet-gray fields accompany lighter bluish-gray devices. NGC ID# 23ZW, PCGS# 5666

- 4925 1913-S AG3 PCGS.** Bright silver surfaces with traces of grayish-champagne toning in the fields, this piece exhibits extensive wear with the obverse and reverse rims partially worn into the peripheral design elements. Both sides show trivial grade-consistent marks. NGC ID# 23ZW, PCGS# 5666

- 4926 1913-S AG3 NGC.** Bright light gray color overall provides this well circulated key date example with an attractive appearance for the grade. A vertical hair thin line on the eagle poses minimal distraction, if any. NGC ID# 23ZW, PCGS# 5666

- 4927 1913-S Good 6 PCGS.** The 1913-S Barber quarter claims a minuscule mintage of just 40,000 pieces, an extremely low production total for any 20th century coin. Steel-blue and chestnut-tan colors combine to provide this well circulated example with nice eye appeal. The wear is even and there are no mentionable marks. NGC ID# 23ZW, PCGS# 5666

- 4928 1913-S VG8 PCGS.** Natural light gray surfaces exhibit splashes of darker gray patina on this pleasing example. Three letters of LIBERTY are visible as expected for the grade. NGC ID# 23ZW, PCGS# 5666

- 4929 1913-S VG10 PCGS. CAC.** An important example of the key 1913-S Barber quarter, much finer than the usual piece that is worn nearly smooth. This example has light gray devices and slightly deeper gray fields. LIBERTY shows five full letters and two partial letters. Many would grade this piece Fine. NGC ID# 23ZW, PCGS# 5666

- 4930 1914 MS66 PCGS.** The surfaces on this wholly original 1914 are nearly mark-free under a mottled coating of lilac-gray, carmine, and coppery-orange toning. As with so many issues in the Barber quarter series, the vast majority of Mint State survivors fall short of Gem quality. Population: 20 in 66, 2 finer (5/13).
Ex: FUN Signature (Heritage, 1/2005), lot 4166. NGC ID# 23ZX, PCGS# 5667

- 4931 1915 MS65+ PCGS.** An impressive Gem, this 1915 Barber quarter exhibits frosty silver luster and sharp design definition with wisps of iridescent toning. An important opportunity for the advanced collector with only 16 finer examples certified by PCGS (6/13). NGC ID# 2422, PCGS# 5670

- 4932 1915-D MS65 NGC.** Vivid gold toning appears over frosty luster on this lovely Gem Barber quarter. Both sides have a sharp strike and minimal surface marks. Census: 62 in 65 (1 in 65+), 29 finer (6/13). NGC ID# 2423, PCGS# 5671

- 4933 1916-D MS65 NGC. CAC.** Sharply impressed and carefully preserved, with a few wispy, paper-thin contact lines on Liberty's portrait, the reverse is seemingly pristine. There are attractive steel-blue, russet, orange, and green colors on each side, which generate terrific eye appeal. A technically superior and aesthetically pleasing Gem.
Ex: Long Beach Signature (Heritage, 2/2003), lot 6707; Central States Signature (Heritage, 5/2003), lot 6191. NGC ID# 2426, PCGS# 5674

- 4934 1916-D MS65 PCGS. CAC.** An attractive Gem from the final date of the Barber design, this coin displays vibrant mint luster under vivid shades of golden-brown, lavender-gray, amber, and violet toning. NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

- 4935 1892 PR63 Deep Cameo PCGS. CAC.** Type Two Reverse. This proof quarter has a needle-sharp strike and faint almond-gold toning. Luminous frost throughout the motifs contrasts with the darkly reflective fields. The reverse appears pristine while the obverse displays faint vertical hairlines. PCGS# 95678

- 4936 1893 PR63 ★ Cameo NGC.** A sharply struck Select specimen with icy devices and glassy fields. Chestnut-tan toning is mostly confined to the reverse margin. NGC has awarded the Star designation to only 12 1893 proof quarters.
Ex: Long Beach Signature (Heritage, 6/2010), lot 680, which realized \$977.50. PCGS# 85679

- 4937 1896 PR66 PCGS. CAC.** This sharply detailed Premium Gem exhibits deeply reflective fields under attractive shades of champagne-gold, cerulean-blue, and amber toning. Population: 21 in 66 (1 in 66+), 23 finer (5/13). NGC ID# 242B, PCGS# 5682

- 4938 1900 PR66 Cameo NGC.** A sensational Premium Gem Cameo proof struck in the waning days of the second Philadelphia Mint building at Chestnut and Juniper Streets. This impressive example has deeply mirrored fields, satin devices, and delicate peripheral gold toning. Census: 11 in 66 (1 in 66+) Cameo, 17 finer (6/13). PCGS# 85686

- 4939 1901 PR66 NGC.** A debut issue at the Third Philadelphia Mint on Spring Garden Street, this Premium Gem proof has exceptional eye appeal with deeply mirrored fields and sharply detailed devices beneath lovely iridescent toning. Census: 30 in 66 (1 in 66+), 32 finer (6/13). NGC ID# 242G, PCGS# 5687

1903 Barber Quarter, Multicolor PR66

- 4940 1903 PR66 PCGS. CAC.** Deep multicolor patina appears on each side of this Premium Gem proof 1906 Barber quarter, one of 755 struck. The color palette ranges from near-untuned silver through deep copper, mauve, and pinkish hues. The proof strike is sharp throughout, including the leaves in Liberty's head wreath and the upper-right corner of the eagle's shield. Population: 23 in 66, 18 finer (5/13). NGC ID# 242J, PCGS# 5689

- 4941 1905 PR66 PCGS.** Both sides of this Premium Gem proof have brilliant gold toning over the deeply mirrored fields and satin devices. This example deserves a Cameo designation. Population: 30 in 66 (1 in 66+), 14 finer (6/13). NGC ID# 242L, PCGS# 5691

1914 Barber Quarter, PR66 Cameo

- 4942 1914 PR66 Cameo NGC.** A splendid Premium Gem Cameo proof, this 1914 quarter has exceptional contrast with brilliant and sharply detailed devices over deeply mirrored fields. Hints of champagne toning visit the borders of this otherwise brilliant white quarter. Census: 11 in 66 Cameo, 6 finer (6/13). PCGS# 85700

- 4943 1915 PR64 PCGS.** The 1915 Barber quarter was the last proof issue of the design, although some business-strikes were produced the following year. This sharply detailed Choice example displays brilliant deeply mirrored fields with few signs of contact. Population: 51 in 64, 38 finer (5/13). NGC ID# 242X, PCGS# 5701

EARLY HALF DOLLARS

- 4944 1794 — Repaired, Graffiti, Re-engraved, Polished — ANACS. VG8 Details. O-106, Low R.6.** A better Overton variety of this scarce introductory Flowing Hair date. A harshly cleaned example with folk art re-engraving on the portrait and a smoothed right obverse field. Both sides display illegible graffiti letters and numerals entered by a proud owner long ago. PCGS# 6051

1794 O-101a Half Dollar, VF30 Details

- 4945 1794 — Repaired, Reengraved, Cleaned — ANACS. VF30 Details. O-101a, R.4.** The reverse has cracks from the border to the wreath between the D and S, and through the F. Despite the adjectives, this is still a pleasing example of the first year of issue half dollar with pewter-gray surfaces. PCGS# 6051

- 4946 1795 2 Leaves VG10 PCGS. O-119, R.4.** The rims and all major design elements remain in outline, with some interior detail still intact. The surfaces show pleasing gray, gold, and blue-steel patina. Housed in a green label holder. PCGS# 6052

- 4947 1795 2 Leaves Fine 12 PCGS. O-110, R.3.** This early die state shows no evidence of the two obverse die cracks at the upper right part of the design. This is a pleasing example with pewter-gray fields and lighter gray devices, showing wisps of champagne toning. PCGS# 6052

- 4948 1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-105, R.4.** This Flowing Hair type coin is moderately bright from cleaning and has numerous (though individually minor) scratches on both sides. The fields are lavender-gray, the high points are pearl-white, and the borders are ocean-blue. PCGS# 6052

1795 Half Dollar, Fine 15 O-129, S Over D Variety

- 4949 1795 2 Leaves Fine 15 PCGS. CAC. O-129, R.4.** The blundered die variety with the second S in STATES entered over an errant D. The absent-minded engraver apparently had just punched in the letters T and E and confused the legend with UNITED. O-129 also has a unique 8 x 9 berry arrangement within the wreath. This Choice Fine representative is golden-brown and forest-green with cream-gray high points. No marks are remotely consequential. PCGS# 6052

- 4950 1795 2 Leaves — Repaired — ANACS. VF30 Details. O-104, R.4.** No repair is readily evident, though this apple-green and lavender Flowing Hair type coin has a cloudy appearance. Minor adjustment marks on the portrait are mint-made. The faint vertical die break beneath the eagle's head is usual for O-104. PCGS# 6052

- 4951 1795 3 Leaves — Reverse Scratched — NGC Details. VF. O-111, High R.4.** The sole Overton variety with three leaves beneath each wing. O-111 is also significant for its dramatic repunched date and the heavy radial die crack on the reverse at 10 o'clock. This lavender-gray half dollar has an obverse flan flaw at 4:30 and a lengthy pinscratch through the right (facing) wing. PCGS# 6053

4952 1801 Fine 12 NGC. O-101, R.3. Only two die marriages for this difficult low mintage date. O-101 is distinguished by the die breaks or “blobs” on the reverse margin, which are more advanced here than usually seen. A problem-free stone-gray and straw-gold example with partial hair and plumage detail. NGC ID# 24ED, PCGS# 6064

4953 1801 — Repaired — NGC Details. VF. O-101, R.3. The right obverse field is smoothed and the pearl-gray surfaces are hairlined and microgranular from cleaning. The usually encountered 1801 die variety, though one other (O-102) is known. NGC ID# 24ED, PCGS# 6064

4954 1801 — Improperly Cleaned — NGC Details. VF. O-101, R.3. Die lumps on the lower left reverse identify the Overton marriage, one of only two known for this very scarce Draped Bust date. No marks are readily evident though the rim is bright above the R in LIBERTY and the powder-blue surfaces are subdued. The strike is soft on the reverse stars, as often seen for the type. NGC ID# 24ED, PCGS# 6064

1802 Half Dollar, O-101, VF30 Challenging Heraldic Eagle Date

4955 1802 VF30 PCGS. O-101, R.3. Bullion depositors at the Mint usually preferred payment in the highest possible denomination. Thus, 1802 half dollars are scarcer than their silver dollar cousins. This midgrade representative is deeply toned steel-gray and is refreshingly devoid of visible abrasions. Traces of luster are undeniable within the hair curls. NGC ID# 24EE, PCGS# 6065

4956 1803 Large 3, Large Reverse Stars VF30 NGC. O-103, R.3. O-103 is the sole die variety that combines a Large 3 obverse and a Large Stars reverse. This gunmetal-gray and pearl-white example is mildly glossy and devoid of relevant marks. NGC ID# 24EF, PCGS# 6066

1805/4 Half Dollar, O-102, XF40

4957 1805/4 XF40 NGC. O-102, R.3. The O-101 and O-102 die marriages are the two so-called “common” 1805/4 overdate varieties, although neither is truly common. This overdate is an important Guide Book variety, and this example has dark gray surfaces with hints of pale blue and champagne toning. The strike is slightly weak at the centers, and both sides have grade-consistent surface marks. Census: 12 in 40, 29 finer (6/13). NGC ID# 24EH, PCGS# 6070

4958 1806 Pointed 6, No Stem XF45 NGC. O-109, R.1. Presumably distracted, the engraver omitted the stem extending through the eagle’s claw when the reverse die was made. This deeply toned tan-gold and sea-green representative displays pleasing partial luster and substantial design detail, along with the infrequent hair-thin mark. PCGS# 6073

BUST HALF DOLLARS

4959 1807 Large Stars, 50 Over 20 XF40 PCGS. O-112, R.1. This first-year Capped Bust variety is noteworthy for its mint-blundered denomination. The engraver began to enter 25 instead of 50 but promptly recognized the error. A stone-gray and chestnut-gold example with even wear and no detrimental marks. NGC ID# 24EN, PCGS# 6086

4960 1807 Large Stars, 50 Over 20 XF45 NGC. O-112, R.1. The well-known blundered denomination variety. A nicely defined first-year Capped Bust type coin with golden-brown fields and sea-green and lavender borders. A moderate reverse rim ding near 8 o’clock. NGC ID# 24EN, PCGS# 6086

4961 1807 Capped Bust, Small Stars VF35 NGC. O-113, R.2. Golden-brown and aquamarine toning encompasses this moderately circulated and problem-free half dollar. The sole die pair for the 1807 Capped Bust, Small Stars *Guide Book* listing. NGC ID# 24EN, PCGS# 6087

4962 1808/7 AU53 NGC. O-101, R.1. The sole overdated Overton variety for the year. Chestnut-gold toning is confined to the margins. Bright luster fills the borders and devices. The fields display infrequent minor abrasions. Coined from clashed and cracked dies.
Ex: Long Beach Signature (Heritage, 9/2005), lot 3146, which realized \$1,495. NGC ID# 24EP, PCGS# 6091

4963 1808 AU55 NGC. O-105, R.3. A hint of wheat-gold toning visits the borders of this otherwise brilliant half dollar. Evenly defined and devoid of relevant marks. Luster fills the stars, legends, and devices. NGC ID# 24EP, PCGS# 6090

4964 1809 XXX Edge XF40 PCGS. O-102, R.1. This cream-gray example has hints of olive-tinged luster in design crevices. Only moderately abraded aside from a cluster of faint marks on Liberty’s neck. The popular reverse with a repunched U in UNITED and clashed dentils above the eagle. NGC ID# 24ES, PCGS# 6093

1810 O-102 Bust Half, MS63 Intermediate Die State

4965 1810 MS63 NGC. O-102, R.1. This coin is intermediate between the O-102 and O-102a die states, as the die crack through the 18 in the date circles left along the rim and right to stars 12 and 13, while on the reverse the die crack runs all the way clockwise from 50 C through STATES before terminating. This lustrous example has pinkish-gray central toning that cedex to electric blue at the rims on each side. A few faded obverse marks and a soft impression on the eagle’s left (facing) wing determine the grade.

Ex: Long Beach Signature (Heritage, 6/2006), lot 1611; Central States Signature (Heritage, 5/2007), lot 701; Summer FUN Signature (Heritage, 7/2009), lot 586; Central States Signature (Heritage, 4/2011), lot 3633. NGC ID# 24ET, PCGS# 6095

4966 1814/3 XF40 PCGS. O-101a, R.2. A lightly worn example of this popular overdate that retains much original mint luster and design detail under attractive shades of gray and pale gold patina. Extensive die cracks and clash marks are evident on both sides. Population: 16 in 40, 96 finer (5/13). NGC ID# 24F4, PCGS# 6106

4967 1814/3 XF45 PCGS. O-101a, R.2. The caramel-gold and stone-gray centers are bounded by sea-green and lilac margins. Ample luster emerges from design elements. Smooth save for faint marks on the portrait. Struck from heavily clashed dies. NGC ID# 24F4, PCGS# 6106

**1817/3 Half Dollar, Choice AU
O-101, Strong Underdigit**

- 4968** 1817/3 AU55 NGC. CAC. O-101, R.3. Dashes of honey and aqua color visit this partly lustrous and crisply struck example. Struck from multiply clashed dies. An obvious overdate since the bottom half of the 3 is prominent. Census: 14 in 55, 35 finer (6/13).
Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 863. NGC ID# 24F7, PCGS# 6111

- 4969** 1821 AU58 PCGS. O-103, R.2. Defective As on the reverse legend allow prompt attribution. Cartwheel luster dominates both sides of this unmarked and attractive Bust half. A trace of almond-gold patina denies full brilliance. NGC ID# 24FF, PCGS# 6128

1825 O-102 Half Dollar, MS64

- 4970** 1825 MS64 PCGS. O-102, R.1. Straw-gold shades this visit lustrous and well preserved example. A few stars are incomplete but the strike is generally crisp. Liberty has a strike-tripled profile, a popular feature for specialists of the Capped Bust series. Population: 73 in 64 (3 in 64+), 19 finer (6/13), for all 1825 varieties. NGC ID# 24FL, PCGS# 6142

- 4971** 1826 AU58 NGC. O-118a, R.1. The late die state with a die crack joining the tops of most letters in the legend. This near-Mint specimen has brilliant silver surfaces with a trace of rub on the high points. Faint champagne toning appears with a hint of reflectivity in the reverse field. NGC ID# 24FM, PCGS# 6143

- 4972** 1826 AU58 PCGS. O-108a, R.1. A nearly brilliant Borderline Uncirculated half dollar. The reverse is clashed and both sides exhibit die cracks but no marks are remotely noticeable. Bright luster fills the margins and motifs. NGC ID# 24FM, PCGS# 6143

- 4973** 1827/6 AU53 PCGS. CAC. O-102, R.1. Golden-brown, cobalt-blue, and rose-red shades embrace this briefly circulated overdated half dollar. A lens reveals only minor hairlines and a single hair-thin horizontal line on the cheek. NGC ID# 24FP, PCGS# 6147

- 4974** 1827 Square Base 2 MS63 NGC. O-109, Low R.4. The scarce "Neck Dots" variety with several small die lumps beneath Liberty's ear. This unmarked and coruscating Select half dollar displays rich gunmetal-gray, chestnut-gold, and forest-green toning. The strike is sharp except on several stars. NGC ID# 24FN, PCGS# 6144

- 4975** 1827 Curl Base 2 MS61 NGC. O-146, R.2. Though the 1827 provides 49 die varieties, more than any other Lettered Edge date, only two of those pairings exhibit a Curl Base 2. The present lustrous and Uncirculated half dollar has peripheral honey-gold toning and an absence of consequential contact. PCGS# 6145

- 4976** 1830 Large Letters, Small 0 Genuine PCGS. O-114, R.5. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. An evenly worn but subdued pearl-gray example with faded marks near star 2 and the upper neck curls. The rare O-114 is the sole Large Letters Overton marriage for 1830, and is a desirable *Guide Book* variety in all grades.

**1831 O-103 Half Dollar, MS64
Near-Census Specimen**

- 4977** 1831 MS64 PCGS. O-103, R.1. A common variety that is ideal for the date or type collector, this Gem just misses the Condition Census for O-103. The surfaces are fully brilliant and highly lustrous with excellent mint frost. It is mostly silvery-white with a trace of peripheral light gold toning.
Ex: *Phoenix Signature* (Heritage, 3/2008), lot 658. NGC ID# 24FV, PCGS# 6159

1833 O-110 Half Dollar, MS64

- 4978** 1833 MS64 PCGS. O-110, R.1. A curved die line through 50 C on this reverse die is diagnostic. This was the first year of coinage operations at the newly constructed second Philadelphia Mint building, with a full quota of coin denominations minted from the half cent to the half eagle. This Choice Mint State specimen has lovely gold and iridescent toning over frosty mint luster. NGC ID# 24FX, PCGS# 6163

- 4979** 1834 Small Date, Small Letters AU58 PCGS. CAC. O-114, R.1. Varieties O-113 and O-114 are confoundingly similar but the repunching on stars 3 and 4 is definitive. This momentarily circulated and refreshingly unabraded example has satin luster and is draped in rich steel-gray and olive-gold shades. The major devices are bold but the stars are softly brought up. PCGS# 6166

- 4980** 1834 Small Date, Small Letters MS63+ PCGS. O-111, R.1. This Select Mint State half dollar has frosty mint luster shining through olive-gold and iridescent toning with pastel peripheral shades. A splendid example for a date or type collector. PCGS# 6166

- 4981** 1834 Small Date, Small Letters MS63 NGC. CAC. O-109, R.1. An attractive example with grayish-gold toning on both sides. This piece has a nice strike and full underlying mint luster. PCGS# 6166

REEDED EDGE HALF DOLLAR

1837 Half Dollar, MS64 Two-Year Type Coin

- 4982 1837 MS64 PCGS.** Lilac, chestnut, olive, and lavender toning encompasses this lustrous and well preserved reeded edge Bust half. The major devices are sharply struck though border elements show occasional incompleteness. The 50 CENTS reverse was coined only in 1836 and 1837 with the former issue a famous rarity. NGC ID# 24G4, PCGS# 6176

SEATED HALF DOLLARS

1839 No Drapery Fifty Cents, Reverse Die Cracks, AU58 WB-101, Interesting and Scarce

- 4983 1839 No Drapery AU58 NGC. WB-101.** Extensive reverse die cracks show on this coin, from the same die used to strike the “so-called proofs” of this issue, as Randy Wiley and Bill Bugert (1993) phrase it. A crack runs from left of the H in HALF counterclockwise to the M in AMERICA, while a second joins the rim with the nearby olive leaf, continuing upward onto the shield and through the right (facing) wing to the R in AMERICA. The authors state: “Coins with this last cracked reverse are very scarce.” More on this variety appears in a short article by Byron Powell entitled “An 1839 No Drapery Half Dollar with Reverse Die Crack,” in *The Gobrecht Journal*, Collective Volume Number Three, p. 310, and in two follow-up “Letters to the Editor,” on p. 311. Much luster remains on this AU58 example, despite the slight rub, with copper-gold toning. All of the design features are well impressed, and there are no marks inconsistent with the grade. What appears to be a faint clash mark is located under Liberty’s left (right facing) elbow. Census: 30 in 58, 20 finer (6/13).
Ex: FUN Signature (Heritage, 1/2007), lot 4452; Central States Signature (Heritage, 5/2007), lot 777. NGC ID# 24GK, PCGS# 6230

1842-O Half Dollar, XF40 Small Date, Small Letters (Reverse of 1839)

- 4984 1842-O Small Date, Small Letters XF40 PCGS. WB-101.** This variety is distinguished by the beginnings of the die crack between the AL in HALF. Curiously, these pieces were struck before the 1841-O halves. All examples are softly struck. This piece shows even, dark gray-blue toning over each side. A few field marks are present, but are not significant enough to merit individual mention.
Ex: FUN Signature (Heritage, 1/2007), lot 4458. NGC ID# 24GV, PCGS# 6238

1846 Seated Half, 6/Horizontal 6, AU53 FS-301 Variety, Likely Longacre Blunder

- 4985 1846 6 Over Horizontal 6 AU53 PCGS. WB-104, FS-301.** The prominent bulge of the horizontal 6 appears at the bottom-left of the upright 6 digit on this lightly circulated powder-gray example. The 1846/Horizontal 6 is among the most blatant Mint blunders in the entire Seated half series. Numismatists today lay many such errors at the feet of Mint Engraver James B. Longacre, who replaced Christian Gobrecht after his death in 1844. Longacre was a talented engraver but a hurried die-cutter. NGC ID# 24H6, PCGS# 6254

1846, 6 Over Horizontal 6, Half Mint State Rarity, FS-301

- 4986 1846 6 Over Horizontal 6 MS61 NGC. WB-104, FS-301.** The final date digit was incorrectly punched on its side on this *Guide Book* blundered die variety. An intermediate die state with the double rim cud below the date clearly visible. On the reverse, a heavy die crack joins UNIT to the border, with the section above this crack loose but still present. In later die states, a full cud developed at this location. Mint State examples of this popular variety are seldom encountered. This satiny example is deeply toned with golden-brown fields and cobalt-blue margins.
Ex: Long Beach Signature (Heritage, 6/2005), lot 6251, which realized \$3,450. NGC ID# 24H6, PCGS# 6254

4987 1846-O Tall Date AU53 NGC. The scarce 1846-O Tall Date variety, this example has lustrous gray surfaces with a crescent of blue and iridescent toning at the right side of the obverse and reverse. Census: 3 in 53, 10 finer (6/13). NGC ID# 24H9, PCGS# 6256

4988 1849 MS63 PCGS. Sharply detailed in most areas, this attractive Select example shows a touch of softness on the stars and eagle's claws. The surfaces are lightly abraded and accented by hints of sea-green toning. Population: 11 in 63, 13 finer (5/13). NGC ID# 24HE, PCGS# 6262

4989 1849 Repunched Date XF40 PCGS. WB-102, FS-301. All four date digits are repunched west. All letters in LIBERTY are clear on this steel-gray and wheat-gold representative. Traces of luster brighten design elements. A couple of faded thin marks on the right obverse field. PCGS# 409890

1853 Arrows and Rays Half, Near-Gem Muted Color, Strong Underlying Luster

4990 1853 Arrows and Rays MS64 PCGS. While circulated type collectors will find it easy to locate an XF or AU 1853 Arrows and Rays half dollar in today's market, Mint State coins that approach the Gem threshold are another matter entirely. Such coins do not appear with any regularity, and when they do they are quickly snatched up by quality-conscious collectors. This important specimen displays needle-sharp strike definition with an even endowment of lilac-gray patina. Minimally abraded, the fields are semiprooflike but the effect is somewhat muted by the several layers of original toning over each side.
Ex: *Long Beach Signature* (Heritage, 2/2003), lot 7808. NGC ID# 24JJ, PCGS# 6275

4991 1855-O Arrows MS63 PCGS. The short-lived Arrows design is always popular with mintmark type collectors. This pleasing Select example is well-detailed, with satiny mint luster shining through layers of champagne-gold, lavender-gray, and amber toning. Population: 52 in 63, 95 finer (5/13). NGC ID# 24JP, PCGS# 6283

4992 1857 MS64 NGC. The central design motifs are sharply defined with some peripheral weakness. The surfaces have frosty luster beneath lovely gold and iridescent toning. Census: 26 in 64 (1 in 64+), 17 finer (6/13). NGC ID# 24HS, PCGS# 6290

4993 1858 MS64 NGC. Type One Reverse. Attractive luster adds to the eye appeal of this piece exhibiting delicate almond-gold toning. This near-Gem displays a nice strike overall, with only minor incompleteness noted. Clashing is present near the knees, as made. Two small spots appear on the obverse. Census: 37 in 64, 17 finer (5/13). NGC ID# 24HV, PCGS# 6293

4994 Two-Piece CSA Obverse Die Crack Set of 1861-O Half Dollars. Ex: *S.S. Republic*. Set 4 of 50, per the large-sized NGC holder. The *S.S. Republic* sank in fall 1865 en route to New Orleans. Numerous 1861-O halves were recovered, along with many other mintmarked gold and silver issues. The present set includes **WB-102**, the "CSA die crack" variety; and **WB-103**, the "die crack bisected date" variety. (Total: 2 coins) PCGS# 39968

4995 Four-Piece CSA Die Variety Set of 1861-O Half Dollars. Ex: *S.S. Republic*. Set 46 of 50, per the large-format NGC holder. A set of four 1861-O half dollars recovered from the *S.S. Republic*, which sank on Oct. 25, 1865, off of Cape Hatteras, North Carolina, with a reported \$400,000 in gold and silver. In a custom NGC holder but ungraded. The set includes **WB-102**, "CSA die crack" (from nose to rim); **WB-103**, "die crack bisected date"; **WB-104**, "speared olive bud" reverse; and **WB-103/104** "die crack bisected date/speared olive bud" as attributed by NGC, all "shipwreck effect" technically Mint State coins with varying degrees of seawater granularity, still mostly silver-white. Comes with wood case, slipcover, COA, and informational DVD.
Ex: *Orlando FUN Signature* (Heritage, 7/2011), lot 3648. (Total: 4 coins)

1863-S Seated Half, MS63 Untoned Silver-White Example

4996 1863-S MS63 PCGS. Housed in an old PCGS small-sized holder, this Select 1863-S Seated half is untoned silver-white with frosty luster and good eye appeal. A few small contact marks determine the grade. The strike is sharp, save for the uppermost stars on each side of Liberty's head. The large mintage was 916,000 pieces, but most survivors today are circulated. Population: 19 in 63, 14 finer (5/13). NGC ID# 24JC, PCGS# 6310

4997 1865 Repunched Date MS63 PCGS. WB-102, FS-301. The date was initially entered with a downward slope, then corrected. Repunching is especially obvious on the 1 and 5. Struck from moderately rotated dies. Sharply struck and satiny with light straw-gold toning and minor field marks. PCGS# 413728

1870 Seated Liberty Half, MS64 Darkly Toned Prooflike Surfaces

4998 1870 MS64 NGC. Vivid shades of lavender-gray, cobalt-blue, and golden-brown toning blanket the well-preserved surfaces of this attractive Choice example. The design elements are sharply detailed and the fields display prooflike reflectivity underneath the toning. Census: 7 in 64, 4 finer (5/13). NGC ID# 24JZ, PCGS# 6327

1871-CC Half Dollar, XF45

Scarce, Early CC Issue

4999 1871-CC XF45 PCGS. This moderately circulated early CC-mint half is richly toned in golden-brown and sea-green. A few small field marks are noted, but are of little import. Scarcer than suggested by its mintage of 153,950 pieces. The issue was needed by the Western economy, and only five pieces have been certified as Mint State by the combined forces of NGC and PCGS. Population: 15 in 45, 28 finer (6/13).

Ex: FUN Signature (Heritage, 1/2009), lot 2875. NGC ID# 24K5, PCGS# 6331

5000 1872-CC — Cleaning — PCGS Genuine. XF Details. Though the 1872-CC has a reasonable mintage, it also has a low survival rate, since not even the Ponderosa Ranch saved examples for posterity. This stone-gray and lavender Carson City half is well defined and only mildly subdued from cleaning. NGC ID# 24K8, PCGS# 6334

5001 1873-CC No Arrows XF40 PCGS. The 1873-CC No Arrows half dollar is more elusive than its With Arrows counterpart. This lightly worn specimen displays satiny mint luster under pleasing violet-gray toning. Housed in a green label holder. Population: 15 in 40, 32 finer (5/13). NGC ID# 24KC, PCGS# 6338

5002 1873-CC Arrows VF35 PCGS. Ex: Gutttag Family. A Choice VF example of the popular Arrows design from the famous Carson City Mint, this coin shows moderate even wear with pleasing pinkish-gray and amber toning. Population: 20 in 35, 99 finer (5/13). NGC ID# 24L8, PCGS# 6344

1873-CC Arrows Half, Choice XF

Scarce and Popular Issue

5003 1873-CC Arrows XF45 PCGS. WB-5. This variety is characterized by the the Open 3 in the date, Small CC mintmark with the second C higher, die crack through the center of TED, and a die crack along the bottom of HALF. This scarcer With Arrows issue has been so popular with collectors that it was even hoarded for a number of years by a prominent collector. This is a bright example with semireflective obverse fields. The devices show only slight high-point friction. NGC ID# 24L8, PCGS# 6344

5004 1874-CC Arrows Good 6 PCGS. Liberty and the eagle are both completely outlined, and the borders are nearly complete on this example. Both sides have light gray devices and slightly deeper gray fields with subtle gold toning, especially at the lower left obverse border. NGC ID# 24LB, PCGS# 6347

5005 1877-CC MS61 PCGS. Sharply detailed and lightly toned in pale gold hues, the surfaces of this attractive Mint State piece are surprisingly clean for the grade. The reverse is from a late state of the dies, with multiple clash marks and an extensive network of die cracks. NGC ID# 24KL, PCGS# 6356

1881 Half Dollar, Dazzling MS65 Always-Popular, Low-Mintage Date

5006 1881 MS65 PCGS. Once the Philadelphia mint began cranking out millions of silver dollars beginning in 1878, there was little time that remained for quarters and half dollars. In the case of the 1881, a mere 10,000 circulation strikes were produced, making this (and most dates from the 1880s) collector favorites. This is a snow-white coin with a dazzling appearance. The fields are semiprooflike, as expected, and the devices heavily frosted. Just a few tiny signs of contact can be seen with a loupe. Population: 12 in 65, 13 finer (6/13). NGC ID# 24KU, PCGS# 6363

PROOF SEATED HALF DOLLARS

5007 1859 PR63 PCGS. This brilliant Select proof specimen has light contrast although insufficient for a Cameo designation. Both sides are brilliant with fully mirrored fields. Population: 33 in 63, 49 finer (6/13). NGC ID# 27TJ, PCGS# 6413

1866 Seated Liberty Half, PR64 Cameo First Year With Motto

5008 1866 Motto PR64 Cameo PCGS. CAC. The design elements of this sharply detailed Choice specimen are richly frosted, creating dramatic cameo contrast with the deeply reflective fields. A few hints of cerulean-blue and pale gold toning enhance the outstanding eye appeal. Population: 14 in 64 (2 in 64+) Cameo, 7 finer (6/13). PCGS# 86424

**1867 Seated Liberty Half, PR65
Only 625 Pieces Struck**

5009 1867 PR65 PCGS. Only 625 proof Seated Liberty half dollars were struck in 1867. This delightful Gem exhibits sharply detailed design elements throughout, with deeply mirrored fields under shades of cerulean-blue and champagne-gold patina. Eye appeal is terrific. Population: 12 in 65, 4 finer (6/13). NGC ID# 27U2, PCGS# 6425

5010 1874 Arrows PR63 PCGS. A watery specimen that is layered in hazy gray and golden patina that has a subduing effect from most angles. A sharply detailed example of this two-year proof type. Population: 75 in 63, 83 finer (5/13). NGC ID# 27UV, PCGS# 6435

5011 1881 PR64 PCGS. Elegant gold-orange and violet patina of varying thickness drapes the moderate mirrors of this Choice proof. Minimally flawed for the grade assigned. PCGS has graded 38 finer pieces (6/13). NGC ID# 27UG, PCGS# 6442

**1885 Cameo PR65 Half Dollar
Impressively Contrasted**

5012 1885 PR65 Cameo PCGS. This beautiful Gem is essentially brilliant, and features impressively frosted motifs. The strike is needle-sharp except on the eagle's left (facing) claw and Liberty's forehead curls. Only 930 proofs and 5,200 business strikes were issued, since the Mint was too busy striking Morgan dollars to pay more than cursory attention to the Seated half and quarter. Ex: Long Beach Signature (*Heritage*, 5-6/2007), lot 1144. PCGS# 86446

5013 1887 PR62 PCGS. Gold-orange peripheral tints yield to light gray in the centers. This is a pleasingly mirrored example, a touch too hairlined for a finer grade but surprisingly attractive as a PR62. NGC ID# 27UN, PCGS# 6448

**1890 Seated Half, PR65 Cameo
Target Toned on Each Side**

5014 1890 PR65 Cameo NGC. Concentric rings of color in different hues surround silver centers on each side of this Gem Cameo proof, more bluish on the obverse and rich reddish-copper on the reverse. The partially untuned central devices heighten the good contrast. Super eye appeal for this proof, a prize for color collectors. Census: 8 in 65 Cameo, 14 finer (6/13). PCGS# 86451

5015 1891 PR64 NGC. Both sides of this near-Gem example are exceedingly brilliant. Toning is present and includes a number of shades of green along with copper-orange, with the darker colors concentrated near the rims. NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

**1892 Barber Half, MS66
Ideal First-Year Type Coin**

5016 1892 MS66 NGC. This lovely Premium Gem 1892 half dollar, the first of the new Barber design, is an attractive example for type purposes, as it is fully struck throughout both sides. Neither the often-weak juncture of the hair with the forehead of Liberty, nor yet the eagle's right (facing) claw and right shield corner and wing, betray the slightest sign of weakness. A further complement to the broad appeal is deep original patina, orange-gold and gunmetal-gray with glints of jade on each side. Census: 31 in 66, 8 finer (6/13). NGC ID# 24LF, PCGS# 6461

5017 1894 MS62 PCGS. CAC. Deep, variegated toning is seen over each side. A few short marks at the top of Liberty's neck explain the technical grade. NGC ID# 24LN, PCGS# 6468

5018 1896 MS64 PCGS. A frosty Choice Mint State specimen, this 1896 Barber half dollar has brilliant luster with hints of champagne toning on each side. Population: 27 in 64, 18 finer (6/13). NGC ID# 24LV, PCGS# 6474

5019 1896 MS64 PCGS. CAC. The 1896 is one of only seven Philadelphia Mint Barber half dollars with a mintage of less than 1 million coins. A highly lustrous example that has pleasing pink and gold patina. Choice and nicely struck with only a few mentionable marks. Population: 27 in 64, 18 finer (6/13). NGC ID# 24LV, PCGS# 6474

5020 1897 MS64 NGC. Ex: Richmond Collection. Lightly gold-tinged at the margins, most plainly at the bottom of the reverse. Better-defined than usual, even on the talons, with few marks of individual significance. Census: 45 in 64 (1 in 64+), 28 finer (5/13). NGC ID# 24LY, PCGS# 6477

- 5021 1898 MS64 Prooflike NGC.** The flag of the 1 is repunched south. Light golden-gray toning deepens moderately near the rims of this smooth, satiny, and well struck near-Gem. The single finest graded among three examples of the 1898 designated as Prooflike by NGC (6/13). PCGS# 86480

**1899-O Half Dollar, MS64
Richly Toned Condition Rarity**

- 5022 1899-O MS64 PCGS.** Lilac-gray patina has occasional blue overtones on this richly appealing near-Gem from New Orleans. Softly swirling luster under the toning shows few disturbances of substance, though half-hidden faults on the portrait ultimately preclude an MS65 designation. Population: 28 in 64 (1 in 64+), 16 finer (6/13).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5788. NGC ID# 24M7, PCGS# 6484

**1901 Barber Half Dollar, MS65
Spectacular Multicolor Toning**

- 5023 1901 MS65 PCGS.** Although the 1901 Barber half dollar claims a substantial mintage of 4.2 million pieces, the date is quite rare at the MS65 level. This attractive Gem displays spectacular golden-brown and violet patina, with vibrant mint luster and well-detailed design elements. Population: 8 in 65, 6 finer (6/13). NGC ID# 24MC, PCGS# 6489
- 5024 1904 MS64 PCGS. CAC.** Several Philadelphia Mint Barber half dollars are scarce issues, aside from the three low-mintage dates in the teens. One of the scarce dates, especially in higher grades, is the 1904. This Choice Mint State example has gold, violet, and teal obverse toning, with gold and green on the reverse. Population: 37 in 64, 18 finer (6/13). NGC ID# 24MM, PCGS# 6498
- 5025 1904-S VF25 PCGS.** A pleasing light silver-gray example of the scarce 1904-S Barber half dollar. This issue is less rare than some others in the series, but it is an important date none-the-less. Hints of champagne toning enhance the eye appeal of this pleasing mid-grade specimen. NGC ID# 24MP, PCGS# 6500

**1907-D Half Dollar, MS66
A Top 20 Specimen**

- 5026 1907-D MS66 PCGS. CAC.** The Denver Mint opened in 1906 and immediately began full scale production of Barber half dollars, including just over 4 million that first year, and nearly the same in 1907. Only eight issues in the Barber series had higher mintages. This example, a gorgeous Premium Gem that ranks among the finest 20 examples of the issue, has a bold strike and brilliant, satin luster, all showing through lovely green-gold and iridescent toning. Population: 10 in 66 (2 in 66+), 3 finer (6/13). NGC ID# 24MZ, PCGS# 6509
- 5027 1907-O MS63 NGC. CAC.** A white and lustrous Select example of this later New Orleans issue. The centers show incompleteness of strike but marks are minor and mostly relegated to the base of Liberty's neck.
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1885. NGC ID# 24N2, PCGS# 6510
- 5028 1908-D MS64 PCGS. CAC.** The well-preserved surfaces display intense satiny mint luster and reveal only a few light abrasions beneath attractive shades of pink and gold patina. Population: 60 in 64 (1 in 64+), 36 finer (5/13).
Ex: Long Beach Signature (Heritage, 2/2001), lot 423. NGC ID# 24N5, PCGS# 6513

**1911-D Half Dollar, MS66
Boldly Struck, Multihued Surfaces**

- 5029 1911-D MS66 NGC.** Remarkably few signs of contact appear on either side of this multihued Premium Gem 1911-D half dollar. While the issue is not normally thought of as a condition rarity, the mintage was rather low — below 700,000 pieces — and Premium Gems are seldom bettered. This piece shows a range of hues from charcoal-gray at the rims through lighter blue, copper, and pinkish tinges in the centers. Both sides are powerfully struck, with just a trace of weakness on the upper-right shield corner. Census: 6 in 66, 1 finer (5/13). NGC ID# 24NE, PCGS# 6522

**1911-S Barber Half Dollar, MS64
Underrated Issue in High Grade**

5030 1911-S MS64 PCGS. Sharply detailed in most areas, this attractive Choice example displays a touch of softness on the eagle's leg and claw. Vibrant satiny mint luster radiates from both sides and the creamy surfaces show only a few minor contact marks. Population: 21 in 64, 17 finer (6/13). NGC ID# 24NF, PCGS# 6523

5031 1912 MS64 NGC. CAC. This frosty Choice Mint State Barber half dollar has brilliant silver luster with hints of light champagne toning. Both sides have the usual scattered marks that prevent a higher grade. Census: 84 in 64 (6 in 64+), 12 finer (6/13). NGC ID# 24NG, PCGS# 6524

5032 1914-S MS64 NGC. Orange-gold, rose-red, ice-blue, and lime-green patina embraces this satiny and well preserved Choice San Francisco half dollar. Well struck for the issue. Census: 41 in 64, 19 finer (5/13). NGC ID# 24NP, PCGS# 6531

PROOF BARBER HALF DOLLARS

5033 1894 — Questionable Color — PCGS Genuine. Proof, Unc. Details. The fields are moderately hairlined beneath the deep blue-green and wheat-gold toning. Sharply struck and acceptable to many collectors. A scant 972 proofs were issued. NGC ID# 24NW, PCGS# 6541

5034 1895 — Questionable Color — PCGS Genuine. Proof, Unc. Details. This well struck half dollar is blanketed in deep forest-green and golden-brown toning. The obverse is faintly hairlined. Equally as rare as the proof 1895 silver dollar, though vastly more affordable. NGC ID# 24NX, PCGS# 6542

**1901 Barber Half Dollar, PR65
813 Pieces Struck**

5035 1901 PR65 PCGS. This delightful Gem proof marks the opening of the third Philadelphia Mint building, and the end of cameo proof coinage. Light contrast is noted between the sharply defined devices and the mirrored fields on this iridescent toned specimen. Population: 31 in 65, 39 finer (6/13). NGC ID# 24P5, PCGS# 6548

**1902 Barber Half, PR66+ Cameo
Unusual Contrast**

5036 1902 PR66+ Cameo PCGS. CAC. The sharply detailed design elements of this high-end Premium Gem show an unusual amount of mint frost for this issue, which was typically produced with an all-brilliant finish. The deeply reflective fields provide bold cameo contrast and a few hints of pale gold toning add to the considerable visual appeal. Population: 6 in 66 (1 in 66+) Cameo, 3 finer (6/13). PCGS# 86549

5037 1904 PR62 PCGS. Ex: Teich Family Collection. This lovely proof Barber half dollar is brilliant and attractive with delicate toning over its mirrored fields. The sharply defined design motifs show hints of satin luster. NGC ID# 24P8, PCGS# 6551

5038 1905 PR62 PCGS. Hints of contrast are apparent on this pleasing proof, with brilliant silver surfaces and a trace of peripheral iridescent toning. A borderline Cameo proof. NGC ID# 24P9, PCGS# 6552

5039 1906 PR63 PCGS. A splendid Select proof Barber half dollar, this piece has vivid gold and blue toning with evidence of bright silver on the reverse. NGC ID# 24PA, PCGS# 6553

5040 1906 PR64 NGC. The luminous surfaces of this near-Gem Proof display just a few wisps of gold-orange color at the margins. Fine hairlines are visible on Liberty's portrait. NGC ID# 24PA, PCGS# 6553

5041 1910 — Questionable Color — PCGS Genuine. Proof, Unc. Details. Ocean-blue and autumn-gold hues emerge when this crisply struck proof half dollar is rotated beneath a light. Delicate hairlines accompany the obverse field. A minimal 551 proofs were coined. NGC ID# 24PE, PCGS# 6557

5042 1910 PR64 Cameo PCGS. The well-detailed frosty design elements of this attractive Choice example contrast boldly with the reflective fields, despite a layer of champagne-gold and lavender-gray patina. Population: 10 in 64 Cameo, 20 finer (5/13). PCGS# 86557

**1910 Half Dollar, PR66 Cameo
Ultra Cameo Obverse**

5043 1910 PR66 Cameo NGC. Although it fails to garner the same demand as the 1913, 1914, and 1915 Barber half dollars, the 1910 is an important rarity in higher Mint State grades. For that reason, proofs such as this Premium Gem Cameo example are in higher demand than are most other proof issues. This piece has brilliant silver surfaces with exceptional contrast, especially on the obverse. Census: 6 in 66 Cameo, 14 finer (6/13). PCGS# 86557

EARLY DOLLARS

1795 Flowing Hair Dollar Three Leaves, B-6, BB-25, VG10

- 5044** 1795 Flowing Hair, Three Leaves VG10 NGC. B-6, BB-25, R.3. A majority of Three Leaves dollars are examples of the surprisingly available Bolender-5 variety. B-6 is scarce and readily attributed by the location of the curl relative to star 1. The obverse periphery shows mint-made adjustment marks but both sides are refreshingly void of post-strike abrasions. The stone-white devices and legends contrast with deep gunmetal-gray fields. NGC ID# 24WZ, PCGS# 6852

1796 Dollar, Large Letters Small Date, B-4, BB-61, Fine 12

- 5045** 1796 Small Date, Large Letters Fine 12 PCGS. B-4, BB-61, R.3. Bowers Die State II. Rich steel-gray patina embraces this evenly circulated early silver dollar. The fields and devices lack any noticeable marks, though each side has a couple of small rim dings. Bolender-4 is the only collectible Large Letters variety for the date. Certified in a green label holder. PCGS# 6860

- 5046** 1796 Large Date, Small Letters — Plugged — NGC Details. VF. B-5, BB-65, R.2. Bowers Die State II. A former hole at 1 o'clock on the reverse is repaired. The 179 in the date is re-engraved and both sides are lightly and evenly whizzed. A collectible example of this scarce and popular early crown-sized type. PCGS# 6861

- 5047** 1797 10x6 Stars, Large Letters — Damage — PCGS Genuine. Fine Details. B-3, BB-71, R.2. Several scratches and scrapes appear on both sides of this light silver piece with hints of deep gold and ebony toning. However, this is still an important Small Eagle dollar for a budget-minded collector. NGC ID# 24X4, PCGS# 6865

- 5048** 1797 10x6 Stars, Large Letters — Plugged, Whizzed — NGC Details. XF. B-3, BB-71, R.2. Bowers Die State III. Plugged near 12 o'clock with repairs in the vicinity and opposite at 5:30 on the reverse. The bust truncation is smoothed and both sides are uniformly whizzed. Toned wheat-gold and stone-gray.

- 5049** 1798 Large Eagle, Pointed 9 VG10 NGC. B-10, BB-109, R.5. A deep stone-gray example of this better Bolender variety. The right-side stars above the eagle are weak, due to the strike, but wear is otherwise even. A few faded horizontal marks are noted above the date. NGC ID# 24X6, PCGS# 6873

- 5050** 1798 Large Eagle, Pointed 9 VF30 PCGS. B-24a, BB-124, R.2. Bowers Die State IV. Light pearl-gray and almond-gold toning. The surfaces are faintly hairlined but generally unmarked. The strike is good aside from softness on the stars northeast of the eagle's head. Housed in a green label PCGS holder.
Ex: FUN Signature (Heritage, 1/2005), lot 8140, which realized \$2,760. NGC ID# 24X6, PCGS# 6873

1798 B-31a, BB-115 Dollar, XF40 Shattered Reverse Die

- 5051** 1798 Large Eagle, Pointed 9, Close Date XF40 NGC. B-31a, BB-115, R.4. BB Die State IV. This is the latest die state with a shattered reverse showing extensive die cracks. The obverse of this pleasing XF has light gray high points with a linear depression through the center, appearing to be a strike-through rather than a scratch. The balance of the obverse and all of the reverse exhibit steel-blue and iridescent toning with excellent eye appeal. NGC ID# 24X6, PCGS# 6873

1798 B-26, BB-114 Dollar, XF40 From the Jules Reiver Collection

- 5052** 1798 Large Eagle, Pointed 9, Close Date XF40 NGC. B-26, BB-114, R.5. Digit 8 out of position, high and leaning slightly right; Line star pattern, star 12 touches upper beak, star 13 touches scroll. Reiver die state a. Bowers-Borckardt die state V. The final die state seen. The surfaces of this coin have been lightly cleaned and remain bright silver with a hint of peripheral gold. The strike is reasonably good for this late die state, but we do note central weakness on Liberty's neck curls, and on the stars opposite from Liberty's bust. Identifiable by a tiny dig on Liberty's temple.
Ex: Liberty Coin Co. (June, 1954); K.P. Austin; A.J. Ostheimer; Superior ANA sale (August, 1975) lot 895; Jules Reiver Collection (Heritage, 1/2006), lot 23539. NGC ID# 24X6, PCGS# 6873

- 5053** 1798 Large Eagle, Pointed 9, 10 Arrows VF20 PCGS. CAC. B-13, BB-108, R.2. Bowers-Borckardt Die State II. Rich olive-brown toning embraces the fields, though the high points are pearl-white. A few parallel adjustment marks (as coined) on the central reverse do not distract. The base of Liberty's neck shows faded moderate abrasions. PCGS# 6876

- 5054** 1798 Large Eagle, Wide Date, Pointed 9 — Obverse Scratched — NGC Details. VF. B-23, BB-105, R.3. Bowers Die State III. An X-shaped test mark is noted at the base of Liberty's neck, and there are two small pits southwest of the earlobe. The gunmetal-gray and tan-brown surfaces have a cloudy appearance and the right obverse field is faintly abraded. PCGS# 6877

5055 1799/8 13 Stars Reverse PCGS Genuine. B-1, BB-142, R.4. Bowers Die State III with extensive crumbling from the I in AMERICA. The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has questionable color. Deep walnut-brown and gunmetal-gray encompass this better variety early dollar. Devoid of noticeable marks. PCGS# 6884

5056 1799/8 13 Stars Reverse Fine 15 PCGS. B-1, BB-142, R.4. Bowers Die State III. This lavender-brown overdated dollar has claims to VF sharpness though abrasions are noted on the eagle's shield and right (facing) wing. The obverse has minor rim dings at 5:30 and 10 o'clock. PCGS# 6884

5057 1799 Irregular Date, 13 Stars Reverse — Rim Damage — NGC Details. Fine. B-13, BB-151, R.5. The obverse rim is bruised near star 7, but neither side has any distracting abrasions. Milk-gray high points contrast with gunmetal-blue fields. The rarest of the three Irregular Date Bolender varieties. PCGS# 6880

5058 1799 7x6 Stars Fine 15 PCGS. B-21, BB-169, R.3. Bowers Die State IV. Some of the die cracks listed in that die state are absent due to wear, but others are clearly present. This is the usual die state for the variety. A pleasing Choice Fine with pewter gray, tan, and steel toning, showing the usual grade-associated handling marks but none out of the ordinary. NGC ID# 24X7, PCGS# 6878

5059 1799 7x6 Stars — Corrosion — NGC Details. VF. B-11, BB-161, R.3. Bowers-Borckardt Die State I. This coin represents the extremely rare early die state with an unbroken reverse. This coin is only the second example we have seen without the heavy die crack by D in UNITED. Some evidence of corrosion is apparent on both sides, but the coin retains much of its original design detail.

5060 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-17, BB-164, R.2. Bowers Die State III. This darkly toned silver dollar is minimally abraded except for a minor obverse rim ding at 4 o'clock and a short line in front of Liberty's neck. The specialist attributed BB-164 by its "equals sign" die flaw beneath reverse star 2. NGC ID# 24X7, PCGS# 6878

5061 1799 7x6 Stars VF35 ANACS. B-9, BB-166, R.1. BB Die State IV. The obverse has a crack from the neck to the chin, through the right field, faintly reaching star 10. This moderately worn specimen has light silver-gray surfaces with reddish-gold and iridescent toning. A few scattered marks are noted on each side. NGC ID# 24X7, PCGS# 6878

5062 1799 7x6 Stars — Obverse Graffiti — NGC Details. XF. B-5, BB-157, R.2. Bowers-Borckardt Die State II. Darkly toned in shades of blue-steel, silver-gray, and amber, this lightly worn XF specimen retains most of its original design detail. A few pin scratches in the obverse fields are largely masked by the toning. NGC ID# 24X7, PCGS# 6878

5063 1800 Dotted Date — Cleaning — PCGS Genuine Secure. VF Details. B-14a, BB-194, R.3. BB Die State III with extensive reverse cracks. Both sides show prominent cleaning lines along with other minor scratches and marks, but with still attractive light gray surfaces. PCGS# 6889

5064 1800 12 Arrows VF20 NGC. B-17, BB-196, R.1. Bowers Die State I, "rare." Medium caramel-gold and ice-blue toning embraces this nicely detailed and mildly luminous Heraldic Eagle dollar. A few small marks are noted on the field near the profile. PCGS# 6890

5065 1802/1 Wide Date Fine 15 PCGS. B-3, BB-234, R.3. Bowers Die State II. Deep steel-gray toning blankets this Choice Fine early dollar. Surprisingly detailed for the designated grade, and although small marks are scattered, we note only a minor rim ding beneath the 2 in the date. PCGS# 6899

**1802 Narrow Date Dollar, Choice VF
B-6, BB-241**

5066 1802 Narrow Date VF35 PCGS. B-6, BB-241, R.1. B-6 is most easily distinguished from B-5 by the absent right foot of the T in LIBERTY. This piece is relatively well-defined for the grade, and the surfaces are lightly abraded, and each side shows medium, uniform gray toning with localized areas of slightly darker color on the obverse. Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 6722. NGC ID# 24XB, PCGS# 6895

**1803 B-3, BB-256 Dollar, VF Details
Scarce Die Marriage**

5067 1803 Small 3 — Improperly Cleaned — NGC Details. VF. B-3, BB-256, R.5. Perfect dies as always, and this example is sharper than most. Both dies appeared only for this single die marriage so it is not possible to determine its position in the emission sequence of 1803 dollars. This variety was either struck before BB-251, between BB-252 and BB-253, or after BB-255. This piece shows the light cleaning lines expected, with light silver surfaces and delicate champagne toning.

SEATED DOLLARS

- 5068 1840 AU53 NGC.** A great early Seated dollar with considerable remaining luster under rich blue-to-gray and sunset patina. A flattened denticle below the E in ONE on the reverse presents as "fresh metal." NGC ID# 24YA, PCGS# 6926

1840 Seated Dollar, AU55 Still-Lustrous First-Year Issue

- 5069 1840 AU55 PCGS.** The 1840 Seated dollar appeared after the various trial Gobrecht dollars dated 1836, 1838, and 1839, although the Flying Eagle reverse was, unfortunately, replaced with the Robert Ball Hughes design. Only 61,005 pieces were reported struck, and this Choice AU example is finer than the average certified coin. Still-lustrous surfaces are light dove-gray with a few light marks but good eye appeal. Population: 26 in 55, 53 finer (5/13). NGC ID# 24YA, PCGS# 6926

- 5070 1842 AU50 PCGS.** The 1842 Seated Liberty dollar is seldom encountered in Mint State grades. This lightly circulated example is well-detailed and lustrous with just a touch of wear on the high points. Housed in an old green label holder. NGC ID# 24YC, PCGS# 6928

- 5071 1844 AU55 NGC.** Dappled golden-brown, ocean-blue, and lilac toning encompass this well defined No Motto silver dollar. The fields display marks commensurate with the grade. Liberty's shield is die doubled, characteristic of all survivors from the business issue of 20,000 pieces. NGC ID# 24YE, PCGS# 6930

- 5072 1846 AU53 NGC.** This lightly circulated specimen exhibits well-detailed design elements, with just a touch of wear on the high points, and pleasing silver-gray surfaces with a few accents of gold and lavender toning. NGC ID# 24YG, PCGS# 6932

- 5073 1846-O AU53 NGC.** First O-mint Seated dollar produced, and more obtainable than the later issues. Still an AU 1846-O is a good collector coin with a good story behind it. The medium gray surfaces show lighter, almost brilliant accents over the higher points of the design. Census: 19 in 53, 64 finer (5/13). NGC ID# 24YH, PCGS# 6933

- 5074 1847 AU55 NGC.** Shades of light gray and sea-green patina visit the lightly abraded surfaces of this Choice AU specimen, with traces of prooflike reflectivity in selected areas. The well-detailed design elements show just a trace of wear. NGC ID# 24YJ, PCGS# 6934

- 5075 1847 AU58 PCGS.** This attractive near-Mint specimen exhibits well-detailed design elements with just a trace of wear on the high points. The lightly abraded surfaces retain much of their original mint luster and eye appeal. Population: 44 in 58, 60 finer (6/13). NGC ID# 24YJ, PCGS# 6934

- 5076 1848 XF45 PCGS.** This Choice XF Seated dollar represents a scarce, low-mintage date, surviving from a total production of only 15,000 coins. This example has deep blue and violet toning with traces of underlying luster. NGC ID# 24YK, PCGS# 6935

1848 Seated Dollar, AU58 Low-Mintage, Elusive Issue

- 5077 1848 AU58 PCGS.** Much of the luster remains on this low-mintage Seated dollar under a layer of dusky patina, intermingled smoke, copper, and pinkish hues. A few contact marks appear, most notably a largish dig to the right of the date. This is a rare issue struck to the extent of only 15,000 pieces, and most show far more circulation wear than this near-Mint example. Population: 21 in 58, 23 finer (5/13). NGC ID# 24YK, PCGS# 6935

- 5078 1853 AU50 PCGS.** The lightly marked surfaces of this attractive Seated Liberty dollar are enhanced by mottled shades of green, gray, blue, and amber toning. The design elements are well-detailed and show just a trace of wear. Housed in a green label holder. NGC ID# 24YS, PCGS# 6941

1856 Seated Dollar, AU50 Attractive Collector-Grade Example

- 5079 1856 AU50 PCGS.** This is a nice collector-grade 1856 Seated dollar, free of major problems, lightly circulated but with excellent eye appeal throughout both sides. The light-gray surfaces show a scattering of minor marks, and the strike is quite sharply impressed, producing full centrals on all stars around the obverse periphery and good detailing on the eagle on the reverse. NGC ID# 24YV, PCGS# 6944

- 5080 1857 MS61 ANACS.** Softly struck but with luminous all-around luster beneath rich shadings. Blue-gray, green-gold, and sage hues are most prominent on each side, while the reverse adds orange elements. Housed in a small-format ANACS holder. NGC ID# 24YW, PCGS# 6945

- 5081 1860-O AU58 NGC.** Although this piece shows light wear, it lacks the usual heavy bagmarks normally associated with Mint State examples of this issue that were released from the Treasury a century after they were struck. This near-Mint specimen is deeply toned in golden-brown and gray with underlying satin luster. NGC ID# 24Z3, PCGS# 6950

- 5082 1861 — Improperly Cleaned — NGC Details. AU.** The design elements of this lightly circulated Seated dollar are sharply detailed and show just a trace of wear on the high points. The surfaces are lightly abraded but have an unnaturally bright, flat aspect, indicative of a cleaning long ago. Hints of jade and lavender-gray patina visit both sides. NGC ID# 24Z4, PCGS# 6951

1862 Seated Dollar, AU55
Sharply Struck With Rim Toning

5083 1862 AU55 NGC. Deep rose-copper patina near the rims cedes to untuned silver in the immediate centers on this Choice AU 1862 Seated dollar, one of only 11,500 pieces struck in this Civil War Year. Light high-point rub and a few thin marks in the fields determine the grade. The strike is sharp on each side: Note the full star centrils on the obverse and the wealth of detail visible in the eagle feathers. NGC ID# 24Z5, PCGS# 6952

5084 1863 XF45 PCGS. CAC. Lightly worn and minimally abraded for the grade, this low-mintage Civil War issue displays pleasing shades of gold and dove-gray patina. Population: 16 in 45, 87 finer (5/13). NGC ID# 24Z6, PCGS# 6953

5085 1868 XF45 PCGS. Lightly worn and lightly abraded, this pleasing Choice XF specimen exhibits well-detailed design elements and displays traces of green and lavender-gray patina. Housed in a green label holder. Population: 21 in 45, 92 finer (5/13). NGC ID# 24ZB, PCGS# 6961

5086 1868 XF45 PCGS. This Choice XF Seated dollar has pleasing light gray surfaces with steel and gold toning on both sides. The surfaces show only minimal marks with trivial rim chatter on each side. NGC ID# 24ZB, PCGS# 6961

5087 1870 AU58 NGC. The lightly abraded surfaces of this attractive near-Mint specimen retain much original mint luster and just a trace of high-point wear shows on the design elements. A few minor rim bruises are evident. Census: 26 in 58, 59 finer (5/13). NGC ID# 24ZD, PCGS# 6963

5088 1871 — Questionable Color — PCGS Genuine. Unc. Details. The deeply patinated surfaces reveal autumn-brown, olive-green, and lavender undertones when rotated beneath a light. Satin luster is comprehensive and the strike shows only minor softness. The reverse is smooth while the obverse field displays inconspicuous marks. NGC ID# 24ZG, PCGS# 6966

5089 1872 AU58 PCGS. A trace of wear appears on the high points of this lustrous and brilliant Seated Liberty dollar. Subtle gold toning appears on each side, with scattered marks that are consistent with the grade. NGC ID# 24ZJ, PCGS# 6968

5090 1872-S VF35 PCGS. This lower-grade With Motto dollar has medium gray patina over each side and even high-point friction. There is a possible spot of PVC on the lower right of the reverse. NGC ID# 24ZL, PCGS# 6970

1872-S Seated Dollar, AU50
Eye-Appealing Collector-Grade Coin

5091 1872-S AU50 PCGS. This 1872-S Seated dollar was struck during the year that Germany abandoned the silver standard and National Gold Bank notes, fully backed by gold, appeared in California for the first time. There was little need for new silver dollars at a time when their melt value was plummeting and specie payments continued in abeyance. Only 9,000 silver dollars were struck in San Francisco in this year. This issue is, nonetheless, the only S-mint Seated dollar from the 1870s that collectors stand a chance of obtaining — the 1870-S is a great rarity, the 1871-S is nonexistent, the 1873-S is unknown. This AU coin shows attractive eye appeal over silver-white surfaces with only scattered circulation marks, a great collector-grade coin in an underrated series. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLAR

1859 Seated Liberty Dollar, PR62
Sharply Struck, Attractively Toned

5092 1859 PR62 PCGS. From a mintage of 800 pieces struck in just the second year of the Philadelphia Mint's commercial proof offerings, this attractive Seated dollar displays sharply detailed design elements and reflective fields with pleasing pale gold patina. A small planchet flaw is noted at Liberty's throat and a larger one above 5 in the date. Population: 45 in 62, 97 finer (6/13). NGC ID# 252D, PCGS# 7002

TRADE DOLLARS

1873 Trade Dollar, Bright MS63 Scarcer First-Year Issue

- 5093 1873 MS63 NGC.** Apparently the novelty of the new Trade dollar design did not spur the populace to set aside these lovely coins as they did with other first-year issues. Uncirculated examples are not really rare but they are uncommon, unlike many later issues. This is a bright, lustrous example that shows just a trace of color around the devices. Sharply struck. Census: 29 in 63 (2 in 63+), 41 finer (5/13). NGC ID# 252W, PCGS# 7031

1873 Trade Dollar, MS64 First-Year Strike, Excellent Eye Appeal

- 5094 1873 MS64 NGC.** Soft, glowing luster visits the surfaces of this near-Gem first-year Trade dollar, golden-gray and silver in the centers with a hint of ice-blue at the extreme rims. Excellent eye appeal and a bold strike are evident, despite a single small scrape through Liberty's midsection that likely prevents a Gem grade. The reverse is particularly well-preserved. Census: 34 in 64, 7 finer (5/13). NGC ID# 252W, PCGS# 7031

- 5095 1873-CC — Improperly Cleaned — NCS Details. AU.** An elusive branch-mint issue with just a trace of high-point wear and an unnaturally bright sheen on the lightly abraded surfaces. The Norweb flip accompanies the lot.

Ex: Albert Holden purchased this coin from one of the Chapman brothers on November 11, 1908; Emery May Holden Norweb; Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1821. NGC ID# 252X, PCGS# 7032

1873-CC Trade Dollar, AU55 First Trade Dollar Issue

- 5096 1873-CC AU55 NGC.** The Trade dollar was introduced in 1873 and the Carson City Mint accomplished a small mintage of just 124,500 pieces during the course of the year. This Choice AU example features well-detailed design elements with just a trace of wear and lightly abraded silver-gray surfaces. Census: 19 in 55, 70 finer (6/13). NGC ID# 252X, PCGS# 7032

1874 Trade Dollar, MS63 Partially Reflective Fields

- 5097 1874 MS63 NGC.** The Richmond catalog described this piece in part as: "Reflective fields and frosted devices combine to give this coin a touch of cameo contrast." Just a touch of pale golden is seen over the otherwise brilliant surfaces. Well struck overall, except on the eagle's right (facing) leg. Census: 18 in 63, 32 finer (5/13). *Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1542. NGC ID# 252Z, PCGS# 7034*

1874-CC Trade Dollar, MS62 Shattered Reverse Die

- 5098 1874-CC MS62 PCGS.** The obverse die shows considerable evidence of fatigue in the form of die cracks around the periphery. The strike is far sharper on the lower obverse than on the upper obverse, where the thin die cracks are most numerous (and the head of Liberty and adjacent stars are noticeably soft). The explanation lies on the lower reverse, where numerous heavier die cracks converge in a V shape below DO(LLAR); this is a die that was sinking and getting ready to shatter. Scattered contact marks and generous luster appear over mostly silver-gold surfaces. An interesting coin that will be of interest to die state specialists. Population: 41 in 62, 65 finer (6/13). NGC ID# 2532, PCGS# 7035

- 5099 1874-S Chop Mark MS62 PCGS.** Unusually lustrous and well-preserved for a chop marked dollar, this coin is well-detailed, with accents of gray, blue, and amber toning. The chop marks indicate a Chinese merchant verified the silver content of this coin. PCGS# 87036

**1874-S Chopmarked Trade Dollar, MS64
Rarely Seen in Mint Condition**

- 5100 1874-S Chop Mark MS64 PCGS.** Large S. Such coins present an interesting study case. A Chinese merchant handled this coin, gave it a chop on Liberty's abdomen to verify its silver content, and then what? It is interesting that the coin remained in mint condition after handling and chopping. Usually chopmarked dollars are found in VF-XF condition with the occasional AU. Rarely were they set aside almost immediately after chopping and preserved in Uncirculated grades. The surfaces on this dollar are mostly brilliant with light accents of golden-brown around the devices. The strike is sharp, although not quite complete, and the all-important mint luster is frosted and uninterrupted except for a few small abrasions scattered over both sides. PCGS# 87036

**1875 Trade Dollar, MS63
Underrated Philadelphia Issue**

- 5101 1875 MS63 PCGS. CAC.** Type Two Reverse. The 1875 Philadelphia Trade dollar lacks the popular mintmark of its Carson City cousin but is nonetheless scarcer, as it has a much lower mintage. Dusky chestnut-gold and silver-blue toning embraces lustrous and lightly marked surfaces. The strike is good though inexact on the curls and right (facing) claw. Population: 13 in 63, 22 finer (6/13). NGC ID# 2534, PCGS# 7037

- 5102 1875-CC AU58 PCGS.** Type One Reverse. Shades of golden-brown and lavender-gray toning visit the surfaces of this lightly circulated Trade dollar. The design elements are well-detailed and significant amounts of luster shine through the toning. NGC ID# 2535, PCGS# 7038

- 5103 1875-CC MS60 ANACS.** Type One Reverse. Glimpses of lemon-gold toning adorn this flashy and moderately abraded Carson City type coin. The strike is good, though roller marks are evident on Liberty's waist. NGC ID# 2535, PCGS# 7038

1875-CC Trade Dollar, MS62

- 5104 1875-CC MS62 PCGS.** Type One Reverse. Light straw-gold toning visits this coruscating Carson City Trade dollar. The obverse is minimally abraded and the reverse field has moderate grazes, mostly near 6 o'clock and 10:30. The strike is good aside from bluntness on the eagle's right (facing) leg. NGC ID# 2535, PCGS# 7038

- 5105 1875-S Chop Mark MS63 PCGS.** Type One Reverse. Large S. Two deeply entered chopmarks are noted, one near star 5 and the other on the eagle's breast. These chopmarks cause granularity and bulging on the opposite portions of the coin. Lustrous and brilliant with a typical strike and unexpectedly few abrasions. PCGS# 87039

- 5106 1876-CC AU55 NGC.** Type One Obverse, Type Two Reverse, Tall CC. Attractive shades of gray, gold, and cerulean-blue toning blanket the lightly abraded surfaces of this Choice AU specimen. Traces of prooflike reflectivity shine through the patina. Census: 19 in 55, 79 finer (5/13). NGC ID# 253A, PCGS# 7042

**1876-S Trade Dollar, MS64
Vivid Multicolor Toning**

- 5107 1876-S MS64 NGC.** Type One Obverse and Reverse. Attractive shades of sea-green, magenta, and blue toning blanket the surfaces of this impressive Choice specimen. The design elements are well-detailed, with just a touch of softness on Liberty's head and vibrant mint luster shines through the toning. Census: 87 in 64, 20 finer (5/13). NGC ID# 253B, PCGS# 7043

**1877-CC Trade Dollar, MS61
Relatively Unabraded for the Grade**

- 5108 1877-CC MS61 ANACS.** Bronze-gray patina deepens around the device outlines to a charcoal-brown shade on this Mint State 1877-CC Trade dollar. The strike is sharp, but the luster is somewhat muted beneath the deep color. Fewer contact marks than expected appear for the grade, however, making this coin a nice potential acquisition. NGC ID# 253D, PCGS# 7045

5109 1877-S MS62 PCGS. Minute S, the scarcer of the two mintmark sizes. Potent luster and original medium honey-gold toning ensure the eye appeal of this well struck silver type coin. A few thin obverse field marks correspond to the grade. NGC ID# 253E, PCGS# 7046

5110 1877-S MS63 PCGS. Large S. Deep peach-gold toning dominates though jade-green and stone-gray shades are also present. A crisply struck and lustrous example with a minimally abraded obverse and a few thin marks on the reverse. NGC ID# 253E, PCGS# 7046

5111 1877-S MS63 PCGS. Large S. Potent luster sweeps this brilliant and well struck Trade dollar. The reverse is well preserved and the obverse field displays moderate contact. The 1877-S has the highest mintage of the series though most pieces were exported to the Orient. NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

5112 1873 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details. A brilliant proof with white-on-black cameo contrast. The surfaces have been dipped but are without any obvious indication of smoothing or wiping. A scant 865 proofs were struck. NGC ID# 27YJ, PCGS# 7053

1873 Trade Dollar, Select Proof First Year of the Design

5113 1873 PR63 ANACS. Silver centers have broad swaths of surrounding toning in varying blue hues. This well-defined first-year proof has a handful of contact marks in the fields around the eagle but otherwise is pleasing for the grade with appreciable (though not Cameo-level) contrast. Housed in a small-format ANACS holder. NGC ID# 27YJ, PCGS# 7053

1874 Trade Dollar, Toned PR63

5114 1874 PR63 PCGS. Numerous small contact marks are scattered over each side as well as hairlines, but their effect is greatly diminished by the depth of the toning present. The center of each side is gray-rose with a ring of blue around the margin. Strongly struck in all areas. NGC ID# 27YK, PCGS# 7054

1875 Trade Dollar, Choice Proof Original Toning

5115 1875 PR64 NGC. Type One Reverse. This deeply patinated near-Gem exhibits golden-brown, powder-blue, and fire-red tints upon rotation beneath a light. The strike is good aside from incompleteness on the eagle's right (facing) leg. A loupe reveals minor field hairlines. A scant 700 proofs were coined. Certified in a prior generation holder. NGC ID# 27YL, PCGS# 7055

5116 1876 PR60 PCGS. Type One Obverse, Type Two Reverse. The deeply toned fields reveal orange-gold, fire-red, and powder-blue colors when rotated beneath a light. A good strike through the right (facing) claw is incomplete. The obverse field is thickly hairlined. NGC ID# 27YM, PCGS# 7056

1877 Trade Dollar, PR62 Cameo

5117 1877 PR62 Cameo PCGS. Even more crisply struck than expected with razor-sharp definition apparent on virtually every design element, including the dentils. Strong cameo contrast is evident on both sides, with frosted white devices set against the illimitable reflectivity of jet-black fields. Faint cloudiness and a few wispy hairlines in the fields define the numerical grade of this pleasing proof specimen. *Ex: Long Beach Signature (Heritage, 2/2007), lot 3723.* PCGS# 87057

1877 Trade Dollar, PR62 Deep Cameo Intense Contrast

5118 1877 PR62 Deep Cameo PCGS. Although a few hairlines and contact marks limit the grade, this visually impressive piece has amazing field-to-device contrast with delicate peripheral gold and iridescent toning that is more visible on the obverse. Only 510 proofs were coined in 1877, the lowest proof production of the series, save for the ultra-rare 1884 and 1885 proofs. Population: 1 in 62 Deep Cameo, 10 finer (6/13). PCGS# 97057

**1879 Trade Dollar, PR63
Attractive Toning Pattern**

- 5119 1879 PR63 PCGS.** Attractive shades of champagne-gold toning blanket the surfaces of this sharply detailed Select example, with a vivid arc of cobalt-blue and a segment of brilliance at the obverse bottom. Reflective fields shine through the patina. Housed in a green label holder. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR62 Cameo
Starkly Contrasted and Sharply Struck**

- 5120 1879 PR62 Cameo PCGS.** The unusual grade of PR62 Cameo is accounted for by well-contrasted jet-black fields and silvery devices, although a few scrapes and milk spots appear in the fields, most notably a scrape behind the wheat sheaf in the right obverse field. The proof strike is uniformly sharp throughout, a partial compensation. PCGS# 87059

**1880 Trade Dollar, PR63
Well-Contrasted Surfaces**

- 5121 1880 PR63 PCGS.** The Select grade on this 1880 proof Trade dollar comprises a few field hairlines and light contact or handling marks, as well as a small spot of dark toning near the obverse rim at 3:30. On the other hand, the silver-white surfaces show a sharp proof strike and considerable field-device contrast, even if insufficient for a Cameo designation. The mintage of this issue was a memorable 1,987 pieces, and it was all downhill from here to the mysterious, series-ending 1884 and 1885 rarities. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64 Cameo
Lovely Black and White Contrast**

- 5122 1880 PR64 Cameo PCGS.** Even after the beginning of Morgan dollar production, politicians in Nevada kept putting pressure on the Mint to continue striking Trade dollars, with the hopes that that series would be revived. Of course, that never happened, and proofs were struck for a few more years before the design became obsolete. This Choice Cameo proof is sharply struck and fully brilliant with satiny white luster and deeply mirrored fields. Population: 55 in 64 (2 in 64+) Cameo, 39 finer (6/13). PCGS# 87060

**1883 Trade Dollar, PR63
Elusive Proof-Only Issue**

- 5123 1883 PR63 PCGS. CAC.** Only 979 Trade dollars were minted in 1883, all in proof format. The date also has a low survival rate, and the 1883 is more difficult to locate than other Trade dollar issues of the time period. The present coin is an attractive Select example, with sharply detailed design elements and reflective fields. The surfaces are patinated in vivid shades of electric-blue and golden-brown. NGC ID# 27YV, PCGS# 7063

End of Session Four

SESSION FIVE

HERITAGE Live!®, Internet, Fax, and Mail Only Session
Saturday, July 13, 2013 | 2:00 PM CT | Dallas, Texas | Lots 7001 - 8506

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1187

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

End of Session Five

SESSION SIX

HERITAGE Live!®, Internet, Fax, and Mail Only Session
Sunday, July 14, 2013 | 3:00 PM CT | Dallas, Texas | Lots 8507 - 9901

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1187

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

THE PARCFELD COLLECTION

FLYING EAGLE CENT

- 8507** 1857 Obverse Die Clash With Half Dollar, Snow-9, FS-402 MS63 PCGS. PCGS Population (4/7).
From The Parcfeld Collection. PCGS# 37375

INDIAN CENTS

- 8508** 1893 Repunched Date, FS-301, Snow-2 — Surface Damage — PCGS Genuine. Fine Details.
From The Parcfeld Collection.
- 8509** 1906 Misplaced/Repunched Date, FS-302, Snow-14 MS64 Red and Brown PCGS.
From The Parcfeld Collection. PCGS# 412793

LINCOLN CENTS

- 8510** 1949-D/D Repunched Mintmark, FS-501 MS64 Red PCGS.
From The Parcfeld Collection. PCGS# 37861
- 8511** 1951-D/S Overmintmark FS-511 MS65 Red PCGS.
From The Parcfeld Collection. PCGS# 37879

- 8512** 1951-D/S Overmintmark, FS-511 MS66 Red PCGS. CAC.
From The Parcfeld Collection. PCGS# 37879
- 8513** 1953-D/D Repunched Mintmark, FS-501 MS65 Red PCGS.
From The Parcfeld Collection. PCGS# 37900
- 8514** 1959-D/D/D FS-501 MS64 Red NGC.
From The Parcfeld Collection. NGC ID# 22FT, PCGS# 2857
- 8515** 1959-D/D/D Repunched Mintmark, FS-501 MS65 Red PCGS.
From The Parcfeld Collection. PCGS# 37962
- 8516** 1961-D D Over Horizontal D, WRPM-001 RPM-1 MS64 Red ANACS.
From The Parcfeld Collection. NGC ID# 22G2, PCGS# 2875

SHIELD NICKELS

- 8517** 1866 Rays, Doubled Die Obverse — Cleaned, Corroded — ANACS. Fine 12 Details.
From The Parcfeld Collection. NGC ID# 22NX, PCGS# 3790
- 8518** 1866 Rays, Repunched Date, FS-304 F-16 — Corroded — ANACS. VF30 Details.
From The Parcfeld Collection. NGC ID# 22NX, PCGS# 3790
- 8519** 1867 Shield No Rays, Repunched Date — Cleaned — ANACS. AU50 Details.
From The Parcfeld Collection. NGC ID# 22NZ, PCGS# 3794
- 8520** 1868 Reverse of 68, FS-905 — Damaged — ANACS. AG3 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8521** 1868 — Cleaned, Corroded, Major Die Break — ANACS. Good 6 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8522** 1868 Reverse of 68 (FS-904), Doubled Die Obverse (FS-109) — Corroded, Scratched — ANACS. VF20 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8523** 1868 Repunched Date, FS-301 F-25 — Corroded — ANACS. VF30 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8524** 1868 Repunched Date, FS-301 — Corroded — ANACS. VF30 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8525** 1868 Doubled Die Obverse — Cleaned, Corroded — ANACS. XF40 Details.
From The Parcfeld Collection. NGC ID# 22P2, PCGS# 3795

- 8526** 1868 Repunched Date, FS-301 — Cleaned, Corroded — ANACS. AU50 Details.
From The Parfeld Collection. NGC ID# 22P2, PCGS# 3795
- 8527** 1868 Reverse of 1868, FS-901 XF45 PCGS.
From The Parfeld Collection. PCGS# 400244
- 8528** 1868 Reverse of 1868, FS-901 AU53 PCGS.
From The Parfeld Collection. PCGS# 400244
- 8529** 1868 Reverse of 1868, FS-901 AU55 PCGS.
From The Parfeld Collection. PCGS# 400244
- 8530** 1868 Reverse of 1868, FS-901 AU58 PCGS.
From The Parfeld Collection. PCGS# 400244
- 8531** 1868 Reverse of 1868, FS-902 AU50 PCGS.
From The Parfeld Collection. PCGS# 400245
- 8532** 1868 Reverse of 1868, FS-903 AU53 PCGS.
From The Parfeld Collection. PCGS# 400246
- 8533** 1868 Reverse of 1868, FS-904 AU53 PCGS.
From The Parfeld Collection. PCGS# 400247
- 8534** 1868 Reverse of 1868, FS-906 VG8 PCGS.
From The Parfeld Collection. PCGS# 400243
- 8535** 1868 Reverse of 1868, FS-906 AU58 PCGS.
From The Parfeld Collection. PCGS# 400243

- 8536** 1868 Doubled Die Obverse, FS-104 MS64 PCGS.
From The Parfeld Collection. PCGS# 38350

- 8537** 1869 Narrow Date, FS-301 — Cleaned, Corroded — ANACS. AU50 Details.
From The Parfeld Collection. NGC ID# 22P3, PCGS# 3796
- 8538** 1869 Repunched Date, FS-1305 XF40 PCGS.
From The Parfeld Collection. PCGS# 38364
- 8539** 1870 Doubled Die Obverse, FS-102 F-12 — Cleaned, Corroded — ANACS. VF30 Details.
From The Parfeld Collection. NGC ID# 22P4, PCGS# 3797
- 8540** 1870 Doubled Die Obverse, FS-101 Good 4 PCGS.
From The Parfeld Collection. PCGS# 38367
- 8541** 1872 Doubled Die Obverse — Cleaned, Corroded — ANACS. XF40 Details. NGC Census: (4/230). PCGS Population (9/313). Mintage: 6,036,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$71.
From The Parfeld Collection. NGC ID# 22P6, PCGS# 3799
- 8542** 1875 Doubled Die Obverse, FS-101 F-04 — Cleaned, Corroded — ANACS. Fine 12 Details.
From The Parfeld Collection. NGC ID# 22PA, PCGS# 3804
- 8543** 1875 Doubled Die Obverse, FS-103 F-03 — Corroded — ANACS. Fine 12 Details.
From The Parfeld Collection. NGC ID# 22PA, PCGS# 3804
- 8544** 1875 Doubled Die Obverse, FS-101 MS62 PCGS.
From The Parfeld Collection. PCGS# 38405
- 8545** 1876 Doubled Die Obverse, FS-102 F-05 — Cleaned, Damaged — ANACS. XF40 Details.
From The Parfeld Collection. NGC ID# 22PB, PCGS# 3805
- 8546** 1883 Repunched Date, FS-312 F-02 — Whizzed — ANACS. AU50 Details.
From The Parfeld Collection. NGC ID# 22PE, PCGS# 3813

BUFFALO NICKELS

- 8547** 1913 Type 2, Doubled Die Reverse, FS-1801 MS62 PCGS. PCGS Population (1/11).
From The Parfeld Collection. PCGS# 38430
- 8548** 1916 Two Feathers, FS-403 — Cleaned, Corroded — ANACS. VF20 Details.
From The Parfeld Collection. NGC ID# 22RA, PCGS# 3930
- 8549** 1916 No F Initial, FS-401 — Cleaned, Corroded — ANACS. AU50 Details.
From The Parfeld Collection. NGC ID# 22RA, PCGS# 3930

- 8550** 1918 Two Feathers, FS-401 — Corroded — ANACS. Fine 12 Details. PCGS Population (4/9).
From The Parfeld Collection. PCGS# 38445
- 8551** 1920 — Obverse Lamination — Good 6 ANACS. NGC Census: (0/804). PCGS Population (2/1285). Mintage: 63,093,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : \$2.
From The Parfeld Collection. NGC ID# 22RP, PCGS# 3944
- 8552** 1920-S Two Feathers, FS-401 AG3 PCGS.
From The Parfeld Collection. PCGS# 38450
- 8553** 1930 Doubled Die Obverse, FS-101 Fine 12 PCGS. PCGS Population (1/16).
From The Parfeld Collection. PCGS# 38459
- 8554** 1930 Doubled Die Obverse, FS-101 Fine 15 PCGS. PCGS Population (2/14).
From The Parfeld Collection. PCGS# 38459
- 8555** 1930 Doubled Die Reverse, FS-801 VG8 PCGS.
From The Parfeld Collection. PCGS# 38462
- 8556** 1930 Doubled Die Reverse, FS-801 VF30 PCGS.
From The Parfeld Collection. PCGS# 38462
- 8557** 1930-S Two Feathers, FS-401 — Scratched — ANACS. VG8 Details.
From The Parfeld Collection. PCGS# 38464
- 8558** 1935 Doubled Die Reverse Fine 15 PCGS. PCGS Population (39/127).
From The Parfeld Collection. PCGS# 93974
- 8559** 1935 Doubled Die Reverse, FS-801 VG8 PCGS. PCGS Population (2/56).
From The Parfeld Collection. PCGS# 38465
- 8560** 1935 Doubled Die Reverse, FS-801 Fine 15 PCGS. PCGS Population (5/43).
From The Parfeld Collection. PCGS# 38465
- 8561** 1936 Doubled Die Obverse, FS-101 XF40 PCGS.
From The Parfeld Collection. PCGS# 38469
- 8562** 1936-D/D Repunched Mintmark, FS-502 XF45 PCGS.
From The Parfeld Collection. PCGS# 38472

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Americana & Political, Arms & Armor, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, twenty-five percent (25%) on the first \$50,000 (minimum \$14), twenty percent (20%) of any amount between \$50,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$29	\$2	\$20,000 - \$29,999	\$2,000
\$30 - \$49	\$3	\$30,000 - \$49,999	\$2,500
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$299	\$20	\$200,000 - \$299,999	\$20,000
\$300 - \$499	\$25	\$300,000 - \$499,999	\$25,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$2,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$3,000 - \$4,999	\$250	>\$10,000,000	\$500,000
\$5,000 - \$9,999	\$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot considered by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions..
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and/or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administered by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foote, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. Feeling pressured to continually lower your list price?

Maybe it's time to move beyond the conventional real estate model to solve your selling dilemma.

Heritage Auctions is now the only top-tier auction house that holds luxury real estate auctions. We offer a powerful platform that reaches a client base of more than 750,000 members worldwide.

Benefits of selling at auction include:

- Your property is guaranteed to be sold within 60-90 days
- High carrying costs such as mortgage payments, insurance, taxes, utilities, HOA dues, membership fees and upkeep will stop
- Selling at auction creates a competitive bidding environment in which fully qualified and motivated buyers participate in a transparent, non-contingent sale

To learn how Heritage Auctions can help you realize the highest attainable selling price for your property listed at \$2.5 million or above, email LuxuryEstates@HA.com or call 855-261-0573.

U.S. COIN AUCTION
NOVEMBER 15-16, 2013 | NEW YORK | LIVE & ONLINE

We are proud to announce

Selections from The Eric P. Newman Collection Part II To be sold at auction November 2013 New York City

1800+ lots valued at
over \$15 million
Unreserved

Part II of the Eric P. Newman Collection consists of two cent pieces through silver dollars, early silver condition rarities pedigreed to the "Colonel" E.H.R. Green Collection, with an emphasis on quarters (including Browning plate coins in the Bust quarter series), half dollars and silver dollars.

Items being sold are from the extensive collection of Eric P. Newman Numismatic Education Society (a Missouri not-for-profit corporation) and have been assembled over a period of 90 years. Proceeds of the sale of all items will be used exclusively for supplementing the Society's museum operations and scholarly research efforts and for the benefit of other not-for-profit institutions selected by Eric P. Newman Numismatic Education Society for public purposes.

Annual Sales Exceed \$800 Million | 750,000+ Online Bidder-Members
